LSI overlay characterization technique for exposingintegrated circuit wafers 86−53718
LSI photolithography, photodefinable C films, image quality control 85−29264
LSI statistical process control in photolithography 87−60246
LSI submicrometer optical lithography using a double-layer resist by a single development technology 85−18393
lumped parameter model, book contrib. 88−57564
magnetic bubble devices, deep-UV contact lithography using trilevel resist system for submicron patterns 86−22035
magnetic heads, thin film, development and appl. 86−42129
magnetic thin film head technology for high density disc storage 85−35317
mask protection with PNO films 86−47438
mask registration errors using full-field mask aligners 87−11556
photolithography continued
mask repair using laser-induced pyrolytic decomposition 87−11557
MESFET, self-alignment struct., low-resistance submicrometre gates 85−6926
MESFET ring oscillators fabrication on Si substrates 87−46196
metal image formation by peel apart system, surface treatment influence *(Japanese)* 85−61860
metal liftoff process facilitated by the use of contrast enhanced photolithography 87−38405
metal patterning and etching methods, book contrib. 88−57513
metal resinate films, appls. in electron and optical lithography 88−33092
MIC, microstrip circuit design and layout *(French)* 88−63876
Micralign 1:1 projection printers; implementation of automatic fine alignment 85−45829
Micro Pattern Printer, economical prototyping optical direct write system for ICs 88−7541
microcircuit engineering, conf., Berlin, Germany (Sept. 1984) 86−70
microelectronics appls. of lasers *(Polish)* 88−57728
microelectronics technology, electron, ion, and photon beams, conf., Woodland Hills, CA, USA (May 1987) 88−37807
microlenses on end of single-mode optical fibres for laser appls., photolithographic fabrication 86−2663
Microlite 150PC photostabilizer system for photoresists 86−1930
microlithographic projection lens quality 88−19883
microlithographic stepper system, charactn. and setup techniques 87−11551
microlithography, conf., Boston, MA, USA (May 1986) 87−36294
microlithography, conf., Santa Clara, CA, USA (March 1987) 88−11
microlithography, conf., Santa Clara, CA, USA (March 1986) 87−10009
microlithography, polymer appls. 88−70057
microlithography, ring-field and full-field projection systems, performance comparison 88−1585
microlithography, statistical anal. 87−25034
microlithography for VLSI and beyond 86−2335
microlithography system, image struct. in focal plane 86−15011
mirrors, excimer laser phase conjugate, appl. 85−12946
mix and match lithographic system, moire alignment technique 88−39323
mix-and-match system at Signetics plant, development problems 86−21334
MM-wave imaging quasi-optical 85−8945
modelling advanced topics, model PROLITH 87−11904
MOM structure, thin-film edge-aligned junctions for small-area surfaces-tudies [MOM junctions] 85−55602
monocentric telescopes for microlithography 87−60235
monochromatic optical autofocus systems thin-film structs. 87−38044
MOS LSI 0.3 μm fabrication technology, step and repeat X-ray/photo hybrid lithography 86−41984
MOS LSI circuits, misalignment between gate and diffusion regions, meas. 86−2366
MOS structures with microstructured SiO_2 gate insulators, prep. and charactn. 87−24968
MOSFET, submicrometer channel length, microwave operation 85−23803
MOSFETs, p-channel, sub-0.5-μm, fabrication using X-ray/optical hybrid lithography and plasma etching 87−53520
MOSFETs, X-ray residual radiation damage 86−58356
multichip integration, optical interconnections technology 88−2147
multilayer and contrast-enhancement-layer resists, 0.5 μm, excimer laser deep-UV stepper 87−60540
multilayer circuit boards, embedded conductor struct. fabrication process 85−28813
multilayer circuit via hole formation, resist process for improved photo throughput 86−8653
multilevel photolithography, optical alignment pattern formation on zero-level Si wafers 85−35078
multimode optical waveguide components 88−13924
multiple aspheric systems for lithography of VLSI circuits 87−46629
multiple sheet resist. technology for thin film ccts. 86−53212
nanosecond single-pulse laser lithography 86−58362
negative deep UV resist for 248 nm lithography 88−57525
negative photoresist, high performance, for microlithography 86−2285
new focusing and dispersive planar component based on an optical phased array 88−39980
nonactinic wavelength microscope, target alignment accuracy 88−1587
NOR logic PMOS gate array, educational introductory microelectronic lab. project 87−58596
objectives for IC prep., centering tolerances calc. 88−19872
on-size phototool production requirements for PWB manufacture 88−32644
optical bandpass filter set for multispectral detector, design and manufacture 87−38890
optical considerations in target alignment using a non-actinic wavelength microscope 88−1485
optical emission spectroscopy appl. to semicond. processing 86−35532
optical image profile computation for lithography and linewidth meas. 87−25023
optical interconnections based on multichip integration 87−26234
optical lithography and dry etching, limitation as prod. tools 87−53654
optical microlithography, conf., Santa Clara, CA, USA (March 1985) 86−13265
optical overlay meas. system 88−4635
optical pattern generator, EM-559, industry test for mask fabrication 86−21305
optical projection lithography, proximity effect 85−29094
optical scanner with helical mirror 85−29287
optical single layer lift-off process 86−1946
optical single layer lift-off process 85−45492
optical stepper eval., position meas. using optical instruments 88−4640
optical stepper for lithography system *(Japanese)* 86−53504
optical waveguides, multimode GRIN strip, fabricated in glass by ion exchange 87−54041
Optimetrix wafer steppers optimisation in VLSI process 85−6989
organosilicon polymers, electron beam and UV sensitivities, O_2 plasma stabilities 88−26165
overlay accuracy and critical dimension meas. by correlating binarised Laplacian of Gaussian convolutions 88−33093
overlay accuracy for VLSI devices 86−2394
particulate films, photolithographic patterning 88−19553
pattern defect inspection in photolithography *(Japanese)* 86−52298
pattern inspection using machine vision 86−13523
pattern linewidth control for step and repeat projection imaging *(Korean)* 86−41647
patterning technologies status 88−7424
PC manufacture, photolithographic techniques *(French)* 88−12799

photolithography continued
PC manufacture using photolithographic processing, film stability and QC *(Italian)* 88−25675
PCB, selecting the proper imaging medium−film or glass 86−58159
PCB automated primary imaging, revolution 88−32576
PCB dry film photo-resist developing process, break point location 86−62934
PCB dry film photoresist imaging automation 85−55280
PCB fabrication, laser direct imaging, one-step automated process for pattern transfer 87−59993
PCB fine line imaging 87−53010
PCB fine line working conditions 87−60006
PCB fine-line imaging, conventional technology or laser direct imaging 87−6228
PCB liquid epoxy photopolymer 86−58161
PCB manufacture, improved phototool line quality 85−34316
PCB new high-resolution dry film photoresist 87−6236
PCB phototool automated video inspection system 88−32563
PCB phototool generation and tooling methods 88−32643
PCB solder mask choice 86−47187
PCB solder masks using photoimagable liquid 86−58127
PCBs, keeping phototools picture perfect 87−45408
Peltier-cooled laser diodes, monolithic fabrication using marking and wet chem. etching 85−41398
Perkin-Elmer Micralign projection aligners, high performance retrofit condenser 86−15001
Perkin-Elmer projection printers, models 140, 240, 340 and 341, illumination source 87−11559
Permalloy hybrid bubble memory device, ion implanted, fabrication process 88−71958
Permalloy propagation tracks, less than 4 μm period, using narrow-gap delineation technique 86−28713
phase conjunction phenomenon appls. *(Czech)* 87−75251
phase diffraction grating fabrication, photolithographic methods 85−18748
phase gratings as wafer stepper alignment marks for processing layers 86−14997
phase shift masks, optical imaging characts. 85−12075
phase-locked interferometry for automatic mask alignment in projection printers 87−67031
phosphor screen, multicolour, fabrication using diazonium salt 86−63005
photoablation of resist coated alignment targets to improve VLSI pattern overlay 88−13290
photochemical machining and photoetching, principles and practice, book 87−5129
photoetching of polymers with excimer lasers 88−13286
photomask and reticle materials review 86−53516
photomask inspection instrument, DKG-160, automatic misalignment compensation system 86−24305
photomask pellicle support ring design 85−1185
photomask protection using glass coverplates 88−1596
photomask reduction camera, 10:1, components and operating conditions 87−11571
photomask repair, focused ion-beam etching technology progress report 88−57540
photomask repair by C opaque film growth by focused ion beam induced deposition 88−57542
photomask repair using focused ion beam technology results 88−57541
photopolymer compositions, camera-speed, appls. to lithographic plates and films 87−73855
photopolymers, principles, processes and materials, conf., Ellenville, NY, USA (Oct. 1985) 87−16241
photoresist processing systems: the next generation 86−21699
photoresists and electron resists, characts. *(Japanese)* 85−35094
photosensitive heat resistant coating materials for IC production 85−12333
photosensitive polyimides processing for MLC package for VLSI chip 88−26109
photosensitive thick-film conductor comp. for 2-mil lines 87−53073
physical and technological limits 88−26117
piezoelectric resonators, chemical etching, density meters and viscometers fabrication 87−74477
planar focusing lens for reflection-mode acoustic microscope 87−71415
planar Josephson junction, tunnel area definition 86−2622
planar waveguide technology solves optical coupling problem 88−45204
planarization profile measurement using a confocal scanning laser microscope 87−11558
plasma etching reactor, wafer temp. meas. and control 88−1549
plasma sources for deep-UV lithography, book contrib. 86−8956
PMMA bilayer resist in hybrid deep UV/electron beam fabrication process for 30 nm scale devices 87−67068
polyamic acid esters for polyimide patterns using photoreactive precursors 87−53340
polychromatic wafer stepper systems, exposure matching 88−1590
polymer:I resists using O plasma resist. of I cpds., ESCA, two-layer photolithography microfabrication system 85−55715
polymer ablation with excimer lasers 88−58749
polymer strip waveguides, charactn. by leaky-mode spectroscopy 88−7911
polysilane, self-developing deep UV resists, photochemistry, photophysics and submicron lithography 86−1901
polysiloxane, dry etching characts., multilayer resist processes appl. 87−11647
polyvinylidene fluoride pyroelectric focal plane array , technology and props. 88−74476
portable conformal mask resist process with RIE development for etching Al 87−11912
portable conforming masking excimer laser lithography using water-soluble contrast enhanced material 88−39291
positive photoresist optical density, optimisation, for high resolution lithography on reflective surfaces 86−1906
positive-resist processing for step-and-repeat optical lithography 87−25455
precision stepper column optimisation, elec. methods 87−11550
printhead structure 85−11802
process latitude model for microlithography 88−39313
process modeling for photoresist development and design of DLR/sd (double-layer resist by a single development) process 87−60222
process optimisation, exptl. design 88−19877
processing parameters impact on semicond. prod. 88−19885
production linewidth data, hierarchical anal. and statistical process control 88−19880
production-ready phototools for PCB CAD 88−32642
production-ready phototools for PCB fabrication 88−12841

photolithography continued
projection, holographic mask illuminator for coupling excimer laser 85−18406
projection lens for submicron lithography, consequences for wafer stepper design 87−11543
projection lenses for optical steppers 87−11541
projection lithography, contact hole imaging characts. 87−66776
projection printers and optical steppers, current status and future pot. 87−38043
projection printing, coherence of defect interactions with features in optical imaging 87−38045
projection printing, lens aberrations, identification and monitoring 88−1593
projection printing, two-dimensional optical proximity effects 87−11564
PROLITH, optical lithography model 86−15009
pulsed UV laser use 86−47444
PWB, photolithographic requirements rel. to need for very high interconnection densities 86−58118
PWB direct imaging systems 88−32645
PWB manufacture, photolithography alignment-limited yield using sensitivity anal. model 88−44451
PWB phototool prep. 88−32615
quartz crystal micromechanical devices, fabrication, props. and appls. 86−55657
quartz miniature ZT-cut resonator 86−42043
reduction lenses for submicron lithography 85−7029
reduction photolithography by ablation at wavelength193 nm using excimer laser 86−36625
reduction projection printing method, sensitizer conc. effect on pattern profile. *(Japanese)* 87−32362
reduction stepper lenses, atm. press. induced reduction errors 86−15003
registration, optical meas. techniques 86−18123
resist image critical dimension control using vapour jet developer nozzle 85−12072
resist materials, new develop. 88−7407
resist materials for photolithography 87−6509
resist technology, conf., Santa Clara, CA, USA (Mar. 1986) 87−10007
resolution enhancement methods 87−32382
resolution improvement methods 87−11544
reticle writer using scanned laser beams from Ateq Corporation 86−15217
reticle-to-wafer alignment system, automatic two-points, using projection column servo 87−11545
review of optical lithography, book contrib. 88−57563
robust process develop., SAMPLE/Monte Carlo methodology 88−19875
SAW filter with centre frequency of 960 MHz 86−28584
SAW microwave devices, optical photolithography fabrication 88−50384
scale dividing, optical problems *(German)* 87−17561
scanning laser technology applied to high speed reticle writing 88−7540
Schottky diode with submicron anode contacts fabrication 87−18080
screens and screening in photography for graphic arts 85−5596
second-order gratings for 1.55 μm DFB lasers, fabrication using deep UV lithography 88−20637
semiconductor device production yields 87−17859
semiconductor industry, pattern delineation technology, overview 86−28409
semiconductor manufacturing, photolithography, CVD, etching, ion implantation and metallization 88−71376
semiconductor manufacturing equipment for bigger wafer diameters 85−7023
semiconductor processing line, mixing 1X scanning and 5X step-and-repeat exposure systems 86−14999
semiconductor wafer fabrication by photolithography, capacity planning 87−60260
semiconductor wafer patternable epoxy developer 86−28081
semiconductor wafer realtime characterisation technique for photolithographic processing 85−35080
separation distance meas. in contact and proximity lithography 87−32369
silicon-added bilayer resist process for high-resolution optical lithography 88−7533
simulation of microlithographic resist processing usingthe SAMPLE program 86−21697
single pulse lithography using electric-discharge source intense radiation 86−63155
sloped contact holes generation using cantilever resist structure 87−11905
spin-coating cycle employing two spin speeds for improved alignment accuracy 88−71484
spun-on contour coating characterizations for advanced optical lithography 87−17874
statistical anal. of linewidth control rel. to contrast 86−35494
statistical process control 88−19876
step and repeat photolithographic system, method for overlay characts. and stability study 85−29098
step-and-repeat alignment systems and wafer scanners, mixing and matching 87−11552
step-and-repeat camera lenses, optical performance meas. 85−29072
step-and-repeat lithographic systems for mask making, overlay anal. 85−29071
step-and-repeat projection printers, pellicle defects effect on fine line images 85−6783
step-and-repeat system for VLSI prod. line 86−9222
step-and-repeat X-ray/photo hybrid lithography for 0.3 μm MOS devices 87−45732
stepper field registration impact on manufacturing 86−63385
stepper overlay calibration using alignment to a latentimage 86−15004
straight edge detection in general partially coherent cases 87−11562
sub-micron stepper characterisation, stepper test alignment resolution reticle 87−11572
subhalf-μm optical lithography, limitations and future prospects 88−26116
submicrometer patterning by projected excimer-laser-beam induced chemistry 85−29074
submicrometre, resist. technology, advances 87−60237
submicrometre patterning potential of optical lithography 87−60542
submicron, advances in digital alignment strategies for step-and-repeat opticalimaging 86−21676
submicron, contrast enhancement material CEM-428 for imaging over refl. substrate 87−11890
submicron, critical dimension control issues 88−19882
submicron, depth of focus requirements 88−1578
submicron, DESIRE process mechanism 88−19886
submicron, double diffraction alignment method using checker grating 88−7534
submicron, image resolution and depth of focus considerations 88−1581

photolithography continued
submicron, impact of wafer flatness 88−1597
submicron, proximity effects 88−1579
submicron, Zeiss 10-78-46 lens: a breakthrough in opticaltechnology 85−62043
submicron 1:1 optical lithography, optical systems 86−63384
submicron CMOS technology 88−39681
submicron contacts, technology and modelling 88−7525
submicron contacts, technology and modelling 87−67162
submicron critical dimensions optical control, image modelling and line profile meas. 88−18518
submicron defect detection, backscatt. electron and optical images 85−29089
submicron device fabrication, 193 nm contact printing technique using excimerlasers 86−1945
submicron G- and I-line lithography, process latitude modelling 86−15010
submicron I-line wafer stepper 87−38424
submicron i-line wafer stepper with variable coherency andnumerical aperture 86−41667
submicron lithography, intelligent optical steppers 88−1582
submicron lithography, performance of a wafer stepper with automatic intradie registration correction 88−1586
submicron lithography, spin-on dry etch arc process 88−26121
submicron lithography charactn. using expert system 88−19879
submicron lithography technologies, eval. 88−57554
submicron lithography using contrast enhancement 85−34753
submicron lithography using excimer lasers 85−23927
submicron LSI design rules, optical stepper 87−11915
submicron MOS device fabrication using photoresist-ashing technique 88−39712
submicron MOS devices, mix and match lithography 86−21321
submicron MOS process, Mo gate, using optical projection lithography 87−25579
submicron optical contrast enhanced lithography usingwater-soluble materials 86−41665
submicron optical lithographic masks, variable proximity corrections 88−7535
submicron optical lithography: enhanced resolution and depth of focus using advanced processing materials and process optimization 87−11889
submicron optical lithography: I-line wafer stepper and photoresist technology 85−35103
submicron optical lithography, contrast enhancement techniques 88−7409
submicron optical lithography, I-line lens and photoresist technology 85−6779
submicron optical lithography, lens design 86−1948
submicron optical lithography, multilayer resist schemes 88−1504
submicron optical lithography, photoresist design, polyphotolysis appl. 88−1497
submicron optical lithography using an i-line waferstepper 86−14996
submicron optical lithography with high resolution i-line lens 88−19884
submicron optical photolithography, photoresist schemes 88−1503
submicron pattern profile and simulation technique 87−6515
submicron patterning limits, computer simulation 86−8945
submicron patterns, 3D meas. 87−67051
submicron photochemical image enhancement 87−11892
submicron photolithography, defocus effects 87−38384
submicron photolithography, sloping wall etching, planarisation and spacer production techniques 85−6780
submicron photolithography technique using i-line stepper and trilevel photoresist, megabit VLSI appl. 86−41666
submicron production lithography, impact of 1X reticle defects 87−11553
submicron resist structs., in situ image meas. during lithographic exposure 85−55625
submicron step-and repeat lithography, defocus tolerance improvement 88−1583
submicron structure delineation method using optical projection lithography 85−40579
submicron superconducting microbridges of variable thickness, fabrication with pile-up masking technique *(Chinese)* 88−20271
super-self-aligned process for very high speed bipolar LSI technology *(Japanese)* 87−60623
superconducting-semimetal-superconducting layered transistor, fabrication process 85−7177
surface mounted hybrids on preclad laminates 85−34410
test structures, Murray daggers and contact arrays 87−11566
thick film circuits on alumina substrates, reverse photolithographic technique 85−34382
thin film electroluminescent edge emitter array for optical image bar appls. 87−2037
thin film inductive magnetic heads *(Polish)* 85−1839
thin film patterning techniques for hybrid circuits 87−6298
thin film technology for prototypes and small scale production 86−20983
thin-film lenses for integrated optics, fabrication by photolithography and diffusion processes 88−7965
thin-film MICs fabrication from substrate cleaning to pattern delineation 85−6621
three-dimensional photoresist imaging process simulator for standing-wave effect environment 87−60223
transit time devices, grid structure form. for end point detection during substrate thinning 85−50423
TRIPS-1, 3D photoresist image simulator 86−2258
two layer resist systems for hybrid e-beam/deep-UVlithography 85−50353
two-dimensional simulation of photolithography on reflective stepped substrate 87−60224
two-layer planarisation process 86−41644
two-level photoresists for RIE pattern transfer 86−2295
ULSI lithography, resolving power aspects *(Japanese)* 88−33088
UV, 0.13 μm lines and spaces by excimer laser projection lithography on diamond-like C resist 87−38392
UV, XeCl, excimer laser exposed positive photoresist development, percolation model 87−38393
UV high-resolution photolithography using built-on mask 86−21674
UV microlithography using excimer laser *(Japanese)* 88−39286
UV photodefinable polyimides, charactn. and processing of photosensitive polyimide systems 88−64472
UV photolithography water soluble photopolymer for submicron fine patterns *(Japanese)* 88−1489
UV stepper lens options for VLSI 88−57552
UV submicron lithographic performance of I-line optics 88−57571
vacuum fluorescent displays for automotive applications 85−16337

AlGaInP, organometallic UPE, high electron mobility 86−52493
AlGaInP, organometallic VPE growth, band edge photoluminesc. 85−28220
$(Al_xGa_{1-x})_yIn_{1-y}P$, MOCVD grown for visible light lasers 85−10715
$Al_{0.48}In_{0.52}As$, epitaxial, photoluminescent linewidth 85−24389
$Al_{1-x}In_xAs$, MOCVD grown epitaxial layers, characterisation 85−10706
$Al_{1-x}In_xAs$:Si(Mg) films metal organic VPE growth and doping, appl. for optoelectronic devices 88−64255
$Al_{0.48}In_{0.52}As\text{-}Ga_{0.47}In_{0.53}As$ SQW, electron temp. depend. on well width, photolum. obs. 87−6425
Al_2O_3 colour centre lasing in near IR at 300K 85−41369

photoluminescence continued
Al_2O_3, colour centres, lasing at ≈1 μm, spectral peak obs. 86−58910
α-Al_2O_3:Ti^{3+} cryst., laser props. and spectral luminescence 86−54114
Al_2O_3:Ti^{3+} crysts., tunable laser, absorpt. and luminesc. studies 85−35729
Al_2O_3:Ti^{3+}, spectral and lasing characteristics 86−54115
Al_2O_3-SiO_2:Cr III glass ceramics, tunable laser and solar concentrator appls. 85−56597
As_2Se_3 single cryst., luminesc., study, elec. field quenching 86−36321
BP, crystal growth by high press. flux method, elec. props., photoluminesc. 85−39712
BaFBr:Eu^{2+} evaporated thin films, photostimulated luminesc. 88−40060
$BaSO_4$:Eu^{2+} TLD phosphors, photoluminesc. 86−22231
$BeAl_2O_4$:Ti^{3+}, lasing and optical props. 87−54276
$Bi_{2S}GaO_{40}$ heteroepitaxial single-cryst. films, photocond., photolum. and absorpt. coeff. studies 86−27968
$Bi_{12}TiO_{20}$ heteroepitaxial single-cryst. films, photocond., photolum. and absorpt. coeff. studies 86−27968
a-C:H, diamond-like thin films, elec. optical, structural and mech. props. 86−27952
CaF_2:Tm detectors, radiation induced thermoluminescence 87−38914
$Ca(PO_3)_2$:Tb^{3+}, radiative lifetime, green fluoresc. laser meas. 85−18834
CaS:Bi^{3+}, O phosphor, O-related luminescence centres 88−58351
$CaSO_4$:Eu^{2+} TLD phosphors, photoluminesc. 86−22231
Cd (Se,Te), synthesis, characterisation and photoelectrochem. cells 86−26807
(Cd,Hg)Te of all comps., THM growth, alloy disorder, photolum. and electronic Raman scatt. meas. 86−7734
(Cd, Mn)Te photoluminescence obs., using fibre optics for low-temp. spectroscopy 85−50966
Cd chalcogenides, cryst. growth by SSSR-zone melting method, photolum. 87−31487
$CdGaInS_4$ layered crysts., optical absorpt., photolum. and photocond. props. study 86−27966
CdHgTe, IR negative luminesc. 85−35612
$Cd_{0.7}Hg_{0.3}Te$, ion implantation, furnace annealing and RTA, damage study and phys. props. 88−33004
$Cd_xHg_{1-x}Te$, growth word charactn. for optical communications 88−56249
$Cd_xHg_{1-x}Te$ layers, LPE, surface morphology, optical and elec. parameters 86−7785
$Cd_{1-x}Mn_xS$, crystal growth and charact. *(Japanese)* 87−235
CdMnTe, synthesis by implantation of Mn into CdTe 87−45769
$Cd_{1-x}Mn_xTe$ diluted magnetic semiconductor superlattices, props. 86−8842
$Cd_{1-x}Mn_xTe$ heteroepitaxial growth by metalorganic CVD on GaAs 88−24750
$Cd_{1-x}Mn_xTe$ superlattices, MBE growth 85−44706
CdMnTe:In(Sb)-CdTe, doped films and superlattices, photoassisted MBE grown, elec. struct. and optical props. 88−31779
$Cd_{1-x}Mn_xTe$:P,As, elec. and optical props. studies 87−66904
$Cd_{1-x}Mn_xTe$/CdTe superlattices, MBE growth, characterisation 85−44705
$Cd_{0.55}Mn_{0.45}Te$-CdTe multiple quantum well struct., photoluminesc. in mag. field 85−35608
$Cd_{1-x}Mn_xTe$-CdTe multiple quantum wells, time-resolved exciton recomb. study 85−55516
$Cd_{1-x}Mn_xTe$-CdTe quantum well structs. and superlattices, MBE growth 86−13773
$Cd_{1-x}Mn(Zn)_xTe_{1-y}Se_y$ cryst. growth and characterisation 86−52422
CdS crystal growth and charact. *(Japanese)* 87−235
CdS crystal growth, influence of excess S_2 pressure on electron-beam-excited laser charact. 86−9811
CdS, distribution of defects formed by laser radiation 85−56405
CdS electron-hole dynamics picosec. luminesc. studies 87−45604
CdS, film, charge transport, rel. to electrophysical props. 87−6378
CdS film, hot-wall epitaxy and photolum. 85−28224
CdS films, hot-wall epitaxial growth, photoluminesc. *(Korean)* 88−6467
CdS screen printed fibres, photoresponse, effect of added Cl_2 85−29702
CdS screen printed thick films, physical props. and flux effects 85−61690
CdS single cryst., surface layers, photocurrent and photoexcitation inter-impurity transfer 85−61680
CdS single crysts., nonequilib. high-temp. vacuum annealing effects, intrinsic defect transform. 87−32238
CdS:Fe, pulsed photo-EMF relax. kinetics, luminesc. spectra, recomb. mechanisms 85−62432
CdS_xSe_{1-x}, stoichiometry control in vapour growth, photoelec. props. 85−39717
CdS_xSe_{1-x}, with controlled deviation from stoichiometry, photoelectrical props. 85−34486
CdSe, photolum., effect of photoetching 85−55730
CdSe photolum., evidence for selective etching of donor states 87−66908
CdSe surfaces, impurity conc. control by photoelectrochem. etching 88−33040
CdSe/polysulphide liquid-junction solar cells, open-circuit, photoinduced aging 86−7002
CdTe : $B^+(Cu^+)$ ion implantation damage, rapid thermal annealing, photolum. anal. 87−25076
CdTe (100) films, MBE growth on GaAs (100), charact. 85−381
CdTe (111)-GaAs (001) heterostructures, low defect density, MBE growth 85−60954
CdTe, MBE and MOCVD growth on (100) and (111) GaAs/Si substrates 88−56287
CdTe, MBE growth on GaAs substrates, struct. and optical props. 87−31540
CdTe, MBE growth on Si using (Ca, Ba)F_2 buffer layer 87−23621
CdTe MOVPE growth on InSb substrate, charcts. 87−10423
CdTe, OMVPE growth on InSb substrates 87−16583
CdTe, OMVPE growth on InSb substrates, elec. and optical props. 86−57444
CdTe, P^+ implanted, impurity profile, laser and furnace annealing comparison 86−8985
CdTe, cryst. melt growth and characterisation 88−31714
CdTe crystals grown by travelling heater method using Cd as solvent, props. 86−7732
CdTe epilayer growth on GaAs by hot-wall epitaxy 86−52442
CdTe epilayers on GaAs grown by hot-wall epitaxy, charactn. 88−6486
CdTe epitaxial films on GaAs, etch pit formation−photolum correls. 88−44655
CdTe epitaxial layers, MBE growth on GaAs substrates, photoluminesc. 87−23619
CdTe epitaxial layers, MOCVD grown on GaAs, photoluminesc. 85−51033
CdTe epitaxial layers, MOCVD growth and charact. 85−60957

photoluminescence continued
CdTe epitaxial layers, low press. MOCVD growth on Si, photoluminesc. props. 86−34308
CdTe, epitaxial layers on GaAs, selective etching and photolum. 87−67093
CdTe films, (111) and (100), growth in GaAs (100), hot wall epitaxy, X-ray diffr. and photolum. 88−31785
CdTe films, MBE, exciton photolum., twinning, X-ray diffr. 85−54458
CdTe films, MOCVD growth on off-oriented (100) Si substrates 88−12017
CdTe films, hot-wall-close space vapor transport growth and photoluminesc. props. 85−10772
CdTe grown on Si by LPMOCVD, physical props., photolum., exciton related emission peak 87−10422
CdTe, ion implanted, rapid thermal annealing, photoluminesc. spectrum 87−60096
CdTe, ion implanted with $Cu^+(Kr^+)$, flash annealing 85−34759
CdTe laser-annealed epilayers, defects, Hall effect, photolum. and DLTS meas. 86−8776
CdTe layers on InSb, organometallic VPE growth and characterisation 86−13777
CdTe, low temp. LPE from Hg solvent, photolum., X-ray diffr. 87−58936
CdTe microcrystalline films, thermally annealed photolum. and particle size microcrystalline 88−31839
CdTe, organometallic VPE growth on InSb 85−369
CdTe, organometallic VPE on GaAs 86−7756
CdTe screen printed films, prep. and props. 86−62963
CdTe single cryst. growth and photoluminescence 88−31721
CdTe, substrate, growth and characterisation, modified horizontal Bridgman technique 87−65480
CdTe:Al on GaAs, MBE growth and Al doping, struct. optical and elec. props. 87−36733
CdTe:As layers, growth by organometallic VPE 87−44369
CdTe:Cl, pure and doped, photoconductivity, fundamental absorpt. edge 86−68374
CdTe:In, photocorrosion, vacancies, photoluminescence spectra 87−10510
CdTe:N, N acceptor energy spectrum and H interaction, photolum. spectra 86−8775
CdTe:Sb, photoassisted MBE growth, low temp. hole mobility and excitonic photolum. 88−49827
CdTe:Sb(In), doped films and superlattices, photoassisted MBE grown, elec. struct. and optical props. 88−31779
CdTe:Zn, growth by gradient freeze method solid-liquid interface shape 87−65481
CdTe/(Cd,Mn)Te superlattice, optical props. heterointerface effects 87−1252
$CdTe/Cd_{1-x}Mn_xTe/Cd_{1-y}Mn_yTe$ double quantum well energy levels, mag. field depend. 86−67736
CdTe/metal interfaces, pulsed laser annealed, electronic and chemical struct. 88−44586
CdTe-CdMnTe superlattices, photoluminesc. props. 87−7208
CdTe-InSb heterostructures, OMVPE growth and elec. props. 86−28012
CdTe-ZnTe superlattices, OMVPE growth 88−31761
CdZnS-$CuInSe_2$, solar cells, minority carrier diffusion, recomb., C-V, photocond., spectral response, photoluminescence meas. 86−7000
CdZnTe, MBE growth on GaAs substrates, struct. and optical props. 87−31540
$Cd_{1-x}Zn_xTe$, MBE, MBE, characterisation by TEM, C-V characteristics, photoluminescence 88−432
$Cd_{1-x}Zn_xTe$ MBE layers on GaAs, optoelectronic props. 86−15561
CeTe, growth on GaAs substrates, hot wall epitaxy 88−31784
CeTe:In(Sb), doped films, growth by photoassisted MBE, struct. and elec. props. 88−64247
Cu/nS_2 films, LPE growth 87−23666
$Cu_xAg_{1-x}In_yGa_{1-y}Se_2$ crysts., optical and elec. props. study 87−61031
$Cu_{1-x}Ag_xIn_5S_8$ solid soln., struct., elec. and optical props., comp. depend. study 87−60126
$Cu_xAg_{1-x}InS(Se)$, solar cells grown by liquid-encapsulated Bridgeman/Stockbarger method, struct. and photoelectric props. 88−37591
$CuGaIn_{1-x}Se_2$ single crystals, props. for photovoltaic appls. 87−68256
$CuGa_xIn_{1-x}Se_2$ single crystals for solar cells, bulk growth conditions, props. 88−37573
$CuGaS_2$, semicond., LPE growth and luminescence characterisation 85−16945
$CuInS_2$, heterogeneous, VLS growth, electronic defects, photocurrent spectra, photolum., EBIC analysis 87−11382
$CuInS_2$ large single crystals, growth by travelling heater method, photoluminesc. spectra 85−39711
$CuInS_{2y}Se_{2-2y}$ single crystals, props. for photovoltaic appls. 87−68256
$CuInSe_2$ crystals, evidence for Se vacancies, photoluminesc., AES and electron probe anal. 85−55509
$CuInSe_2$ for photovoltaic appl., photolum. spectra 86−1762
$CuInSe_2$, growth and characterisation for solar cell use, overview 88−33875
$CuInSe_2$, polycrystalline, solar cells, photoluminescence 88−5874
$CuInSe_2$ polycrystalline thin film solar cells, donor-acceptor pair luminescence 87−9856
$CuInSe_2$-CdS solar cells, annealing temp. effects 86−66342
$CuInSe_{2y}Se_{2-2y}$ single crystals for solar cells, bulk growth conditions, props. 88−37573
Cu_2S-$Zn_xCd_{1-x}S$ solar cell perform., influence of Zn conc. in $Zn_xCd_{1-x}S$ layer 86−13048
(Ga,Al)As-GaAs multilayer structures, growth by MOVPE 85−39765
$Ga_x In_{1-x} As$, VPE growth, X-ray diffr. and luminescence characterisation 85−39805
Ga-As-In-As superalloy, atomic layer epitaxy 88−11972
p-GaAS, grown by organometallic VPE, characterisation 86−52499
GaAlAs MOCVD growth, effects of O_2 and H_2O introduction 85−10692
GaAlAs quantum well struct., photoluminesc., subband state transitions, elec. field effect 86−9668
$Ga_{1-x}Al_xAs$ solar cells, molecular beam epitaxy grown, recombination parameters 88−37506
$Ga_{1-x}Al_xAs$:Mg, metalorganic VPE growth 86−34321
$Ga_{0.6}Al_{0.4}As$-GaAs single quantum wells, LPE growth, photoluminescence spectra 86−36316
$Ga_{0.65}Al_{0.35}As$-GaAs quantum wells, elect. field-induced decrease of exciton lifetimes 87−24871
$Ga_{1-x}Al_xAs$-GaAs monolithic cascade solar cells, GaAlAs cell perform. limitations near cross over region 88−18079
$Ga_{1-x}Al_xAs$-GaAs quantum well structures, disordering by S diffusion, photoluminesc. study 85−40482

photoluminescence continued
$Ga_{1-x}Al_xAs$—GaAs superlattice, exciton CW-photoluminesc., excitation intensity depend. 87—32313
GaAlInAs, VPE growth, struct. and optical props. 88—63293
GaAs (100), Fermi level unpinning using photochemistry 86—35569

GaInAs/InP interfaces, OMVPE grown, atomic steps 88−31726
GaInAs/InP quantum wells, OMVPE grown 86−7761
$Ga_{0.47}In_{0.53}As/Al_{0.48}In_{0.52}As$ quantum well, photolum. well depth determ. 86−1787
$Ga_{0.47}In_{0.53}As/Al_{0.48}In_{0.52}As$ quantum well heterostruct., photoluminesc. excitation spectroscopy study 86−8855
$Ga_{0.47}In_{0.53}As/Al_{0.48}In_{0.52}As$ multiquantum well struct., excitonic recomb., photolum. studies 86−35416
$Ga_xIn_{1-x}As/GaAs$ heterostructures, low press. MOVPE, photolum., Auger profiling 87−11404
$Ga_xIn_{1-x}As/InP$ junction, confined electron-hole plasma, photolum. study 85−61734
GaInAs-AlInAs single quantum wells, MBE growth, photoluminesc. charactn. 87−58922
GaInAs-InP, energy relaxation, recombination of hot carriers 88−19708
GaInAs-InP measurement, time-resolved photoluminescence system with subnanosecond resolution at wavelengths up to 1.65 μm 88−57300
GaInAs-InP multiquantum well structures, MOVPE growth with adducts 86−46309
GaInAs-InP multiquantum well structures for lasers, LP-MOVPE, photoluminesc. 88−56268
GaInAs-InP, quantum well structures, adduct MOVPE, photolum., magnetoresist charactn. 87−11403
GaInAs-InP quantum wells and heterostruct. devices, growth by chemical beam epitaxy 87−44320
$Ga_{0.47}In_{0.53}As$-$Al_{0.48}In_{0.52}As$ quantum wells, MBE growth and optical props. 86−430
$Ga_{0.47}In_{0.53}As$-$Al_{0.48}In_{0.52}As$ 86−454
$Ga_{0.47}In_{0.53}As$-InP heterostructures, MOCVD grown, characterisation 86−8869
$Ga_{0.47}In_{0.53}As$-InP, layered structures grown by LP-MOCVD, structural optical and electrical props. 88−57355
$Ga_{0.47}In_{0.53}As$-InP quantum wells and superlattices, CBE growth, TEM, IR absorpt., photocond. and photolum. charactn. 87−65529
$Ga_{0.47}In_{0.53}As$-InP quantum wells, nonparabolic band struct. 85−34557
$Ga_{0.5}In_{0.5}As$-GaP heterostructs., monolayer epitaxy by MOCVD 88−24749
$Ga_{1-x}In_xAs$-InP heterostructures, MOVPE growth and characterisation 86−46330
$Ga_xIn_{1-x}As$-GaAs strained-layer superlattices, MOVPE growth, struct. and optical props. 88−32837
$Ga_xIn_{1-x}As_yP_{1-y}$ FIR photocond. and photoluminesc. studies 86−22225
$Ga_xIn_{1-x}As_yP_{1-y}$, chemical beam epitaxial growth 88−394
$Ga_xIn_{1-x}As_yP_{1-y}$:Mn, LPE layers, photolum, and elec. meas. 85−1319
GaInAsP/InP crystal growth by organometallic VPE for integrated optics, photolum. intensities 85−401
GaInAsP/InP heterostructures on Si substrates, CVD growth, struct. and photolum. 88−24751
GaInAs(P)/InP quantum well structs., MBE grown, optical props. 86−2937
GaInAs(P)/InP quantum well structures, gas-source MBE grown, optical props. 86−54033
GaInAs(P)/InP quantum wells, gas source MBE grown, optical props. 86−68389
GaInAsP-InP BH laser fabrication, MOCVD epitaxy, validation by photoluminescence imaging 87−18992
GaInAs(P)-InP, MOCVD growth, characterisation and applications *(Polish)* 87−73149
GaInAsP-InP, channeled substrate buried heterostruct. wafer, lasing wavelength, characterisation using photolumin. 88−45424
GaInAsP-InP, double heterostructure, characterisation by IR spectroscopy, SEM modes, photoluminescence 88−8182
$Ga_xIn_{1-x}As_yP_{1-y}$-InP DH lasers, low press. MOCVD growth, laser props. 86−15726
$Ga_xIn_{1-x}As_yP_{1-y}$-InP quantum wells, MBE growth, charactn. and optical studies 88−31804
GaInAsSb, organometallic UPE, high electron mobility 86−52493
$Ga_{1-x}In_xAs_ySb_{1-y}$ LPE layers lattice-matched to GaSb (100), photoluminesc., 1.71 to 2.33 μm 86−13755
GaInP, high purity, chloride VPE growth 86−40724
GaInP, organometallic VPE growth on {100} GaAs using adduct cpds. 85−49554
$Ga_xIn_{1-x}P$, LPE growth on GaAs substrates, cathodoluminesc. and photoluminesc. spectra *(Chinese)* 85−372
$Ga_xIn_{1-x}P$, OMVPE growth and characterisation 87−250
$Ga_xIn_{1-x}P$ epitaxial layers, OMVPE, surface morphology, photolum. 87−10436
$Ga_xIn_{1-x}P$, high-purity, chloride VPE grown, near-band-edge photoluminesc. 86−68390
$Ga_xIn_{1-x}P$ layers, MOVPE, photolum., comp. and growth temp. depend. 87−16595
$Ga_{0.5}In_{0.5}P$:Zn(Te)(Si), OMVPE growth, doping studies 86−28140
$Ga_{0.5}In_{0.5}P$/GaAs interfaces, OMVPE growth 88−31755
GaInP-AlGaInP-GaAs heterostructures, MOVPE, Hall effect, photolum. 87−16593
GaN MOVPE using $Ga(CH_3)_3$ and NH_3, H_2 effects in N_2 ambient 85−10693
GaN film, organometallic VPE growth, characterisation 86−40732
GaN films, high quality, MOVPE growth using AlN buffer layer 86−34304
GaN single-crystal films, MOVPE growth, luminescent props. 87−58928
GaN:Zn films, MOVPE, electron cyclotron resonance plasma excitation, low temp. growth, photolum. 87−10411
GaN:Zn, pure and doped, electrophysical props., nonhomogeneous semicond. model 87−12299
GaN:Zn(Cd), time-resolved photoluminesc. study 87−12310
GaP LEDs, high-speed IR-to-visible up-conversion by free-to-bound transitions 86−15586
GaP LPE layers, dark region associated with macrostep riser 85−39723
GaP, MBE growth on Si (211), cryst. quality, photolum. meas. 85−39743
GaP, MBE growth on Si, Zn-O complexes formation 86−57448
GaP, MOVPE grown on Si, elec. and optical props. 85−11932
GaP diode wafers, photoconductive IR excitation spectrum and IR imaging system appl. 88−26938

ZnTe epilayers, chemical transport growth, photoluminesc. props. 87−16610
ZnTe layers, VPE grown on GaAs, photoluminescence, elec. props. 85−2134
ZnTe/CdTe strained-layer superlattices, lattice const. band gap, photolum. studies 86−53377
ZnTe-ZnSe(S) superlattices, hot wall epitaxial growth and photoluminesc. props. 87−5421
ZnX (X=S, Se), metalorganic MBE growth 88−417

photolysis
alkyliodide, pyrolysis, laser action, reaction rate consts. 85−51088
ammonium tetrachloroaurate, UV-light induced photolysis for Au film deposition 88−24742
amorphous superlattice structs. fabrication using ArF excimer laser photolysis 88−50644
azide-phenolic resin composite film, thermolysis, photolysis and appl. as antirefl. layer in resist 87−53327
baseline compensation circuit for measurement oftransient signals 86−31333
CVD, laser-induced growth of microstructures 87−23735
CVD under laser irradiation, thin films for microelectronic appl. *(French)* 86−13818
diethyltelluride, photosensitisation stimulant for HgTe low temp. MOVPE 85−10695
dimethylditelluride, excimer laser photolysis, laser mass spectroscopy 87−10409
dye activated polymer laser media, nonlinear photochem. in high intensity light fluxes 86−9779
gelatin, volume hologram recording, bis azido cpd. photocross-linking *(Russian)* 86−36609
hexamethyl indium phosphide, photodecomposition, deposition of InP and In_2O_3 by CVD, excimer laser enhancement and probing 85−10765
laser flash photolysis system with vidicon digitizer and computer data analysis 88−58747
laser generated microstruct., etching and deposition processes, surface chem., review 85−56894
laser microchemistry etching and deposition 88−13152
laser-induced deposition of thin films study 87−36781
laser-induced surface chemistry, microelectronics and heterogeneous catalysis appls. 85−12355
lasers in microlithography, conf., Santa Clara, CA, USA (Mar. 1987) 88−11568
methylacrylate with methacrylic acid copolymers, sensitivity to short-wavelength UV radiation 85−50356
MOVPE, conf., Universal City, CA, USA (Apr. 1986) 87−9988
photo-CVD for VLSI isolation 85−12393
photoablation of resist coated alignment targets to improve VLSI pattern overlay 88−13290
photoetching of polymers with excimer lasers 88−13286
polyphotolysis process to enhance positive photoresist results 87−74171
polystyrene and chloromethylated polystyrene, deep UV, electron and ion beam resists, photo- and radiation chemistry 85−12093
stroboscopic pulsed laser photolysis apparatus 85−56910
submicron optical lithography, photoresist design, polyphotolysis appl. 88−1497
trimethylphosphine, photodecomposition, deposition of InP and In_2O_3 by CVD, excimer laser enhancement and probing 85−10765
Al laser direct writing of customizing interconnectors for CMOS gate-arrays 88−64768
Al_2O_3 thin film deposition by UV laser photolysis 85−413
Au lines, fast photolytic laser writing on prenucleated alumina substrate 88−72455
Au mercaptoterpene metallopolymer thin films, photolytic decomp. by UV direct laser writing 87−67040

photolysis continued
Au micropatterns, projection printing by photochemical decomposition 87−11694
Au patterns, laser CVD 88−38249
CO_2 TEA laser, photolysis effect on seeding gases 85−35667
$Cd_{1-x}Hg_xTe$ films, photolytic MOVPE 85−49569
CdTe, OMVPE growth, UV irrad. effect 86−7783
CiO_2 thin film deposition by UV laser photolysis 85−413
Cr mask manufacture without etching step 85−45765
GaAs, MOCVD growth, effect of UV irradiation 85−10696
GaAs excimer-laser-stimulated CVD, polycryst. thin film growth and props. 87−31563
GaAs, laser assisted growth in low press. MOVPE 88−56274
GaAs, maskless dry etching with submicron line-width by laser pyrolysis in CCl_4 85−23684
n-GaAs/liquid junctions, activation barrier for carrier transport 86−14974
GeH_4 laser photolysis and ionisation for Ge film growth 85−414
$Hg(CNS)_2$, semiconducting and photocatalytic props. 85−40478
$Hg_{0.2}Cd_{0.8}Te$, photochemical organometallic VPE growth 86−40728
HgTe films, deposition by photolysis of (t-butyl)HgTe(t-butyl) 87−313
I transverse flow CW atomic laser, 1.315 μm 88−58428
InI, laser photolysis and ionisation for In film growth 85−414
$In_{2-x}Sn_xO_{3-y}$, photolytic prod., heat mirror characts. 86−62262
$LiNbO_3$, SAW devices, high accuracy post-fabrication trimming by laser photochemical processing 88−71871
MO, micrometer-scale line deposition using near UV laser light 87−31554
Pt, micrometer-scale line deposition using near UV laser light 87−31554
Si spontaneous thermal etching by CF_3 radicals, reaction kinetics study 88−71421
a-Si:H, photochem. vapour deposition, di- and trisilane photolysis, film elec. and optical props. 86−52514
a-Si:H, thermal and photo-CVD, pyrolysis and photolysis of disilane 86−509
p-SiC:H amorphous films, photochemically deposited, elec. and optical props., solar cell appl. 85−23457
SiH_4, dissoc. under laser irrad., Si film deposition 87−5480
Si_3N_4 film, photo CVD deposition 86−40766
Si_3N_4 thin film deposition by UV laser photolysis 85−413
Sn, photochemical deposition for GaAs selected area doping during MBE 86−8990
SnO_2 thin films, photochemical fabrication and micropatterning from SnI_2 87−23700
V complex, vanadium(III)bis(2,2′-bipyridyl) chloride-Fe(III) system, photogalvanic effect 87−30892
W, micrometer-scale line deposition using near UV laser light 87−31554
$W(CO)_6$, laser CVD of W film, pressure dependent deposition saturation rate 85−28252
Zn photodeposition rates from diethylzinc 87−38167
ZnO thin film deposition by UV laser photolysis 85−413
Zn_2SiO_4 phosphors, UV photolysis in fluorescent lamps, XPS and chem. anal. 87−58439

photomagnetic effect
carrier temp. effect on photomagnetic information recording 87−18517
n-$Bi_{1-x}Sb_x$, deep donor levels, photocond., photomag. effect, Hall effect studies 85−61703
$Cd_xHg_{1-x}Te$ variable-gap semicond., electron photothermomagnetic effect study 86−35311
InAs, hot photoelectrons, thermomag. effects 86−53334
$In_{1-x}Ga_xAs$:Zn(Mn), carrier lifetimes and loss mechanisms, photocond. and photomag. effect meas. 86−67674
p-InSb:Ge injection photodiode characts., electron irrad. effects 87−18840
Si, intervalley transfer of electrons, influence on photomag. effect, spectral characts. 88−14002
Te, photocarrier recombination at low temps. 86−22211

photomagnetoelectric effects *see photoelectromagnetic effects*

photometers
see also photometry; spectrophotometers
absorption photometer for liquids *(German)* 85−15078
astronomical instrumentation and techniques, conf., Tucson, AZ, USA (March 1986) 87−22971
calibration, stable source of IR radiation 87−33067
camcorders, iris control for automatic light meter *(German)* 88−74131
CCD imaging system, design and construction for astron. appl. 85−26213
combustion processes control, meas. techniques development *(German)* 85−64326
computer controlled light meter 85−3842
DEFOR nondispersive IR photometer *(Italian)* 85−14797
dust particle detect. in clean room *(Dutch)* 86−50015
electronic exposure timer, review *(German)* 85−55072
FIA 05 flow injection analyser and first experiences with its operation *(Czech)* 87−70850
fibre optics appls. *(Polish)* 86−68277
film thickness monitoring by two-wavelength method 86−18122
five channel auroral photometer, microcomputer controlled 88−30167
focal plane arrays for the ISOPHOT experiment 88−74485
gas-discharge light-pulse generators, optimising parameters, use as base of flash photometer 85−5497
goniophotometer, automated moving arm, for measuring the spatial distribution of light sources 87−70637
high-speed dual CCD imaging photometer for star occultation obs. 86−44183
HILAT vacuum ultraviolet auroral imager 85−9259
illuminance meters performance, characts. and specifications 88−29671
IR photometer, registration system *(Russian)* 85−26329
IR photometer for atm. aerosol studies 87−71315
far IR photometer for ground-based astronomical obs. 85−20286
IR-reflecting coated lamp evaluation 85−64314
Korry digital video lightmeter tests displays 87−70379
laser radiation parameters measurement in machining lines, meter design 87−35215
light intensity distrib. meas. system, image processing unit *(Japanese)* 87−3454
light meter, general purpose 85−15058
light meter design using SMT 88−22817
light switching with an SCR used as a GTO 85−50007
luminescence photometer for efficiency evaluation of laser pumping sources 85−35838
magnetic disc surface buffering monitor microscope and photometer head 85−1845

photometers continued
NDIR, nondispersive error model, for difference meas. of CO_2 in air *(German)* 87−41514
NDIR photometer for micrometeorological CO_2-profile meas. *(German)* 87−77869
optical radiation meas., conf., San Diego, CA, USA (Aug. 1984) 85−49251
optimum parameters determ. with various photoreceiver types 85−20628
particle counting by photometric analyser, upper limits on meas. range *(Russian)* 85−8990
photometry, astronomical, acoustooptic filters, design and fabrication 88−13958
photomultiplier electron characts. determ., pulse photometers appl. 87−53137
photoresistor sensor system with LED indicator 88−19424
portable, digital display, for recording irradiance from near UV to near IR 87−41556
Purex process control, automatic laboratory equipment and in-line instrumentation *(German)* 85−42840
Radas UV photometer as monitor of processes *(Dutch)* 85−20619
RADAS UV photometer for boiler emission analysis *(German)* 85−64324
remote sensing of Earth resources, imaging spectropolarimeter-photometer for satellite 87−29916
rotating shadowband radiometer, microprocessor-based, 86−50109
Shuttle/tethered satellite system missions, bistatic LIDAR expt. 85−53181
single-photon counter system, microprocessor-based 86−18161
spherical photometer test station with microcomputer interface *(German)* 87−41336
telephotometer, two-channel optoelectronic 87−56701
transducers, spectral match quality determ. 87−8629
twin-rotation-disc visibility meter characteristics 86−55739
UV radiometers, detector elec. characteristics 87−29113
UV radiometers, detector optical characteristics 87−29114
Al-SiO_2-Si_3N_4-Si digital photocapacitance sensor 88−42104
$Ga_{1-x}Al_xAs$ photodetectors as exposure meters 86−50103
O_2 sensor based on fluorescence quenching of indicator-treated silicone rubber membranes 88−36055
OH nightglow, emitting region temp. meas. equipment 86−60941
Si:Bi hybrid array for photometric near-IR spectrometer 87−20938

photometric light sources
high-intensity discharge photometric lamp incandescent modelling inaccuracies 86−52036
illumination engineering, measuring instruments development 85−44295
Toshiba 6 V51 m low level luminous intensity photometric lamp, operating characts. *(Japanese)* 85−27762
Xe lamp spectral distribution as standard white light source *(Japanese)* 87−5080
$Pb_{1-x}Sn_xSe$ 10 μm IR LEDs as radiometric calibration sources 86−2985

photometry
see also brightness; colorimetry; densitometry; spectrophotometry; stellar photometry
agricultural remote sensing, crop classification, biomass and plant height algorithms from visible/IR/microwave data 85−38358
alkali halide based UV recording channel in optoelectronic converter *(Russian)* 88−4660
astronomical photometry, 1/f noise 87−17659
aurora, imagery, photometry and spectroscopy by Polar BEAR satellite 88−30149
auroral imaging, one-dimensional, using intensified photodiode array 85−31991
automobile headlamps/indicators automatic testing facility 85−14624
borescope quality assurance, test specification development 86−25354
brightness measurement for lighting engineering *(Japanese)* 86−33818
brightness stability of capillary flash lamps 88−18204
brightness-coefficient indicatrices, analytic approx. for polished milk-glass specimens 85−46119
cable sheaths, water vapour and gas diffusion measurement *(German)* 86−30540
candela definition, 1979 SI changes 85−58486
candela SI base unit realisation 87−29327
CCD photometry, appl. of TV rate readout unit for two-dimensional CCDs 88−47350
combustion processes control, meas. techniques development *(German)* 85−64326
combustion/firing monitoring by photoradiometry and photothermography, application to power station monitoring *(German)* 85−38810
compact fluorescent lamps under square wave voltages, photometric and colorimetric behaviour 88−49272
computer aided measurement of magnetic, photometric and thermal variable *(Japanese)* 88−29602
CRT, shadow-mask, resolution meas. 86−31248
difference integrator for twin-wave photometers 86−70094
diffraction-grating scaling energy (average power) measuring converter for laser photometry 87−77434
diode array spectrometers appl. in microscope photometry 86−24805
dual beam double pass optical sensor for online web transmission meas. 85−58717
economical light sources developments, scientific and technical collaboration of Interelektro participating nations 85−44297
emergency lighting legislation, system design and photometric meas. 87−31070
error analysis of image convertor with optical-mechanical scanning 86−44314
F40 type fluorescent luminaires, factors affecting performance 87−64941
fibre optics appls. *(Polish)* 86−68277
flashlamp light distribution approximation model *(Russian)* 86−33831
floodlight photometric subtleties, interpolation, luminaire position and resolution 85−65610
fluorescent lamp-ballast combination performance and photometric testing 86−33820
fluorescent lamp/ballast system performance meas. with temp.-controlled integrating chamber 85−65605
fluorescent lamps, HF operating characteristics 85−65594
fluorescent lamps, UV radiation emission study 88−43478
fluorescent solar concentrators, performance evaluation using photometric method 87−36134
Gaussian surface curvature/contour determ. using photometric stereo 88−3273
glare filters display quality obs., for CRT terminals 85−20515
high intensity discharge lamp testing, incandescent model 85−65604

photometry continued
high intensity discharge luminaire photometry 88−76039
high sensitivity system employing optoelectronicintegration for optical power measurements 86−11611
high temperature gas analysis for continuous extractive measurement *(German)* 87−70853
illuminance meters performance, charact. and specifications 88−29671
Illuminating Engineering Society conference, St. Louis, MO, USA (Aug. 1984) 85−60636
illumination engineering, measuring instruments development 85−44295
industrial illumination developments in Czechoslovakia *(Slovak)* 86−61797
integral charact. determ. of light sources *(Czech)* 87−36235
integrating sphere luminous flux meas. method reducing error *(Polish)* 88−36252
IR, using RAM for computerised image analysis 86−44315
IR radiation *(Japanese)* 86−31433
laser radiation parameters measurement in machining lines, meter design 87−35215
LEDs, semicond. lasers, optical fibres, near-field radiation power density distrib. meas., luminance monitor *(Polish)* 85−4133
light intensity meas. accuracy, one-electron pulse counting and charge accumulation 86−24804
light measurement technology moves to the production line 85−31608
lighting standards, international comparison, luminous flux and intensity, spectral responsivity 88−16532
luminaire photometry for furniture-mounted task lighting 85−5485
luminous flux and luminous intensity meas., national standards comparison 88−29667
Marx generator performance monitoring using fibre optics and multichannel data recorder 87−65839
medical photometric sensors, remote fibre meas. system 85−38134
metal halide luminaires, photometric and field perform. 88−62744
milk glass transmission under diffuse and directional illumination 85−46118
nanosecond pulse source with tunable wavelength for meas. fibre optic communication equipment 88−9550
NBS photometric calibrations 88−67629
near-field photometry, luminaire intensity representation appl. 88−37732
nonlinear photoreceivers used in photographic exposure meas. systems, equisignal and equienergy meas. comparison 86−5319
optical measurement applications and trends *(Japanese)* 87−70831
optical radiation meas., conf., San Diego, CA, USA (Aug. 1984) 85−49251
optical radiation meas. system calibration standards, 200-600 nm region 85−20442
outdoor fluorescent luminaires, IEC method for photometric testing 85−16381
phosphor persistence, effect on photometry with image intensifiers and integrating readout devices 87−6339
photocell bridge network for photometric measurements *(Polish)* 88−51676
photodetector error, anal. in determ. of law governing light flux intensity changes *(Russian)* 85−31611
photodetector system with photodiode and operational amplifier, high speed photometry of half-tone images 85−26342
photodetectors phase charact. meas. using bimodal lasers 88−53814
photometric stereo systems with region matching, depth map determ. *(Japanese)* 86−23167
photometry, astronomical, acoustooptic filters, design and fabrication 88−13958
photomultiplier signals distortion, by background luminous flux 88−36257
photomultipliers, one-electron characteristics, modulator operation effects 87−24727
photomultipliers appl. to quantitative analysis of short light flashes fluxes 86−1652
photon detectors, conf., Weimar, Germany (Sept. 1984) 85−39431
photonics handbook 88−26
point source illumination stereo photometric method for distance meas., multiple image anal. *(Japanese)* 88−60918
pulse-counting photometry, implications of photomultiplier fatigue, astron. appl. 85−23369
reflection-type photometric measurement of metal surface structures after machining *(Polish)* 85−37812
road tunnel adaptation luminance meas. and physio-optical characterisation 86−57023
rotating shadowband radiometer, microprocessor-based, 86−50109
sampling technique for luminesc. time constant meas. 87−74921
scanning microdensitometers for image processing, photometric channel struct. and meas. errors *(Russian)* 85−31280
searchlights photometric testing IES guide 85−16384
shaper of video pulses, center of gravity based 88−70614
single-mode optical fibres far-field meas. by integrating sphere *(French)* 86−58771
spectral match quality determ. in photometric transducers 87−8629
sports lighting installations, photometric specification and meas. 87−43641
sun tracker, two-axis universal mount, electronically controlled, design and construction 85−26319
surface objects orientation determ., vision system appl. 87−48245
task station, illuminance distrib. charact., interior room cavity obstructions effect 88−31191
thin film recording heads, mag. switching charact. at pole tips 86−36015
traffic sign sheet materials, retroreflectance and colour meas. *(Japanese)* 85−26488
transparent random structures, distrib. function of probability determ., time interval summing methods *(Czech)* 86−50017
ultraweak light signal detection, synchronous single-photon counting using Si APD 88−16528
units, photometric and radiometric *(French)* 88−60930
VDU comfort and safety, visual fatigue and relative visibility meas. *(Japanese)* 87−71080
video imaging systems, MTF meas. techniques 86−24376
visual spectral sensitivity meas. and colour sensation model *(Japanese)* 86−60752
white-light optical signal processor, noise performance meas. using scanning photometer 85−26487
Au film thickness determ. of Si counter by photometry 88−16484
H_2S selective analysis, using photometric analyser 86−5575
$LiNbO_3$, doped, holographic recording of gratings, microphotometric investig. 87−19056
NO_2 traces in air detection, using automatic colorimetric detector 88−29692
Na lamps, high pressure, pulse supplied, spectroscopic behaviour anal. 88−37730
Na luminaries, high pressure, photometric and field perform. anal. 88−37731
O_2 demand measurement in chemical effluent *(Spanish)* 88−22836
Si photodiodes appl., spectral ageing patterns obs. 88−60730

low light level sensors, latest techniques 85−29710
low power photomultiplier base circuit using HV FETs 85−43287
LV microgap surge absorber, discharge processes 86−32849
Lyman-alpha UV hygrometer for small-scale atmospheric humidity turbulence meas. 88−23184
magnetic fields effects obs. 88−71292
mDM-channel adjustable photomultiplier EHT supply 86−7970
mesh PMTs for high magnetic environments 86−47262
microchannel film electron multiplier with secondary electron emitters for charged particle detectors 86−25135
microchannel-plate photomultiplier and its application tothe time-correlated single-photon counting method *(Japanese)* 86−35276
multianode photomultiplier tube, development 88−1334
multianode photomultiplier with position sensitivity, operational characteristics 86−14822
multichannel photon counter, fast, for fluoresc. spectroscopy 86−11505
multimode lasers, detector-dependent beating 86−29222
multistage electron-optical convertor, noise generation, digital modelling 87−66856
nanosecond amplifier-limiter for shaping photomultiplier signals 87−65961
nanosecond optical pulses recording device, in presence of quasistationary background 85−26256
nanosecond pulses delay and recording module, using high-speed memory IC 88−16659
near-IR detectors, signal-to-noise ratio comparison 85−26325
neutron backscatter effects from photomultiplier assembly in TOF spectrometry at 144 keV 87−29687
neutron-nucleus interaction obs., using automated universal expt. complex 86−18245
noise due to input window material phosphorescence 88−32732
one-electron characteristics, modulator operation effects 87−24727
one-electron photodetectors, selection method 85−26341
one-electron response, internal feedbacks and afteremission effect 86−41495
operation and availability 87−1158
output circuit, effect on output voltage pulse form *(Russian)* 86−14821
output signal modeling algorithm 85−55417
particle sizing in the electrodynamic balance 86−55844
PET, high resolution detector blocks 87−77653
phase adjustment charact. 87−24724
Philips type XP2972, large sample performance testing 88−29823
photodetection protection from strong exposure, based on photomultiplier voltage control 87−21087
photodetector error, anal. in determ. of law governing light flux intensity changes *(Russian)* 85−31611
photodetector with stabilizer anode stability 86−11604
photodetectors for use in severe environments, recent developments 85−9053
photoelectric instrument, FPS-3M, adaption for light scattering meas. and turbidimetric titration 85−14812
photoelectron yield and inefficiency of photomultiplier-based detector 85−4210
photoelectronic image device, prelim. tests 86−21079
photometer optimum parameters determ. with various photoreceiver types 85−20628
photomultiplier tubes and detector packaging for hostile environments, performance 88−61621
photon counting appl., characteristics and practices, review 85−28915
photon counting appl. of FEU-112 photomultiplier 87−63664
photon counting performance eval. 88−71291
photon counting photomultipliers, noise power spectrum 87−17659
photon counting suitability, probability criterion 85−55418
photon detection systems, review *(French)* 88−36349
picosecond synchroscan photometer with streak tube and direct photomultiplier readout 86−5073
plastic scintillator optical response model to understand attenuation lengths 88−54410
point-to-plane gap, space charge develop. under AC conditions 87−37788
position identification of gamma rays and electronswith a multianode photomultiplier 86−50332
position sensitive multianode photomultiplier for low light level events 87−41833
position sensitive photomultiplier tubes for scintillationimaging 86−47260
position sensitive photomultiplier tubes using multianode segmented dynode or resistive anodes 85−40411
position sensitive tubes for high energy physics, nuclear medicine appl. 88−68209
positron emission tomograph for whole-body, Positologica III, performance charact. 86−18306
power supply, HV ripple elimination using active filter 88−67728
power supply, with output voltage adjustment from 0.9 to 4 kV 86−13997
power supply unit, small-size regulated 88−50017
power supply using programmable voltage dividers 88−31997
preamplifier-discriminator IC for photomultipliers 87−41889
prebreakdown electrode-monitoring of gaps using laser beam adjusted photomultiplier 87−38607
preinstallation testing at CDF 88−47995
programmable photomultiplier power supply 86−27817
proximity-focused electron lenses design 85−23372
pulse power source for tacitron photomultipliers 86−40900
pulse radiolysis equipment, setup for simultaneous multiwavelength kinetic spectroscopy 87−34940
pulse-amplitude distributions of photomultipliers for various types of ionizing radiation 88−32730
pulse-height-to-code converter for heavily loadedphotomultipliers 86−5187
pulsed microchannel-plate mounting for subnanosecond X-ray image intensifiers, plasma diagnostics appl. 85−26739
quantum threshold sensitivity for UV detection *(Russian)* 87−49751
quantum wells for photonics 85−46217
R 928 photomultiplier noise factor meas. 87−24726

photomultipliers continued
RCA 4522 phototube gain stabilisation using LED diode scheme 85−37930
RCA C83036E prototype photomultiplier, preliminary eval. 85−40410
reproducibility of photomultiplier anode current with pulse control and illumination 88−32731
response time investig. of photomultipliers with MCP 86−67643
sampled photodetector based on FEU-83 photomultiplier 87−41520
sampling optical oscilloscope with streak tube 88−47627
scintillation hodoscope based on photomultipliers, with 50×50 cm working area 88−36368
scintillation hodoscopes, optimal encoding 88−4819
scintillation hodoscopes based on multipliers, load charact. 87−8868
scintillation light yield determ., simulation by Poisson distrib. 88−42432
SEM detector system, double, for BSE and SE imaging 85−28918
SEM scintillator/photomultiplier, detective quantum efficiency 86−14826
shutter ratio of a gated ITT F4128 microchannel-plate photomultiplier 88−19642
side-on photomultiplier tubes in time-correlated photon counting meas., time response 88−50608
simultaneous subnanosecond timing information and 2D spatial information from imaging photomultiplier tubes 87−77148
single photon response of photomultiplier tubes 86−21080
single-electron, ATE-based selection for lidar studies of atmosphere 86−44123
single-electron, optimum operating parameters determ. 86−70344
sodium salicylate as combined fluoresc./refl. coating for broad band detector *(German)* 87−3613
solid-state, detection of individual 0.4-28 μm photons via impurity-impact ionisation 87−66855
solid-state, resonant tunneling transistors, tunneling superlattice devices and new quantum well avalanche photodiodes 87−24472
solid-state photomultiplier using variably spaced superlattice energy filter quantum well avalanche photodiode 87−38925
spectral response data, scintillation and Cherenkov radiation detection 88−54426
spectrometers with large-volume detectors 85−26731
staircase multiplier, N-stage Capasso excess noise factor 87−26197
standard source for certifying low-level radiation detectors 87−56869
supply instability reduction 87−59162
surface discharge meas., optical detection system 88−74579
Tektronix CRO photomultiplier technique for random parasitic signal visualisation *(Spanish)* 88−4542
temperature coefficients determ. using photon counting technique 87−41830
temperature dependences of photomultiplier charact. obs. 88−25847
test facility at IMB 86−1649
thermal neutron imaging using position sensitive photomultiplier 87−29510
thyristor switch for fast photomultipliers 86−67439
time charact. obs. of FEU-130 photomultiplier 86−1650
time-correlated simple-photon counting , avalanche diode and photomultiplier performances comparison 88−74432
time-correlated single-photon counting, time response of various photomultipliers determ. 86−53311
time-referencing device for large scintillation counters 88−68298
tube development for nuclear and medical appls. 85−40409
tube performance with transmissive dynodes in high mag. field 85−31704
ultrafast microchannel plate photomultipliers 88−44527
UV region sensitivity increase, using film convertors 86−60598
vacuum and gas photodetectors calorimeters operation in high mag. fields 85−9039
vacuum photosensitive detectors in hostile environments, space telescope Faint Object Camera case study 85−4410
variable power supply for photomultipliers, compensation-type 87−65834
X-ray remote detect., coupling between plastic scintillators and light fibres 87−21441
XP4702, 64-channel PMT for imaging 88−54418
$Al_{0.5}Ga_{0.55}As$ superlattice APD as solid-state photomultiplier, anal. 87−11398
AlGaAs/GaAs multilayer heterojunction structure, solid-state photomultiplier appl. 85−34613
$Al_{0.48}In_{0.52}As$-$Ga_{0.47}In_{0.53}As$ multiple graded-well struct., near-single carrier-type multiplication 87−33051
$Al_{0.48}In_{0.52}As$-$Ga_{0.47}In_{0.53}As$ multiple graded-well APDS, single carrier-type multiplication 87−46699
BaF_2 scintillators coupled to photomultiplier with CsTe photocathode, slow and fast scintillation light components 88−61145
BaF_2/BGO crystal scintillators, photomultiplier tube design, characteristics 86−47261
BeCu dynode photomultiplier tubes for fast neutron detection in high rad. fields 88−68206
$Bi_4Ge_3O_{12}$ detectors linked to dual PMT for positron emission tomography 85−15192
CsI transmission photocathode/MCP electron multiplier characterisation 85−31708
$GaAs_{1-x}Sb_x$, solid solns., negative electron affinity photocathodes, use in photomultipliers 88−38970
NaI photomultiplier γ-ray detectors, stabilisation 86−27816
Pb-glass detectors, removal of phototubes 87−29520
Si:As solid-state photomultipliers, detection of individual 0.4-28 μm photons via impurity-impact ionisation 87−66855
ZnS scintillation detector, silver activated, alpha particle detection using optical fibre cable 88−48007

photon correlation spectroscopy
acoustic velocity field measurement, appls. 88−47731
acoustic velocity fields, meas. by laser Doppler system 86−31744
aerosol particles obs., microcomputer-aided determ. of diffusion coeff. and electrical mobility 85−4102
biotechnology appls. of laser light scattering instrumentation 88−42543
conference on optical metrology, Viana do Castelo, Portugal (July 1984) 88−64
dynamic light scattering using monomode optical fibers 88−13792
monomode fibre components for dynamic light scattering 88−20359
particle discrimination and background suppression in photon-correlation laser velocimetry 85−8964
PC data capture adapter for a photon correlator 88−15926
pulmonary tree particle analysis by laser Doppler velocimetry 88−10331
shift-invariant imaging of photon-limited data using bispectral analysis 85−30352
simultaneous subnanosecond timing information and 2D spatial information from imaging photomultiplier tubes 87−77148

photon correlation spectroscopy continued
time correlated single-photon counting , using commercially available avalanche photodiodes 88−74431
time-correlated simple-photon counting , avalanche diode and photomultiplier performances comparison 88−74432
time-correlated single-photon counting, time response of various photomultipliers determ. 86−53311
Si avalanche photodiode for photon correlation meas., passive quenching 87−26187

photon counting
2D photon-counting CCD imaging system 88−67889
2D photon-counting image pick-up tube *(Japanese)* 87−49523
aftereffect obs. in FEU-79 photomultiplier 88−12907
analog device for measuring the intensity of weak lightsignals 86−18160
astronomical image photon counting system, granularity noise reduction via mag. scanning 86−70043
astronomical instruments and techniques, conf., Tucson, AZ, USA (March 1986) 87−22971
astronomical photon-counting imaging system, design and performance 86−65130
avalanche photodetector, photon pulse integrating receiver optimisation 85−8844
avalanche photodiodes appl., 10^{-16} to 10^{-11} W luminous fluxes recording 88−58360
avalanche photodiodes for OTDR sensors 88−4446
avalanche semiconductor detector for single optical photons, 60 ps time resolution 87−29486
bit-error rate in photon-counting communication 88−47143
bone density meas., using computer tomography scanner and ^{125}I isotope source 86−70410
Brownian thermal detector, IR radiation power meas. appl. 85−47979
CCD collection efficiency 88−22644
CCD imager, virtual phase, operated in frontside electron-bombarded mode, appl. as photon counter 85−47859
charge position readout devices for imaging photon detectors 88−36391
Cherenkov radiation recording, by wire chamber operating in self-quenched streamer mode 86−60592
cooled avalanche photodiodes used for photon detection 88−22599
dead time variable designs 85−28669
distributed fibre optic temp. sensor using Raman anti-Stokes OTDR and single photon counting detect. 87−53948
dye lasers, photon statistics and pumping fluctuations relation 88−72286
eight-channel threshold Cherenkov counter with air radiator 88−29890
Endeavour project, Canister 2 support structure 87−77731
FEU-112 photomultiplier appl. 87−63664
FEU-112 photomultiplier in photon count mode, with Ag-O-Cs photocathode 86−14824
FEU-136 for use in photon counters 85−40412
fibre birefringence determ. by normalised second-order factorial moment meas. 87−25933
fibre optic systems, digital time domain fault anal. techniques 86−30843
free electron laser steady-state photon statistics 86−29179
free-electron laser, photon statistics and squeezing 87−46925
high speed photography, videography and photonics, conf., San Diego, CA, USA (Aug. 1986) 87−51705
high-speed differential pulse discriminator-counter, atmospheric sounding appl. 86−60936
hodoscopic hadron and photon scintillation calorimeters, radial distrib. of shower energy release 87−50163
image acquisition system, astron. tests 85−31381
image acquisition system, performance analysis 87−20928
image correlation at low light levels, computer simulation 85−2873
image correlation at low light levels using 2D photon-counting detector 85−51721
image detection and quality, conf., Paris, France (July 1986) 88−35
image dissector, one-electron sensitivity optimisation 86−1644
image intensifier development 88−4490
image processing, photon-limited 85−57426
image processing in photon-counting imaging 87−19901

imaging photon detectors for optical astronomy 85−12735
IR photodetectors, photon parameter characterisation 86−55732
large-format photon-counting arrays for astronomical imaging, design and performance 88−71290
laser photon fluctuations, computer simulation, single cavity laser theory 85−7446
laser photon fluctuations, computer simulation, single-cavity laser results 85−7447
light intensity meas. accuracy, one-electron pulse counting and charge accumulation 86−24804
long-life microchannel plates, evaluation for X-ray photon counting 88−61108
MCP image readout methods for space astronomy 88−67888
microchannel plate image intensifier for detectionof photon-noise-limited images 86−21082
microchannel plate image intensifiers for imaging photoncounting systems and optical feedback 86−21074
microchannel plates assembly with micrometer gaps 88−67798
microchannel plates system for photons and particles counting 87−71024
monomode optical fibre, optical time domain reflectometer using photon counting technique 87−20486
MOS photon-counting sensor operating in above-breakdown regime 85−8851
multichannel fast acting phonon correlator *(Russian)* 85−62420
multichannel photon counter, fast, for fluoresc. spectroscopy 86−11505
multipoint optical detectors, phase and amplitude meas., quantum theory 85−58721
optical dead-time effects, generation and statistical props. 88−51927
optical fibre fault location using photon counting 85−63715
optical fibres, optical time domain reflectometry, coherent detection techniques use 86−48152
optical time-domain reflectometer using planar InGaAsP avalanche photodiode detector 86−38380
parametric downconversion for detector quantum efficiency absolute meas. 88−14268
Particle Beam Fusion Accelerator Marx generators 87−21329
photodetection process, parameter estimation of receiver 87−49753
photodetectors, ideal, response to photon flux and/or energy flux 86−11602

photon counting continued
photodetectors selection criterion optimisation 86−31440
photomultiplier characteristics and practices, review 85−28915
photomultiplier operation obs., grounded anode and grounded photocathode operation comparison 86−21081
photomultiplier photon counting performance eval. 88−71291
photomultiplier photon counting suitability, probability criterion 85−55418
photomultiplier temperature coefficients determ. using photon counting technique 87−41830
photomultiplier with bialkali photocathode, wavelength dependence of quantum efficiency determ. 87−11310
photomultiplier with local photocathode illumination, amplitude distrib. of single electron pulses 87−53136
photomultipliers, noise power spectrum 87−17659
photomultipliers, one-electron characteristics, modulator operation effects 87−24727
photon-limited image analysis 88−8861
photonic methods of high speed analog data recording 85−64050
picosecond Raman studies using 5 kHz tunable dye laser system 87−12637
position sensitive multianode photomultiplier for low light level events 87−41833
PPM noisy photon counting channel with soft decision, cutoff rate 87−33747
PPM weak noisy photon-counting channel, efficient capacity 86−49000
pulsed radiation sources location, parameters optimisation of dissector system 87−49754
Raman fibre amplifiers, SIN ratio, appl. to recirculating delay lines 86−63635
randomly overlapping photon fluxes analysis, reference pulse selection 88−25068
receiver signal, restored, statistical characts. 85−13583
ring cavity, twin photon beam generation, intracavity four-wave mixing 87−33239
sandwich microchannel plates for X-ray photon counting, operating characts. 88−61106
scanning photon microscope, Si wafer defects and interface trap distrib. obs. 88−22434
semiconductor laser, constant current driven, obs. of amplitude squeezing 87−39123
SHG, classical light statistics, evolution 85−41470
side-on photomultiplier tubes in time-correlated photon counting meas., time response 88−50608
simultaneous subnanosecond timing information and 2D spatial information from imaging photomultiplier tubes 87−77148
single photon detection and timing system for Lidar expt. 88−9917
single-electron recording of light flow, reliability 87−70646
single-photon counter system, microprocessor-based 86−18161
soft X-ray microscope detector systems for high photon rates 88−23021
spatial distrib. of particle and photon fluxes recording, using microchannel plates 88−42433
speckle correlation using 2D photon event detector 86−24528
statistics of field formed by superposition of coherent signal and Brownian noise 86−37029
streak camera characterisation, with tandem micro-channel plates 87−53131
streak camera for picosecond time-resolved photoelectric correlation meas. of laser field 88−40307
strobed multichannel photon counter with LI-706 supervidicon 88−67799
time characts. obs. of FEU-130 photomultiplier 86−1650
time correlated single-photon counting , using commercially available avalanche photodiodes 88−74431
time domain reflectometer using photon-counting InGaAs/InP APD at 1.3 μm 85−20740
time-correlated simple-photon counting , avalanche diode and photomultiplier performances comparison 88−74432
time-correlated single-photon counting, time response of various photomultipliers determ. 86−53311
time-correlated single-photon counting method, appl. of microchannel-plate photomultiplier *(Japanese)* 86−35276
time-resolved multiphoton counting, radiophotoluminescent metaphosphate glass dosimeter appl. 86−44548
types, properties, sensitivity and efficiency *(Czech)* 85−42990
ultraweak light signal detection, synchronous single-photon counting using Si APD 88−16528
UV imaging photon detector, large format for astronomical spectroscopy 87−34986
video-intensified microscopy system design 85−58567
weak light signals recording system, pulsed or continuous 86−11761
X-ray camera appl. 88−4872
Au cathode photoelectric detectors, absolute photon sensitivity characterisation 87−14348
$GaAs/Ga_{0.7}Al_{0.3}As$ single quantum well struct., photoluminescence transients 85−29704
InGaAs/InP avalanche photodiode, near room temp. single photon counting 85−7319
InGaAs/InP photon counting avalanche detector for 1.3 μm room temp. optical time domain reflectometry 85−31475
Si ADP, charactn. for photon correlation meas., active quenching 87−68273
Si APD in photon counting receiver, shot-noise-limited sensitivity, 50 dB dynamic range 86−48280
Si avalanche photodiode developments and appls. 87−7221
Si avalanche photodiode for photon correlation meas., passive quenching 87−26187
Si devices based on nuclear irradiation induced defects *(Czech)* 86−27835
Si(Li) photon counters, spectral efficiency and resolution, 0.3 to 5 keV 88−22978

photon echo
degenerate, for simultaneous storage of multiple optical data 88−58059
dynamic echo holograms, transformation props. of arbitrarily polarised wave fields 85−56866
holography based on photochemically stored light echo 87−68645
information processing appl. 87−69148
optical stimulated echo memory device, effects of hyperfine structures 86−48501
polydiacetylene, dephasing time by photon echo method 88−2189
storage and phase conjugation of light pulses using stimulated proton echoes 85−2411
Nd^{3+}:silicate glass excited by nanosecond dye laser pulses 85−12959
$Pr^{3+}:LaF_3$ laser action, relax., photon echo technique 87−12424

photon-phonon excitations *see polaritons*

photon polarisation
VEPP-4 storage ring, synchrotron radiation intensity, spin depend. obs. 85−15111
XUV monochromator for synchrotron radiation polarisation enhancement 86−60479

photon transport theory
gamma-ray skyshine calculations, approx. methods in nuclear power plant environment 86−25722
optical waveguides, soft X-ray radiation transport 88−13843
particle beam fusion accelerator II (PBFA II), vacuum insulator stack failure mechanisms 87−21313
$Bi_4Ge_3O_{12}$ tapered cryst. in positron emission tomography 85−20893

photoplasticity
holographic interconnections, programmable, using photothermoplastic devices 88−58722
photothermoplastic material, high spatial frequency limit 88−7843

photorefractive effect
acoustical-photorefractive recording of acoustical oscillations in piezoelec. crysts. 88−48399
adaptive optical networks using photorefractive crystals, holographic interconnections in neural networks 88−51950
amplitude distortion correction, modal dispersal and phase conjugation method 88−20745
analog optical processing and computing, conf., Cambridge, MA, USA (Oct. 1984) 86−13263
associative memory using optical resonator 87−12620
beam combiner, photorefractive adaptive, use in crossed acousto-optic cell correlator 88−33834
beam coupling and locking of lasers usingphotorefractive four-wave mixing 86−68611
$Bi_{12}SiO_{20}$, photorefractive linear resonator with two pump beams 88−51926
$Bi_{12}TiO_{20}$, photorefractive crystal, ring oscillator 88−40350
coherent optical detection through two-wave mixing in photorefractive materials 88−58670
conference, Erice, Italy (July 1986) 87−72708
controllable nonreciprocal optical phase shifter 85−35857
correlator acousto-optic, time-integrating using photorefractive crystal 86−15532
coupling pulsed dye oscillators using a phase conjugate resonator 88−72388
crystal, image recording mechanism 86−63692
crystal with complex impurity level struct., holographic storage mechanisms 86−10023
crystals for optical neural computers 88−65132
cubic crystals, hologram diffraction efficiency and diffracted light polaris., optical activity effect 87−26575
cubic photorefractive crystals, anisotropic four-wave mixing, phase hologram form. 88−58653
deflection optically induced, in photosensitive materials *(French)* 85−7294
degenerate four-wave mixing in photorefractive media, short-wavelength asymptotic framework 85−56790
degenerate two-wave mixing in photorefractive crystals, stationary energy transfer intensity depend. 85−62657
degenerate two-wave mixing in photorefractive crystals with multiple internal reflections 85−35875
dielectric photorefractive crystals as the storage medium in holographic memory systems 88−71999
digital optical processing, parallel half-adder circuit, algorithmic state machines appl. 88−20466
diode laser arrays, coupling with photorefractive passive phase conjugate mirrors 87−61134
dye laser, controlled scanning with intracavity photorefractive element 88−14131
dye laser, CW, with intracavity photorefractive element, mode selection 87−26472
dynamic frequency plane correlator for image correlation 86−29973
dynamic frequency plane image correlator based on photorefractive nondegenerate four wave mixing 87−62229
dynamic holographic interconnections using photorefractive crystals 88−34156
dynamic photorefractive optical interconnects 88−72394
electro-optic materials for data storage and processing 87−26576

holographic photorefractive incoherent-to-coherent optical convertor using volume holographic storage 85−12983
holographic setup stabilisation with photorefractive crystals 86−68638
holography appl., conf. The Hague, The Netherlands (April 1987) 88−37815
image bearing photorefractive oscillators 87−55289
image differentiation, real-time, by degenerate four-wave mixing with photorefractive crystals 85−19018
incoherent-to-coherent image conversion using holographic storage 85−35921
information recording and readout, raster effect in photorefractive cryst. 86−15439
integrated optical vector matrix multiplier 88−58221
laser beams, one-way real time wave front conversion 86−36560
laser diode arrays coupled to photorefractive oscillator, line narrowing and self freq. scanning 88−65687
laser oscillation with intracavity image and multimode fibre 86−58947
$LiNbO_3$:Cu(Er)(Mg)(H), laser-induced grating characteristics 87−33336
$LiNbO_3$ interferometric modulators, evaluation of drift and nonlinearities 88−51572
logic element, multiple-output, based on optical interf. system 85−35880
materials, props. and appls. 87−68014
materials for optical computing and image processing 88−65120
matrix vector multiplication by four-wave mixing in photorefractive media 87−26534
matrix-matrix multiplication, optical, using multi-color four-wave mixing 88−65440
modulator, integrated total internal reflection, bistability and blocking oscillations 85−29916
multilayer optical learning networks based on holographically interconnected nonlinear devices 88−20461
multimode optical fibres, light polarisation reconstruction by holographic phase conjugation 88−72048
multiple phase-conjugate beam coupling in photorefractive crystals 87−12588
neural computers, learning algorithms 88−58313
neuromorphs, adaptable interconnects, photorefractive projection operator 88−58315
neuromorphs, optical, using spatial light modulators 88−58300
nonlinear materials, photoinduced index change, applications *(French)* 85−7530
optical associative memories based on photorefractive oscillations 87−12619
optical beam equalisation using degenerate two-wave mixing 85−12948
optical computing based on interference fringe shifting 86−37142
optical data processing, role of photoconductive/photorefractive materials 86−42222
optical erasure of sinusoidal holographic gratings in photorefractive materials, kinetics 87−7454
optical fibre mode generation using photorefractive crystal 88−39919
optical fibres, one-way image transmission by degenerate four-wave mixing in photorefractive BSO crystal 88−72060
optical image processing appls. of photorefractive materials 86−29974
optical interconnect, photorefractive, dynamic, two wavelength 88−65518
optical interconnections using photorefractive dynamic holograms 88−58699
optical material basic props., conf., Gaithersburg, MD, USA (May 1985) 86−13294
optical oscillators with photorefractive gain 87−68630
optical processing appl. of photorefractive materials, overview 85−30481
optical processing using photorefr. materials 87−46435
optical ring resonator, photorefractive gain, multimode operation 87−33232
optical signal processing, photorefractive crystals appls. 88−3197
optical signal processing and in-line recording, role of speckles 88−34763
optical signal processing appls. 87−69380
optical switching rates in ferroelectrics, limitations 88−7979
oscillation with photorefractive gain, review 87−7407
oxide solid solution, cryst. growth and electro-optic props. 86−36117
phase conjugate mirror, photorefractive self-pumped, optical bistability and hysteresis 85−19007
phase conjugate mirrors as thresholding elements for optical associative memories 87−46984
phase retrieval algorithm, optical implementation using photorefractive phase conjugate mirror 87−47881
phase-conjugate ring gyros and photorefractive-based ring gyros 85−35820
photo-induced index change nonlinear materials and their applications *(French)* 85−19027
photorefractive acoustoelectro-optic correlator 87−68202
photorefractive crystals, light-induced scattering 86−42649
photorefractive ferroelectric crystals, light diffr. by phase holograms 86−54227
PMMA:Cp_2TiCl_2, depth profiles in volume phase holograms 88−58700
polymer for optical recording of waveguide gratings 87−1929
pulse compression by holographic method 88−40374
quasidegenerate optical oscillators, vector four-wave mixing calcs. *(Russian)* 87−19049
real time correlation by degenerate four wave mixing 85−51284
real-time holographic recording, active stabilization 87−47012
reflection grating real-time holography, multistability 87−7452
resonators, photorefractive, frequency shift and cavity length 86−9898
resonators with photorefractive gain, laser oscillation 86−3242
ring laser resonator, photorefractive coupling 85−2360
ring oscillators, unidirectional photorefractive, theory 86−22518
ring passive phase conjugator controlling self-freq. shift and intensity of oscills. with photorefractive crysts. 86−3282
scattering noise suppression for a 3-D phase hologram recorded in a photorefractive medium, reconstructed by a reversed reference wave 88−72447
self Bragg matched beam steering using double colour pumped photorefractive oscillator 87−68574
self-pumped phase conjugate photorefractive mirrors, theory 85−51241
semiconductors, photorefractive effect for optical processing 87−33323
spatial filtering and frequency colour coding withphotorefractive crystals 86−69146
spatial light modulators, conf., San Diego, USA (Aug. 1987) 88−55785
spatial light modulators and appls., conf., Los Angeles, CA, USA (Jan. 1984) 85−10307
transient index grating formation in photorefractive crystals, analytical treatment 86−9988
transparent ferroelectric ceramics, photorefraction and formation of holographic gratings 87−74469
tungsten bronze family photorefractive crystal progress, growth and appls. 86−36113
two-dimensional optical beam switching techniques using dynamic holography 87−12613
two-wave and four-wave mixing, polarisation effects 88−2385
volume hologram formation in photorefractive crystals 87−68664
volume holograms recorded in photorefractive crystals, angular selectivity 88−58709
volume phase holograms recorded in photorefractive materials, diffr. efficiency and angular selectivity 85−7551
wave mixing, spatial light modulation, filtering effects 87−39204
$Ba_2NaNb_5O_{12}$ crysts., photorefraction and holographic storage 86−58980
$Ba_{2-x}Sr_xK_{1-y}Na_yNb_5O_{16}$:Ce tungsten bronze crystals, ferroelectric for photorefractive appls. 88−20186
$BaTiO_3$ IR photorefractive passive phase conjugate mirror 86−3285
$BaTiO_3$, altering photorefractive props. by reduction and oxidation at 650°C 86−36114

photorefractive effect continued
$BaTiO_3$, beam coupling at 442 nm 85−50891
$BaTiO_3$ characts. for electro-optic devices 88−7840
$BaTiO_3$, coherent optical images, photorefractive time differentiation 88−21302
$BaTiO_3$ double phase conjugation mirror, anal., demonstration and laser appl. 87−26533
$BaTiO_3$ imaging threshold detector using phase-conjugate resonator 87−3444
$BaTiO_3$ nonlinear phase conjugation, coherent coupling of pulsed dye oscillators 87−46964
$BaTiO_3$ optical limiters using photorefractive nonlinearities 85−51248
$BaTiO_3$, optical phase conjugation by backscattering 85−56827
$BaTiO_3$ photo refr. cryst., four-wave mixing, real-time complex field imaging through fibre bundles 85−35883
$BaTiO_3$ photorefractive crystal, self-pumped, self-pulsation and optical chaos 86−3297
$BaTiO_3$ photorefractive crystals, coherent image amplification by two-wave coupling 86−43320
$BaTiO_3$ photorefractive crystals, growth, processing and charactn. 88−1923
$BaTiO_3$ photorefractive crystals, phase conjugation with depleted pumps 85−56821
$BaTiO_3$ photorefractive fibre coupler, anal. 88−13875
$BaTiO_3$ photorefractive materials for optical processing 87−46435
$BaTiO_3$, photorefractive, optical digital logic operations by two-beam coupling 86−54201
$BaTiO_3$ photorefractive passive phase conjugate mirror for coherent coupling of diode lasers 86−54127
$BaTiO_3$, photorefractive phase conjugation, dancing modes and frequency shifts 87−39227
$BaTiO_3$ photorefractive phase-conjugating mirror for laser phase-locking 86−36561
$BaTiO_3$, picosecond photorefractive effect for optical data processing 88−65434
$BaTiO_3$, stimulated photorefractive scattering 88−58685
$BaTiO_3$:Fe, photorefractive effect, microscopic origins due to Fe impurities 86−36115
$Bi_{12}GeO_{20}$ electro-optic photorefractive crystals, degenerate four-wave mixing via shifted phase holograms 85−29922
$Bi_{12}GeO_{20}$, electrogyratory and electrooptic coupling 87−12100
$Bi_{12}GeO_{20}$ photorefractive crystal in multimode fibre generator, single-mode resonance observation 88−45091
$Bi_{12}GeO_{20}$ photorefractive crystals for NDT of phase objects by holographic interferometry 85−51296
$Bi_{12}GeO_{20}$ photorefractive materials for optical processing 87−46435
$Bi_{12}GeO_{20}$, photorefractive recording and optical processing for speckle velocimetry 88−52544
$Bi_{12}GeO_{20}$, photorefractive, two-wave and four-wave mixing for real-time intensity inversion 85−51239
$Bi_{12}SO_{20}$, photorefractive, real-time differentiation 88−46178
$Bi_{12}SiO_{20}$ PRIZ space-time light modulator, pulsed readout of image 87−38862
$Bi_{12}SiO_{20}$ crystal optical generator of spheroidal wave functions 86−9959
$Bi_{12}SiO_{20}$ crystal, phase conjugate signal at elevated temps. 87−26504
$Bi_{12}SiO_{20}$ crystals, dynamic beam deflection using photorefractive gratings 86−36116
$Bi_{12}SiO_{20}$ cubic photorefractive cryst., time-depend. holographic current meas. and calcs. 87−39247
$Bi_{12}SiO_{20}$, doping effects on electron beam spatial light modulator 85−62407
$Bi_{12}SiO_{20}$, dynamic optical processor based on holographically stored gratings 85−29956
$Bi_{12}SiO_{20}$ electro-optic photorefractive crystals, degenerate four-wave mixing via shifted phase holograms 85−29922
$Bi_{12}SiO_{20}$ grating modification in degenerate four wave mixing 85−29918
$Bi_{12}SiO_{20}$, hologram electrical development, grating writing and erasure 85−41525
$Bi_{12}SiO_{20}$ light amplifier, mode form. and competition in optical resonators 86−36568
$Bi_{12}SiO_{20}$ monocrystals, anisotropic props. of volume holographic gratings 87−47004
$Bi_{12}SiO_{20}$, moving photorefractive gratings, applications 87−68631
$Bi_{12}SiO_{20}$, optical image processing in photorefractive materials 88−40363
$Bi_{12}SiO_{20}$, photoconduction and hologram recording 88−8314
$Bi_{12}SiO_{20}$, photoinduced holographic gratings, beam steering props., optical switching *(French)* 85−7550
$Bi_{12}SiO_{20}$ photorefractive amplifier, self-induced coherent oscillations 85−29928
$Bi_{12}SiO_{20}$, photorefractive, appl. to real time edge enhancement by active spatial filtering via five wave mixing 86−69150
$Bi_{12}SiO_{20}$ photorefractive crystal, dynamic holographic grating beam steering for fibre arrays 86−42325
$Bi_{12}SiO_{20}$ photorefractive crystal, holographic grating formation 88−34161
$Bi_{12}SiO_{20}$ photorefractive crystal, polarisation props. in two wave mixing with moving grating, dynamic interferometry 86−22526
$Bi_{12}SiO_{20}$ photorefractive crystal with complex impurity level struct., holographic storage mechanisms 86−10023
$Bi_{12}SiO_{20}$ photorefractive crystals, amplified phase-conjugate reflection by four-wave mixing 85−19026
$Bi_{12}SiO_{20}$ photorefractive crystals, continuous reconstruction of holographic interferograms through anisotropic diffraction 85−29951
$Bi_{12}SiO_{20}$ photorefractive crystals, frequency shifting 86−22476
$Bi_{12}SiO_{20}$ photorefractive crystals, hologram fixing at room temp. 87−12598
$Bi_{12}SiO_{20}$ photorefractive crystals, hologram recording, interferometry, wavefront conjugation and nonstationary image processing 85−29948
$Bi_{12}SiO_{20}$ photorefractive crystals, two beam coupling under nanosecond excitation 88−20725
$Bi_{12}SiO_{20}$ photorefractive crystals, wave mixing and appls. 86−3302
$Bi_{12}SiO_{20}$, photorefractive, hologram recording, real-time defect enhancement using inversion props. 87−12621
$Bi_{12}SiO_{20}$ photorefractive liquid crystal in cross-correlator 85−36377
$Bi_{12}SiO_{20}$ photorefractive materials for optical processing 87−46435
$Bi_{12}SiO_{20}$, photorefractive, real-time optical logic 88−58296
$Bi_{12}SiO_{20}$, picosecond photorefractive effect for optical data processing 88−65434
$Bi_{12}SiO_{20}$, pulsed holography, grating form. 88−20802
$Bi_{12}SiO_{20}$ 87−12100
$Bi_{12}TiO_{20}$ crystals, holographic recording mechanism in sign-alternating electric field 88−65916

photorefractive effect continued
$Bi_{12}TiO_{20}$ photorefractive crystals as holographic recording medium for ultrasound imaging 88−72454
$Bi_{12}TiO_{20}$ photorefractive crystals, continuous reconstruction of holographic interferograms through anisotropic diffraction 85−29951
$Bi_{12}TiO_{20}$ photorefractive crystals, holographic recording, unstationary in external alternating electric field 85−41521
$Bi_{12}TiO_{20}$ photorefractive crystals, hologram recording, interferometry, wavefront conjugation and nonstationary image processing 85−29948
$Bi_{12}TiO_{20}$ photorefractive crystals, oscillating behaviour of diffracted light on illuminated holograms 88−58712
$Bi_{12}TiO_{20}$, photorefractive cubic cryst., degenerate four-wave mixing 85−24658
$Bi_{12}TiO_{20}$, spatial light modulation 86−15521
CdS, self-induced changes in refractive index at λ=532 nm 87−68632
CdTe:In, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569
GaAs, optical image processing in photorefractive materials 88−40363
GaAs, photorefractive beam coupling with picosec. pulses 87−19040
GaAs, photorefractive effects, appls. 88−51422
GaAs, photorefractive, index grating lifetime meas. 88−51951
GaAs photorefractive materials for fast updatable optical correlators 88−65406
GaAs, picosecond photorefractive effect for optical data processing 88−65434
GaAs:Cr, photorefractive behaviour using two-beam coupling 87−19041
GaAs:Cr, photorefractive two-wave mixing at 1.31 μm 88−45535
GaAs:EL2, photorefractive determ. of sign of photocarriers 85−35587
InP:Fe, optical signal amplification at 1.3 μm by two-wave mixing, expt. study 88−40327
InP:Fe, photorefractive determ. of sign of photocarriers 85−35587
InP:Fe, time-resolved photorefractive four-wave mixing, image processing appls. 86−36569
$KNbO_3$ crystals, photorefractive spatial light modulation, by anisotropic self-diffraction 88−2057
$KNbO_3$ photorefractive materials for optical processing 87−46435
$KNbO_3$ single crysts., growth and doping, dielec. and optical props. 87−53805
$KNbO_3$:Mn photorefr. cryst., nonreciprocal optical transmission asymm., photoinduced refl. grating 85−35884
$LiBnO_3$:Ti waveguides, acousto-optic interaction, thermo-optic and photorefractive effects 86−5154
$LiNbO_3$ channel waveguides, optical TE to TM mode conversion 85−18650
$LiNbO_3$ directional couplers, time depend. photorefractive effects 85−46200
$LiNbO_3$, doped, holographic recording of gratings, microphotometric investig. 87−19056
$LiNbO_3$, guided-wave optics, physical props., devices and signal processing systems 85−50956
$LiNbO_3$ laser-induced refractive index gratings, decay dynamics 85−35912
$LiNbO_3$ optical modulators, Mach-Zehnder and directional coupler, photorefractive effect 88−72161
$LiNbO_3$ optical waveguides, proton exchanged, resistivity to optical damage 86−42304
$LiNbO_3$ photorefractive crystals, light-induced scattering 86−42649
$LiNbO_3$, picosecond photorefractive effect for optical data processing 88−65434
$LiNbO_3$ waveguide optical damage meas. 85−29547
$LiNbO_3$ waveguides, guided-wave charact. and optical damage 85−29549
$LiNbO_2$:Fe photorefractive crystals, light-induced scattering 87−7455
$LiNbO_3$:Fe IR filter, highly selective holographically formed 86−2903
$LiNbO_3$:Fe, four-wave polarisation interaction in photorefractive crysts. 88−27311
$LiNbO_3$:Fe holographic gratings, erasure kinetics and spectral depend. 87−54436
$LiNbO_3$:MgO for higher power optical applications 85−35878
$LiNbO_3$:T indiffused optical directional couplers at 1.3 μm, photorefractive effect. 86−68313
$LiNbO_3$:Ti channel waveguide interferometric modulator, photorefractive effects 85−2040
$LiNbO_3$:Ti channel waveguides, photorefractive effects 86−15444
$LiNbO_3$:Ti channel waveguides, z-axis oriented, optical damage effects 87−46555
$LiNbO_3$:Ti directional couplers, photorefr. effect 85−29550
$LiNbO_3$:Ti directional couplers, photorefractive effect 85−18741
$LiNbO_3$:Ti optical waveguides, photorefractive effect during ultrashort ultrashort laser pulse propag. 86−53973
$LiNbO_3$:Ti slab waveguides, photorefractive sensitive, optical branching effect 86−22122
$LiNbO_3$:Ti waveguide modulators, characterisation of instability due to photorefractive and non-optical sources 85−2042
$LiNbO_3$:Ti waveguide, optical branching effect, near-field patterns 86−36127
$LiNbO_3$:Ti waveguide, optical damage effects, holographic meas. 86−9589
$LiNbO_3$:Ti waveguide, photoinduced light extraction with polarisation rotation 85−12614
$LiNbO_3$:Ti waveguides, fabrication by laser annealing 85−2045
$LiNbO_3$:Ti waveguides, light induced refr. index changes, holographic meas. 88−7910
$LiNbO_3$:Ti waveguides, photoinduced light extraction and polarisation rotation 85−41177
$LiNbO_3$:Ti waveguides photorefractive effect using pulsed illumination 88−7940
$LiNbO_3$:Ti waveguides, planar, photorefraction 87−46500
$LiNbO_3$:Ti waveguides, z-axis propagation and avoidance of optical damage 85−2041
$LiNbO_3$:Ti(H) waveguides, photorefractive susceptibility, charactn. methods 87−12225
Si, electro-optical switching, Kramers-Kronig analysis 88−7984
SiO_2-GeO_2 optical fibres, photorefractivity 88−33623
$Sr_{0.6}Ba_{0.4}Nb_2O_6$ photorefractive crystals, phase conjugation with depleted pumps 85−56821
$Sr_xBa_{1-x}Nb_2O_6$ photorefractive crystal, wavefront-reversing mirror characts, 87−26524
$(Sr_xBa_{1-x})_{1-y}(Nb_2O_6)_y$:Ce crysts., holographic storage, diffr. efficiency, elec. field effect 85−35925
$SrBaNb_2O_6$:Ce, broadband photorefractive props. and self-pumped phase conjugation, use as mirror 88−20734
W bronze family crystals for optical device appls. 85−12531

photoresistors
2D photosensitive array for HERMES systolic array version machine 88−40088
n^+-As/n^+−$GaAs_{1-x-y}Sb_xP_y$/n$GaAs_{1-x}Sb_x$/n^+−$GaAs_{1-x}Sb_x$ photoresistor, spectral sensitivity and gap width studies 86−27646
autocollimation focusing devices for optical systems, photoresistors used as image analyzer 87−18786
autodyne photoresistor detector 86−5323
bipolar IC image sensor using thyristor shift register *(Japanese)* 88−29435
digitisers based on multicomponent photoresistors 87−63336
distributed photoresistor struct., generalised model development *(Russian)* 88−25575
distributed structs., function synthesis using relax. phenomena *(Russian)* 88−8063
electronic mousetrap, human design using LED/photoresistor light barrier technique 85−11461
exposure time meter, bridge cct.-based with four-digit display *(Spanish)* 86−11632
II-VI multielement code photoresistors, design and charact. 87−24494
II-VI semiconductor multi-element code photoresistors, topology synthesis *(Russian)* 88−25574
II-VI semiconductor photoresistors, signal conditioning using system-technical means *(Russian)* 86−17978
III-V photoconductive detectors, gain and noise props. 85−41275
IR detector with frequency output 87−70654
light sensitive semicond. resistors and their appl. *(German)* 87−11074
microcomputer interface to photoresistor, light-level meter appl. 87−70647
moving object counting system using photoresistor detector, counters and seven-segment displays *(Spanish)* 85−20549
optical range 0.4 to 1 micron photoresistors *(Russian)* 86−14553
optocouplers, photoresistor-based *(Russian)* 86−68403
optoelectronic functional convertors, dynamic operating charact. *(Russian)* 87−38931
optoisolator, mathematical model *(Polish)* 87−12318
periodic struct. with heat sink, spatial distrib. processes *(Russian)* 85−11589
photometer, photoresistor sensor system with LED indicator 88−19424
porch light, energy-saving cct. design using light-activated switching config. 85−16410
position-sensitive for automatic focusing systems 87−11077
positive resists functional comparison by statistical design 85−45830
resistor-photon couples with diode radiators *(Russian)* 85−35633
semiconductors under transverse sweep-out conditions 85−41237
SOS photoresistors, V/A charact., laser charact. meas. appls. *(Russian)* 86−47099
spectral charact. in background-limited regime, extrinsic photoresistors 86−62851
Cd $S_{1-x}Se_x$ film photoresistor, two-coordinate photoelectric transducer appl. 85−47982
CdHgTe photoresistor and photoelectromag. uncooled 10.6 μm detectors, performance comparison 85−42999
$Cd_xHg_{1-x}Te$ photoresistors, doping effect on performance 86−20857
$Cd_xHg_{1-x}Te$ photoresistors, performance as function of doping 86−8525
$Cd_xHg_{1-x}Te$ uncooled graded gap 10.6 μm photoresistors, performance and detectivity 85−28733
CdS photoresistor for insolation meas., correlation with wind speed 87−37588
CdS photoresistor sandwich structs., CVD grown, photoelec. charact. *(Russian)* 88−8047
CdS_xSe_{1-x} multielement slotted photoresistor based electric-to-heat energy convertor *(Russian)* 85−50052
n-CdTe photoresistors, lux-ampere charact. and response time, trap effects 85−7311
CdTe polycrystalline photodetector with broad spectral range *(Russian)* 86−14552
GaAs high gain photodetectors for Raman spectroscopy 86−17983
GaAs photoconductive detectors, gain and noise props. 85−41275
$GaAs_{1-x-y}Sb_xP_y$ highly efficient fast large area photoresistor, 0.9-1.1 μm wavelength range 86−1389
Ge:Hg, Sb photodiode and photoresistor structures with injection amplification, photosensitivity, electron irrad. effect 87−18841
HgCdTe room-temperature photodetectors, heterodyne meas. of weak 10.6 cm signals 85−14810
InP:Fe short photoresistors, photoconductivity kinetics, loss of nonequilib. plasma, electric field 87−61037
PbS, thermoelectrically cooled photodetector for 0.8 to 2.5 μm band 87−56703
Sb_2S_3 amorphous films, phys. phenomena appls. in functional microelectronics 87−60114
Si:Mn based sandwich photoresistor 86−21622
Si:Zn(S) photodiodes, photosensitivity, spectra noise density 87−7219

AZ-5214 resist, diffusion in image reversal process, appl. to electron beam proximity effect correction 88−26156
AZ-type photoresists, optical consts. meas. 88−7527
azide photoresist initiator, emission spectra and exposure reciprocity 88−50764
azide-phenolic resin aq. developable deep UV/electron beam negative resist 86−1898
azide-phenolic resin composite film, thermolysis, photolysis and appl. as antirefl. layer in resist 87−53327
azide-phenolic resin resists for deep UV to visible light range 86−1902
azide-phenolic resin resists sensitive to visible light 86−1903
azide-PMMA photoresist for UV lithography 88−44713
bilayer resist system using contrast-enhanced lithography with water-soluble photopolymer 87−11910
bilevel photoresist system, comp. effect on interfacial layer form. 86−1895
bilevel resist for ion beam lithography 85−50354
bisazides for photoresist appls., thermal stability *(French)* 87−67073
blazed holographic gratings, real-time recording effects in positive photoresist 88−58697
Bragg gratings as beam splitters and beam reflectors for integrated optical systems 87−46579
brominated poly(1-trimethylsilylpropyne): a sensitive deep-UV resist for two-layer lithography 88−13242
CD technology, objective and photoresists props. effect *(Czech)* 88−15870
characterisation and optimisation using simulation computer program PROSIM 87−11887
characterisation on reflecting substrates 87−11873
characteristics of various photoresists and electron resists *(Japanese)* 85−35094
chemical modification of surfaces 88−64422
CMOS fabrication, 1 μm, using optical stepper, single layer resist systems 86−2443
CMOS gate oxide defect density, effect of source/drain ion implantation 85−34796
CMOS process, 3 μm, photoresist technique eval. 87−11969
CMOS process, photoresist profile shaping by anisotropic dry etching *(French)* 86−58618
CMOS technology, photoresist profile control when exposing with steppers 88−20123
CMOS technology, reticle sizing for optimized CD control 86−15266
contact hole generation by bi-level image reversal resist process 88−64473
contaminating particle measurements in medium-current ion implanters and recommended procedures to improve yield 85−40592
contamination resist apertures for X-ray opticalsystems 87−1360
contrast enhancement material, photobleachable cpd. conc. effect on pattern form. *(Japanese)* 88−44722
contrast enhancement material for G-line exposure 87−45736
contrast enhancement of submicron pattern profiles 88−13248
contrast enhancement processes 86−1947
contrast enhancing additives for positive photoresist 88−33100
contrast improvement of alignment signals from resist coated patterns 87−74161
contrast prediction model 86−8925
contrast-enhanced photoresists, process sensitivities 88−26112
contrast-enhancement material, simulated performance 85−50349
cresol novolac resin, diazonaphthoquinone-sulfonate negative deep UV resist 87−17871
critical dimension and profile control of photoresist images 87−6507
curcumin, positive resist dye, g- and h-line exposure, appl. for photoresists 87−74153
deep UV, evaluation of positive acting resists for lithography at 248 nm 87−38394
deep UV 2-layer resist system derived from trimethylsilylstyrene 87−11876
deep UV dyeable negative resist for CCD micro-colour filter 87−11966
deep UV lithography, dry development using olefinic polymer and ozone developing 88−7405
deep UV low molecular weight resist for lift-off metallisation 85−34874
deep UV multilayer resist process for VLSI 85−40795
deep UV photoresist, containing Si and ortho-nitrobenzylsilylether group 88−13199
deep UV photoresists, new class of resins 87−11881
deep UV resists for use in 248 nm excimer laser lithography 87−11883
deep-etch synchrotron radiation lithography, LIGA technique 88−39301
defect control using liquid particle counting 87−11569
defects caused by oxidation 88−13218
DESIRE: a new route to submicron optical lithography 87−60256
DESIRE system, silylation parameters effect on lithographic performance 87−25017
DFB lasers, λ/4 phase-shifted corrugations fabrication using positive and negative photoresists 87−46856
diamond-like C resists, excimer laser submicron etching 87−11666
diazide photoresists, charact. and formulations for deep UV lithography 85−1450
diazide/novolak photoresist film, overhang form. by chlorobenzene soak process 86−35484
diazo-type, characterisation using e-beam exposure and metal-ion-free developers 86−2269
diazo-type positive photoresists, contrast, effect of process parameters 87−11502
diazo-type positive resists, modelling depend. of photoresist contrast and linewidth on processing variables 87−11903
diazo-type resists in synchrotron lithography 86−1970
diazoketone dissolution inhibitors for deep UV photolithography 88−13240
diazonaphthoquinone compounds and diazonium salt contrast, enhanced lithography 87−38403
diazonium-phenolic resin two-layer resist system utilising photoinduced interfacial insolubilisation 88−13241
diazopolysiloxanes, positive photoresists, imageable barrier layers 87−25018
diazoquinone photoresist films, on Si wafers, Fourier transform IR anal. 87−11506
diazoquinone-based resist layers, silylation from gas phase, mechanism and kinetics 88−13254
diazoquinone/novolak resist, thermal acceleration of UV hardening 85−1455
dichromated poly(vinyl butyral) photoresist with improved stability 88−12782
diode laser, λ/4 shifted DFB corrugation, formed by spatial phase modulating masks 86−36506

photoresists continued
dip-coating method for fabricating thin photoresistfilms 86−15014
direct laser platemaking by dimethylaminobenzalacetophenone resists 86−3411
dissolution kinetics, photoproduct effects, quartz cryst. microbalance rate monitoring 86−1883
double-wafer-chuck system to facilitate rapid and accurate alignment 87−11845
DRAM, 1 Mb, yield-limiting patterned-fail mechanism 88−6866
dry development with reactive ion etching and magnetron enhanced etching 88−1550
dry etching techniques for inorganic resist processing 86−2070
dry etching using image reversal photoresists. *(Japanese)* 87−32428
dry film photoresist technology available in Europe for PWB industry 88−64082
dry film photoresists for high-density PCB fabrication 86−58143
dry film resist trimmer appl. to Mylar-Riston-Mylar lamination 85−1452
dry film resists for printed circuit board manufacture *(German)* 87−1074
dry film solder mask resists 87−6241
dual image aqueous developable thermally stable photoresist, latent image 87−18223
dye, photobleachable, as water soluble contrast enhancement layer 85−34714
dyed photoresist, myths 88−33108
dyed resist to enhance undercut angles attainable onreduction projection printers 86−58352
dyed resists for 1 micron resolution 86−21682
dyed resists for improving linewidth control over reflective surfaces 86−41646
DYNALITH resists for mid-UV appls., formulation optimisation for GaAs lithography 88−13216
DYNALITH resists for mid-UV appls., formulation optimisation for GaAs lithography 88−13279
electron beam exposure for mask lithography 88−13224
electropulse chemical machining 88−11747
entrainment pattern, elimination of subboundaries in zone melted Si-on-insulator films 88−12028
EPA 914 IR — a positive resist with built-in image reversal (IR) capabilities for ULSI technology 87−11900
erosion in Al etch plasma, spectroscopic diagnostics 88−7479
etching on Al-Si substrate in high press., low RF system, SEM study 88−7481
etching process, electron-irradiation-induced-contamination 87−45794
exposure and contrast enhancement, algebraic description 86−63142
exposure and focus scales for optical lithography 88−33104
fibre heads with photoresist lenses for optical discs 87−25924
films, ion-implanted, Fourier transform infrared spectroscopy 88−50763
films, plasma-etched depth meas. using diffr. of lamellar grating 85−12197
functional characterization of positive optical resists 87−11901
gate oxide damage in dry photoresist stripping environments 88−50746
Ge_xSe_{1-x} photoresist, Ag sensitized, Ag and by anodic stripping 86−21304
gratings on reflecting substrates interference pattern 87−2242
heavily dyed, appl. to wafer production, patterning 88−33101
high resolution positive photoresists 87−11882
high temperature post exposure bake for AZ 4000 photoresist 86−1911
high temperature stabilization of positive photoresists 85−12377
high yield process for delicate wafers 87−25024
high-density, high yield PWB imaging with dry film photoresist 85−17962
high-impact spraying for photoresist processing 87−60009
high-resolution interconnect photolithography, resist processing 88−64474
highly nonlinear resists, modelling, Bose-Einstein statistics 85−29091
Hitachi RD-2000N negative resist charactn. under electron beam exposure 88−39317
hologram, surface relief rainbow, brightness, S/N and contrast for embossing master 86−3373
holograms, large-format embossed, mass replication 86−3372
holographic grating arrays, recording and large scale replication using multiple beam interferometry 85−35908
holographic grating recording with photoresist AZ-1350 J *(Spanish)* 85−56871
holographic image projection, high-resolution, using visible and UV lasers, photoresist recording 88−45558
holographic micropattern recording and replication, photographic emulsion grain ordering in film systems 88−8315
holographic photoresist under pulsed laser radiation in the blue and UV, behaviour 88−34152
holograpic gratings, phase-shifted quarter micron by selective image reversal of photoresist 88−51949
HPR/PMMA bilevel resist system 88−19891
i-line lenses for submicron lithography 88−1580
i-line lithography for VLSI and ULSI appls. 87−11542
IC antennas on thin membranes 88−21025
IC fabrication, two layer planarization process 86−21416
IC fabrication and inspection, conf., The Hague, Netherlands (April 1987) 88−18307
IC fabrication appl. 87−11184
image hardening using conformable mould, appl. to portable conformable mask bilayer system 87−67049
image projection for high resolution photolithography 88−2409
image reversal photoresist, ST-A-R process 88−57558
image reversal process for lift-off technology 88−13267
imaging science, conf., Chicago, IL, USA (Sept. 1985) 86−61833
implantation mask fabrication for 16 Mbit bubble memories 87−25871
implanted ion profiles in AZ111 photoresist 87−1389
in-line automatic photoresist process control 86−2283
integrated optical chemical vapour microsensors 88−74378
integrated optics, laser beam photolithographic fabrication 86−9611
integrated optics devices, photoresistive periodic structures *(Russian)* 86−9605
integrated-optics devices, photoresistive periodic structures, corrugation shape investigation *(Russian)* 86−15513
interferometry appl. to photoresists characterisation 86−53522
ion beam lithography, masked, photoresist profiles, mask scatt. effects 85−45756
ion implantation, high current, photoresist outgassing, FTIR and residual gas anal. study 87−11622
ion implantation outgassing, quadrupole mass anal. 86−35533
ion implanters, electrostatically scanned, five lockup pattern detection, diagnostic technique 87−74184
ITREM inland photoresist for PC production *(Polish)* 88−12788

photoresists continued
Josephson integrated circuits, advanced lift-off planarisation process 88−65009
Kodak 809 on PMMA two layer resist for plasma etching 87−11908
Langmuir-Blodgett films, lithography resists, excimer laser, X-ray and electron beam exposure 88−57544
Langmuir-Blodgett films for 0.5 μm lithography using KrF excimer lasers and X-rays 88−13245
Langmuir-Blodgett resists for excimer laser and X-ray lithography *(Japanese)* 88−44711
laser high-power UV radiation evaporation appls. 88−27256
laser repair of transparent microfaults in IC photomasks 87−45742
laser RIE process for etching of organic materials 85−6833
lift-off process for the fabrication of thin filmmetal lines with small line-width 86−53730
linewidth control, effect of diffuse refl. 88−13259
linewidth control and meas. 86−21336
linewidth control in optical projection printing, influence of resist parameters 86−1904
linewidth control in photolithography positive resist, anal. mode 85−29093
linewidth meas. on 1 μm geometry process wafers using fluoresc. 85−29240
liquid photoimageable solder masks 88−38896
liquid photoresists for fine line imaging 88−25692
lithographic materials for semicond. processing 86−1942
LMR and LMR-UV, formation of thick narrow-spacing metal patterns by lift-of technique 86−21680
mask, ion implanted, formation of carbonised layer 85−40599
mask for B plasma doping into the side-wall of a sub-0.5 μm width trench 88−19801
material evaluation, quality parameter meas. using photoresist evaluation equipment *(Japanese)* 87−74166
membrane model for positive photoresist development 87−11888
metal lift-off process development and optimisation 87−25165
metal-ion-free developers, dissolution rate studies during various modes of automated spray development 86−1909
methacrylate resin and polysilane photoresists. for VLSI memory device fabrication 85−23854
methacrylate silicone-based negative photoresist for highresolution bilayer resist systems 86−35520
methacrylated silicone based negative resist for high resolution two-layer resist systems 85−34701
methylacrylate with methacrylic acid copolymers, sensitivity to short-wavelength UV radiation 85−50356
microelectric photoresists, uncoated, SEM inspection, low-loss electron images 87−6769
microlithography, novolak calibration method applied to the GPCanalysis of the UV photoresists 86−53742
microlithography materials, sensitivity, quantum chemistry 88−7415
microplastic structures at micron scale 87−11879
Microposit 1350 H, reactive ion and plasma etching in parallel-plate reactor study 88−39200
Microposit 1350 H positive photoresist, etch rate 88−57464
Microposit 1400 resist patterns, UV hardening with XeCl excimer laser 87−25022
Microposit 2400-17 resist profile simulation for 0.5 μm photolithography at 248 nm *(French)* 87−67072
microroughening permanent resist by a photo method for bondability improvement 85−34735
microwave plasma etching in air and O_2 in VLSI production 87−60344
molded deep-UV portable conformable masking system 87−17872
monodisperse Si-containing photoresist for abilayer system 86−53513
MOS LSI, field-isolation technology employing lift-off patterning of sputtered SiO_2 films 85−18463
MOSFETs, X-ray residual radiation damage 86−58356
mould controlled profile technique 88−13262
MRS-type negative resists, characts. and deep UV projection printing appl. 85−1445
MSA VLSI, trench isolation technology with novel planarisation 88−39725
multilayer resist, image enhancement by UV hardening, soft vac. pulsed electron beams, and organometallic cpds. 88−26151
multilayer resist, reactive ion etching 87−67126
multilayer resist processing update 86−21701
multilayer resist system for submicron lithography, contrast enhanced reflectionless process 88−19895
multilayer resist systems for optical and e-beamlithography 86−8947
multilevel, organosilicon novalac resin based 85−35048
multiwafer resist stripping system design 86−58371
negative, based on dichromated gelatin *(Japanese)* 85−61561
negative deep UV resist *(Japanese)* 85−61591
negative deep UV resist for 248 nm lithography 88−57525
negative photoresist, high performance, for microlithography 86−2285
negative photoresist used as dielec. in hybrid ccts., characts. study *(Hungarian)* 88−12857
negative plasma developable resist with high resolution 86−2077
negative resists, contrast and cross-linking rel. to radiation wavelength 85−23621
negative resists, struct. profile study 87−25021
negative thin film resist, characterisation by photo FT IR 88−64434
negative tone high resolution photosensitive polyimide precursor 87−44414
negative UV photoresist NUKL 1 *(German)* 88−7181
negative X-ray resists based on phenolic resin, acid generator, and crosslinker 88−26159
negative-acting aqueous base-developable photoresist with submicron resolution capabilities over topography 88−13278
nondestructive sectioning for SEM inspection 88−13291
nonlinear resist materials, exposure bleaching 87−74147
novolac resin film, positive photoresist, dissolution kinetics 88−13258
novolac resin photoresist based high dry etching resist. portable conformable masking 88−13272
novolac resin-type high performance positive photoresists 86−35523
novolak, silyl ethers for trilevel and bilevel resist systems 86−35519
novolak based multilayer systems, use of azo dyes 87−25020
novolak design for high resolution positive photoresists 88−13251
novolak resin positive photoresist, pattern profile *(Japanese)* 88−71469
novolak resist patterns, UV hardening 86−1977
novolak resists, deep UV and thermal hardening 88−13273
novolak-based photoresists, DSC anal. 87−53623
novolak-based photoresists, glass transition temp. effects 86−1976
novolak-based positive resist for X-ray lithography, kinetics and simulation 88−26164

photoresists continued
novolak-based positive X-ray resist with high X-ray sensitivity 87−25008
novolak-based resist systems for submicron optical lithography, develop. induction mechanism 88−13271
novolak/diazoquinone photoresist, reciprocity failure with 364 nm exposure 88−26111
N-octadecylacrylamide Langmuir-Blodgett multilayers, ultrathin resists fabrication 88−26174
optical lithography, high resolution linewidth control 87−11560
optical microlithography, new materials 88−7407
optical positive resists exposure and development, process control 86−1885
organic resists, dry photoetching rate, thickness dependence 87−11656
organosilicon novolac resin, synthesis and lithographic charactn. 87−11878
organosilicon novolac resist, reactive ion etching and lithographic charactn. *(French)* 87−67130
organosilicon photoresist for use in excimer laser lithography 88−44724
organosilicon photoresist for use in excimer laser lithography 88−26149
organosilicon polymers in multilayer plasma resist processing 88−26080
organosilicon positive working photoresists 88−19894
organosilicon resin photoresist family 88−13244
PCB, dry film resist stripping 87−60010
PCB, photoresist, solvent versus aqueous dry film 85−40351
PCB, process latitude of aqueous resist in print and etch processes 85−40349
PCB aqueous resist stripper filter 86−1538
PCB direct data imaging experience 88−71202
PCB electrostatic coating of photoresists 86−62924
PCB fabrication, automation of plating, strip, and etch processes 86−67594
PCB fine-lining photoresist 87−53009
PCB laser direct photoplotting without aperture wheels 85−40319
PCB photoimageable resist liquid solder mask debubbling system solves board processing delay problems 88−38897
PCB photoresist, residual, Cu bondable surface, visualizing technique 85−28812
PCB phototool handling 87−11242
PCB polyacrylate-based photoresist lamination, influence of substrate thickness and preheat on adhesion and dimens. stability 86−62917
PCB strip solution evaluation 87−60007
PCB surface prep. for dry film photoresist lamination 88−64103
PCBs, performance evaluation of aqueous resist strippers 87−60008
Permalloy magnetic bubble devices, reactive ion etching planarization process 85−56131
peroxopolyniobotungstic acids, spin-coatable inorganic resists for bilayer lithography 88−13200
phenol formaldehyde resist, plasma etching appl., comparison with electron resist *(Czech)* 88−13122
phenolic high temp. positive photoresist for refl. topography and sputter appls. 86−1892
photoimageable polyimide: a dielectric material for high aspect ratio structures 87−11895
photolithography, excimer laser applications 87−6519
photolithography, resist materials 87−6509
photon, ion and electron beams, Int. Symposium, Tarrytown, NY, USA (May-June 1984) 85−27917
photoplotter−a drawing tool for PCB design *(German)* 88−71179
photoresist computerised electron beam linewidth measuring and inspection 85−1726
photoresist gratings with high aspect-ratio 88−65882
photoresist removal by afterglow oxidation for productivity enhancement 87−11663
photosensitivity and contrast determ. by laser interferometry 85−23618
photosensitivity values, use in maintaining crit. dimensions 87−17867
photostructural material processing, negative image form. 88−13260
piezoelectric substrate interface, real-time characterisation 86−53502
planarisation by thermal cure, role of photoactive cpd. 87−38019
planarisation properties of the SCR 17 photoresist *(Czech)* 88−57520
planarised oxide with sacrificial photoresist, etch rate sensitivity to pattern density 87−67138
plasma etching, role of N_2O in CF_4+N_2O plasma etching 86−21433
plasma polymer surface adhesion modification method 85−28832
plasma stripping, heavy metal contamination 88−57526
plasma tailoring for high performance low noise GaAs mixer diodes 86−1913
plasma-polymerised, X-ray imaged pattern development by H_2 plasma etching 85−1435
plasma-polymerized dry-developable resist for synchrotron radiation lithography 87−60229
plasmon optical discs, volume production 86−42216
PMMA, acrylic acid calcium acetate modified, enhanced plasma etch resistance 87−38390
PMMA, exposure in bilevel resist processing using deep UV source 87−67050
PMMA, radiation induced graft lithography, optimisation of solvent development 86−35518
PMMA, scanning ion beam lithography appls. 85−23922
PMMA bilayer resist., laser writing 85−50345
PMMA bilayer resist systems, commercial dye charactn. 88−19893
PMMA containing a bisazide cpd., photosensitive UV photoresist 88−57548
PMMA films, irrad., ESR study 86−1978
PMMA films, X-ray lithography with synchrotron radiation, photoelectron and Auger electron prod. 86−8923
PMMA on Si, X-ray lithography exposures, Monte Carlo simulation 85−34710
PMMA photoresist spin coating mechanism related to polymer solution to rheology 88−26154
PMMA plasma polymerised films, X-ray resist characts. *(Japanese)* 86−1917
PMMA positive resists, dissolution characts. 87−74158
PMMA resist heating in excimer laser lithography 88−33096
PMMA resist sublayers, contact printed, image form. 85−18415
PMMA resists, for recessed gate GaAs MESFETs, poly(2-vinylpyridine) adhesion promoter 86−58355
PMMA synchrotron radiation X-ray lithography system, design parameters simulations *(Japanese)* 86−15188
PMMA X-ray resist, dissolution characts. 88−33087
PMMA-azide modified photosensitive resist, azide conc. depend. 87−53328
PMMA-bisazide photosensitive deep UV resist 88−26152
PMMA-maleic anhydride positive resists, dissolution characts. 87−74158
PMMA/polymethylacrylic acid bilayer UV resist system, resolution and reproducibility 87−11852

photoresists continued
point-of-use photoresist filtration, practical appl. and economics 85−6778
Polaform process, holographic embossing at Polaroid 87−12611
poly(alkyl α-cyanoacrylates), positive X-ray resist for microlithography *(French)* 85−29107
poly(alkylmethacrylate) ester:F, positive X-ray resist for microlithography *(French)* 85−29107
poly(chloromethylstyrene) X-ray resist characterisation by monochromatic synchrotron radiation 85−1628
poly(glycidyl methacrylate), negative resist cross-linking in X-ray lithography 85−55631
poly(n-butyl α-cyanoacrylate), highly sensitive and high contrast resist for lithography 87−67032
poly(p-hydroxystyrene), selective gas-phase reactive microlithographic system, mechanistic study 88−13253
poly(p-hydroxystyrene) positive photoresist, dissolution behaviour, comparison with novolac 88−13256
poly(p-methylstyrene-co-chloromethylstyrene) resist for electron and optical lithographics 85−34718
poly(p-vinylbenzoate) based positive/negative mid UV resists with high thermal stability 88−13243
poly(trimethylsilylmethyl methacrylate co-chloromethyl styrene), prep. and lithographic props. 87−11874
poly(trimethylsilylmethyl methacrylate-methacrylic acid)-nitrobenzyl cholate, bilevel, solution inhibition deep UV resist system 87−60227
poly-2-methylpentene-1-sulfone, X-ray resist, spectral sensitivity by X-ray excited ion mass anal. 85−34695
polyallyl methacrylate-polypropargyl methacrylate copolymer negative-working resists 86−1899
polyaromatic negative resist material *(Japanese)* 85−18196
polybutadiene dielectrics, cyclized, thermal and mech. props. *(French)* 87−65585
polycyanoacrylate films for electron beam/deep UV resist appls. 88−64465
polydimethyl glutarimide, dopant-induced ablation by 308 nm excimer laser 88−39334
polydimethylglutarimide resist, progress report 87−11909
polydimethylglutarimide-based aq. developable bilayer resist system 86−1896
polyhexafluorobutylmethacrylate plasma polymerised films, X-ray resist characts. *(Japanese)* 86−1917
polyimide, high resolution high photospeed, for thick film appls. 87−1374
polyimide, photoimageable dielectric material for high aspect ratio structures 87−11895
polyimide, photosensitive, for advanced electronic devices, material and processing technologies 88−19864
polyimide films, microwave plasma etching, anisotropy rel. to ion energy 87−25120
polyimide high resolution ion implantation masks, thin film surface morphology and dielec. props. study 87−38074
polyimides, applications in IC fabrication and packaging cycles 85−23607
polymer chemistry in the electrical industry 86−34406
polymer film, AZ111 photoresist, Bi ion implantation, range measurements and thermal stability 88−64438
polymer film photoresists, photoablation using synchrotron radiation 88−39333
polymer films plasma etching, behaviour, book contrib. 88−7676
polymer films X-ray irradiated, latent image development by photoetching in VUV 86−21296

design and appls., book 86−61432
design considerations and guidelines 87−9430
design criteria for solar energy systems 87−42714
design of systems for Third World countries 88−17438
direct coupled system with PV module coupled to DC motor 88−17453
direct coupled water pumping system, optimum design 87−15607
direct-coupling PV system, solar cell generator load matching 88−30613
dispersed PV generators, effect of moving clouds in utilities 88−30616
dispersed PV systems, interfaces to distrib. networks, invertor control 88−37100
dissemination in developing countries, marketing strategy 88−17452
distributed photovoltaic system, utility interface problems 86−6617
distribution feeder photovoltaic prototypes, utility interactive, harmonic characts. 86−51525
distribution network incorporating photovoltaic systems, testing and fault protection 87−9441
DOE goals for 21st century 86−39630
drinking water and crushed ice prod. using 25 kWp photovoltaic system 88−17464
dual series resonant convertor for photovoltaic utility interface, design and simulation 87−72270
Duncan Mountain project, microwave and radio communications facility powered by hybrid power generation system 87−30469
Dutch PV industry appls. 88−17959
dynamic optimal coupling to induction motors 88−23795
dynamic solar systems in spacecraft power supplies, Cassegrain reflectors *(German)* 88−30122
economic evaluation of stationary, tracking and concentrating designs, South Florida project 86−39642
economics, cost competitive prospects 85−53623
efficiency, solar cell max. power output using impedance matching 'Maximiser' 88−11148
efficient exploitation of photovoltaic electricity 86−12746
Egyptian desert solar cell system transient performance with variable inductive load 87−42735
Egyptian photovoltaic solar module assembly techniques for reparability 86−45680
electric power systems, value of photovoltaic generation estimation 87−9434
electric utility connected photovoltaic system, rating methods 87−9436

photovoltaic power systems continued
electrical design guidelines for photovoltaic/thermalsystems 86−7123
electrical subsystem design practice, recommendations 88−37107
electricity cost of photovoltaic cells in South Africa 87−64477
electricity generating solar systems, improved matching of daily solar insolation and electrical peak demand 85−32396
electricity generation by solar thermal and photovoltaic utilisation, development and prospects *(German)* 86−45251
electrochemical energy storage in photovoltaic systems, DELPHOS installation *(Italian)* 88−43098
energy and power methods for photovoltaic plant anal., comparison 85−48904
energy and precision characts., system using voltage regulator with partial shunting 87−30433
energy collection comparison for several photovoltaic panel systems 86−6640
energy conversion chain, study and implementation of photovoltaic-electrochemical system *(French)* 85−38933
energy conversion engineering, conf., Miami Beach, USA (Aug. 1985) 86−26492
energy generation prediction for residential photovoltaic arrays 87−4630
energy production and costs, influence of solar cells *(Finnish)* 87−58329
energy rating meas. using JRC multi-intensity simulator 87−9426
energy system for television antennas telecom 88−30619
energy system for UHF/VHF radio repeater base stations, Canada 87−30452
energy-feed systems for satellite devices, photovoltaic generators with solar radiation concentrators 86−51902
engineering design and construction, system experience 86−6643
engineering methods and integrated approach to balance-of-systems 86−45262
EURECA space platform power supply system *(German)* 87−71187
European Commission photovoltaic pilot plant acceptance test conclusions inspection testing lightning protection 86−19166
European Communities' photovoltaic pilot plant acceptance testing and monitoring 86−45274
European Communities' photovoltaic pilot projects, inspections and performance meas. 86−45273
European Community R&D programme for photovoltaic systems 88−24145
European photovoltaic demonstration programme, appls. of solar power 88−62276
European pilot plants, operational status 87−42720
evaluation in large electric utility system 87−15610
Federal Photovoltaic Research program, connection of photovoltaic cells into electricity grid 87−42724
Federal Photovoltaic Utilization Program status report 86−6626
field power loss and induced failure dependences 86−45684
field test demonstration projects in Egypt 86−45295
field test performance assessment status report 86−51530
film solar high-voltage sources 86−26284
fire resistant photovoltaic module materials development 87−9829
fixed and step tracking photovoltaic arrays, power output eval. 86−65991
flat photovoltaic panel operating temp. calc. and expt. 86−45687
flat plate modules, comparative study of different orientations 88−62266
flat plate modules in California, field perform. 88−37111
flat-plate photovoltaic module and system price projections 86−45695
flexible photovoltaic testbed construction and test results 86−45686
Fota Island (Eire) 50 kWp photovoltaic array field experience 86−45276
French photovoltaic program, 1982-6 86−7122
French photovoltaic programme 88−24146
French Polynesian development 86−45282
French standards for PV and energy storage systems 88−30618
fresh water supply photovoltaic pumping station in Italy 86−19687
Fresnel lens point focusing photovoltaic modules, design and perform. characts. 86−12749
future prospects, systems experience 86−6647
general model of power processing contrib. 88−5614
generation system, construction, research and development 88−17470
generation technology development and evaluation *(Japanese)* 86−51528
generations system simulation model, solar energy in USA 86−12739
generator, system sizing 87−15604
generator-PWM invertor-induction motor maximum power point tracking 87−43018
generators, I-V charact. measurement unit and procedure 88−11147
generators, markets in telecom., lighting and village power plants 87−51111
generators for radio communication systems in Jordan 88−75520
generators in space, 5th European Symposium, The Hague/Scheveningen, Netherlands (Sept.-Oct. 1986) 87−72710
Giglio Island photovoltaic water purification and cold storage system 86−19685
Greek combined combined solar photovoltaic and wind power generation 87−57965
Greek solar and wind power developments 87−51122
grid connected photovoltaic plant TISO 15, performances 86−45300
grid connected photovoltaic systems, system economics 86−6627
grid connected PV plants, performance comparison 88−17457
grid connected PV sources, control and stability 88−30614
grid connected solar PV system, decentralised relief of grid 88−17461
grid-connected, residential, operating performance 86−6659
grid-connected, Tennessee Valley Authority's experiences 86−39636
grid-connected photovoltaic power plant performance analysis and simulation 86−45279
grid-connected privately-owned photovoltaic systems in Tennessee Valley, economics 88−37109
grid-connected residential photovoltaic system in Germany 86−39646
grid-connected systems, utility compatibility of nonisolated residential power conditioners 88−37106
grid-interactive residential power conditioners, islanding experiment test results 87−9432
grid-intertie systems, generalised capacity factors 88−48820
groundwater pumping and desalination by photovoltaic power system using brushless DC motors 85−53614
harmonic distortion propagation in distribution systems with utility interactive photovoltaic systems, simulation program 88−17129
Hawaii Natural Energy Institutes photovoltaic program, solar database and device testing 87−30440
HF link inverter for photovoltaic residential appls. 86−61603
HF link utility interfaced photovoltaic power convertor with invertors and rectifier 87−51110
high power needs for commercial satellites 87−30437
photovoltaic power systems continued
high power photovoltaic arrays, convertor configs. to meet utility interface requirements 87−30456
high temperature solar receivers, process and control design, integrated approach 85−43899
high voltage power supply with integrated photovoltaic cell array for satellite-borne instruments 88−75744
high-efficiency cell materials and designs, R&D progress in US photovoltaic program 86−40129
high-efficiency solar thermophotovoltaic cell development 86−61749
household electric supply generation using solar cells, computer-aided economic anal. *(German)* 88−62257
household photovoltaic power plant care and enhancement 86−12745
houses powered by photovoltaic power plants, thin-film solar cells 88−62275
hybrid active/passive solar house, for Third World countries 85−60076
hybrid photovoltaic array and aerogenerator system performance evaluation 86−45261
hybrid photovoltaic-diesel power system design 87−4639
hybrid photovoltaic-photothermal solar conversion system with cogeneration 87−30443
hybrid photovoltaic-wind system for railway level-crossing 86−45301
hybrid photovoltaic/diesel generator stand-alone power supply, microprocessor-based controller 86−45305
hybrid power systems with source switching control for telecomm. equipment appl. 88−30630
hybrid PV systems for total solar energy 85−65184
hybrid PV-fuel cell energy system, feasibility study 88−49121
hybrid renewable and nonrenewable energy source systems 86−12758
hybrid solar energy conversion systems, liq. and thin-film filters 87−51100
hybrid solar systems using solar thermal, photovoltaics and wind energy 87−42719
hybrid solar-wind electric power supply for H_2 generation 88−23820
hybrid wind-solar electrical supply systems, simulation and optimisation w.r.t. energy pay back time 88−62264
hybrid wind/photovoltaic power plant, aerogenerator development and appls. 87−22192
hybrid wind/photovoltaic/diesel power system for radio repeater site, case study 85−65191
ice-making machine without compressor buffer battery 86−45836
IEC, ASTM, and IEEE standards 87−30446
IEEE standard for interconnection interface of electric utilities and PV power systems 88−48503
IEEE standards for utility grid and photovoltaic power system interconnection 85−53628
Impact 2000 house for demonstration of energy technologies 85−53611
Indian PV systems using battery bank cycling 88−37102
Indian solar PV programme for rural develop. 88−37119
Indian stand-alone rural photovoltaic solar energy centre design, construction and operation 86−45284
insolation availability and peak demand matching at 6 MW photovoltaic facility 87−4633
insolation data characterisation for anal. models 88−30612
installation in Noto village, Senegal 88−17460
instantaneous load data for system performance prediction 86−6638
integrated cascade of photovoltaic cells as power supply for ICs 85−10960
integrated photovoltaic central station conceptual design, cost efficiency 86−6656
integrated technology advanced power system 87−42182
INTEL 8748 based PWM system for synchronous motor PV tracking system 88−43174
interconnected power systems, effects of photovoltaic power generation 85−43900
interconnection protection between photovoltaic generators and utility distribution lines 87−9442
interconnection requirements from utility perspective 86−6616
intermediate sized projects, operation and maintenance 86−6629
intermittent photovoltaic energy systems introduction into distribution systems, microcomputer aided evaluation of impact 86−6664
international photovoltaic projects evaluation 86−45296
international PV projects for remote area appls., eval. and financial anal. 88−37112
inverter/battery combined power conditioning, dynamic charact. anal. 87−9437
invertor, optimal, for Spanish market 86−6911
invertor circuit for photovoltaic energy feedback into public grid 86−51749
invertor effects on efficiency and reliability, meas. system 87−78557
invertor performance comparison for small grid-connected photovoltaic systems 86−45269
invertors and thyristor switching for power conditioning 87−9438
Irish solar energy potential and development work 86−33205
irrigation area optimisation for PV pumping station 88−43386
irrigation systems operated by photovoltaic energy, implementations *(Spanish)* 88−6077
irrigation well pumping systems photovoltaically powered, survey results 87−42727
Italian photovoltaic R&D programme 88−24148
Japanese 1 MW centralised power plant 86−6634
Jebel Ali Hotel PV lighting systems 86−6637
large scale systems, performance evaluation 86−6639
large solar power systems, generic approach to shading effect of collectors 87−72064
large-scale photovoltaic energy system demonstrations and future needs 86−45281
leakage currents from photovoltaic modules, temp. and moisture effects 87−9831
load matching, ohmic and storage battery loads 88−17458
long-term average performance predicting method 85−48903
long-term manned space station power system selection criteria 86−32468
long-term performance prediction, analytical models 87−15599
loss-of-load probabilities for stand-alone photovoltaic systems 88−23796
low cost modular 30 kW photovoltaic array, cost and performance testing 86−7103
manufacture in developing countries, economic infrastructure establishment 86−40100
manufacturing facility simulation and cost anal. 87−22759
Mariner Mark II space vehicle power plant, solar cells avoiding LILT degradation 88−36630
marketing and appls. in developing countries 87−42736
maximum power point trackers, general model 86−33703

photovoltaic power systems continued
microcomputer control of residential photovoltaic power conditioning system 86−12742
microcomputer controlled direct adaptive coupling of photovoltaic generators to pumping systems 86−33702
microcomputer model for photovoltaic energy system performance analysis 87−22184
microcomputer-controlled simulator of a photovoltaic generator using a programmable voltage generator 87−15600
microprocessor control 86−6657
microprocessor controller for space vehicle photovoltaic power system 85−48417
microprocessor-based power controller design and evaluation for autonomous photovoltaic systems 86−45272
microwave radio repeater station power supplies, solar photovoltaic systems appl. 85−8314
microwave repeater stations, power demand reduction, strategic pursuing by Telettra *(Italian)* 85−20050
microwave repeater stations, solar power appl. 88−37096
military applications 86−45696
military space vehicles, solar power requirements 85−64673
Mississippi County Community College in Blytheville, Arkansas, USA, solar expt. 85−15944
mobile communication system appls., use of Ni-Co batteries 88−43368
mobile radio remote base station hybrid power generator, photovoltaics and thermoelectric 88−5600
mobile solar energy H_2 generating system 87−42728
modelling codes verification based on system experiment data 86−6662
module and array evaluations flat plate and concentrator design 86−13063
module and cell scene worldwide 86−40105
module performance assessment 86−51915
module string hot-spot detection with mirrors, ammeter and voltmeter 86−45691
module testing by nondestructive holographic interferometry 86−45690
module testing in Finland *(Finnish)* 86−45678
module tests executed by EX Joint Research centre to EUR specifications 88−17443
modules, test field for long term performance and energy rating study 88−17469
modules and arrays, outdoor testing 88−17466
mountain nut power supply from solar cell installation *(German)* 85−48894
multiobjective stochastic linear programming appl. 85−48556
multistring modules in central-station application, hot-spot susceptibility 86−6623
nameplate power and efficiency ratings, advertised versus actual performance 87−30447
NASA's space vehicle energy program, energy conversion and storage 85−48431
NASA manned space station hybrid photovoltaic and solar thermal power system design 87−15017
NASA manned Space Station power system development 87−77798

Paomia Rondulinu PV plant, instantaneous and long term meas. for merit figures 88−17442
parabolic cylinder solar concentrator modification for uniform flux 86−40080
parabolic dish concentrator with 24 kW Stirling engine power conversion unit 87−15602
performance, empirical model 88−43103
performance and costs, comparison with wind and small hydro power generation 86−6649
performance modelling using PVFORM 87−15605
performance of photovoltaic power systems, environmental factors, expt. studies 87−64481
permanent magnet synchronous machine fed by photovoltaic generator, 3-phase MOSFET invertor 88−69343
photoelectric-station module, expt. charact. 87−51456
photovoltaic and thermal concentrator system with linear Fresnel lens at DFW airport, performance 87−9428
photovoltaic array energy utilization factor 87−15612
photovoltaic power generation, 1987 review 88−43102
photovoltaic pumping system using commutated synchronous machine, optimal functioning, anal. *(French)* 88−69225
photovoltaic solar energy conf., Sevilla, Spain (Oct. 1986) 88−11589
Photovoltaic Specialists Conf., Kissimmee, USA (May 1984) 85−60662
photovoltaic water pumps, performance, reliability and maintainability 87−9423
photovoltaic/utility interactive system, utility power waveforms 86−6652
photovoltaic/wind hybrid systems, performance simulation, optimal system sizing and busbar costs 87−4631
photovoltaics, conf., New Orleans, USA (May 1987) 88−24349
photovoltaics for electric power appls., technology assessment 87−4889
Photovoltaics for Utility Scale Appls. Project 88−37116
pilot plant monitoring data for installation performance, usefulness and reliability 88−17444
photovoltaic power systems continued
pilot plant of Isola del Giglio, Italy, perform. anal. 88−23800
Platte River Power Authority eval. of PV systems, tracking and tilting 88−23806
point-focus Fresnel lens concentrator photovoltaic system 86−39637
polar axis tracking with bifacial solar panels 86−45267
polygon concentrator with discontinuous optical surface, photovoltaic power system appl. 87−9427
power conditioner subsystems for photovoltaic power systems 85−53627
power conditioners, performance evaluation 86−6654
power conditioning and conceptual design of photovoltaic hybrid systems 88−69229
power conditioning for photovoltaic power system and utility grid interconnection 85−53629
power conditioning in a solar energy system with microprocessor control 87−30455
power conditioning subsystems for photovoltaic central station power plants 86−56667
power conditioning system for HF utility interfaced PV system 88−37093
power output prediction using sub-hourly solar irradiance forecasting 88−37097
power sources for remote telecommunications equipment 87−43186
power supply for microwave relay in France, photovoltaic diesel engine generator, optimisation and economics 87−30454
power supply for remote communications centres, load models 87−30453
power supply technology telecommunications appls. conf., Stockholm, Sweden (June 1987) 88−24342
power supply to meteorological station in Swiss Alps, economic operating experiences *(German)* 88−43096
power technologies for the 1990s, cost and performance 87−50655
pre-electrification in rural areas using PV electricity for domestic and community appls. 88−17435
product design, solar electric devices 87−74931
prototype residential systems, development and operation at the Southeast Residential Experiment Station 86−6660
pseudo maximum-power-point tracker 86−6618
pump storage systems, selection criteria 86−40187
pumping stations, photovoltaic, adaptation and control technique for automatic optimal control *(Italian)* 88−30624
pumping system based on induction motor driven pump, optimisation 87−42732
pumping system for medium head pumping 87−15609
pumping system for water supplies in tropical countries 87−51103
pumps, evaluation methodology, development and appl. 86−45294
PV concentrators for large PV power systems 88−37099
PV-mechanical generator power sets for remote areas, economic advantages 88−23811
PV/diesel hybrid stand-alone system design 88−37104
PVXPRT expert system for PV system technology transfer 88−17462
PWM double forward invertor module for grid-connected photovoltaic systems 86−45268
qualification testing for a central station 86−6632
R&D programme for photovoltaics in European Community 86−40104
radio stations, solar powered 88−5602
railway flashing light units, solar panel power supply config. *(German)* 87−42721
recent developments 86−6646
reflector augmentation of fixed polycrystalline arrays 86−6633
refrigerators and lighting systems for Zaire 86−45837
reliability in sizing and design, user's guide 87−4629
reliability of operation and power conditioning hardware 87−9433
reliability problems and test conditions 86−45263
reliability studies and failure impact simulation 86−45304
remote household power supply, high efficiency invertor using power MOSFETs 85−48896
remote hybrid power systems for telecommun. 87−43215
remote microwave repeater powered by PV energy systems 88−28687
remote microwave repeater stations appls. 87−28389
remote rural areas, solar energy appls. 88−37120
remote telecommunication installation, photovoltaic power system design 86−61439

CT, SRT-1000 series, scanning system design features 88−36441
data acquisition and control of physical expt., modular system 87−70479
decomposition study instrument 87−34942
digital controller for a magnetic suspension system 87−2279
digital optical profiler, three-dimens. noncontact, development and applic. to mag. media 86−65120
digital stabilization of multichannel gammaspectrometer 86−18264
diode compact linear array external cavity laser, wavelength control 87−26455
dye laser, single-mode, 100 cm^{-1} scan range 85−56576
dye laser system, high resolution computer controlled 87−12413
dye lasers, pulsed or CW tunable, wavelength stabilisation and control 88−2183
electro-oculographic system, automated, for retina pot. investigs. 86−18344
electrochemical probe with chromoamperometric controller for dissolved O_2 concentration determ. 88−74339
electrodynamic drive of Mossbauer spectrometer, controller design 87−29689
electron accelerator, linear, RF characts. control 86−70270
electron beam evaporation synthesis of multilayered materials, mass spectrometer controlled 86−52523
electron microscope astigmatism and defocus correction, using image histogram 86−41496
electron microscopes, Philips series, low dose microscopy facilitation 87−66861
electron synchrotron, automatic orientation system for single-crystal targets 86−50297
eye examination setup, OAP-311, rational refraction system 87−8909
eye refractometer, open view automatic, design 85−4307
eye refractometer, semiautomatic, with TV monitor, one-position meas. of ametropia 85−4308
eye refractor, objective, microprocessor-assisted 85−4309
Finnigan MAT 90 automated magnetic sector mass spectrometer 87−41318
force vectorballistocardiograph, computer-based, design and eval. 87−63722
FTIR spectroscopy nondestructive analysis of mag. disc surfaces 87−25849
function generator for controlling the magnet power supplies of a superconducting spin synchrotron 88−607
goniophotometer, automated moving arm, for measuring the spatial distribution of light sources 87−70637
grid control for electron guns in electroionization lasers 87−75193
gyroscope, fibre optic, closed loop, electronics subsystem 87−68145
gyroscope, passive ring laser in very high finesse cavity, laser feedback control system 87−68556
Heathkit Most Accurate Clock, digital cct. for more accurate time determ. 86−62658
heterodyne holographic interferometry, phase-stable AGC 86−63883
industrial lasers, power output control, calibration system *(Russian)* 86−36540
insertion device Beam Line Wunder design at SSRL 87−29414
ion laser, I_2 stabilised, automatic control and switching 88−33930
ion source gas flow control system 87−70978
IR pyrometer, high accuracy, microcomputer controlled, design *(Chinese)* 88−74402
IRAM 30-metre millimetre-wave radio telescope, thermal control 88−47246
JEM-2000FX TEM control, using LSI-11/23 computer 87−17677
LaCoste-Romberg model G gravity meter, implementation of electrostatic feedback 85−9366
laser beam adjustment device for holographic memory units *(Russian)* 85−2370
laser diode, computerised freq. control *(Japanese)* 85−12848
laser Doppler velocimetry control, using dedicated microprocessor system 88−53940
laser Doppler viscometer, falling-cylinder, microcomputer controlled 85−52642
laser electro-optic shutter control, w.r.t. luminance level of active medium 87−75194
laser modulator controller based on resonators Q-control 86−68597
laser optical path alignment by servomechanism *(Chinese)* 86−22444
laser radiated power regulation 87−68565
laser simple numerical control loop for stabilizing Nd:YAG andNd:YLF single-mode oscillators 86−68505
laser surgery, CO_2 beam modelling and integrated computer-based control problem soln. 87−41993
laser-beam writing system for optical integrated circuits 88−14310
lasers, Pointing alignment by orthogonal phase-lock feedback loops 87−39187
light stimulator, intermittent, for recording flicker perceptive thresholds in patients with retinal disease 85−4313
LWR power stations, signal validation, EPRI sponsored demonstration 85−43689
magnetic suspension systems with digital controllers 87−2278
magneto-optical elements of particle channels, optical remote control system for power supplies 87−29407
medical microscopy blood smear analysis automation, image processing 87−35408
Michelson interferometer, fibre optic, remote polarisation control 87−38782
microwave spectrometer, electromagnet power system improvement using dual control 87−16867
mirror, charged-large-array-flexible, control by electron beam 85−51015
Mossbauer spectrometer motion controller 87−63701
multichamber plasma processing system for researchlaboratory use 85−54506
NMR imaging system using minispectrometer and microcomputers *(French)* 88−61280
Nova laser alignment computer-based control structure and software methods 85−18998
optical instrument automation, information processing and microelectronics trends 86−24435
optical microscope, dimens. meas., automated, development and analysis 88−9874
optical-aperture probing system, influence of piezoelectric-drive hysteresis *(Russian)* 88−20204
particle detector position changing and monitoring system, using M-6000 computer 86−50384
photogrammetry, real-time operation using digital imagery 85−64018
photographs processing from large bubble chambers 87−29675
photoluminescence and Raman spectroscop characteris. of semicond., automated system 88−44615
plasma CVD system, programmable fully automatic *(Japanese)* 86−13802
physical instrumentation control continued
positioning systems in instrumentation engng., electronically commutated linear direct drives *(German)* 86−13108
programmable chronometer, controllable cycle counterand external event counter *(French)* 85−64543
programmable detector system for plasma spectroscopy, high-speed design 86−55555
PULMA-01 microprocessor system for testing respiration 88−36423
pulse EPR relaxometer, computer-controlled time-internal generator 86−67099
pulse magnetic-induction regulator 86−67117
quasi-elastic light scattering, data acquisition and evaluation 87−34998
quasi-periodic pulsed neutron source, neutron chopper phasing, control system 85−43155
radiation detection, automated source wells for instrument calibration 85−20800
roentgenography, automated, of thoracic organs 86−25216
rolled stock austenite transformation in thermomech. treatment, universal automatic equipment using magnetometric method 88−41984
scanning optical microscopy, MICROB system, planar technology characterisation 87−18283
scatter diagrams in energy analysed digital imaging, applic. to scanning Auger microscopy 88−8828
seismometer with automatic horizontal position control system 87−77846
seismometers, automatic play-back system for unattended seismological observation by direct recording method *(Japanese)* 88−36660
SEM system, fully computer-controlled 88−1335
servo-controlled lasers progress and appls. 87−12547
soliton laser stabilisation, feedback from pulse-shaping fibre, servo control 87−26351
SpectrAA-20 automated atomic absorpt. spectrophotometer 87−41319
SQUID magnetometer, RF, for biomag. field detection, digital control unit 87−41458
streaker air sampler with programmable controller 87−50556
superconducting magnetic calibration bench power supply, control and protection 88−51406
supersonic laser cavity flow control 86−48315
synchronization of control systems of LTI-PCh and Arzni-2501 lasers 88−34079
synchrotron, electron cross section control 86−44497
telescope servodrive mechanical resonance compensation *(Chinese)* 86−26079
thermoelastic stress analysis technique, spectral analyser for response of solids to LF dynamic loads 88−15940
thermometer, deep body, improved probe design 88−74793
time lapse video microscopy using an animation control unit 88−9875
Tokamak, automatic pinch holding in equilibrium position 86−57628
trap-control system for polarized-electron source 86−50296
tunable diode laser, wavelength control for IR spectroscopy 86−48441
two-dimensional fibre-optic laser velocimetry using polarisation state control 88−22794
ultrasonic deformation measurement system, computer controlled 87−50597
US annular array techniques with automatic data acquisition system for sizing defects 85−6088
US displacement meas. system, microcomputer controlled *(German)* 87−35203
Varian E-109 EPR spectrometer sensitivity improvement, using FET microwave preamplifier 88−50385
Wild OR-1, control by PDP 11 minicomputer 85−26884
working control system for space-time characteristics of industrial IR lasers 87−75188
X-ray analysis automated data processing using MK-46 microcalculator 88−41985
X-ray expts. automation, motor control and data acquisition system 86−56076
X-ray lithographic mask alignment using moire signals in refl. 87−63245
X-ray set, diagnostic, optical centering unit adjustment device 87−14860
X-ray spectrometer, Cauchois-type, computer-controlled 87−34941
Ar ion laser, wideband power regulation system 87−18910
He-Ne laser frequency stabilisation using polarisation modulation 88−14085
He-Ne laser, power regulator for discharge current control 88−14247
InGaAsP DFB laser, 1.5 μm, linewidth reduction by elec. feedback 85−41386

liquids, thermal diffusivity determ. by laser flash method 88−22822
lithography, electron and ion beam optics design, computer programs 87−74167
locally deformed stratified media, computer code appl. to rough surfaces and guided waves devices 85−35431
Los Alamos accelerator code group documentation 88−54329
Los Alamos Accelerator theory and Simulation Group Poisson group codes manual 86−32000
lossy dielec. media, 3D finite, boundary and hybrid element solns. of Maxwell eqns. 88−40459
low-earth-orbit satellite tracking and data acquisition, use of microcomputer systems 87−28460
LPCVD reactors, modeling, effect of empty inlet tube 88−31843
MACPAR code, electron-positron collider, beam-beam interaction simulation 86−38663
MAFIA, 3D EM CAD system for magnets, RF structs., and transient wakefield calcs. 87−35308
magnetic bubble materials, 3D computer model of domain wall motion 86−42151
magnetic field anal., toroidal boundary conditions use in program POISSON 88−65957
magnetic field generation, digital simulation 88−40475
magnetic field in rotationally symmetric structures, fast computation 86−42714
magnetic fields, stationary, computer program for calculations *(Russian)* 88−8409
magnetic fields simulation for Maxwell equations solving 85−7161

physics computing continued
magnetic focusing coil, electrostatic and magnetic imaging, inverse design 88−20855
magneto-optical disc design, normal incidence performance of multilayer structures 88−8003
magnetostatics, different finite element formulations comparison 88−52075
magnetostatics problem treatment by TRIFOU computer code *(French)* 86−68675
MAGNUS program for 3D magnet designs 88−54307
MAGNUS program for 3D magnetostatics, superferric magnets design for Superconducting Supercollider 86−44486
MARYLIE 3.0 beam transport and tracking code 86−24963
MARYLIE 3.0 code, beam optics calcs. for Karlsruhe electron storage ring 88−47851
mass spectrometer automated data processing system 88−29921
material design system for ferrites (MAGSYS-F) using knowledge engineering *(Japanese)* 87−7000
mathematics and computers in biomedical applications, book 86−26488
MBE artificially layered struct., automatic process control 87−73082
McMaster Univ. Tandem Van de Graaff accelerator, computer control system for beam steering 88−61015
MDP code, superconducting dipole magnets, saturation control using elliptical aperture 86−25055
measurement in weakly attaching gas mixtures, computerised signal analysis 88−35902
megagauss magnetic field generation, computer simulation 88−40476
megagauss technology and pulsed power appls. conf. Santa Fe, USA (July 1986) 88−37833
metal-insulator-metal (semiconductor) structs., circuit anal., automated 87−10611
metallographic analysis, automated, with AMD-1 microdensitometer 88−41982
metallography, quantitative, automated analysis methods 88−38304
microcomputer based control system for the TAMU K-500 cyclotron 87−56931
microcomputer based DLTS system *(Japanese)* 85−55426
microcomputer controlled TLD for personnel dosimetry, data processing 86−44720
microcomputer-based data acquisition and control system for Raman spectrometer 88−60613
microelectronics, process and device simulation *(German)* 87−6887
microprocessor and minicomputer-based 87−2559
microprocessor based radiation monitor 86−44540
microprocessor-based linac main oscillator and beam stabilization using the phase-locked trigger *(Japanese)* 87−14792
microtomography, applics. 88−8830
microtomography, methods and equipment 88−8829
minute spatial displacement field determ. from multiple interferometric holograms, fast algorithm *(Chinese)* 87−35184
modular routing interface, simul. list mode, histogramming mode storage of coincident data 85−58622
molecular orientation transitions simulation of surface stabilised ferroelectric LCs. 86−36269
motion picture theatre loudspeaker coverage, microcomputer program 85−3803
multi-ADC data acquisition and transfer system for nuclear physics expts. 87−14214
multichannel analyser, microcomputer appl. 85−44947
multichannel optoelectronic processor with correlation-function processing 87−20983
multichannel pulse analyser based on SM-3 computer and CAMAC 86−60181
multichannel pulse height analyser data, PC assembly program with RS-232C data transfer *(Japanese)* 88−54445
multichannel scaling with a VIC-20 or Commodore 64 87−29676
multilayered EM wave absorbers, optimal design 88−14361
multilayered structure, acoustic model for nondestructive evaluation 85−10902
multimode and monomode optical fibres, matrix eigenvalue calc. *(German)* 85−50944
multimode fibre optic rotation sensor, digital simulation anal laboratory tests 88−42134
multiprocessor system for parallel proton tracking 87−14636
muon channel with CAMAC control, FORTH diagnostic software 86−11809
mutual coherence function calc. of atmospheric laser beam, computer code 86−59089
MWPC imaging, derandomising buffer and microcomputer memory 87−29463
MWPCs, 3D algorithm for induced charge distrib. calc. 87−21414
NAC accelerator, recent control system developments 85−59011
NAC electrolytic tank facility for cyclotron orbit calcs. 85−59218
NaI(Tl) scintillation counter, high photon energy resolution, development for use above 100 MeV, resolution loss simul. 88−68245
National Synchrotron Light Source, real-time control and data acquisition 86−60541
NDE, computer aided design of array processing techniques 88−10655
negative corona discharge, digital computer modelling 88−1311
network terminal complex of LAN for scientific research automation, structure 87−28030
networking at Daresbury Laboratory, overview 87−13435
networking for high energy physics in US, status 87−13429
networking in high energy physics 87−13439
neural networks and cellular automata, appl. to high energy physics expts. 88−68281
Neutron Ball spin spectrometer, computer simulation 86−44609
neutron dosimetry from recoil particle tracks, digital meas. and analysis 88−5023
neutron radiography, conf., Paris, France (June 1986) 88−30
NEWTRAJ, code for electron discharge simulation in accelerating structures 88−54355
NMR imaging, magnetic field correction algorithm 86−42797
noiseless universal coding, image data compression, VLSI design 88−50193
nonrigid loudspeaker diaphragm, sound radiation calcs. 88−74183
nonsinusoidal waves radiation by large-current radiator 85−51391
NRL modified betatron accelerator, controls and data acquisition 86−60407
NSLS VUV and X-ray storage rings transfer lines, magnet power supply control 86−24949
nuclear emulsion chamber, computer based coordinate measuring station, for high multiplicity events 88−54439

physics computing continued
nuclear particle track detector *(German)* 85−37951
nuclear power plant dosimetry, unfolding code for multisphere neutron spectrometer 86−25337
nuclear power stations, information systems, plant management 86−25726
nuclear power systems and nucl. science symp., Orlando, FL, USA (Nov. 1984) 85−39411
nuclear spectral data, digital processing 87−77582
Oak Ridge 25URC tandem accelerator, control system evol. and development 88−53984
Obelix data acquisition system for intermediate energy physics expts. 88−48012
oblique scattering from anisotropic cylinders, theory and computation 85−13104
occupational noise exposure, computer program for CSA Standard Z107.56 calcs. 88−48391
ocean acoustic propagation by finite difference methods 88−15692
online FASTBUS processor for LEP 87−14635
operative metrological maintenance, high accuracy data conversion, microprocessor appl. 88−63747
optical bistability, steady state numerical solns. and their stability 88−65832
optical fibre/stripline waveguide junction theory, FORTRAN program *(German)* 85−50943
optical fibres, refractive index profiling using the phase retrieval algorithm 88−45132
optical filters, thin film, inhomogeneous, design using new CAD technique 85−56394
optical filters, thin film, instability due to moisture adsorption *(Chinese)* 85−62422
optical instrument automation, information processing and microelectronics trends 86−24435
optically-scanned acoustic transducers, computer-aided imaging 86−12223
Orsay MP-9 injector, microprocessor-based monitoring system 88−54083
OSIRIS two dimensional process simulator code, presentation and validation *(French)* 85−18226
output signal modeling algorithm 85−55417
paging system design computer program 87−63179
parallel processing of flash-ADC data for the Jet-Chamber of JADE 88−22999
PARMTEQ, RFQ simul. code, accelerator test stand comp. 86−25016
particle accelerator, long run stability, tracking program 88−4742
particle accelerator applications of artificial intelligence 88−53995
particle accelerator device controller using I-TRON *(Japanese)* 88−42361
particle accelerator sequence computer control, concurrent interpretive language *(Japanese)* 88−42362
particle accelerators, computer programs, beam dynamics and EM field appl. 87−50057
particle accelerators, control system design, modern techniques 85−59016
Particle Beam Fusion Accelerator II (PBFA II), computer model of vacuum system design 87−21335
Particle Beam Fusion Accelerator II (PBFA II), energy transport meas. and computer simulation 87−21326
particle beam fusion accelerator II (PBFA II) data acquisition system with waveform recorders 87−21317
Particle Beam Fusion Accelerator-I, automated performance history database 85−4180
particle optics, computer programs and component design 88−4763
particle tracking, automatic, in three-dimens. flow field 86−11771
particle tracking codes, present and future 86−31927
particle tracking in solenoid channels using TRACK2D code, ICF appls. 87−50051
PASCO harmonic motion apparatus, interface to computer 87−70349
perpendicular conducting planes separated by a gap, capacitance permit length determ. 85−51466
personal computers in accelerator control 88−68101
personnel dosimetry system with personal computers 86−44715
PF linac, trigger control system 86−60432
PH13D, 3-D EM field computation package 88−2465
phase unwrapping by regions 88−46249
photogrammetry, real-time operation using digital imagery 85−64018
photographs processing from bubble chambers 87−29030
photographs processing from large bubble chambers 87−29675
PHOTON calc. program for synchrotron radiation doses 88−47819
PHOTON code for synchrotron radiation doses, expt. verification 88−47820
photoresistor interface to microcomputer, light-level meter appl. 87−70647
picosecond streak camera, high fidelity, large format 88−47580
piezoelectric semiconductors, acoustoelectric current noise, computer study 87−45550
piezoelectric structure anal., three-dimensional finite elements formulation 87−67627
planar cracks, pulse echo inspection, US response prediction using computer model 86−46398
plasma CVD system, programmable fully automatic *(Japanese)* 86−13802
POISSON Group Codes improved mesh generator 88−51413
polymers, aqueous systems, high temperature viscosity, slit viscometer measurement system 88−16565
polymers, fatigue crack growth meas., computerised data acquisition system 85−44815
processing, automated system 87−39871
programmable input protection for modules of seriesASVT-M 86−44122
programmable synchronization unit for timing system of Stanford Linear Collider 85−43291
proton beam excitation function meas. system using microcomputer 88−68174
PRUD-W code for accelerating structures design 87−3823
PS, control system design at KEK 86−24881
PS accelerator complex, main operator consoles 86−24874
PSR, control system, man-machine interface 86−60423
PSR control system, design modifications 86−60412
pulse generator system, BBC micro based, for NMR 88−4506
pulse height analysis and multichannel scaling meas. fast data acquisition system 85−59214
pulse power research with microcomputer based data acquisition system 87−20981
pulsed NMR, microprocessor based digital pulse programmer appl. 86−44125
pyroelectric detector signals analysis by analogue technique 87−3616
QFC 54, strong focusing bending magnet for ACOL, design, field calcs. 88−54292
quasi-elastic light scattering, data acquisition and evaluation 87−34998

physics computing continued
racetrack microtron, high-power RF controls 86−31791
racetrack microtron, RF power system for chopper/buncher system 86−31792
racetrack microtron at NBS, control system 86−60408
racetrack microtron at NBS/LANL, control system 86−24883
radiation detectors, upgrading using Commodore 64 87−50160
radiation instrumentation, microprocessor-based, data processing and display algorithms 88−60546
radiation protection management, applic. of computer using programless language *(Japanese)* 86−25333
radioactivity contaminated sites field surveys, commercial ranging system appl. 85−48357
radiography, scanning means for radiational quality control 86−57501
radiography, technique for L shaped object generation by computer program 87−343
radioimmunoassay γ counter, meas. and data processing *(Chinese)* 85−59235
radioisotope laboratory, digital monitoring system, personal computer appl. 85−64643
RAPID database, dose equivalents to organs from intakes of radionuclides 88−23142
RCNP ring cyclotron computerised control system *(Japanese)* 88−42357
recoil separator, adaptable computer control system 87−8792
reliable timing systems for computer controlledaccelerators 86−60431
RF accelerating cavities, 3D calcs. using the URMEL-3D code 87−35309
RFQ1 control and data acquisition system 88−54138
RFQSBDS program for negative RFQ accelerator design *(Chinese)* 88−10182
RFQTRAK program for beam transmission in RF quadrupole accelerator 86−24897
ridge waveguide laser, threshold current in gain and index guiding regimes including end facet reflectivity, computer code results 88−40210
RIKEN ring cyclotron minicomputer-based control system 88−42356
RIKEN SSC, computer simulations of accelerated particles 85−59069
ring cyclotron control system at Riken 86−24885
ring cyclotron sector shapes, transfer matrix techniques 85−58977
Saclay linac, control system graphics software 88−68102
Saclay linac control system 86−24871
scanning electron microscopy, online digital recording system 87−3322
scanning tunnelling microscopy images, noise characts. and digital filtering 87−59743
scientific workstation operator-interface for accelerator control 88−54110
scintillation detectors, light collection efficiency, computer programs 85−26704
sector focused cyclotrons, focusing props. and closed orbits computation, Cyclops program 85−20767
selection system for particles with lifetimes of 1-0.1 psec, in vertex detector 87−8872
semiconductor, granular, computer modelling of volt-amp characts. *(Russian)* 85−23385
semiconductor detector synchrotron radiation spectrometer, electronic module system with CAMAC control 88−16666
semiconductor diode laser actively mode-locked by gain modulation, computer model 86−29154
semiconductor dosimeters, Monte Carlo computer simulation 85−48356
semiconductor films, uniform, on large area flat substrates, for photovoltaics, vacuum growth 88−63381
semiconductor lasers field spectra computing asymmetry due to noise obs. *(Japanese)* 87−12483
short-lived nuclides, decay rates, spectrum multiscaling analyser system using IBM PC 88−68295
signal compression processor using 16 bitmicroprocessor applied to the measurement ofreverberation response of strings *(Japanese)* 86−31297
single mode optical fibre properties, practical computation 85−50967
single-mode optical fibres, CAD calc. method *(French)* 87−68030
single-mode optical fibres, dispersion characterisation 88−65214
SLAC, RF computer control, operation and linearisation procedures 86−24852
SLAM, program for vectorized calc. of refraction and reflection at nonlinear interface 88−34106
SLC, beam diagnostics, control and data acquisition 88−47797
SLC, computer controlled feedback systems 88−54168
SLC, first order beam optics online modelling 88−54159
SLC, klystron control software 86−31782
SLC, klystron energy output, computer control system 88−54163
SLC, programmable delay unit incorporating asemicustom integrated circuit 86−31783
SLC, timing system control software 86−31786
SLC accelerator control system, COW operator console 86−31784
SLC beam error finding and correcting methods, expert system development 88−54269
SLC control system, error message recording and reporting 86−31787
SLC control system, status, development 88−54181
SLC control system, status report 86−31785
SLC electron damping ring, on-line model driven control 86−24886
SLC injector, hardware and software developments 88−47923
SLC linac, beam position monitor readout and control 86−24887
SLC positron target and arcs, position, angle, energy stabilisation 88−54157
SLC workstation consoles 88−54184
SNS data acquisition system punch 86−56029
SNS Target Station, services monitors and controls 86−56012
software architecture of a local area network 86−64710
software package for electric and magnetic fields computing, dual energy bounds appl. 88−34232
software pseudorandom noise generator 88−36683
solar cell performance, a-Si, effects of interface states, computer simulation model 88−37386
solid-state lasers, pumping systems, thermophysical props., temp. field calcs. 88−14163
sound's speed measurement using computers in school context 87−56855
SPEAR target ring, portable driven control system 86−24888
speckle pattern meas. method for in-plane displacement anal. 88−68031
spectroscopy, digital signal processing, noise and pileup suppression 86−70368
spreading resistance correction factors, piecewise quadratic function interpolation *(Chinese)* 86−55809
SPS/LEP control system, integrated development 88−54165
sputter ion source, multi-processor control 86−25098
SRC electron storage ring, control system upgrading 86−60410

physics computing continued
SRS, microprocessor based status control and interlock protection system 88−54148
SSC, synchrotron oscillations anal. using TEAPOT program 88−10221
SSC CDR clustered lattices, computing tools for design 88−4745
SSC design D dipole, mag. charact., calc. and meas. comparison 88−51410
SSC dynamic aperture, computations 88−10216
SSC event detection simulation using GEANT code package 88−16632
stainless steel strip, surface temp. calc. system in continuous annealing furnaces 86−5011
standard platinum resistance thermometer program 86−38590
Stanford Linear Collider control system, design and performance 85−43142
Stanford Photon Research Lab., networked real-time control system 88−54158
Starburst, J-11 based front-end processor system for cyclotron facility 85−64498
Starburst J-11 high speed front-end processor, onboard capacity extension 86−31771
static field solver with open boundary conditions in MAFIA 3D CAD system 88−52077
static magnetic and electric fields, FINIT computer program *(German)* 85−13027
stationary magnetic field calc., finite element method *(Russian)* 86−42671
steady state magnetic field calc. in air, 3D computer code 88−51999
steel, austenitic, US testing, computerised ray tracing 85−39834
steel, cast, discontinuities and flaw monitoring, computerised US method 88−38298
steel, welded, US buried defect charactn., automated classification method 86−66876
streak camera, digital readout system on CCD and image intensifier basis 86−1646
streak camera, digital readout with CCD array coupled to image intensifier 86−5093
streak camera focusing, resolution limitations and optimisation 88−47583
streak camera image data processing based on Pericolor-1000 86−11503
streamer chamber in magnetic field, RISK data collection and transmission 86−5827
SUMMER VME trigger processor 87−14637
Superconducting Super Collider, computing needs 85−43140
surface impact treatment, conf., Bedford, England (Sept. 1986) 88−49371
symbolic computing as a tool in wind turbine dynamics 87−4642
synchrotrons, fixed-field alternating gradient, orbit code 86−31939
tandem accelerator control system at ORNL 86−60403
tandem accelerator parameters prediction 86−55921
TCAPM fission cross section meas., CAMAC data acquisition system and data anal. 87−50174
TDBBU code for 2D multipass beam breakup simulation 88−54274
TEAPOT, thin-element accelerator program for optics and tracking 87−77482
TEAPOT tracking code, Lie algebraic maps and invariants 87−77481
TEM autofocusing using parallax 88−19646
temperature recorder, 3-point, for teaching 85−8979
TeV e^+e^- linear accelerator, DENKAI program for static field simulation *(Japanese)* 87−14656
Tevatron, front end control system 86−60414
Tevatron, time and data distrib. systems 86−60433
Tevatron extraction microcomputer QXR 86−31789
thermal cond. of liquids, meas. using hot-wire transient method 88−22824
thermal property testing, computerised appl. to composite materials 85−485
thermistor probe construction, microcomputer attachment 87−63373
time digitiser, multi-hit for wide-gap drift chamber 85−37546
time projection chamber, electronics, CAMAC interface, design 88−23002
time projection chamber, Monte Carlo simulation of positron spectrum of muon decay data 88−61165
time projection chamber, real time data acquisition system 88−16627
time-resolved X-ray data, MicroVAX compatible data acquisition system 88−42003
TLD, computerised recording, evaluation and analysis 86−44721
TLD, glow curve structure unfolding, computer aided method 86−44713
TLD, routine control of occupational exposure, computer aided evaluation 86−44717
TLD personnel monitoring service, operational experience 86−44716
TLD system, on-line glow curve recording 86−44712
TOM, a program for interactive lattice design 86−31899
tomography, gradient-projection method 88−41046
tomography, shape estimation from minimal data 88−52528
TOPAZ time projection chamber, FASTBUS digitizer system 87−35366
TOSCA, magnet config. calcs for SLC damping ring dipole magnet 86−25044
TRAC-32, CAMAC current convertor with wide dynamic range 88−54145
track detector evaluation, Z80 microprocessor-based subroutine system 86−44580
TRANSOPTR, beam transport design code with parametric optimisation, constraints 85−37847
Transport, beam dynamics code, acceleration element modification 88−54224
TRANSPORT code simulation of ion beam trajectories in Cockcroft-Walton type ion accelerator *(Japanese)* 88−42338
TRIO-FIT mass spectrometer ion optical system design program 85−64511
TRISTAN, safety and interlock system 88−53993
TRISTAN accelerator, experimental data processing system *(Japanese)* 88−53956
TRISTAN accelerator, multivendor network system use *(Japanese)* 88−52846
TRISTAN accelerator complex, KEK nodal system 86−24880
TRISTAN control, software development 88−53994
TRISTAN control computer network, characteristics 86−60427
TRISTAN control system, hardware and software 86−60404
TRISTAN electron-positron collision computerised control system, present status 88−42355
TRIUMF, modular RF control system 88−54108
TRIUMF control system, recent developments 88−54136
TRIUMF cyclotron, RF leakage reduction, model study using SUPERFISH 86−31797
TRIUMF RF cavity modelling using the RFQ3D code 86−32019
trunk beam lines, distributed control system *(Japanese)* 88−68402
tubular cylinder of finite length, interaction of modal currents, computational results 85−13032
two glider ultrasonic ranging module interface for the Apple IIe 87−71450
two-processor data-acquisition system based on Elektronika-60 and Elektronika N MS 11100.1 microcomputers 87−8556
tyred wheels, noise investigation, array processor use *(German)* 87−3811
UA1 VME data acquisition system 88−22995
ultrasonic A-scans, computer modelling 88−6581
UNILAC injector, CAMAC control system 86−60418
US detection of cracks in web geometries, computer model for detection system design and optimisation 85−6067
US flaw detector, spectral and time charact. of information signals 86−57494
US imaging, digital beam-former using uncorrelated pulses 88−30205
US inspection using Doppler effect, data processing with noise background of unknown intensity 86−57495
US statistical flaw detection, optimal algorithm adapted to noise environment 85−6069
US statistical flaw detection, optimal algorithm adapted to noise environment, appl. to flaws below curved surfaces 85−6070
US testing, computer based modelling of test arrangements *(German)* 87−44426
US-Japan data linkage for fusion energy research anddevelopment *(Japanese)* 86−43536
vacuum gauge, using electron diffusion process 85−4159
Van de Graaff accelerator, microcomputer control 85−58963
variable pressure gradient flowmeters, standard convergent devices 88−4693
vector drift chambers, track finding and fitting 85−48186
velocity profile computing from reflected data, direct inversion scheme 88−8433
velocity-field measurement by pixel-based temporal mutual-correlation analysis of dynamic image 87−14624
VENUS detector, fast track finding processor, RAM lookup-table based 88−61125
VENUS Pb-glass counters, automatic calibration system 86−11847
very high event rate data acquisition system inFastbus 86−50425
vibration meas. by computer interpretation of holographic interferometry *(Swedish)* 88−53945
vibration transducer with multichannel adaptive system for dynamic parameters meas. 87−35042
video graphics system analyzes laser beam profiles 85−64035
video/computer technology role in exptl. mech. 87−36855
VME/VMX parallel multiprocessor system for the data acquisition of the UA1 streamer tubes 87−14788
wake field transformer expt., computer simulations using TBCI-SF and WAKTRACK codes 88−16589
wavefront sensor error, Cramer-Rao lower bound 86−58808
wide-area networking for high energy physics in Brussels and Antwerp 87−13433
wind turbines, UPM computer code calcs. 88−48835
WNR data acquisition system configuration for neutron meas. 86−56071
workstations as hosts, experience in accelerator control environment 88−54123
X- and γ-ray sources and applications, conference, Ann Arbor, MI, USA (May 1985) 86−31748
X-ray analysis automated data processing using MK-46 microcalculator 88−41985
X-ray equipment, biplane isocentric, math. tools for spatial computation 86−60724
X-ray mirror testing, computer controlled coord. meas. machine 88−22437
Y, distributed resource sharing system in nuclear research environment 87−13434
ZAP code for synchrotron light source parameter optimisation 88−47855
AlGaAs-GaAs, p-n and n-p heterojunctions, space solar cells, near-optimum design for 80°C operation 85−39196
As^+, ion implantation, target at. depletion 88−50696
$Bi_4Ge_3O_{12}$ photon detector for E<10 MeV, efficiency prediction using PEP-C Monte Carlo code 85−43207
^{14}C dating, automatic control using ZSS computer *(Chinese)* 85−54934
CO_2 laser electron temp. meas. using microcomputer-controlled double-probe system *(Chinese)* 86−54064
CO_2 laser welding, temperature shield modelling *(French)* 88−45586
Cu, vapour laser, discharge confined by long metal tubes 88−45350
Fe-Si sheet steel, electrical, rotational magnetisation process determining method 85−26442
GaAs VPE growth process, computer aided modelling 87−73055
GaAs solar cells with corrugated surface, computer code for performance eval. 87−4908
Ge(Li) counting efficiencies with large volume samples, computer program 88−29804
^3H, computerized measurements with a liq. scintillation counter 88−22909
Hg-rare gas positive column discharge model, appl. to compact fluorescent lamps 85−65602
$Hg_{1-x}Cd_xTe$ photodiode, carrier transport, computer modelling study 86−47343
Nb_3Sn superconducting magnet, field strength and homogeneity calc., fabrication technology *(Chinese)* 88−71988
Pu detection in humans using octagonal computer-generated colour patterns 85−48355
Si, crystal ribbon growth, stress-free, numerical simulation 87−44280
Si solar cell fabrication by electron powder ribbon technique, computer aided photoelasticimetry 88−18028
Si:B, magnetic Czochralski growth, computer simulation of B transport 87−16580
Si:B(P), lateral diffusion, modeling LOCOS effects 87−17888
a-Si:H solar cells, C alloyed graded bandgap layers, effect on p/i interface, computer simulation 88−37435
Si:$P^+(Sb^+)$, damage processes during ion implantation, computer simulation 88−1340
a-SiH(F), p-n diode structures, current-voltage charact. under impurity photoexcitation, computer simulation 86−47352
U-scintillator thin-layer sampling calorimeter, e^- response, EGS4 code parameter studies 88−74744
ZnO/Si polymer-coated chemical sensors, digital simulation 88−47492

physiological models

3-D US organ modelling, knowledge driven, medical imaging appl. 85−59252
60 Hz electric field exposure in indoor and outdoor activities 85−59361
agar phantom electrically adaptable for tissue simulation in 5-40 MHz range, hyperthermia cancer treatment 87−35435

physiological models continued
alternating electric field, model for action on a human 87−21683
arterial flow simulation using transmission line model 85−13173
arterial pulsatile flow and pressure using impedance plethysmography model 88−4876
artificial hearts, adaptive control by microcomputer using blood circulation mathematical model *(Chinese)* 88−30042
artificial pancreas design based on pole-assignment self-tuning algorithm for blood glucose regulation 86−18378
atrial pacing, transoesophageal, role of atrial-oesophageal relationship 86−60792
autoregressive EEG modelling, best AR model order 87−29773
basilar membrane modelling by transputer 88−48088
bioelectric signal analysis by linear modeling 85−59285
biomembrane excitation, pulse and const. current stimulation, electrical circuit simulation 87−10599
biostereometric analysis for breast cancer detection 88−68363
blood circulation simulator using two linear DC motors 88−61450
blood flow parameters simulation and meas. 85−48213
blood pressure, computerised analysis and modelling 88−23034
body resistance models and shock physiology 86−18276
brainstem auditory evoked pot. signal, autoregressive model for hearing-threshold testing 86−65435
cable theory applied to blowfly receptor cells and large monopolar cells 87−23886
cardiac action potential reconstruction using Hodgkin-Huxley type models, integration methods 85−28185
cardiac activity models and ECG simulation, review 88−68403
CMOS VLSI cochlea 88−71778
coal-fired power plant occupational health risk model, input-output analysis 86−12662
cochlear model, speech signal detection 88−66348
cochlear prosthesis, fields prod.: the ear as a multilayered medium 85−38234
colour vision model, empirical results 86−4021
conference, Montreal, Quebec, Canada, (Nov. 1987) 88−43600
conference on bioengineering, New Haven, CT, USA (March 1986) 87−26
critical masking interval meas. for click in wideband noise 87−35511
cuff electrode nerve stimulation, 2-part model 87−57202
cuff electrode nerve stimulators, 2-part model for determ, of EM and physiological behaviour 86−44681
deep tissue localised hyperthermia using paired coils, eddy current distrib. cubical model 88−61416
ECG, unipolar limb-lead voltages, novel laws, investigation by elec. model 85−9179
ECGs and heart-pacemaker interface, computer modelling 88−48169
EEG forward and inverse 2D problem, solution by finite element method 88−61370
electrical impedance plethysmography in peripheral blood flow, analytical model 87−63789
electromyographic signals computerised classification and diagnosis using autoregressive modelling *(French)* 88−23093
electrosurgical dispersive electrodes, modelling of thermal patterns, burns prevention appl. 86−50610
electrosurgical dispersive electrodes, temp. elevation around, simulated and expt. studies 85−15340
EMG, statistical modelling for computer-aided diagnosis 87−57175
EMG as a control signal for functional neuromuscular stimulation: autoregressive modelling 88−42564
equivalent cardiac dipole estimation from body surface pot. distrib., bias and scatter *(Japanese)* 86−50579
equivalent cardiac dipole estimation from body surface pot. distrib., bias and scatter *(Japanese)* 86−50580
ESD test human-body-model simulators, failure mode variations and cumulative pulse effects 88−50977
fluid distribution estimation by impedance method *(Japanese)* 86−50578
frequency response analysis methods for systems with random length changes 86−50459
frog muscle fibre during recovery cycle, changes in action potentials and membrane and ionic currents 88−54548
functional electrostimulation rel. to fibre excitation modelling 88−61400
gynaecological and obstetric disease diagnosis, fuzzy Bayesian and learning models *(Japanese)* 86−25168
HDTV display performance requirements based on human visual system perception, modelling 86−49787
heart, left ventricle volume, model for accurate calc. based on radiographic images 87−71099
heart muscle, active state, deconvolution of time-varying systems by Kalman filtering 86−50461
heart rate and arterial blood press. variability signals, causal relationship, algorithm 88−68340
heart rate control, computerised anal. for expt. validation of neurophysiological models 85−9204
human body electrical resistance factors, meas. and modelling *(Spanish)* 86−60840
human thorax, 2D model and physical state determ. using impedance plethysmography 88−29942
human visual system for moving images model base 87−75953
hyperthermic treatment, EM heating, absorption and nonlinear thermal models 86−32359
image compression system with human visual system model for diagnostic STEM 86−32279
image display techniques for solid models in medical imaging 86−32276
immune system, qualitative instability of regulatory cct. 86−27040
impedance cardiogram waveform, contrib. of physiological variables 86−60777
intracardiac impedance plethysmography, computer modelling 85−38172
isolated digit recognition expts. with cochlear model 87−61715
laser beam modelling in surgery, integrated computer-based control problem soln. 87−41993
laser tomoscopy simulation in heterogeneous biological medium 86−60758
linear compartmental physiological models simulation on Apple IIe 87−31460
liver, imaging system performance, Hotelling trace criterion, psychophys. validation 88−23061
living cell model for electric field and overvoltage effects *(Polish)* 87−35448
matching impedance of a nonuniform transmission line: application to cochlear modeling 87−26889
mathematical modelling, conf., St. Louis, MO, USA, Aug. 1987 88−43553

3D model matching from unconstrained viewpoint 87−62303
3D motion anal. using shape change information 87−13130
3D motion estimation, understanding and prediction from noisy image sequences 87−47907
3D motion estimation from 2D projections 87−47965
3D motion estimation using sequence of noisy stereo images 88−73367
3D motion parameter estimation from image frame sequence 86−10560
3D motion parameter extraction 88−34819
3D motion recovery without correspondence 87−62363
3D motion/structure recovering from first order image deformation 87−62208
3D moving object images, feature matching using back tracking algorithm 87−48206
3D multiview object representation for model-based object recognition 87−39923
3D natural shapes, fractal-based anal., Earth resources satellite terrain modelling appl. *(Japanese)* 88−34805
3D object description from stripe coding and multiple views 87−75947
3D object in outdoor scene, reconstruction from 2D image using vanishing point *(Japanese)* 86−10494
3D object motion/structure estimation from image sequence 87−62386
3D object stable surface estimation 87−48213
3D objects model building using range information 87−47958
3D objects recognition, partially occluded, by depth map matching 88−66655
3D objects triangle-based pose determ. 87−48066
3D point position stereo determ., error anal. 88−14766
3D polyhedral scenes, decomposition and transformation into Hough space 87−48059
3D position vector reconstruction, most probable point determ. from nonconcurrent lines 87−13136
3D radius of curvature meas. using facet model approach 87−13124
3D random field estimation, generalised Levinson and fast Cholesky algorithms 88−66534
3D reconstruction by object estimation 87−75860
3D reconstruction from image sequences using association trees 87−75943
3D recovery from angle clues 88−3237
3D scene dynamic management *(French)* 87−55313
3D scene geometry modelling from single 2D image 87−19852
3D shape estimation from 2D images 86−16574
3D shape recognition and point correspondence 87−62202
3D shape reconstruction from bi-directional projection images, algorithm *(Japanese)* 87−48006
3D shape representation by contours, image understanding problem 88−28132
3D surface interpolation, curve fitting using a varying mesh 88−28118
3D surface reconstruction from 2D binary images 88−59270
3D symmetry-curvature duality theorems 87−62390
3D underwater imaging method based on synthetic aperture image holography using acoustic lens *(Japanese)* 87−63072
3D vision feature correspondence problem, trinocular vision soln. 87−48203
4:2:2 digital VTR, experimental hardware anal. 86−17650
5D vector representation of 3D orientation 86−37158
6-coordinates retrieval of a cooperative target fromtwo-dimensional imaging 86−10545
8-bit ADC for video signal processing *(German)* 86−1161
64 kb/s integrated visual telecommunication system 87−8471
150-mW, 8-bit video-frequency A/D converter 86−46929
Abel transform computation, recursive methods 85−36345
absolute-moment block truncation encoded images, 1D median filtering for improved data compression 87−27628
acoustic image reconstruction, two-dimens. stat. analysis of synthetically focused images 86−10549
acoustic imaging of cluttered targets in coloured absorptive media, design technique 86−12211
acoustic signals, colored 3-D spectrum display *(Japanese)* 88−34757
acoustics, speech and signal processing, conf., New York, NY, USA (April 1988) 88−69997
acoustics, speech and signal processing, conf., Tampa, USA (Mar. 1985) 86−13285
acousto-optic image filtering 85−62425
acousto-optic triple product processor and its applications 87−68231
acousto-optic two-pupil synthesis, 2-D image processing and scanning holography appls. 85−36346
acousto-optic two-pupil synthesis, 2D bipolar incoherent image processing 85−46230

picture processing continued
active aperture synthesis in observation of objects via distorting media 87−75871
active binarisation processes, stability 87−19866
active image processing, vibr. mirror with CCD image sensor camera and video frame integrator 86−3958
active model matching in range images 87−62304
active sonar, asymptotic gain of adaptive spatial processing *(French)* 88−22231
adaptive 2D filtering method, gradient median filter operation 87−69354
adaptive algorithm for motion compensated color image coding 85−41993
adaptive algorithm for motion compensated color image coding 87−69270
adaptive asteroid zonal filter for digital image compression 85−57334
adaptive classification procedure for transform coding of image sequences 88−27798
adaptive contrast enhancement, effectiveness evaluation 86−69183
adaptive data compression algorithms, rate distortion charact. 85−57546
adaptive ΔM coding with separated step-size control bits, data compression method *(Japanese)* 87−54881
adaptive digital signal processing, picture crispening 87−55260
adaptive discrete cosine transform encoding with gain/shape vector quantisers *(Japanese)* 87−33804
adaptive DPCM coder for image data M-spectral coefficients, design *(German)* 85−7805
adaptive edge enhancing order statistic filter 88−66553
adaptive edge-preserving image restoration, filtering algorithm *(Korean)* 87−27577
adaptive equalization techniques for digital video recording systems 88−35720
adaptive filtering of a digital TV-signal based on intra-frame image processing *(Russian)* 85−37268
adaptive filtering of digital video signals for imageenhancement 86−43294
adaptive Fourier optical processor, using liquid-crystal-over-silicon spatial light modulator 88−52565
adaptive hybrid transform technique for image data processing and video compression 87−27631
adaptive image coding scheme with two stages using DPCM and vector quantization *(Japanese)* 88−73231
adaptive image coding using cascaded vector quantisation 87−69381
adaptive image restoration, one-dimensional processing 85−46930
adaptive image restoration filter 88−59283
adaptive image restoration of sigma filter using local statistics and human visual characteristics 88−34742
adaptive image restoration using local statistics and directional gradient information 87−55255
adaptive image sequence filtering scheme based on motion detection 87−19907
adaptive image transform coding techniques, image quality considerations 86−23157
adaptive image transform coding techniques, review 87−2588
adaptive iterative image restoration algorithms, multiple input 87−62277
adaptive L-filters 86−64368
adaptive least squares correlation with geometrical constraints for image matching 87−13113
adaptive least-squares technique for multi-band imageenhancement 86−16550
adaptive linear filtration, recursive algorithms 88−14833
adaptive linear predictive coding of time-varying images using multidimensional recursive least squares ladder filters 88−3152
adaptive luminance signal processing in a TV receiver *(Russian)* 87−69340
adaptive mask selection, fractal dimension estimation 88−66739
adaptive median filters for noise removal in images 88−28017
adaptive monochrome image coding algorithm based on noncausal LPC and vector quantisation 88−66752
adaptive multi-stage mean shape vector quantisation ofimages 86−16588
adaptive multiscale feature extraction from range data 88−28093
adaptive orthogonal transform coding algorithm for images utilizing classification technique *(Japanese)* 88−41098
adaptive progressive transmission, anal. 87−2827
adaptive pyramid image coding system 88−73256
adaptive region growing technique using polynomialfunctions for image approximation 86−64358
adaptive regularised image restoration using convex projections theory 88−46297
adaptive restoration of heat images of objects in energetical solution spaces 88−46207
adaptive schemes for noise filtering and edge detection by use of local statistics 88−34666
adaptive segmentation of noisy images, EM-algorithm approach 87−39993
adaptive selection of block aperture in transform coding of images 88−27797
adaptive spatio-temporal DPCM for videoconferencing 87−34851
adaptive surface labelling techniques 86−37169
adaptive ternary delta modulator, images transmission 87−2567
adaptive threshold control in transform coding systems−a new approach towards stabilized reconstruction quality *(German)* 87−47890
adaptive transform coding of grey scale pictures with reduced blocking effect *(German)* 88−59224
adaptive transform coding of images using vector quantization 87−48036
adaptive transform coding using vector quantization 87−2459
adaptive transform tree coding of images 86−10508
adaptive transform trellis coding for picture signals *(Japanese)* 88−52592
adaptive transform vector quantization 86−16589
adaptive trimmed mean filters for image restoration 88−73185
adaptive TV coders, channel error propagation 86−37152
adaptive TV picture group coding *(Russian)* 87−33800
adaptive vector quantisation of monochrome and colourimages 87−2646
adaptive vector quantization by progressive codevectorreplacement 86−10505
adaptive vector quantization for image sequence coding 86−10511
adaptive vector quantization of picture signals in discrete cosine transform domain 87−75855
adaptive VWL coding of transform coefficients for sub-primary rate video transmission 87−33627
adaptive WH-transform encoding, variable subpicture size 85−19543
adaptive windows for image processing 86−3969
adjacency detection using quadcodes 87−48103
advanced image understanding 86−10588
aerial image stereo processing, urban scenes 85−30425

picture processing continued
aerial images, classification by multispectral texture features, error rate reduction using PAL TV signals 85−2906
aerial photomosaics, geometrical seam elimination *(Japanese)* 88−48318
aerospace and electronics, conf., Dayton, OH, USA (May 1984) 85−5647
affine transform determ. from object contours with no point correspondence information 86−16559
affine-transform-invariant curvature fn. 87−62356
agricultural scenes, probabilistic modelling of radar images 85−62742
agricultural scenes, probabilistic modelling of radar images 85−63085
airborne image analysis using an optical pyramid 86−4064
airborne reconnaissance, conf., San Diego, CA, USA (Aug. 1983) 85−3
airborne SAR image geometric distortion meas. 86−6085
airborne SAR image of agricultural fields, backscatter coeff. extraction 87−63990
airborne SAR imagery, statistical modelling of intensity distribs. 88−10533

algorithm for uniform vector quantizer design 85−30175
algorithms *(Japanese)* 87−27576
algorithms developed at GEC 85−57519
algorithms for translation of pictures represented by leaf codes 88−28029
algorithms for vector quantisation picture coding 87−62258
aliasing phenomenon due to CCD sensors *(French)* 88−59321
aligned component orientation detection method 86−59344
alpha linear processing of a multiplicative noise with application to radar images 88−46306
Alvey Programme, man-machine interface strategy 87−12956
Am8151 graphics colour palette chip for image manipulation 85−58564
ambiguities of a motion field 87−62372
analog optical computing 87−55290
analogue array processing of PtSi focal plane imagery 87−20937
analogue full-motion video recording on magneto-optical disc *(Japanese)* 88−53469
analogue input unit for picture processing *(Czech)* 87−56574
analogue TV vision mixers, new architecture *(French)* 87−13928
analysis and recognition methods *(Japanese)* 85−51703
analysis of pictures and image compression *(French)* 87−19840
anamorphic systems, appl. to directional pseudocolor encoding 88−46181
angle of rotation of object in gray-level image, orthogonal coordinate transformation into polar *(Japanese)* 86−69165
apparent area of a rigid moving body 87−62159
application-specific ICs, technological requirements 86−47742
applied control, filtering, and signal processing, conf., Anaheim, CA, USA (June 1987) 88−43588
approximate method for anti-aliasing, using arandom access Z-buffer 85−63124
archaeological magnetic data display 86−56244
area of figure components, labeled medial line approach 87−75919
arithmetic coding unit for document treatment 87−20292
artificial intelligence in image processing 86−23155
artificial vision, industrial, CCD for picture capture *(French)* 85−18481
Asilomar conference on circuits, systems and computers, Pacific Grove, CA, USA (Oct./Nov. 1983) 85−21
ASL image sequences, intelligible encoding 86−23096
aspheric surface meas., using laser CCD light diffraction analysis 88−53876
astronomical data analysis, conf., Erice, Italy (May 1984) 88−49379
astronomical data analysis, conf., Erice, Sicily, Italy (April 1986) 88−49380
astronomical maximum entropy image restoration method 88−14784
astronomical objects, statistical synthesis of algorithms 85−51750
astronomical plates image reconstruction, digitisation 87−75861
astronomical speckle images, statistical model of spatial spectrum 86−37145
astronomy, Wiener filtering and cleaning in general image processing context 85−8498
atmosphere particulate blurring effects determ. via line spread function 88−16902
atmospheric effects removal from remotely sensed color images 86−69174
atmospheric phase distortions, adaptive compensation using image spatial spectrum 88−46179
atmospheric phase distortions, determ. and adaptive compensation 86−48997
atmospheric turbulence caused distortions, compensation method 86−16525
attenuation mapping for imaging and characterisation of inhomogeneous media 88−10645
attribute classification of images using Laplacian histogram *(Japanese)* 87−75867
auroral TV images enhancement 85−30475
auroral TV images enhancement, very low light intensity 85−30476
Australian Landsat Station at X-band 88−35439
automated manufacturing facilities using image processing systems *(German)* 88−73225
automated paint surface texture inspection technique 86−24378
automatic classification of the welding defects 87−58672
automatic edge extraction using locally adaptive threshold 88−52509
automatic focusing of synthetic aperture radar images of diffuse targets 88−9625
automatic image anal. for complex object inspection, systems approach 87−48183
automatic image binarisation in electron microscopy *(French)* 87−27613
automatic image brightness scaling for CRT displays and printers 86−16510
Automatic image production system for videotex 86−54854
automatic image segmentation, modeling, and restoration with a rule-based expert system 88−3248
automatic microscopic inspection system using image processing 88−221
automatic snow-cover depth meas. system using image processing *(Japanese)* 86−18106
automatic target tracking, unsharp masking technique 88−41724
automatic thresholding algorithm, performance study 85−30401
automatic thresholding method for waveformsegmentation 85−51804
automatic verification of seal impression 87−2648
automatic visual fault identification using picture processing procedures, hybrid cct. appls. *(Slovenian)* 87−45464
automation, structure statistical parameter evaluation *(Russian)* 87−7835
autonomous image acquisition, survey 85−30472
autoregressive model selection, quantitative decision rule 86−10578
Avelex video codec, signal processing advances 86−55445

picture processing continued
average image of similar optical signals, appl. to signal processing and recognition 85−57449
averaging using adaptive 2D least mean square filter 87−55263
B-code programmable retina *(French)* 86−23135
B-scope imaging using wideband chirped ultrasound 85−7927
B-spline functions appl. to efficient 2-D filters 87−5358
B/W solid-state compact cameras for robotics, features *(Japanese)* 86−11272
band-limited multidimensional signals, reconstruction from algebraic sampling contours 86−3989
bandlimited images, iterative reconstruction from nonuniform spaced samples 88−28025
bandlimited images from nonuniformly spaced samples, iterative reconstruction 86−64369
bandlimited signals reconstruction from unevenly-spaced sampled data 87−61996
bandpass pyramids, sampling 87−33748
bandwidth compression, low data rates, visually weighted quantisation 87−2569
bandwidth compression systems for moving pictures *(Japanese)* 86−37131
Bayesian approach to robust local facet estimation 88−34837
Bezier approximation for design of operators in image processing 88−14831
bi-level line drawings, error detecting and correcting coding method, image redundancy *(Japanese)* 86−30038
bi-level reproduction of continuous tone images 87−2656
BiCMOS image signal processor with line memories 87−59613
bicolour block coding for colour facsimile 86−23401
bilevel picture digitisation, subpixel accuracy 87−55317
bilevel reproduction of halftone images 87−62173
bilinearly degraded image restoration 87−39880
binarisation procedure generating 2D pulse density modulation 87−62174
binarization of sampled images and holograms rational carrier-period 87−19867
binary, line element chain coding *(Japanese)* 86−16542
binary curve linear/spatial representation in multiple resolutions 87−48231
binary digital pictures, theory 86−23098
binary dithered images, edge detect. and smoothing *(Japanese)* 85−63117
binary image, operational filtering *(French)* 85−63114
binary image complexity rel. to gray-scaled image thresholding *(Japanese)* 87−39966
binary image decomposition applied to a submarine sweeping pattern problem *(French)* 88−14812
binary image detection in presence of film grain noise and intersymbol interference 85−51754
binary image filing based on contours and interior points of figures *(Japanese)* 87−39963
binary image reconstruction from four projections 88−73264
binary images, accuracy of consistent perimeter estimates 88−52539
binary images, deviation of parameters displaying object shape *(Japanese)* 88−28079
binary images, hierarchical coding 85−51687
binary images, logical pel encoding technique *(Japanese)* 85−51779
binary images, morphological transformations by hybrid optical-electronic methods 87−39934
binary images, new noiseless coding technique 87−7815
binary images, segmentation processes *(Polish)* 85−13619
binary images restoration using stochastic relaxation with annealing 86−23137
binary linear predictive filtering for modeling 2-D images 88−3243
binary pictures, fast computation of moments algorithm 87−69392
binary pictures and image thresholding complexity, depth-first expression approach 87−48222
binary pictures matching, fast computation using column division multiplexing method *(Japanese)* 88−34806
binary raster image conversion, hybrid vectorisation algorithm 85−36396
binary spatial light modulator at Fourier plane, joint transform image correlation 88−33804
binocular shading and visual surface reconstruction 85−19496
binocular stereograph based on structures of edgelines *(Japanese)* 87−62220
biological macromolecules, projection images, classification by multivariate matrix anal. 85−51724
biomedical images with quadtrees, encoding 87−39992
biomedical NMR imagers, image quality and appls. of Siemens prototype *(German)* 86−44650
biomedical tissue image region segmentation using colour texture feature 85−31811
biquads, special contours convexity testing algorithms 86−16529
bistatic SAR imagery, urban and rural target signature analysis 86−6083
bit serial systolic chip set for real-time image coding 87−62267
bivariate intensity distrib. recording of optical radiation 86−60256
blind restoration of images using reconstruction of thedegrading point spread function 86−23134
blob detection as textons in natural images 88−3279
block coded images, nonlinear space-variant postprocessing 87−13066
block coding technique for two-tone image compression 87−27605
block cosine image coding with adaptive quantisation 85−36350
block differential PCM coding 87−47523
block list transform coding of images 88−40794
block transform coding of images, modified technique *(Japanese)* 88−46270
block transform image compression by power spectrumfitting 86−30024
block truncation coder image coding using vector quantisation 87−39888
block truncation coding 87−75863
blur identification, iterative identification and restoration of images 88−66713
blurred image restoration, modelling by 2 D multi-input multi-output structure 86−59353
blurred images in speckle noise, digital restoration by two-step procedure 87−7839
blurred images restoration, max. likelihood identification 88−59338
blurred images restoration, using 2-D digital filters with noise suppression *(Japanese)* 85−19533
blurred radiograph restoration, optimal homomorphic tomographic filter 87−33751
blurred radiographs, tomographic restoration using optimal homomorphic filtering 87−29706
blurred-edge enhancement, successive partitioning and selection filters 87−39987
book 88−31282

picture processing continued
border detection algorithm *(Spanish)* 87−7836
border detection techniques *(Spanish)* 87−13080
border-following algorithm of three dimensional digitized binary pictures *(Japanese)* 85−19535
Born and Rytov approximations and imaging from scattered field 85−46972
boundary detection by minimising functionals 86−10554
boundary detection in digital images, Markov model 87−62154
boundary encoding algorithms 86−10530
boundary images segmentation, selection and use of image features 87−2635
bounded object reconstruction from spectrum modulus 86−59330
bright-spot detection in pyramids 87−48230
brightness of reconstructed images of reflected waves for plane hologram *(Chinese)* 86−36595
broadband image subtraction by spectral dependent sampling 87−2586
broadcast TV cameras, CCD imagers appl. 86−11252
business graphics, binary black and white stripes based *(Japanese)* 87−2447
byte coded form for representing non-coded information 85−19511
C-transform and C-matrix appl. *(Slovak)* 85−63090
C-transformation algorithm for preliminary image processing 87−19861
CAICOU colour image analysis system *(French)* 88−14814
camera edge response 88−52553
camera look angles, determination from perspective projection of parameterised curve 85−13623
camera rotation invariance of image characteristics 87−2628
camera system, electronic, key technologies and image processing techniques 85−58545
CAPTAIN videotex service, modified Huffman run-length code for image encoding *(Japanese)* 85−52022
cardiology, nuclear, parametric image appl. *(Russian)* 85−38033
cas-cas real-to-real transform, discrete separable Hartley-like transform, image processing appls. 88−278
cassette deck, digital still picture recorder design 85−51685
category decomposition of remotely sensed image data 88−42676
CATV converter, intermodulation distortion reduction 85−3719
CCD as light sensing element in video cameras *(Swedish)* 87−49513
CCD charge packet differencer/replicator 85−18465
CCD colour endoscope images, compensation of motion blur 87−49503
CCD colour endoscope images restoration 88−10340
CCD imager with Cross-Gate structure, vertical colour crosstalk suppression by frame transfer 85−57522
CCD images, noise reduction by relaxation techniques 85−57521
CCD imaging arrays, spatial noise characterisation using Fourier spectrum techniques 88−22646
CCD output structure for picture processing 86−5112
cellular-complex topology appl. 88−14838
censored order statistic filters 88−34835
central receiver power plants, irradiation meas., software facilities 88−5616
centre-clipping quantiser, low-bit-rate encoder for picture signals 86−23112
centroid location of nonoverlapping objects 87−75851
centroid tracker aim point estimation in the presence of sensor noise and clutter 87−55294
centroid tracking scheme in weighted coordinate system 86−10580
chain codes for below pixel resolution image processing 85−25155
chain codes for line drawings, rate and distortion analysis 85−30185
chamfer matching algorithm, improved version 85−36448
character image segmentation 85−30308
character image segmentation, minimum variance criterion 86−3978
character set compression/decompression technique 85−2883
characteristics estimation of point objects usingstereo vision 86−23174
characters, pictures and sound, coding *(Japanese)* 86−69140
charge transfer devices for image reproduction and signal processing *(Italian)* 85−45860
chest X-ray images texture anal., automatic diagnosis of pneumoconiosis 87−63759
N Chile, MOMS, image interpretation and evaluation 85−64713
Chrestenson functions, applications in logic design and data processing 86−16520
chromostereoscopic process with depth encoding/decoding 88−3199
CID readout, dual-gate, with correlated double sampling, subtractive effect of charge integration 86−44168
classification of abnormalities observed in wood by camera *(French)* 88−59322
classification of partial 2-D shapes using Fourier descriptors 88−3169
classified vector quantization of images 87−13069
CLEAN algorithm and objective functions minimisation 87−69251
closed contours matching procedure 85−36432
closed curve filtering and smoothing 87−7828
cloud field image texture anal., time series modelling, climatology appl. 85−36455
cluster anal., bootstrap technique 87−75885
cluster anal. under Markovian dependence, image segmentation appl. 88−59330
cluster pattern points, distances probability distribution 86−23165
cluster validation, model-fitting approach, stochastic model-based image segmentation appl. 88−66747
clutter analysis in IR background, filtered and unfiltered states determ. 88−21316
clutter rejection by serving focal plane movement 87−7852
CMOS chip pair for digital TV 87−59618
CMOS facsimile video signal processor, VLSI implementation 86−10715
CMOS video filters using switched capacitor ccts., 14 MHz clocked LSI implementation 86−34966
CMOS VLSI processing element using Cordic algorithm 88−1791
codec, intra- and interframe transform coding for moving pictures transmission 87−28246
coded aperture images, energy-resolved time-resolved with URA tagging 87−77124
coded aperture imaging, Fourier space anal. 87−33732
coded mask telescopes, S/N ratio determ. 85−51709
coded video signals, noise impairment and reduction 85−37276
coded-spectrum diffraction interferometry, phase object characts. recognition and imaging 88−52537
coder performance, bounds derived from uncertainty principle 87−33771
coding, adaptive multistage vector quantisation 87−2416
coding, adaptive system using vector quantisation and scalar correction in transform domain 88−27813
coding, frequency and pixel domain using convex sets 87−19889
coding, hierarchical predictive approach 86−10500

picture processing continued
coding, hybrid Hadamard LPC scheme 87−39885
coding, motion compensation using delayed decision 87−7864
coding, segmentation strategies for nonstationary interpolative methods 88−27817
coding, variable rate multistage vector quantisation 88−66746
coding, vector quantisation of NTSC colour signal 88−27816
coding, vector quantisation with variable dimension 88−27814
coding, vector quantiser based on DCT-domain classification 88−27812
coding, vector quantizers, appl. 86−10503
coding algorithms, 2D orthogonal transformations, error behaviour 87−7821
coding based on segmentation using region growing 87−62265
coding by 3D block vector quantisation 86−64329
coding by predictive classified vector quantisation 88−27811
coding scheme based on two-component model 85−51797
coding scheme for scanned images of handwriting and graphics 87−27665
coding schemes for still pictures, effects of error propag. on performance *(Japanese)* 88−8847
coding techniques for 64 kbit/s narrowband ISDN *(German)* 88−59223
coding techniques of image data in spatial domain 88−66696
coding textures 87−33612
coding using compensation for inter-pixel differences 88−27815
coding using pseudorandom shift register sequences 87−33793
coherent image amplification by two-wave coupling in photorefractive $BaTiO_3$ 86−43320
coherent images, speckle reduction using correlated mixed-integration techniques 88−28054
coherent optical generation of Hartley transform ofreal images, polarisation encoding 86−23136
coherent optical image correlation system, behaviour of binary spatial light modulators 87−47956
coherent-optical processing system, parabolic mirror segment structural parameters, effect on image characts. 85−46947
color coding medical ultrasound tissue images with frequency information 87−19902
color coding of spatial frequencies, quality criteria *(French)* 86−59323
color detection using chrominance signals and its application to color image recognition *(Japanese)* 87−28858
color image scanner 86−44163
color images, synthesis and analysis 87−39890
color masking matrix optimization in terms of uniformcolor scales 86−64347
color optical processing using a microchannel spatial light modulator under white light 88−46205
color scene segmentation of remotely sensed signals 85−57527
color-dependent optical prefilter for the suppression of aliasing artifacts 88−51653
color-encoded structured light for rapid active ranging 87−39891
colour and monochrome images, sub-band coding method 88−34752
colour depth representation appl. 87−48105
colour figure encoding by run-endpoint curve fitting *(Japanese)* 85−51780
colour graphics and image processing, number of simultaneous colours versus grey levels, quantitative relationship 85−13618
colour holography, white light transmission, review 86−3357
colour image coding based on Munsell specificationsystem *(Japanese)* 86−29995
colour image correlation 87−33759
colour image edge detection based on histograms of differences 87−48150
colour image expansion using three perceptual attributes 87−62188
colour image processing for elimination of fibre structure 87−39913
colour image processing with CGH filters in white light optical system 88−27993
colour image quantisation, adaptive algorithm 88−3225
colour image recognition by spectral-spatial matched filtering 85−25168
colour image restoration, recursive filtering techniques, effects of modelling domains 87−62285
colour image restoration algorithms, iterative methods 88−66722
colour image retrieval from black and white transparencies using partially coherent speckle 87−62178
colour image segmentation and reflection anal. 88−66666
colour imagery, pyramid vector quantisation 88−3212
colour images, absolute moment block truncation coding 85−13594
colour images, adaptive discrete cosine transform coding with vector quantisation 87−19941
colour images, adaptive discrete cosine transform encoding with vector quantisation *(Japanese)* 87−27617
colour images, adaptive restoration 88−46294
colour images, vector quantisation 87−19920
colour images, vector quantisation method *(Japanese)* 86−31005
colour images compression using product codes vector quantization 86−10504
colour object identification by monochromatic binary correlation 88−46145
colour picture coding, algorithm optimisation and technical realisation 88−21293
colour recording system using CCD image sensor and thermal dye transfer 88−51648
colour reflection model for separating highlights from object colour 87−62324
colour scanning, using spatial image separator 88−42024
colour signal fluctuations control 86−16538
colour space, standardised, model of 3-Zone sensor is image processing system *(Russian)* 88−73194
colour space description, IHS-RGB coordinate transformation algorithm 86−12145
còlour still picture coding, international standardisation *(Japanese)* 88−28040
colour TV, picture insert in multipicture system *(Chinese)* 87−62141
colour TV receivers, signal processing developments *(Czech)* 86−4827
colour TV signal coding, modified M-transform for 34 Mbit/s transmission *(German)* 85−8568
colour video images, picture quality improvement by nonlinear filtering 86−24058
colour video signal encoding for 64 kb/s integrated video communications *(Japanese)* 86−31003
colour vision model, empirical results 86−4021
coloured picture encoding, differential luminance/chrominance signal vector quantisation *(Japanese)* 85−30357
combined optimisation of image gathering and processing systems 86−10533

picture processing continued

CONTAM: an edge-based approach to segmenting imageswith irregular objects 86−4040
content-driven progressive transmission of grey-scale images 87−39887
context dependent smoothing of figures represented by medial axis transform 87−48095
contextual filters for image processing 87−33818
continuous order derivative for optical signals and images 88−66646
continuous tone images, adaptive to grey level structs. in a mesh, bi-level representation *(Japanese)* 85−51785
continuous tone images, bilevel representation method *(Japanese)* 85−30363
continuous tone picture signals for image database, information preserving transmission systems *(Japanese)* 85−30361
continuous tone pictures using probabilistic assignment of fixed patterns, bilevel representation method *(Japanese)* 88−8824
picture processing continued
continuous-tone pictures, two-level rendition using binary patterns with similar Fourier spectra *(Japanese)* 85−51784
continuous/discrete image signal transformation with Gaussian presampling/interpolation filters cascade 85−41957
contour, spatial filtering of rectilinear fragments 85−36390
contour based stereo algorithm 87−62383
contour classification, Hough transformation *(German)* 88−46265
contour coding 87−19944
contour coding for image manipulation and compression 87−48201
contour detectors, operating quality criterion 88−28003
contour element parameter identification *(Italian)* 87−13081
contour image producing of two-dimensional objects, by nonlinear optics methods *(Russian)* 86−3963
contour map registration using Fourier descriptors ofgradient codes 85−51690
contour recognition, syntax-directed approach 87−27642
contour segment coding algorithm 85−57507
contour-based motion analysis *(Chinese)* 88−41002
contour-based recovery of optical flows by iterative improvement 87−47973
contour-edge optimal detection, recursive algorithm *(French)* 88−21342
contour-line surface model conversion to mesh surface model 87−48148
contours matching, token based shape description 88−46223
contrast enhancement and quantitative edginess measure 86−49036
contrast enhancement for the ordered dither method 87−39967
contrast enhancement using fuzzy sets concept 88−34748
contrast resolution function of flexible fiber elements 88−72045
control point theory for boundary representation andmatching 86−16575
convex boundary arrays for coherent and incoherent imaging 88−73259
convex sets iteration based image coder, projection implementation 87−47979
convolution back-projection image reconstruction for synthetic aperture radar 85−20256
convolution reconstruction algorithms, L^2 optimal convolution functions 87−69288
convolution squared error versus observer performance, nucl. medicine image processing 88−21308
convolution with Laplacian-of-Gaussian masks, very fast 87−2631
convolutional kernels reduced to multipass appls. of small generating kernels 88−66643
coordinate rotation invariance of image characteristics for 3D shape and motion recovery *(Japanese)* 87−62222
coordinate rotation invariance of image characteristics for 3D shape and motion recovery 87−62318
coordinate transformation in image processing *(German)* 88−28009
core-line tracing for fuzzy image subsets, astronomical imaging appl. 86−59340
corneal topography using computer analyzed rasterstereographic images 88−48105
corner detection, direct algorithm 87−48178
corner detection algorithm based on chain-coded plane curves 87−69305
corner detection and curve representation using cubicB-splines 86−59369
correlated clutter textures in coherent images, noise models 88−73193
correlation, effect of additive and multiplicative noise 88−28045
correlation based technique for shift, scale, and rotation independent object identification 87−62231
correlation rotationally invariant filters performance, effect of expansion center choice 88−52568
correlation using deformable mirror device 88−41052
correlation using pulsed dynamic holography, expt. study 87−13060
correlator, updatable, optimisation 87−62177
cosine transform image coding variable block rate and blockwise spectral adaptation 88−73249
crop identification, airborne SLAR-data 86−18610
crop monitoring, satellite image enhancement using colour perception 86−25405
cross correlation to two images using an all-points-addressable display 85−13593
cross-angle transform for viewer-independentrecognition of 3-D objects 86−4039
crosshole seismic data, algebraic reconstruction techniques 86−23110
CRT displays, digitally-controlled, quantization error minimization 86−70028
CT artifacts caused by metallic implants, image quality improvements 88−4919
CT image reconstruction from view projections, mathematical programming *(Japanese)* 86−38779
cuboctahedric sampling mesh for mathematical morphology in three dimensions 88−46312
curvature primal sketch 86−43305
curves with concatenated arcs, piecewise representation via break points detection 88−66759
cylinder picture element, GYXEL, generalized, for image representation 88−28120
cylindrical multivalued logic transform for shape processing 87−13103
cylindrical near-field microwave imaging system for quasi-real-time tomography 86−31618
cylindrical shape from contour and shading without knowledge of lightning conditions or surface albedo 87−62345
d-dimensional binary pictures, quadtrees size 86−16504
data compression, extrapolative prediction-discrete sine transform encoding *(Japanese)* 87−7847
data compression, orthogonal transform encoding with movement compensation *(French)* 88−28087
data compression, zonal sampling and bit allocation of Hadamard transform coefficients 87−19848
data compression for images, modified block truncation coding technique 87−48236
data compression method using extrapolative prediction-discrete sine transform, 2D coding case *(Japanese)* 88−73232
data compression of multispectral images 88−59284
data compression using 2D lattice modelling 86−64363
data compression using digital transformations, remote sensing image appl. 86−30065
data compression using image contours for 2D image representation 87−13100
data compression using nonuniform samples with controlled compression ratios 87−7854
data embedding, improved method by module masking 86−54564
data structure for image storage 85−51732

picture processing continued
dBTV system for optimum bandwidth efficiency 87−48979
DC coefficient restoration by cosine and sine transforms 87−39876
DC coefficient restoration in transform image coding 85−13485
DCT coding with gain/shape vector quantisers 87−75856
DCT/DST alternate-transform image coding 88−46285
deaf people's sign language, transmission by telephone and teletext 86−54847
deblurring and image restoration techniques 88−28012
deblurring random blur 88−8818
decimated subband image reconstruction 87−69376
decimation techniques, two-dimensional transform domain 87−19942
decision-directed nonlinear filter for image processing 88−8814
decision-directed segmentation, restoration of images degraded by space-variant blurs 88−66710
decoder for the teletext system, LSI ccts. realisation *(Slovak)* 86−1328
decomposition of 3D objects into compact subobjects by analysis of cross-sections 88−28032
deconvolution, iterative algorithm with quadratic convergence 87−27590
deconvolution by maximum entropy method, astronomical appl. 85−30474
deconvolution for image restoration in spatial domain 87−48033
defect detection in textiles, filter sets comparison 85−30424
degenerate view quantification 88−8868
degraded image restoration, iterative algorithms 85−30466
degraded image restoration using Markov random fields 88−66716
degrees of adjacency and surroundedness 85−41976
delay-Doppler radar-imaging and radionuclide imaging, correspondence 86−64370
Densitron-4 image analyser for radiographic interpretation 88−53589
density pseudocolor encoding of picture based ontri-primary color *(Chinese)* 86−59204
depth determination, accuracy improvement *(Japanese)* 87−77423
depth extraction by stereo triples and correspondence estimation algorithm 87−48135
depth map, improvement using right-angled trinocular stereo 87−48137
depth map direct recovery using differential methods 88−28098
depth map for surface reconstruction from profiles 88−3280
depth map reconstruction from intensity maps 85−30444
depth maps, dense, incremental estimation from image sequences 88−73327
depth of field information 87−69275
depth perception, interaction of different modules 87−62337
depth reconstruction in stereopsis 87−62384
depth recovery from blurred edges 88−73340
depth recovery from surface normals 85−36422
design formulae for $\nabla^2 G$ edge operator 88−21295
design theory of 3-dimensional memory system for image processing *(Japanese)* 88−73233
detail-preserving filters for image processing 87−39894
detecting local image characteristics using multiple-order derivatives 87−62147
detection of local image anomalies under conditions forwhich their statistical characteristics are uncertain 86−37144
determining surface orientation from distortion of irregular patterns *(Japanese)* 88−46279
deterministic Bayesian estimation of Markovian random fields with applications to computational vision 87−62370
developable surface matching algorithm 88−73288
development and published work in Italy, survey 87−75922
diagnostic imaging in medicine, conf., Pascoli, Italy (Oct. 1981) 85−34
diagnostic ultrasound, signal processing for spatial averaging 88−4934
difference detection by colour mixing using holographic lenses 87−39911
differential displacement estimation algorithm with improved stability 87−33780
differential image motion estimation, time/space recursions 87−33781
differential motions of a camera from imagedifferentials 86−10544
differential operator based edge and line detection 87−62237
differential-interference-contrast microscopy, signal-processing characteristics, noise considerations 88−46146
differentiating spatial light modulator based on nematic liquid crystal, for optical preprocessing and pattern recognition 87−68218
diffraction-limited high-contrast imaging systems, image construction, iterative approach 85−46921
diffrequency stereo, theoretical basis, disparity measurement error 86−69112
diffuse edges extraction by edge focusing 88−46193
digital, using two-dimensional FFT *(Czech)* 86−43291
digital 3-D images movement analysis 85−31828
digital approximation of moment invariants 86−4052
digital arc, chord prop. and equivalences 85−30383
digital coding for quasi-motion colour picture transmission 87−34720
digital coding of video signals 85−19536
digital coding of video-teleconference signals 87−2441
digital color image restoration 87−48029
digital contour enhancement of infrared image 88−46211
digital curves and contours, simplicity conditions 87−48096
digital decoding of in-line holograms 88−20777
digital encoding of TV pictures, European studies and word standardisation *(French)* 85−25192
digital figures, thinning algorithm derivation 85−51802
digital filter image processing using intensity level segmentation *(French)* 85−51704
digital filtering, noise reduction *(Italian)* 86−3968
digital filtering system for decoding in-lineholograms 86−14392
digital filters, 3D type, rational approx. 87−52746
digital filters for video signals, design and implementation 87−7865
digital grey level images, edge detect., via dynamic programming 85−30373
digital half-toning technique for images 88−46165
digital halftone image quality evaluation by ordered dither method 85−25152
digital HDTV-system, subjective investigation of information transmission *(German)* 85−37272
digital image compression, shape adaptive activity controlled multistage gain shape vector quantiser 85−41950
digital image data encryption algorithm for transmission security in satellite communication *(Japanese)* 87−27618
digital image edge detection, stochastic approach 85−30372
digital image fidelity: an end-to-end analysis 86−69179
digital image modelling/parameter identification 85−25191
digital image mosaics 85−64684

picture processing continued

directional decomposition-based image coding, new results 87−33775
directional filtering, image processing appls. 87−62239
discontinuities in images, 2D local structure 86−10556

picture processing continued
discontinuity detection 85−30370
discrete 2-D Gabor transforms, neural networks for image anal. and compression 88−66620
discrete binary images, skeletonising algorithm with improved isotropy 87−47981
discrete binary picture architecture, geometrical tools *(French)* 88−14813
discrete cosine transform, fast recursive algorithm 87−36568
discrete cosine transform, use in image data compression 86−16521
discrete cosine transform domain picture signals, adaptive vector quantisation *(Japanese)* 86−54554
discrete cosine transform encoding with gain/shape vector quantisers for picture signals *(Japanese)* 86−49022
discrete Fourier transform generalisation 86−40692
discrete frequency Fourier transform 86−69122
discrete geometry for image processing 88−11881
discrete Hartley transform for image compression appls. 86−30023
discrete integral geometry 88−11882
discrete random images, statistical model investigation *(Chinese)* 85−2876
discrete signals, 1-D and 2-D, pole-zero modelling 85−25134
discrete topology and contour definition 85−7915
discrete-valued random fields for statistical images modelling, comparative study 88−73323
discriminant surface anal. using polar coordinates 87−69316
discriminating textured surfaces in natural imagery 88−46217
discrimination of radar clutter by texture analysis 86−49704
displacement meas., feature-based, in image sequences, precision 87−49951
displacement vector field estimation by adaptive affine transformations 87−48173
displacement vector fields estimation for image areas, smoothness constraints 85−30365
distance measurement by stereo vision, recursive model adaptive parameter estimation approach 86−18128
distance transformation and reconstructable skeleton ofthree-dimensional digital binary images *(Japanese)* 86−37154
distances defined by neighbourhood sequences, general props. 86−52352
distorted central symmetry image matching, seal impressions collation *(Japanese)* 86−69166
distorted image reconstruction, digital spatial filter mask calc. 88−13994
distorted images, elastic matching using combination of dynamic programming and autoregressive model 88−3230
distortion by lin. systems with unknown parameters, image quality improvement *(Russian)* 87−2571
distortion by turbulent atmosphere, reduction methods 88−34809
distortion weighted motion compensated image coding 88−73383
dithering methods of color images directly applicable to run-length coding 88−46286
dithering with blue noise 88−34772
document and text image compression using adaptive delta modulation 86−69175
document image data compression for any typeface, using symbol matching 87−48237
document images, multilevel compression method 87−19949
document images, skew normalization algorithm *(Japanese)* 87−27623
document images in mixed-mode communication, extraction algorithm for photographic area *(Japanese)* 87−39959
Doppler imaging radars, response characts. determ. using speckle 87−28679
Doppler-time image processing, Hough transform appl. 88−73257
dot matrix font pattern for image process, bit density conversion 85−2884
dot patterns perceived orientation strength, quantitative measure, concept 86−49032
double-interval probability distribution as tool for signal and image recovery 88−46184
doubly stochastic Gaussian random field models for image estimation 87−47902
DPCM, motion-compensated interframe, transform coding, efficiency 86−54565
DPCM, variable block vector, predictive coding of colour images 88−3209
DPCM and transform coding, robustness, theoretical comparison 85−19516
DPCM compression of pictures, fast coder using tree encoding 88−73180
DPCM low bit rate code technique for image signals, appl. of tree encoding *(Japanese)* 87−39961
DPCM picture coding, adaptive intraframe, minimum slope detection prediction 86−23107
DPCM picture coding using two-dimensional quantizer 86−49020
DPCM studies using edge prediction and adaptive quantisation laws for the transmission of still pictures over the ISDN 87−75873
drainage networks direction, extraction from Landsat imagery, use of consistent labelling technique 86−18584
drawing vectorization, picture processing using multidimensional data management struct. *(Japanese)* 85−51788
dual phase multiplier-accumulator digital filter for television scan line decimation 87−32023
dynamic constraints, image restoration 87−19957
dynamic edge detection, local determ., intensity-based method 85−57472
dynamic frequency plane correlator for image correlation 86−29973
dynamic frequency plane image correlator based on photorefractive nondegenerate four wave mixing 87−62229
dynamic image processing, time correlation anal. for particle movement meas. 86−48996
dynamic imagery modeling and motion estimation using weak formulations 87−69279
dynamic occlusion analysis in optical flow fields 85−57470
dynamic ordered dither algorithm, image quantisation appl. 87−39955
dynamic programming algorithm for binocular stereo vision 85−46919
dynamic scene anal., event detection and correspondence 86−43327
dynamic scene anal., optical flow field determ. 88−3192
dynamic scene optical flow, linear and nonlinear objective functions 88−28127
dynamic scenes, accretion and deletion anal. at object boundaries 85−41954
dynamic scenes, pyramid structures 85−36434
dynamic shape anal. 86−64321
dynamic thresholding method for character detection in complex scene images *(Japanese)* 88−59327
dynamical processing using birefringent pupils 88−46183
early images processing, parallel computations of optic flow 85−2888
Earth Resources Data Analysis Systems *(Italian)* 86−32419
EBIC and scanning electron acoustic microscopy, simultaneous evaluation in automated SEM, semicond. characterisation appl. 86−58220
ECGs, 1-D signal extraction and archiving 88−48154

picture processing continued
echo diffraction imaging, reconstruction from incomplete data 88−73270
echo sounder, image processing evaluation *(Japanese)* 86−49739
echo sounder images, real-time edge detection using 2D exponential smoothing method *(Japanese)* 86−3991
echography, high resolution, multiple element sensor arrays, coherent signal processing 85−59530
eddy current nondestructive testing, automatic classification and recognition of defects 87−16767
edge ambiguity measurement using fuzzy sets 86−43339
edge angle meas. using averaging Sobel edge detector and 3-pixel square convolver 87−62183
edge contours in images, detection and smoothing by 1D Kalman techniques 88−66728
edge detection, computation approach 87−19849
edge detection, edgel-aggregation and edge-description 87−48153
edge detection, estimation and accurate localisation 88−3287
edge detection, localisation and estimation 88−3289
edge detection, multi-scale, Gaussian filtering 87−2641
edge detection, real time, of echo image of school of fish by 2D exponential smoothing 86−69160
edge detection, surface fitting approach 87−19850
edge detection, template mask design constraints 86−59343
edge detection algorithm of color images using the reduction of brightness and chroma *(Japanese)* 85−25184
edge detection and nonlinear estimation theory 86−37159
edge detection and restoration of images corrupted by noise *(Japanese)* 85−13628
edge detection and segmentation based on Hilbert transform 88−66748
edge detection by means of Walsh transforms, local operators calc. *(Slovak)* 85−63083
edge detection by zero crossing of Laplacian-Gaussian operation, error probabilities 87−48152
edge detection device 88−33880
edge detection from negative maximum of secondderivative 86−4053
edge detection in aerial pictures: new operators *(French)* 85−51760
edge detection in colour machine vision 86−16583
edge detection in fingerprints, image enhancement 87−75882
edge detection in gray-level images, nonparametric tests 86−54550
edge detection in gray-scale image 87−48151
edge detection in noisy signals using median filters 86−64365
edge detection in the presence of speckle 87−33825
edge detection in uncorrelated speckle 87−27601
edge detection of smooth moving objects in noisy low resolution images 87−69384
edge detection problem and method 86−48973
edge detection scheme using nonlinear point operators 86−69110
edge detection techniques, comparative study 85−30471
edge detection using 2D second-order nonlinear digital filters 86−43296
edge detection using mathematical morphology processing 87−57434
edge detection using the directional derivatives of a correlated random field model 87−55320
edge detection using the linear model 87−13064
edge detection using zero crossings of random field model directional derivatives 87−19955
edge detection with subpixel precision 86−4050
edge detectors, hybrid, for noisy situations 85−25157
edge detectors based on linear and median operators 87−48158
edge enhancement algorithm using a polynomial transformation 87−13070
edge enhancement appl. to scenes with natural vegetation backgrounds 85−63106
edge enhancement using order statistic Laplacian 88−34832
edge extraction and restoration of noisy image by innovation process in Kalman filter *(Japanese)* 87−55307
edge extraction of noisy image by generalized likelihood ratio test *(Japanese)* 87−55309
edge focusing, coarse-to-fine tracking 88−14764
edge orientation computations, noise effects 88−14799
edge pictures encoding, addressing overheads minimisation 85−46920
edge point estimates in noisy data across step edge 86−10555
edge preserving image restoration, nonrecursive filter use 86−10522
edge preserving image restoration with robust image modelling techniques 87−55319
edge preserving smoothing algorithm testing and evaluation 85−30477
edge preserving smoothing filter based on robust estimate 87−48082
edge recognition in SEM metrology, imaging and waveform anal. techniques 87−11868
edge segments detection 85−51695
edge separation and orientation texture measures 86−4022
edge stitching of a wide-respect ratio HDTV image 87−27664
edge-based image segmentation 88−41063
edge-detection schemes highly suitable for hardware implementation 88−73195
edge-detector resolution improvement by image interpolation 88−3288
edge-detector resolution improvement by image interpolation 87−47913
edge-effect-free restoration of motion-produced blur in pictures *(Japanese)* 88−14818
edge-preserving image coding based on local modeling of images 88−73272
edge-preserving noise filtering based on adaptive windowing 88−72930
edge-preserving noise reduction in digital videosequences 87−7867
edge-preserving restoration of noisy images 86−48991
edge-preserving smoothing approach, absolute grey level differences 86−16506
edge-preserving smoothing filters 88−3190
edge-sensitive image restoration usingorder-constrained least squares methods 86−23113
edge-to-edge visibility in polygon, shortest path approach 87−2590
edges, fingerprints of 2D models 88−46158
education at UAH 86−66563
ego-motion complex logarithmic mapping 85−46900
electro-optical imaging systems, grey scale limitations *(Chinese)* 86−59315
electro-optical imaging systems integration, conf., Los Angeles, CA, USA (Jan. 1987) 87−72671
electron holographic interferometry, quantitative phase anal. and magnetic field meas. appl. 87−26555
electron microscopy, conference, Sumy, USSR (1982) 86−7365
electron microscopy, image restoration based on projections onto convex sets 88−68398
electronic circuits, TV signal processing *(German)* 87−20673

picture processing continued
electronic imaging, history, industry evolution, design parameters and appls. 86−38277
electronic minds' eyes 87−69269
electronic sector scanning sonars, stabilisation 87−56281
electronic speckle pattern image fringe minima identification 87−63312
electronic speckle pattern interferometry for NDT of adhesive joints 85−49672
electronic speckle pattern interferometry use as inspection tool 85−49370
electronic stills from the field: an update 86−4858
electrooptical photographic arrangement for quasi-real time image recording 86−48219
electrophotographic toner particle, image processing study *(Japanese)* 87−41265
electrostatic ink jet using dielectric-ink, tone reproduction *(Japanese)* 85−2890
ellipse detection by use of recursive least-squares estimator 85−57487
EM authenticity features, synthesis and detection 85−62765
EM imaging, iterative Gerchberg method modifications 85−63129
EM imaging of dielectric targets, inhomogeneities reconstruction from scattered data 85−62761
EM inverse scattering problem, current state-of-the-art 87−47162
EM LF imaging, charact. scattered signal parameters, Rayleigh coeffs. 85−62760
EM scattering data inversion by digital imaging of multiple hologram 88−2403
encoding, adaptive vector quantisation of prediction error signals *(Japanese)* 88−8848
encoding, theoretical study on prediction efficiency forsub-Nyquist sampling structures *(Japanese)* 86−49021
encoding, vector quantisation of prediction error signals *(Japanese)* 87−55310
encoding, vector quantisation using interpolation *(Japanese)* 87−33805
encoding and decoding processor for group 4 facsimile apparatus 85−13825
encoding developments, review 85−51737
encoding system using adaptive multistage vector quantisation *(Japanese)* 85−30356
encoding techniques, second-generation methods 85−51738
encoding using multidimensional spherical symmetrical random source, gain/shape vector quantiser *(Japanese)* 86−10492
encoding with variable block size code *(Japanese)* 87−27616
encoding/decoding, hybrid codec with adaptive quantiser *(Japanese)* 86−16541
engineering an image processing module in WSI 87−1681
enhanced-quality TV, spatio-temporal confinement of spectra *(French)* 86−37149
enhancement techniques, quantitative evaluation 85−51757
enhancement techniques of infrared image 87−14246
entropy coding for a hybrid scheme with motion compensation in subprimary rate video transmission 88−3156
entropy coding for low-bit-rate visual telecommunications 88−3157
entropy coding of cosine transformed images 87−39972
entropy-constant image enhancement by histogram transformation 87−19891
entry-exit method of shadow boundary segmentation 86−4057
environmental change, remote detect., data struct. appls. 87−2613
epipolar-plane image anal., generalised, for nonorthogonal and varying view directions 88−3275
epipolar-plane image anal. generalisation on spatiotemporal surface 88−73291
ϵ-Kalman filter−a method of signal estimation with considering sudden changes of signals *(Japanese)* 85−36387
equivalence of discriminant criterion and correlation criterion for automatic threshold selection *(Japanese)* 87−19917
equivalence of two basic theorems on moving images *(Japanese)* 88−14820
ERS-1 active microwave instrumentation 86−12158
ERS-1 SAR wave mode for ocean-wave spectra recovery, calibration 86−55352
ESM data processing, appl. of optical transform image modulation techniques 88−54827
Esprit 824, wafer scale integration project 88−25281
estimation of image distrib., from limited intensity data 88−46258
estimation of image orientation, appls. 85−51817
Euclidean distance approx. using distance transformation; 87−48110
Euclidean distance transformations and model-guided image interpretation 87−39926
Euler no. computation for 3D image 87−62367
event set distance for texture classificationand cluster analysis 86−49030
expectation-maximisation algorithm application in image reconstruct. and processing 88−21309
exploratory pattern analysis using sparse decompositions 87−48109
exponential filtering to solve phase problem of image reconstruction 88−73203
exponential smoothing method for 3D image data *(Japanese)* 85−57514
extended definition TV, existing standards compatibility 85−3681
extended definition TV, fully compatible, dynamic characts. *(Japanese)* 86−31000
extended definition TV, fully compatible, system with motion-adaptive processing *(Japanese)* 86−31001
extended Gaussian image anal. for orientation determination 88−28102
extended randomly emitting source with unknown energy brightness distribution, detection 88−73226
extended version of the tomographic transform convolution for the wavefront curvature *(Chinese)* 88−28920
extraction of line figures in a binary image and its applications *(Japanese)* 87−39964
eye movement anal. system using fundus images 85−31813
facsimile, developments in picture encoding, terminal equipment and network systems 85−51990
facsimile, progressive coding scheme for interactive image communications 85−46954
facsimile broadcasting, information services *(Japanese)* 88−3465
facsimile coding scheme with graphic commands and line skipped scanning *(Japanese)* 87−76270
facsimile documents, high compression coding method 87−34073
facsimile encoding scheme with graphic commands and line skipped scanning *(Japanese)* 87−33803
facsimile image resolution conversion algorithms *(German)* 87−13312
facsimile picture quality eval. using pel error rate *(Japanese)* 87−2598

picture processing continued
facsimile progressive encoding scheme for interactive image communications *(Japanese)* 85−30358
facsimile receiver, signal receiving and image receiving *(Japanese)* 88−3464
facsimile signal processing technology *(Japanese)* 87−39877
facsimile video signal processor, LSI implementation using 2.5 μm CMOS technology 86−37381
fair copy reproducing algorithm from roughly sketched diagrams 87−48129
fan beam tomography, image reconstruction method 86−16565
fast 2-D Kalman filters with non-causal state-space models for image restoration *(French)* 88−34796
fast block matching algorithm *(Korean)* 88−46175
fast digital image processing technique for objectrecognition and classification 86−30066
fast filter transform theory and design for imageprocessing 86−4034
fast Hadamard transform, matrix factorisation 88−6426
fast IIR adaptive line enhancer 85−2910
fast image filtering processor, FIFP 87−19936
fast image registration based on geometric correspondence between two levels of pyramid structure *(Japanese)* 87−39965
fast iterative hill-climbing algorithm for subpixel registration 85−30367
fast multichannel approach to adaptive estimation and filtering of two dimensional images 87−62299
fast recursive estimation of the parameters of a space-varying autoregressive image model 85−46935
fast robust estimator 85−36461
fast thinning algorithm for binary images 85−51701
fast thinning method by the vector peripheralcrossing number 87−2660
fast two-dimensional convolutor based on residual digital systems 85−25181
fast two-dimensional Hartley transform 87−13086
fault diagnostics in welds, using X-rays 88−18831
fault-tolerant systems for the computation of eigenvalues and singular values 87−55131
fax to image processing, development 85−51983
feature detection from local energy 88−14798
feature evaluation of similar images by modified andconstrained average method 86−16502
feature extraction, real-time invariant, image domain processing appl. 86−10531
feature extraction for recognising solid objects with US range sensor 86−37128
feature extraction from intensity images 88−41066
feature extraction from range imagery using mathematical morphology 88−41078
feature extraction using stable view-point tree *(Japanese)* 85−57512
feature mapping in ultrasonic NDT 88−48401
feature point detection, correspondence in presence of occlusion 88−28123
feature point matching in image sequences 88−34771
feature selection procedures, comparison 86−30048
ferroelectric liquid crystals, optical computing and image processing appls. 87−60984
fiberscope using SiO_2 image fiber, picture image transmission system 87−18620
fibres, multimode, image distortion and restoration by polarisation-preserving phase conjugation 87−61237
field ion micrographs, image processing, video digitiser and frame memory system 87−20990
field reconstruction in the atomic space of solutions, method and appls. 88−46159
filamentous processes detection in images 87−69391
film-electronic systems using electronic signal processing to provide image enhancement 85−58568
filter, matched, spectrum shaping for light efficiency 85−46238
filtered images, zero crossings characterised 87−62238
filtering, noncoherent, for automating testing of semiconductor structures 87−11859
filtering and backprojection and filtered backprojection methods, comparison 88−66607
filters, optoelectronic, spatially noninvariant for image processing 88−26925
fine arts painting anal., autoregressive models appl. 87−69338
fingerprint data compression techniques 85−36417
fingerprint identification using feature lines attributes 87−55352
fingerprint image enhancement, matched filter design 88−66702
fingerprint image segmentation using directional image 87−69315
fingerprint images, ridge struct. restoration algorithm with grey-scale compensation *(Japanese)* 85−57513
fingerprint pictures, predictive MH coding *(Japanese)* 86−29996
finite prolate spheroidal sequences, props., image processing appl. 88−14768
finite resolution and sampling of individual projections, effects 86−43331
finite state vector quantisers 88−66753
finite-state vector quantizer for low-rate image sequencing coding 87−62266
FIR digital filter implementation for preprocessing laser beam recorder data 86−67381
first-difference edge detection with subpixel accuracy 88−3177
fixed target detection by radar in K-distributed sea-clutter *(Portuguese)* 87−75952
flash X-ray generator for biomedical use, high-speed radiography appl. 88−42524
flaws reconstruction, using model-based elastic wave inverse scattering 87−23796
flexible 3-D vision system for robotics 85−36412
flexible pattern anal. method 87−48076
flexible template matching for automatic target classification 87−13138
flow meas., multicomponent using correlation method 87−56910
Floyd Steinberg error diffusion, halftoning algorithm quantitative analysis 86−69176
FMCW radar for detecting hidden objects 87−3240
focal plane array processing, parallel asynchronous 88−9908
Foley-Sammon transform for image classification 86−64352
forest types discrimination, video remotely sensed data, principal component anal. and varimax rotation *(Spanish)* 87−69396
four-colour printed images, adaptive transform coding 87−62293
fourier analysis of object boundaries from two dimensional digitized images 87−19956
Fourier domain reconstruction methods and applic. to diffr. tomography 86−10547
Fourier magnitudes, continuous object distributions reconstruction 87−27580
Fourier phase image representation, theory, sampling, and coherent image model 88−73182

picture processing continued
Fourier transform, complex-valued objects reconstruction 87−27581
Fourier transform, phase retrieval from two intensity measurements 87−27585
Fourier transform appl., coherent parallel and converging beam methods comparison 88−3258
Fourier transform magnitude, direct algorithm for image reconstruction 87−47894
Fourier transforms over warped domains 85−51686
Fourier-holograms, reconstruction parameters, influence of film nonlinearities 85−56845
Fourier-magnitude estimation, accuracy from speckle intensity correlation 88−59221
fractal based approach to image coding 87−48023
fractal decomposition of signals 87−69362
fractal feature and texture analysis *(Japanese)* 87−62223
fractal image models and object detection 88−41083
fractal images synthesis, iterated function systems and skeletonisation 88−41081
fractal signature analysis of images containing mixtures of natural textures 87−69375
fractal-based image analysis in radiological applications 88−46242
fractal-dimension estimators of natural image texture 88−46308
frame adaptive vector quantization 87−33815
frame reconstruction problem, solution 88−66682
frame sequences segmentation by moving observer 85−13598
frame-adaptive vector quantization for image sequence coding 88−52344
free motion of object in 3-D space, anal. using sequential pictures *(Japanese)* 85−51776
freeze-frame videoconferencing, gray-scale image coding 86−49865
frequency diversity process for speckle reduction in real-time ultrasonic images 88−34753
frequency response of an image recorder using repeat scan 86−69182
Fresnel holograms, in-line, phase retrieval and twin-image elimination 87−26557
Fresnel image transformation with limited freq. spectrum *(Russian)* 88−14786
fringe anal., Gabor filter approach 87−48143
full field automatic 3D surface reconstruction from moire topograms, phase shift method 88−47669
function pattern coarse-to-fine extraction using parameter space quantization *(Korean)* 88−34808
functional programming language for hierarchical structures in image processing 86−37161
fundamentals *(Japanese)* 85−51702
fuzzy c-means clustering algorithms, efficient implementation 86−48979
fuzzy enhancement, improved method 85−36460
fuzzy image description by convex hull technique 87−48229
fuzzy images processing using algebraic environment 88−73209
Gabor filters applied to electronic speckle patterninterferometer images 87−8580
gamma-angiography, application of image processing techniques 86−11935
Gaussian blur and the heat equation 86−4061
Gaussian DOLP edge detector, design 88−14836
Gaussian filters, multi-scale edge detection 87−27639
Gaussian image detector boundary location optimisation *(French)* 88−21344
Gaussian operators optimal design in small neighbourhoods 88−3175
Gaussian ring filter for edge detection 86−49040
Gaussian surface curvature/contour determ. using photometric stereo 88−3273
Gaussian windows, two-dimensional, computation 88−52547
general and gray-scaled structural operation *(Chinese)* 86−37112
general imagery intelligence training system (GIITS) 87−10067
generalised Hough transform appl. to corner detection 88−21168
generalized cone descriptions from sparse 3-D data 87−2627
generalized cylinders, invariant properties of projections 87−62376
generalized interest operators 86−10551
geo-graphic code representation of 3D objects from drawings 88−66667
geological multisource image interpretation, effect of Heat Capacity Mapping Mission and Landsat scale difference *(French)* 85−64720
geometric filter for reducing speckle 86−59332
geometric image transformations, group structure, cross-correlation and symmetry 88−66692
geometric interpretation of image contours 87−62341
geometric moments from Hartley transform intensities 87−47957
geometry guided segmentation of outdoor scenes 88−66673
ghost canceller, adaptive transversal filter type, design and performance for TV/teletext signals *(Japanese)* 85−14448
ghost canceller, transversal type for TV picture quality improvement, reference signal study *(Japanese)* 86−31015
Gibbs random fields, parameter estimation approach 86−16557
glossy object recognition, model-based, using polarimetrical props. 88−46143
graph theory, shortest spanning tree approach 86−37127
graphic command coding scheme for multi-color images *(Japanese)* 88−46280
graphic command coding scheme for multi-color images 87−39969
graphic image processing, noise removal algorithm 87−19632
grate furnace flame pictures, intensification and anal. using picture processing techniques *(Finnish)* 85−41939
grating, reconstruction, coherent and incoherent review 86−69143
gray geometry, digital image characterisation 85−36428
gray level images, effects of asymmetric fuzzy membership functions 87−13160
gray level iterative image restoration algorithm using power spectral density *(Korean)* 88−46177
gray pictures, random pattern method in high-speed processing time *(Japanese)* 88−41044
gray scale and binary halftoning of images as an optimal quantization problem 87−48210
gray scale images, data compression by level plane encoding *(Japanese)* 87−7848
gray valued pictures, coding using density contour lines *(Japanese)* 85−19534
gray-level images with multiplicative noise, stochastic relaxation for maximum a posteriori restoration 87−62287
gray-level picture thresholding using entropy of histogram 85−41941
gray-scale images, data compression coding using bit planes 86−16548
gray-scale images, parameter reduction and context selection 85−13592
picture processing continued
gray-valued images, inbetweening method using density contour lines *(Japanese)* 85−51787
graylevel co-occurrence matrix, use in threshold selection 88−73229
S Greenland lineament statistical analysis from Landsat images 85−64726
grey level images, sketch based coding 88−59318
grey level textures description, curvature primal sketching 87−19951
grey scale images, difference adaptive block-truncation encoding *(Japanese)* 87−39958
grey scale images, mathematical morphological operations with flat top structuring elements 87−19887
grey scale images processing developments 87−75890
grey-level and bi-level pictures, attribute image classification algorithm using Laplacian operation *(Japanese)* 87−48007
grey-level image dynamic thresholding 87−48225
grey-scale facsimile images, cosine transform coding 86−54832
grey-scale images, compression, parameter reduction and context selection 85−46925
grey-scale images, integral invariant description 88−14835
grey-tone images, information measure *(Chinese)* 86−16493
grey-valued pictures, coding method using density contour lines 86−68987
greyscale image compression, predictive vector quantization schemes 88−46287
group representation theory appl. to picture recognition 87−69261
Gull-Daniell algorithm in max. entropy method, radioastronomical appl. 85−7848
Haar transform appl., properties and fast algorithms 85−7919
Hadamard transform, four-level, image and speech processing appls. 88−49620
half-tone pictures, predictive MH encoding method *(Japanese)* 87−7849
half-tone pictures imaging on binary displays *(Czech)* 88−14809
halftone dot texture visibility estimation 85−36349
halftone image reproduction, bilevel rendition method using threshold matrix *(Japanese)* 85−2903
halftone pictures, image processing using block separate transformation method *(Japanese)* 87−48003
halftone reproduction, pixel overlap to obtain more gray levels 88−52523
halftones in reconstructed image by multiaspect hologram of focused images 88−72448
halftoning of continuous-tone image reproduction with alias suppression 85−13631
halftoning techniques using error correction 87−69320
handwritten drawings, figure recognition method *(Japanese)* 88−46161
handwritten signature preprocessing from image gradient anal. 87−48147
handwritten time drawing, image enhancement method *(Japanese)* 88−46160
harbour surveillance radar echoes, image processing, vessel gross tonnage estimation *(Japanese)* 87−56234
hardcopy output of reconstructed imagery 87−75889
Hartley optical transform intensities to compute geometric moments of image 88−59230
Hartley transform intensity, nonrecursive generation of image moments 88−59187
Hartley transform intensity for image reconstruction 87−19865
Hartley-transform intensity, used for reconstructing real object function 88−59220
HD-MAC, spectral anal. *(German)* 88−15775
HD-MAC TV pictures, chrominance contour enhancement 87−13153
HDTV, colorimetry, up to date technology 87−34793
HDTV, field rate conversions problems 87−34794
HDTV, time-axis transform bandwidth compression system for picture signals 88−41024
HDTV, time-axis transform bandwidth compression system *(Japanese)* 86−31006
HDTV camera, digital contour-corrector development 85−52517
HDTV coding, hybrid scheme of subsampled and interpolative DPCM 87−76987
HDTV colorimetry and gamma, noise and quantisation errors visibility considerations 88−14810
HDTV display, motion compensated field rate conversion 88−9771
HDTV pictures enhancement, psychovisual bases 87−34795
HDTV receivers, frame stores and advanced signal processing techniques 86−49818
HDTV signals, efficient coding method 88−4187
HDTV signals, pre- and post-filtering for sampling rate reduction and display up-conversion 88−29077
HDTV telecine, system approaches 87−13932
HDTV transmission, 3D noise weighting fn. for signal/noise performance eval. *(Japanese)* 86−69930
heart surface electric field reconstruction from field at torso surface 88−36485
heat insulation quality checking, by thermal imaging system 88−4676
heterodyne holography, image reconstruction, parabolic eqn. calcs. 88−72452
heterodyne interferometry, coherently illuminated objects, images recording and reconstruction 88−21327
hexagonally digitised images, relationship between spiralled-alternated heptarchies 87−48232
hexagonally sampled images and detection of edges *(Slovak)* 86−43299
Hi-Vision, PAL standards converter *(Japanese)* 88−22293
hierarchical coding of line-drawing data described bythe chain-code sequence *(Japanese)* 86−69167
hierarchical contour coding, principles and strategies 85−36440
hierarchical estimation of displacement vectors inimage sequences *(Japanese)* 86−69168
hierarchical image anal., renormalisation group approach 88−66726
hierarchical image processing/transmission, architectural adaptations 87−27662
hierarchical picture coding using quadtree decomposition 88−28066
hierarchical segmentation algorithm for picture processing region growing technique 87−13112
hierarchical TV system for different communication services 85−14449
hierarchically encoded image recognition by technical and biological systems 88−41009
high accuracy algorithm for max. entropy image restoration in IR astronomy 85−36315
high accuracy cursor for length measurement in digital images *(Japanese)* 87−62217
high definition backscatter imaging 88−8867
high definition television standards conversion 87−8435

picture processing continued
High Definition TV, bandwidth compression *(Japanese)* 85−46936
high definition TV, motion detector enhancement 87−8434
high picture quality television receivers *(Japanese)* 88−41815
high quality image coding with a model-testing vector quantizer and a human visual system model 88−66751
high quality image compression scheme for real-time applications 87−33816
high quality TV, development 85−19544
high resolution digital image mosaics, development from low-resolution sensor data 87−13166
high speed transformation of drawing images based on structure description *(Japanese)* 87−27621
high-compression image coding methods 88−28019
high-definition ultrasound imaging, fast noise insensitive processing 88−46307
high-resolution high-contrast synthesis, theorem 85−63100
high-speed 2 D digital filter structure 86−57991
high-speed digital facsimile, vertical scanning technique controlled by occupancy of line memory *(Japanese)* 85−63262
high-speed digital filter LSI for video signal processing 87−56357
high-speed fan-beam reconstruction using direct two-dimensional Fourier transform method *(Japanese)* 85−19532
high-speed meas. of particle size distrib., image processing technique 88−16486
high-speed video in automotive barrier safety testing 88−47455
higher-order two-variable functions, approx. using moments and state-space techniques 85−22381
highlight identification using chromatic information 87−62326
highlights separation from object colour using colour reflection model 88−8870
histogram anal. using scale-space approach 87−39898
histogram equalization for optimal intensity range utilization 88−34739
histograms distance, appl. 87−48242
HMOS A/D and D/A convertors for video signal processing *(French)* 86−46934
hologram processing, conf., London, England (April 1985) 85−60637
holograms sampled by Fresnel zone plates, 2 D image reconstruction 88−14291
holographic correlator, effect of image inclination on signal 86−48512
holographic correlator, signal parameters, medium nonlinearity and filter spatial limitations effect 87−26562
holographic correlator revealing differences of common features in images 88−65895
holographic filters for optical image processing 88−34159
holographic image reconstruction and conjugate wave 86−59335
holographic image subtraction using phase shift method and holographic registration 85−57503
holographic image velocity filter synthesis using nonlinear photorefractive effect 88−65447
holographic interference, Fourier transform eval. of patterns 88−45579
holographic interferometry, double exposure and video-electronic processing methods 88−2418
holographic interferometry, heterodyne and quasi-heterodyne, review 86−3359
holographic interferometry, high resolution video-processing, contouring and deform meas. appls. 85−51312
holographic reconstruction, 3D, of serial 2D image information, biomedical appls. 85−51295
holographic three-dimensional image preprocessor for welding control feedback 85−53977
holography, Fourier, using white-light construction and reconstruction processes 86−10004
holography, overview of history, current and future applications *(German)* 87−47000
holography, particle field, data reduction by Fourier transform analysis 85−51307
holography, real-time, applied to conjugate wavefront generation and image reconstruction 86−10007
holography, stroboscopic sandwich, appl. to vibration phase determ. 85−56865
holography, white light, signal-to-noise limitations 88−45557
holography, white light-in-flight, by two-step approach 86−9974
homomorphically processed images, matrix quantisation 87−39978
Hotelling trace criterion as metric for system performance, psychophys. validation 88−23061
Hough transform, adaptive, for 2-D shape detection 88−3170
Hough transform, generalised, for object detection, prop. anal. 87−62180
Hough transform, prediction of performances 85−57444
Hough transform, relaxational approach 88−66769
Hough transform accuracy improvement 88−73353
Hough transform modifications for lines 86−4060
Hough transform of parametric curves and its use for picture processing *(Slovak)* 87−75858
Hughes Image Understanding Project 86−23151
Hughes three-dimensional computer for image and signalprocessing 86−2322
human area recognition in video signal 88−21335
human visual image coding, important obs. 87−33779
hybrid coders with 2D signal processing for moving pictures 88−27800
hybrid coding configuration, 384 kb/s motion estimation 85−57545
hybrid coding of an image using a Walsh-Hadamardtransformation with differential pulse code modulation 86−54418
hybrid coding of multi-tone still images 85−19545
hybrid differential encoder and nonlin. filter 88−66766
hybrid DPCM/transform codec for low bit rates, eval. 87−76411
hybrid Hadamard LPC scheme 85−57534
hybrid identification scheme for image and blur parameters 87−48030
hybrid image coding of sequences, new approaches 87−33788
hybrid image coding scheme using adaptive local resolution 87−48026
hybrid image coding technique using a noncausalstochastic model 86−10502
hybrid image coding techniques for videoconferencing 85−51803
hybrid image coding with vector quantizing , modifications of ID and 2D systems *(Slovak)* 88−73230
hybrid image compression technique 86−10509
hybrid image processing, conf., Orlando, FL, USA (Apr. 1986) 87−36303
hybrid interframe coding of video signals with backward-acting motion detection for videoconferencing 87−19928
hybrid motion compensation/discrete cosine transform coding scheme for TV signal bandwidth compression *(Japanese)* 88−46271
hybrid motion estimation in successive television pictures 87−48043

picture processing continued
hybrid optical-digital texture processing based on Laws' energy measure 87−55286
hybrid predictive/transform coding., fixed and adaptive predictors 86−29721
hybrid transform coding schemes, low bit-rate 88−8857
hybrid videoconferencing coder performance using displacement estimation in transform domain 87−19926
IC production and testing, TV imaging systems for positioning and inspection appls. *(Slovak)* 85−28040
iconic indexing by 2-D strings 87−47910
ICs, low-power video-processing devices for pocket colour TVs with LCD panels *(Japanese)* 88−22271
identification and one-pass coding of objects by image analysis *(French)* 87−69341
identification and restoration using parallel Kalman filters 88−46295
identity independent object segmentation in $2^1/_2$D sketch data 87−19972
IF TV signals processing, in multistandard environment 87−13872
IF video signal processing, low dissipation ICs appl. *(German)* 88−53427
III-V semiconductor defect detection by image analysis *(French)* 87−53173
IIR switched-capacitor linear-median hybrid filters 87−66345
IIR zero forcing ghost canceller, tap weight fluctuations suppression *(Japanese)* 86−15909
ill-conditioned problem soln. by eqn. error minimisation 87−62362
image, symmetrical component expansion data compression capability 87−69390
image algebra, induced operators and induced subalgebras 88−40939
image algebra, mathematical morphology 88−40938
image algebra, unified approach to image processing 88−28052
image algebra closed-form representation of convolution dilation and erosion 88−73371
image anal., conf., Stockholm, Sweden (Jun. 1987) 88−54
image anal., random field estimation/synthesis using long correlation models 85−19526
image anal., rotation-invariant operators and scale-space filtering 88−3189
image anal. and coding, adaptive split and merge 87−33766
image anal. and compression *(German)* 86−54533
image anal. by methods of moments 88−66627
image analysis, attributed relational graphs, similarity measure 85−30375
image analysis, Karhunen-Loeve expansion methods 85−36249
image analysis by the methods of moments 88−73350
image analysis developments in materials science, review *(French)* 88−56347
image analysis methods, critical survey 87−48134
image analysis using hit-or-miss transforms with resolution pyramids 87−39954
image analysis using multigrid relaxation methods 86−48971
image and optical disk recording, laser specification 87−39266
image approx., stability of successive splineapproximation and a new stable calculation method *(Japanese)* 86−49024
image bandwidth compression by coding of lowpass and high pass picture system 85−57486
image bandwidth compression techniques, review 86−23152
image bearing photorefractive oscillators 87−55289
image block motion estimation using fit by generalized discrete orthogonal polynomials 87−47987
image blurring, Gaussian convolution computing 87−48181
image blurring estimation with no a priori information 85−51758
image boundaries, regression-induced, invariant quantities under special linear transformation 87−69312
image boundaries detection between optical flow fields from several moving planar facets 86−59339
image boundary detection problem using dynamic programming *(Korean)* 85−63099
image chain model, human visual system components, for imaging systems design and anal. 86−69184
image chain model and information content of digitalimaging systems 86−69178
image classification, spatial information appl. *(Chinese)* 87−27557
image classification using binary morphological operators 87−57433
image coding, 1D mapping technique for vector quantisation 87−19924
image coding, 3D motion estimation appl. 88−8880
image coding, adaptive discrete cosine transform system using gain/shape vector quantisers 87−19919
image coding, comparison of Hartley, Cas-Cas, Fourier, and discrete cosine transforms 88−59214
image coding, conf., Cannes, France (Dec. 1985) 87−31117
image coding, efficient method based on image struct. 85−51798
image coding, gain-shape vector quantiser 87−19922
image coding, high compression 87−48198
image coding, high compression, using directional filtering 85−51753
image coding, improved vector quantisation techniques 88−46281
image coding, intraframe compression technique, transform coding scheme based on detection [image coding] 85−51791
image coding, low rate, with finite state vector quantisation 87−19921
image coding, recursive pyramids appl. 85−7917
image coding, second generation technique using human visual system based segmentation 87−62291
image coding, transformed, vector quantisation 87−19923
image coding, vector quantisation incorporating orthogonal transforms 86−54561
image coding, vector quantisers and block truncation coding appl. 86−54560
image coding and reconstruction, naturalness-preserving transform 86−10473
image coding based on 2-D line prediction and 2-D multipulse excitation 87−48019
image coding below 0.5 bits per pixel using vector quantization 87−48028
image coding for Chinese character patterns 88−41061
image coding reduction of blocking effects with lapped orthogonal transform 88−73251
image coding schemes based on predictive vector quantisation 86−23114
image coding selective quantization of reconstruction noise in dominant subband 88−73247
image coding system for human face, model-based 88−46283
image coding technique using a human visual system model and image analysis criteria 87−62290
image coding using LPC with vector quantization 85−51799
image coding using Rh transform 85−51793
image coding using vector quantization , review 88−73188
image coding using visual modelling and composite sources 85−51796

picture processing continued
image coding with distortion below visual threshold 88−41067
image coding with motion compensation and motion interpolation *(Japanese)* 87−39867
image coding with vector quantisation, block-effect reduction 87−69264
image colour constancy calc. in near-Mondrian scenes, model 88−73348
image compression, adaptive method using Karhunen-Loeve transforms 87−62292
image compression, fractal based approach 87−19933
image compression, source modelling for arithmetic codes 87−55321
image compression and quality assessment, visual model weighted cosine transform 85−57469
image compression based on hierarchical encoding 87−33778
image compression by gray level reconstruction of dithered images 86−30045
image compression by region analysis 85−46962
image compression results using the LMS adaptivealgorithm 85−63094
image compression through transform coding techniques *(Spanish)* 88−3188
image compression using adaptive vector quantization 86−43303
image compression using nonadaptive vector quantization with adaptive overhead transmission for codevector replacement 88−46290
image compression with VLSI 88−34795
image correction for radiometric effects in remote sensing 87−29911
image data, real-zero-converted, signal phase with amplitude weighting 87−75870
image data compression, two-tone technique, folding method 86−37132
image data compression and approximation using quadtrees 85−30397
image data compression by using adaptive Huffmanencoding and the Laplacian pyramid 87−2647
image data compression method 85−19510
image data compression techniques using Kalman and alpha-beta filters 87−48035
image data compression using 2-D lattice modelling method 87−62148
image data compression using 2-D lattice predictor 85−13589
image data compression using unitary transforms, matrix products implementation 85−51748
image data compression via COSHAR transform 85−30465
image data encoding, simple algorithm 85−46953
image deblurring by spectrum analysis *(Korean)* 87−33756
image decimation and interpolation, comparative anal. of digital filters 87−19883
image decomposition and coding, spatial frequency and orientation 88−41070
image deconvolution using 2-D non-causal fast Kalman filters 87−27650
image deformation, optical flow invariance and parameter estimation 88−21361
image description based on quantum-mechanical harmonic oscillator wave functions 88−28112
image descriptions, objects reasoning and recognition 87−62343
image design: generation of a prescribed image through a diffraction-limited system with high-contrast recording 85−46933
image detection by singular value decomposition of image matrices 87−69386
image differentiation, real-time, by degenerate four-wave mixing 85−19018
image edge segment based stereo matching 86−16545
image edges matching to object memory 87−62342
image enhancement, generalised technique 85−30437
image enhancement, order statistic last output reference filters 87−62289
image enhancement, parametric 88−14790
image enhancement, real time, using simple video systems 88−59275
image enhancement, sum of absolute difference values smoothing: evaluation and application 87−48032
image enhancement and edge detection median based algorithms 88−14825
image enhancement and quantitative index using fuzzy sets 88−3180
image enhancement and threshold selection using gray-level co-occurrence matrix 85−63108
image enhancement using FIR anisotropic filters 87−27654
image enhancement using multithreshold adaptive filtering 87−27653
image enhancement using spatially variant two-dimensional recursive filters 85−19539
image enhancement via transform amplitude sharpening 87−27652
image enhancement/noise reduction by iterative nonparametric Bayes estimation 85−30460
image estimation, hierarchical approach 86−10528
image feature classes discrimination for image data with large spectral dimensions 87−4161
image feature description and segmentation, finite prolate spheroidal sequences 88−41031
image filtering using nonlinear statistical means 86−3997
image filtration, self-congruent dynamics 88−59317
image fitting systems, correlation extremal type, potential noise immunity 88−46147
image flow constraint equation 86−69113
image flow equations, closed form solutions 87−62317
image flow paradigm 85−19541
image flow structure 86−4045
image frequent shift in conditions of characteristics variability *(Russian)* 85−2788
image generating functions, pyramid 88−41080
image generation model for 2-D block Kalmanfiltering 86−64371
image geometric transform implementation, generalised two pass approach 88−52601
image global props. estimation using correlation entropy and variance. *(Japanese)* 85−51772
image identification and blur parameters for noncausal blurs restoration 87−7817
image identification and restoration, survey 88−46293
image improvement using transport equation of optical phase 85−57441
image information processing systems *(Japanese)* 85−8758
image interpolation by generalised spline filters, 2-D schemes based on partial differential eqn. models 85−57467
image interpolation by generalized splines 85−30384
image interpolation coding with motion compensation for video conference 87−34853
image labelling and the statistical analysis ofincomplete data 87−2649
image matching, stereo triangulation techniques 88−28125
image matching algorithms 86−23144
image matching by a probabilistic relaxation labeling process 85−30406
image matching/classification, relaxation technique *(Chinese)* 85−2880
picture processing continued
image model, quad-tree image estimation 87−75949
image motion estimation, anal. of weak solution approach 87−47937
image motion estimation, appl. of maximum a posteriori principle 88−52597
image motion estimation, integrated spatio-temporal model and recursive algorithm 85−36402
image motion estimation using wave front region growing 87−62347
image multiplication by means of Fourier optics, operational change in parameters *(Russian)* 86−37118
image normalization by complex moments 85−36353
image pattern recognition methodologies, overview 86−30060
image plane processing approaches 85−57425
image preprocessing, minimal quadtrees representation 85−36414
image primitives, low data rate coding use 87−33776
image processing: analysis beyond matched filtering 85−63128
image processing, 2-D ARMA models characterisation and estimation 85−19509
image processing, appl. of generalised Schur-Coleski triangular factorisation 85−36324
image processing, invariant local spectral signatures 85−51795
image processing, optical median filtering using threshold decomposition 87−26138
image processing, reconciliation of techniques *(French)* 88−41050
image processing, resolution and robustness, regularization principle 87−27589
image processing, technical issues 86−4012
image processing algorithms, understanding and evaluation methodologies 85−46909
image processing and anal., conf., Coventry, England (Feb. 1984) 85−32919
image processing and image anal. *(German)* 87−33741
image processing and image anal., light microscope appl. *(German)* 87−69266
image processing by simulated annealing 86−23111
image processing fundamentals, review 86−23143
image processing noise reduction by order statistic filters *(French)* 88−21345
image processing system (IPS) for recognition and analyzing objects 87−48047
image processing system for electron linac beam diagnosis 87−41702
image processing systems design, difference calculus appl. *(Polish)* 86−30013
image processing systems for quality assurance *(German)* 88−73224
image processing techniques, application to marine fisheries 85−32024
image processing technology trends *(Japanese)* 86−43342
image processing using three inhibition models 88−34823
image processing with VLSI 85−54939
image quality, psychophysical approach 86−23158
image quality considerations for laser image recording 86−68655
image quality eval. using S/N ratio meas. 85−2894
image quality overview, conf., Arlington, USA (Apr. 1985) 86−19716
image raggedness, effective measure, num. procedure 86−23160
image recognition for store systems 85−46926
image reconstruction, comparison of phase retrieval algorithms 87−62282
image reconstruction, constrained, of complex waveforms 87−27592
image reconstruction, Fresnel zone transforms, stationary phase approx. 87−27584
image reconstruction, general integer-order Hankel transforms computation algorithm 87−33744
image reconstruction, high-speed, using direct 2D Fourier transform method 87−27634
image reconstruction, phase retrieval, support irreducibility 87−27583
image reconstruction, three dimensional, cone beam X-rays appl. *(Japanese)* 85−51773
image reconstruction and spectral estimation, unified dual optimisation and algorithms 86−16523
image reconstruction and spectrum estimation, alternating maximisation of entropy/likelihood function 87−55281
image reconstruction by constrained extrapolationmethod *(Japanese)* 86−30037
image reconstruction by simulated Raman and Brillouin backscattering, geometrical conditions 86−64348
image reconstruction from autocorrelation data, nonnegativity constrained spectral factorisation use 88−66757
image reconstruction from few projections *(Japanese)* 85−41991
image reconstruction from its autocorrelation 87−69262
image reconstruction from limited Fourier magnitude data 86−3948
image reconstruction from limited projections using ang. periodicity of Fourier transform of Radon transforms 86−10548
image reconstruction from one-bit Fourier phase, theory, sampling and coherent image model 87−62281
image reconstruction from phase, iterative method with histogram equalisation constraint 87−62280
image reconstruction from projections in discrete-space systems, appls. *(Japanese)* 85−57508
image reconstruction from rotational shearing interferograms 88−59315
image reconstruction from sine wave crossing contours, interpolation algorithm 86−3950
image reconstruction from truncated projections, linear prediction approach 87−27633
image reconstruction from zero crossings of bandpass signals 86−3949
image reconstruction quality improvement, projection data redundancy *(Japanese)* 85−25185
image reconstruction using convex projections, constraints, initialisation and finite word length effects in blind deblurring 87−62283
image recovery, theory and appl., book 88−55804
image recovery from partial information using $\Delta^2 G$ 88−66714
image registration, piecewise cubic mapping functions 87−75883
image registration, power cepstrum and spectrum techniques appl. 88−41004
image registration using a fast adaptive algorithm 87−69331
image registration using pseudo control points on linear features 87−75932
image representation by 2D polynomials 87−33784
image representation in biological/machine vision, Gabor scheme 88−66624
image representation using Voronoi Tessellation 85−41942
image representations, conversion and combination 87−55351

mIN/MAX autocorrelation factors for multivariate spatialimagery 86−29691
minerals prospecting, image processing of aeromagnetic data and integration with Landsat images 88−10496
minimum relative entropy inversion, state spaces and initial estimates, appl. to spectral anal. 88−34544
minimum relative entropy method as soln. to missing short-baseline problem in radioastronomy 87−28711
minimum variance synthetic discriminant functions, constraint phase optimisation 88−34736
minimum-angle automatic edge detection 85−57523
minimum-error/min.-correlation filter for image recovery 87−47959
mirror double phase conjugate, optical information processing appls. 87−62176
MIS-liquid crystal structures, pseudocolour image synthesis 87−18765
mixed documents, text, graphic, image, binary representation that compresses 87−19935
MM wave radar image improvement using simple linear spatial filters 87−49148
MM-wave holography, 2D image reconstruction method from holograms sampled by using Fresnel zone plates *(Japanese)* 87−26573
mobile robot vision planes identification for world model construction 87−48074
model driven image restoration 86−37167
modelgraph, hierarchical decomposition/synthesis of relational descriptions 87−48220
modeling unequally spaced 2-D discrete signals by polynomials 88−3253
modification of block truncation coding approach to image compression 87−48022
modified anti-aliasing mask algorithm and error evaluation *(Japanese)* 87−27620
modified Huffman coding for half-tone pictures 86−23169
modular architecture for adaptive predictive coders of digital television signals 85−52559
Modular Optoelectronic Multispectral Scanner image and Landsat data comparison 85−64711
modulated CCD imagers, image recovery in astronomy 88−27998
modulator, self-linearized using quantum-well self-electro-optic effect device 85−18753
modulo masking, data embedding in pictures 88−41023
moire fringe suppression in sampling of halftone images 87−19868
moment-coded images, relative entropy reconstruction 87−19967
moment-preserving curve detection 88−41036
monochrome and colour images, quadrature mirror filtering appl. to coding 87−62300
monochrome and colour pictures, bit requirements 86−3995
monochrome image, 3-bit DPCM coding system using adaptive prediction and adaptive quantization *(Japanese)* 85−25183
monochrome images, adaptive predictive coding, 2-D linear prediction appl. 85−25158
monochrome images, approach to choosing fuzzy distribs. 87−33750
monochrome still image coding system, runlength code *(Japanese)* 85−25182
monochrome still image noise reduction by a hybrid method based on an anisotropic stochastic model *(Japanese)* 87−27622
monocular image sequence, feature points trajectories location 87−39893
Montage Picture Processor, computerised film editing system 86−60023
morphologic edge detection 88−14824
morphological filtering appls. 87−27643
morphological filters, anal. of multiple-model type 88−34836
morphological filters, statistical results and image restoration appl. 88−28018
morphological filters, theoretical anal. 87−39986
morphological operations on mesh connectedarchitecture: a generalized convolution algorithm 87−2632
morphological optics and hypotheses role in image analysis 87−55262
morphological sampling theorem for digital image 88−46212
morphology, introduction 87−16448
MOS integrated photodiode optical signal convertor, linear model, implementation for image analyser *(Russian)* 85−29730
motion anal., two view, under small perturbation 86−16561
motion analysis of nonrigid surfaces 88−73328
motion and structure estimation using maximum likelihood method 88−73329
motion blur compensation of CCD endoscope images by colour deviation method 87−47933
motion blurred images, degradation model and parameter estimation 87−27649
motion boundaries detection 87−62330
motion compensated coder 85−41997
motion compensated frame interpolation using a feature based motion estimation technique 88−8882
motion compensated image coding with a combined maximum aposteriori and regression algorithm 85−63095
motion compensated imager coding, contour based representation of displacement field 87−19927
motion compensated interframe image prediction 86−3971
motion compensated transform coder, using vector quantisation with scene adaptive codebook 88−3211
motion compensation image coding, min. risk quantizer design 86−10515
motion compensation in the Hadamard domain for low bit rate NTSC color video systems 88−46288
motion constraint equation for optical flow 85−30369
motion detection in out-of-register pictures 88−73365
motion detection in spatio-temporal space 88−28130
motion estimation, finding 3-D point correspondences 87−48100

picture processing continued
motion estimation 3D, algorithms taking account of scene radiometric characts. 88−4189
motion estimation algorithm for interframe video coding appls. 85−36330
motion estimation and subband coding using quadrature mirror filters 87−48042
motion estimation error anal. 87−62387
motion estimation from 3-D point sets with and withoutcorrespondences 87−2621
motion image structure synthesis using reconstruction and reprojection technique 88−28128
motion images, dynamic multi-stage vector quantisation *(Japanese)* 85−30362
motion parameters, 3D, from contours using canonic differential 86−16558
motion parameters detection from spherical flow fields 88−28108
motion parameters determination using intensity guided range sensing 86−49010
motion parameters recovery using gradient vector distributions 88−28106
motion parameters recovery using optical flow 88−59272
motion patterns generated by moving shape, correspondence detection 86−23139
motion picture coding algorithm using adaptive DCT encoding based on coefficient power distribution classification 88−3150
motion picture transmission at 2 Mbit/s using hybrid subband/DPCM coding *(German)* 87−2421
motion recovery from images sequence 88−59271
motion segmentation and estimation through the determination of spatio-temporal primitives in an image sequence *(French)* 88−14816
motion stereo using ego-motion complex logarithmicmapping 87−2620
motion vector detector for MUSE encoder 87−33812
motion vector processing schemes 87−13154
motion vectors for TV broadcast appls. 88−8881
motion video coders, motion detection and compensation coding 88−45936
motion-compensated, adaptive intra-interframeprediction and entropy coding *(Japanese)* 86−31009
motion-compensated adaptive intra-interframe predictivecoding algorithm 86−10517
motion-compensated hybrid coding at 50 kb/s 86−10518
motion-compensated interframe, interfield, and intrafield adaptive prediction coding for TV signals, performance 86−54446
motion-compensated interframe codec 87−34226
motion-compensated interframe coding 86−10513
motion-compensated SAR image ISLR 88−9621
motion-compensated transform coding 86−10519
motion-compensated transform coding based on block motion-tracking algorithm 88−3210
motion-compensating field interpolation from interlaced and non-interlaced grids 87−33782
motion-compensating prediction for hybrid coding of video sequences 88−3154
motion-in-depth parameters calc. using stereoscopic motion constraints 88−28129
motion/structure estimation from line correspondences 88−73344
motion/structure estimation from monocular perspective images, two-step approach 88−28131
moving edges detection in image sequences using maximum likelihood framework 88−28081
moving holes, size meas. using spatial filtering 87−49942
moving image sequences, local motion estimation with the dynamic pyramid 87−48233
moving image signals, 3-D spectrum anal. of sub-Nyquist sampling structs. *(Japanese)* 85−51783
moving object, recovery of three dimensional structure from orthographically projected optical flow *(Japanese)* 85−13626
moving object 3-D motion parameters and surface structure determ. 86−59366
moving object detection using line image sequence 85−36410
moving object measurement using TV camera, error analysis appl. *(Japanese)* 86−17664
moving object processing assuming locally const. angular momentum 87−48208
moving object recognition using motion enhanced Houghtransform 85−51811
moving point object detect. against moving background 85−52654
moving rigid planar bodies, rapidly converging algorithm for motion estimation 87−48207
moving target detection invariance 85−30347
moving target imaging by SAR processing 85−63767
moving targets, image tracking system, target position estimation 85−30366
N Mozambique contour analysis from Landsat images 85−64725
MR imaging systems, clinical software *(Japanese)* 87−7844
MTI filter design using adaptive techniques 88−74033
Mukhopadyay's parallel string matching algorithm two-dimens. generalization 86−3993
multi-classed images buried in additive noise 87−55284
multi-image segmentation, neighbouring point G-mode central method 85−51806
multi-level images, progressive coding method *(Japanese)* 88−46277
multi-level images, progressive encoding scheme *(Japanese)* 87−39960
multi-level images, variable-length-code-selective reversible predictive encoding *(Japanese)* 87−69342
multi-resolution approach to image segmentation 88−59285
Multi-Resolution CLEAN, appl. to short spacing problem in astronomy 88−66610
multi-resolution low and band-pass transforms for image processing 87−47883
multi-resolution morphology 87−62360
multi-source imagery events detection *(French)* 88−21346
multi-spectral images, adaptive-reversible predictive coding *(Japanese)* 88−41099
multi-spectral images adaptive classification using local uniformity *(Japanese)* 85−41980
multiband image data, random noise reduction, Fourier coeff. phase relationships 85−30348
multichannel 2D linear prediction, appl. to color image coding 88−73254
multichannel filtering methods for color imagesegmentation 86−4051
multichannel images, digital restoration, Wiener soln. 87−62288
multicriterion image reconstruction and implementation 87−48040
multicrop classification of remote sensing imagery 88−10604
multidetector thermal imagers 85−47843

picture processing continued
multidimensional analytical signal processing, using Fourier and Hilbert transforms 87−48020
multidimensional band-limited functions, phase ambiguities and zeros 85−46923
multidimensional bandlimited sequences, extrapolation using signal energy concentration information 87−61997
multidimensional decimation and interpolation filters, joint optimisation, time-varying imagery appl. 87−24359
multidimensional images, ordered and partially ordered processing 85−46931
multidimensional LMS adaptive filters, image registration 88−66703
multidimensional matched filters, staring IR systems modelling appl. 88−53701
multidimensional morphological edge detection 88−41082
multidimensional object state estimation based on weighted Mahalanobis distance 87−69313
multidimensional phase retrieval models 85−46969
multidimensional spherically symmetric random source, gain/shape vector quantiser 86−69119
multielement radiation detector, stabilising image speed *(Russian)* 86−24535
multifrequency diffraction tomography 86−11967
multilayered dielectrics, UHF radio introscopy, image restoration 88−6550
multilevel image coding, arithmetic coding *(Japanese)* 86−3990
multilevel images encoding, using DF algorithms *(Slovak)* 86−43298
multilevel images segmentation using Gibbs distrib. 86−16554
multilevel median filters 88−34833
multilook SAR images, adaptive enhancement and speckle reduction 87−63055
multimedia database on image processing *(Japanese)* 87−75865
multimode predictive coding algorithm with motion compensation 87−33774
multiple 3-D velocity vector fields in optical flow, orthographic projection analysis 86−4042
multiple aperture lenslet arrays, optical image pre-processing 86−9642
multiple image subtraction by speckle interferometry 86−69141
multiple imaging and multichannel optical processing with split lenses 88−27994
multiple object motion estimation, edge relational structure matching approach 87−69378
multiple registration problem 87−39991
multiple resolution imagery and texture analysis 87−39919
multiple SAR images and surface shape reconstruction 88−10539
multiple sensor data combination for automatic target acquisition, statistically optimum methods 85−8458
multiple views estimation of outdoor terrain modelled by stochastic processes 87−62194
multiple views for camera registration 88−28031
multiplexable liquid crystal data representation devices, image contrast calc. *(Russian)* 86−15525
multiplicative noise filtering in images 87−13149
multipolarised SAR image data, stable structure approach to automated scene understanding and awareness 88−28931
multisensor imagery, segmentation techniques evaluation for prescreened areas, automatic target recognition appl. 86−69193
multislice image texture edge detection by local vector mapping 88−66744
multispectral change detection using difference classification and bitemporal classification, remote sensing appl. 86−18535
multispectral high resolution image classification, hierarchical method 88−28058
multispectral image, spatial and spectral patterns, component anal. 88−14782
multispectral image classification 86−23154
multispectral image clustering and classification, Landsat TM data evaluation 87−57431
multispectral image data, compound decision theory and adaptive classification *(Japanese)* 88−73236
multispectral image restoration, synergistic approach 87−57435
multispectral images, classifier evaluation using spatial context *(Japanese)* 87−62219
multistage image decimation and interpolation filters suitable for VLSI implementation *(Chinese)* 87−66399
multitemporal-multispectral scanner data, hierarchical classification 86−18541
multithreshold element for pattern dichotomies, Takiyama's anal., comment 87−19855
multivariable fn. reconstruction using filtered back projection algorithm *(Japanese)* 87−19915
multivariate anal., significance limits for singular values 88−34765
multiviewpoint image sets, predictive coding 87−20706
MUSE bandwidth compression, NHK technique for HDTV 85−46938
MUSE signal, frequency anal. *(Japanese)* 87−47924
mutually compatible Gibbs images, props., simulation and identification 88−66720
N-dimensional hyperplane motion estimation from two matched images 87−75941
narrow image features erosion by combination of local row rank and max filters 87−2655
natural image segmentation, contour-region detector cooperation *(French)* 88−21355
natural scene image segmentation, split and merge algorithm 85−30403
natural scene segmentation via recursive region splitting and merging 87−75880
natural scenes, characteristics related to fractal dimension 88−3164
natural scenes, fuzzy functions and generalised cylinders 87−48176
natural texture structural anal. 86−43311
natural textures, Gaussian Markov random field parameters, max. likelihood estimation 88−66725
NDT, digital signal processing 86−66873
NEC uPD7281 NMOS dig. image processor chip 85−45889
necessary and sufficient condition for a picture to represent a polyhedral scene 85−13597
neighbour finding in pointer based quadtrees, techniques analysis 86−23125
neighbourhood structures, three basic formulae 88−14837
neural lateral system procedure, image processing appl. *(German)* 85−51723
neural nets, use of RAM devices 87−31915
neural network approach to transform image coding 88−66635

picture processing continued
neutron computed tomography, TV fluoroscopic system, digital image processing *(Japanese)* 85−19527
new electronic instruments for radiology *(Italian)* 85−15307
new halftone reproduction and transmission method using standard black-and-white facsimile code 87−39889
NMOS LSI, image signal processing for facsimile 87−48508
NMOS pipelined digital filter chip with a throughputrate of 100 Mbit/s 85−61383
NMR imaging of vascular anatomy, flow artifact suppression and improved image depiction 88−4918
NMR planar imaging technique for linear perfusion meas., biomedical appls. 85−64553
NMR planar mapping technique for linear perfusion meas., biomedical appls. 85−64554
NMR spin-echo images, regional phase correction of chem. shift-based water and fat images 88−4916
NOAA images, data compression scheme *(Japanese)* 88−41099
noise in image processing, generalised homomorphic and adaptive order statistic filters 87−75864
noise in images, conf. London, England, (Jan. 1987) 87−31163
noise restoration of compressed image data 87−33791
noise smoothing using fuzzy clustering algorithm *(Chinese)* 88−27991
noise suppression 86−54540
noise updating repeated Wiener filter and other adaptivenoise smoothing filters using local image statistics 86−69101
noise-limited 3D constructions, interpretation of detail 86−49007
noisy image restoration by cost function minimization 85−30342
noisy image sequence, state-space approach to constrained recursive deconvolution 88−66723
noisy images, contrast enhancement by signal adaptive 2-D filtering 85−51801
noisy images, edge detection by dynamic programming 85−57541
noisy images, fast-discrete Radon transform for enhancing linear features 88−66613
noisy images of finite objects, size variation range determ. 87−69301
noisy images of quasi-periodic surfaces, processing by reference image method *(Russian)* 86−37121
noisy images restoration, with adaptive windowing and nonlinear filtering 87−47989
noisy pictures, smoothing and segmentation, Markov random fields appl. 88−66749
noisy sources, minimum risk quantiser 87−61998
noisy textured images, segmentation using simulated annealing 87−62247
noncausal blurs restoration, image and blur parameters identification 86−10523
noncausal Markov random field segmentation, parallel hierarchical and relaxation algorithms 87−47899
noncoherent object information extraction and processing, nonimaging techniques 88−45573
noncoherent sources for raster filtering in coherent optical system 86−49018
noniterative correction of images and motion sequences 87−47947
nonlinear feedback, chaos, cooperation and quantised feedback 87−27565
nonlinear feedback, chaos, cooperation and stability 87−27564
nonlinear feedback, chaos and cooperation 87−27563
nonlinear filters for image processing 88−3214
nonlinear filters for image processing, novel general class 88−3215
nonlinear image restoration, review 86−23146
nonlinear mean filters appl. 86−64330
nonlinear mean filters for image processing 87−2602
nonlinear optical image filtering by time-sequential threshold decomposition 88−59229
nonlinear optical image processing using precompensated contact screen, design anal. 85−63126
nonlinear order statistic filters for image filteringand edge detection 86−59347
nonlinear picture enhancement techniques for vertically interpolated TV-signals 87−48044
nonlinear recursive filters and applications to image processing 88−66699
nonstationary image processing, local statistics estimation 85−46934
nonstationary iterative image restoration 86−16549
normalised signals, significance of phase and magnitude 88−3245
Nova laser, image processing and automatic alignment 87−39186
NTSC and PAL TV pictures, quality improvement using receiver digital signal processing technique *(Japanese)* 86−37135
NTSC colour multiplexing improvement by multidimensional filtering 88−66683
NTSC colour TV signals, movement compensated interframe prediction 85−2886
NTSC composite format, encoding and progressive transmission of still pictures, transform domain methods 86−43304
NTSC composite video signal, adaptive intrafield transform compression architecture 85−19515
NTSC encoding and decoding, multidimensional interpretation 88−41025
NTSC image improvement, near-RGB performance 88−3203
NTSC signals, second order temporal prediction for interframe coder *(Japanese)* 86−31008
NTSC TV scan conversion using motion adaptiveprocessings 85−51708
nuclear fuel pellets, remote visual inspection with fiber optics and video image processing 87−41344
nuclear medicine scintigram images, median filtering appl. 85−31812
nuclear photoemulsions testing, preliminary video signal processing in TV scanner 86−70352
number theoretic transforms of periodic structures and their applications 88−41022
object boundary detection using guided gradient ascent 88−3278
object boundary representation by investigating neighbor quadrants in quadtree structure of image 86−37164
object classifiers based on stochastic model using spectral/spatial charact. 87−47915
object descriptions based on continuous perimeter distributions 87−48131
object detection in high resolution images 87−69374
object edge detection, rapid estimation, second residual method 86−54568
object extraction from continuum of blurred images, methods comparison 87−47853
object identification from images of variable scale 85−25172
object identification on basis of images, allowance for polarisation of optical fields 86−64346
object interpretation using boundary based perceptually valid features 87−13125

picture processing continued
object motion anal. based on optical flow 85−36411
object motion and camera motion in real scenes, anal. 86−59367
object motion constraint equation under space-varying or time-varying illumination 87−47943
object motion parameter estimation from noisy images 86−10559
object motion parameter estimation from noisy images 86−43312
object moving at random in front of fixed background, recovery 86−59337
object orientation identification using Gaussian image 85−57484
object pass filter use 87−19890
object phase distributions detection by optical differentiation operations *(Japanese)* 87−61005
object recognition and positioning methodologies in 3-D space from a single view 88−66691
object recognition using Hough pyramids 86−4024
object recognition using oriented model points 86−69114
object reconstruction by iterative coded-source image demonstration 85−51752
object rotational motions smooth interpolation 88−73369
object space least squares correlation in photogrammetry 88−73214
object structures, evaluation before image processing, optical Fourier plane symmetries *(German)* 86−23106
object tracking algorithms in camera noise, performance data and limiting conditions 88−28015
object-field reconstruction, ill-posed problems, precision 87−27587
objects occluded by intervening obstacles, representation technique, inspection appls. *(Japanese)* 88−34804
objects represented by Fourier coefficients, geometric props. calc. 88−73361
observer efficiency and feature polarity, medical images on noisy backgrounds 88−21307
occlusion, systematic anal. 88−52550
ocean radar meas., directional-wave spectrum contamination, elimination from noise in elevation meas. 86−32554
ocean SAR images simulation via phase history generation 88−60276
ocean technology electronics, conf., Edinburgh, Scotland (March 1987) 87−51747
ocean wave system and wind field signatures from Seasat SAR imagery 85−64765
ocean wave two-dimensional power spectrum ambiguity resolution by successive image processing 86−6136
ocean waves, processing of airborne SAR images 88−10580
octree generation from object silhouettes in perspective views 88−28133
octree representation of objects in arbitrary motion 86−4044
office digital communications facilities and services *(German)* 86−4123
on-board data compression for advanced Landsat 86−32597
one octave signal reconstruction from position of zeroes 87−47983
one-dimensional regularization with discontinuities 87−62368
opaque 3D objects silhouette slice algorithm 86−16562
optic flow and wave equation 88−46199
optical array logic programming, image data processing 88−65409
optical contour mapping of chest wall shape change with breathing 86−32293
optical contour mapping of recumbent patient 86−32292
optical diagnostics, data management and analysis 88−36329
optical digital mass memories for office and engineering document information systems 85−36463
optical fibre bundles, adaptive spatial filter for image transmission 85−57520
optical fibre image transmission, zig-zag reflection interferometric light modulator *(Japanese)* 85−3441
optical filtering, coherent for image enhancement of electron micrographs *(German)* 88−46189
optical filtering of multiplicative noises usingrealistic recording media 86−59351
optical flow determ. from image sequence, pixel-based mutual correlation anal. 88−8853
optical flow eqns. for rigid curved surfaces in motion 87−62385
optical flow field, inherent ambiguities in 3D motion and structure recovery 86−10557
optical flow fields segmentation by pyramid linking 85−63109
optical flow qualitative information 88−3274
optical flow transformation by camera rotation 88−41028
optical flow under orthographic projection, use in structure and motion determ. 87−7808
optical flow using spatiotemporal filters 88−66636
optical flow-motion, simplified lin. algorithm 88−46156
optical image angular periodicities determ., one-dimens. invariant functions applic. 87−75853
optical image area estimation against a noisy background 88−28001
optical image correlation techniques, appls. 85−7932
optical image processing, overview 85−30479
optical image processing, prospects and illustrations 85−51747
optical image subtraction techniques review 87−39936
optical images, complex, position estimation against spatial noise background 88−28000
optical images representation, genetic functions and stylised images synthesis use 87−19912
optical implementation of synthetic discriminant function, simulation 85−25174
optical implementation of the Hotelling trace criterion for image classification 85−25175
optical serial sectioning microscopy, missing cones and low-pass distortion 88−66700
optical signal differentiation by charged-coupled photodetectors 86−49013
optical testing and metrology, conf., Quebec City, Canada (June 1986) 87−58513
optical tracking system, video processing 86−4004
optical waveguide lens, nondestructive measurement using image processing system 88−40037
optical-correlation filter synthesis by iterative technique 87−2575
optical-digital joint Fourier transform classification of liver echotexture 87−19918
optical/digital hybrid image processing *(Japanese)* 87−69287
optically connected threshold gates for logical signal processing 86−37138
optically-connected 3-D VLSI architecture, template matching algorithm 87−60617
optics symposium, Budapest, Hungary (April 1984) 85−54025
optimal detection of objects with straight edges, parametrisation of straight line 87−62181
optimal edge detector design, coefficient quantisation 86−48975
picture processing continued
optimal edge detector design, parameter selection and noise effect 86−48974
optimal filters for error feedback quantization 87−13071
optimal frequency domain textural edge detection filter 85−57455
optimal image digitisation 87−47897
optimal image digitization 87−55316
optimal polygonal approximation of digital curves 85−41979
optimal quantizer design with entropy constraint 87−13057
optimization techniques for image reconstruction from projections 88−3135
optimum detection techniques rel. to object shape and size motion pattern and material comp. 85−63127
optimum processing of images of coherently illuminated objects observed through a randomly inhomogeneous medium 88−73202
optoelectronic, conf., Cannes, France (Nov. 1987) 88−55791
optoelectronic bistable devices for image processing 86−15780
optoelectronic image processor, binary and circular symmetric filters 85−56393
optoelectronic image sensor system selection guide *(German)* 86−9682
optoelectronic neural networks based on holographically interconnected image processors 88−65520
optoelectronic sensor system based on pictureprocessing for dimensional measurement *(German)* 86−31410
optoelectronic systems, recognition reliability of noisy images 85−36388
orbital radar imagery, geometric accuracy testing 88−30151
order filters, signal and image processing tools 85−30273
order model anal., filtering and image processing appls. 88−49645
ordered structural shape matching with primitive extraction by math. morphology 87−39922
ordering predictive coding of digital image 86−10501
orientation of robots and the blind using a television image 87−49373
orientation selection, inferring trace, tangent and curvature fields 87−48099
orientation-dependent appearance of 3D objects, representation 88−66708
oriented 2D Gabor primitives for image anal. and compact coding 88−41053
orthogonal pyramid transforms for image coding 88−41060
orthogonal transformation of images, mathematical model and pattern recognition appls. *(German)* 85−51706
overhead facsimile scanner, high-resolution machine using image processing and CCD sensor 85−36668
overlapping ellipse-like patterns separation and meas. by least-squares method *(Japanese)* 87−69343
PA Technology research initiatives 86−5247
PAL component signal separation based on 2D digital filtering, TV image directional transmission characts. *(Czech)* 88−22256
PAL receiver, colour processor state anal. *(Spanish)* 86−10488
PAL signals direct digital separation, using two-dimensional complimentary filtration 86−11277
PAL TV luminance signals, synthetic high coding 85−52522
PAL TV signals, 3D pre- and post-filtering 88−41027
PALS hand-held image reading technique, design and image distortion study *(Japanese)* 87−8538
panchromatic and multispectral imagery from dual resolution satellite sensors, combination 87−71285
parallel associative algorithms for image segmentation using NR-graphs 87−47932
parallel identification and restoration of images with symmetric noncausal blurs 88−59209
parallel identification procedure for images with noncausal symmetric blurs 87−19960
parallel image thinning and vectorization on PASM 86−4027
parallel Kalman filter bank design for adaptive image restoration 87−48011
parallel matching for speeding up locating templates 87−48159
parallel optical pyramidal image processing 88−59235
parallel polyhedral shape recognition 86−4041
parallel-sequential optical correlator with a photoanisotropic medium 88−59193
parameter transforms, localised noise propagation effects 88−46213
partial 2-D shapes classification using Fourier descriptors 87−2638
partial 3D model formation from 2D projections, algebraic reasoning 88−3272
partial deconvolution and spectral extrapolation with limited field 87−47929
partial projection filter for image restoration, props. *(Japanese)* 88−46276
partial projection filter for image-restoration *(Japanese)* 88−46275
partial shape recognition using dynamic programming 88−41033
partially correlated signals, frequency and temporal compounding, speckle suppression and image resolution 88−41072
partially occluded boundary image recognition, saliency of boundary segment 85−57473
partition problems, minimal rectangular partitions of digitised blobs 85−19498
passive displays, legibility and perceptibility 86−5412
passive remote sensing, noise reduction method 85−48467
passive stereo, correcting matches and inferring surface patches 88−28124
passive trinocular stereovision, fast and reliable 87−62346
pattern data representation and management in imagedatabase systems *(Japanese)* 85−51767
pattern matching, optical, 3D shape meas. appl. *(Japanese)* 86−29984
pattern recognition, conf., St. Andrews, Scotland (Sept. 1985) 87−16240
pattern recognition, conference, Montreal, Canada, (July-Aug. 1984) 85−27932
pattern recognition, hybrid, using Fraunhofer diffraction 85−7935
pattern recognition, image processing and perimetric sampling 87−69299
pattern recognition, moment invariants evaluation 85−19518
pattern recognition, rotation-invariant operators as filters 87−48211
pattern recognition, systemic approach, pretopological model 87−55306
pattern recognition and acoustic imaging, conf., Newport Beach, USA (Feb. 1987) 88−24321
pattern recognition coding methods for two tone graphics, comparative study 87−2446
pattern recognition conf., Cambridge, UK (March 1988) 88−37845
pattern recognition using photon-limited images 86−69172
pattern spectrum of images and morphological shape-size complexity 87−62235
PCB inspection, phase-only image processing method 87−73862
PDE image models, 2D interpolation by generalised spline filters, comments and reply 88−14763
pel-recursive Wiener-based displacement estimation algorithm for interframe image coding applications 88−46244
pel-recursive Wiener-based displacement estimation algorithm 88−14807
perception of high-pass filtered images 88−41068

picture processing continued
performance prediction methods for electro-optical sensors 87−77137
perimetric sampling technique applied to biological images 87−19903
perspective angle transform−shape from angle *(Japanese)* 88−21329
perspective angle transform and its application to 3-Dconfiguration recovery 87−2642
perspective image, iterative method for locating a vanishing point *(Japanese)* 86−10497
perspective projection of moving planar surface, image flow field calc. 88−46240
phase conjunction phenomenon appls. *(Czech)* 87−75251
phase contrast filtering for edge enhancement in digital images 87−69385
phase errors, propagation induced, reduction methods for coherent imaging systems 88−58832
phase errors, propagation-induced, reduction methods for coherent imaging systems 88−58831
phase retrieval 86−23156
phase retrieval, trigonometric polynomials, factorisation 87−27579
phase retrieval algorithm, optical implementation 87−47881
phase retrieval algorithm based on analogy for image processing 87−39912
phase retrieval algorithms, initial phase estimates, improvement 85−51712
phase retrieval by differential intensity measurements 87−27586
phase retrieval filter methods comparison 88−46256
phase retrieval for discrete functions with support constraints 87−27582
phase retrieval for microwave diagnostic techniques 85−46968
phase retrieval from experimental far-field speckle data 88−73199
phase retrieval from Fourier intensity data 88−46250
phase retrieval in imaging 88−34735
phase retrieval practical algorithms 85−30339
phase retrieval probabilistic algorithm 88−66642
phase unwrapping, cellular automata method 87−27597
phase-retrieval error, Cramer-Rao lower bound 88−3183
phase-sensitive detection of digital image, video lock-in amplifier appl. 85−64339
photo mask alignment technique using digital image processing, semicond. wafer fabrication appl. 86−14979
photo-emitter membrane spatial light modulator for image processing 87−18761
photochromic polymer films appl. 85−24257
photodigitizer thruput limitations 86−70149
photoelectronic imaging system, photon noise and its limitation to grey scale performance 86−24391
photoemitter membrane light modulator, information processing capabilities 88−8838
photoemitter membrane light modulator, structure, operational theory and performance 86−42437
photogrammetrically guided pattern recognition 86−30025
photographic films, colour, archival storage using white light processing 85−36362
photographic films with grain clustering, recorded binary image detection 85−13542
photographic images, binary detection in presence of film grain noise 85−36329
photographic negative grey scale resolution estimation method 85−19528
photographic tone reproduction, decision theory approach 86−23159
photointerpreter evaluation of hyperstereographic forward looking infrared (FLIR) sensor imagery 88−4438
photolithography, optimum amplitude and phase masks, image construction 85−46881
photomatrix for meas. of statistical charact. of two-level images 88−73201
photometric stereo systems with region matching, depth map determ. *(Japanese)* 86−23167
photon counting image acquisition system 87−19901
photon-counting image acquisition system, astron. tests 85−31381
photon-limited blurred images restoration, robust method 85−30335
photon-limited image analysis 88−8861
photon-limited image processing 85−57426
photon-limited image processing 87−33826
photorefractive materials and their applications inoptical image processing 86−29974
photorefractive materials for optical computing and image processing 88−65120
photoresist, aerial image of square apertures, quantitative shape eval. 88−39284
photosensitive mosaics with spatially controllable quantum efficiency, image processing appl. 88−10033
pictorial knowledge representation using pictorial semantic networks 88−46266
picture quality improvement in variable size block coding system using visual characteristics *(Japanese)* 87−75895
piecewise smooth objects, view classification 87−62158
piezoelectric elastooptic-space-to-temporal-frequency converter image processing 87−53834
pipelined MVL image-processing system based on acombined CCD-CMOS process 86−4000
pixel and frequency domain image sequence coding 86−30041
pixel by pixel decomposition into categories, estimation of cover area of each category *(Japanese)* 88−8854
pixel labeling in a second-order Markov mesh 87−33797
pixel trees encoding 85−19497
pixel-independent image processing techniques for noise removal and feature enhancement 87−69387
pixel-selected ray-tracing for image generation *(Japanese)* 87−33806
planar curves, precise straight line approx. method *(Japanese)* 86−10496
planar surface in motion, contour evolution, neighbourhood deformation and global image flow 86−29990
plane curve splitting using Fourier analysis based algorithm 87−55360
plane figure perimeter estimation from discretised image 87−19862
plane images, robust filtration of random fields 87−27607
plane-like object, three-dimens. position and orientation meas., appls. *(Japanese)* 85−26482
planes/quadric surface detection using Hough transform 85−36443
POCS method for iterative image restoration with ringing suppression 88−73269
point source illumination stereo photometric method for distance meas., multiple image anal. *(Japanese)* 88−60918
point-spread-function computation, quasi-digital method 85−25151
point-spread-function determ. in CCD frames, use of Newton-Gauss regularised method 88−8811
points/lines/regions uniform processing methods 87−48221

picture processing continued
Poisson image distorted by atm., statistical synthesis of algorithms for optimal processing 85−46949
Poisson noise, Bayesian filtering using local statistics 88−59207
Poisson noise adaptive filtering, local statistics appl. 88−46298
polar tomographic reconstruction 86−43319
polar-coordinate images on gas-discharge displays *(Russian)* 86−70172
polarisation imagery, new image processing technique 87−27670
polarised image overlay technique, image comparison, appl. to Shroud of Turin photographs 85−36309
polychromatic speckle interference for edge enhancement of image 88−40412
polyhedra volumina estimation from single 2D views 88−3238
polyhedral line drawing interpretation through image plane constructions 85−36352
polyhedral line drawings interpretation using object faces 85−19524
polyhedral model construction from multiple range views 87−48060
polyhedral object line drawings aspect graph computing 88−73363
polynomial representation and moments of pictures, exploitation of interrelationship 86−10568
polynomial representation of pictures 86−59346
position estimation by centroid, accuracy determ. 88−46219
position sensors range/resolution improvement, for magnetically suspended wind tunnels 86−31420
pre-detector optical signal processing technique, optical transform. image modulation 85−30482
predictive coding; motion estimation based 85−63096
predictive coding system for video signals, one-dimensional *(Slovak)* 85−63088
predictive data compression systems, statistical evaluation 87−75862
predictive image coding with pseudo-Laplacian edge detector 88−3159
predictive TV signal coding, reconstruction noise shaping in DPCM system 85−13642
predictive vector quantisation using constrained 2-D autoregressive predictor 88−3244
Preliminary Evaluation Program for SPOT 87−29965
preliminary space-time processing, dynamic charact. of systems 87−19857
preliminary spatial image processing, dynamic charact. 86−48992
preprocessing filter for image compression inteleconferencing system 85−57465
preprocessing using liquid crystal televisions 87−62144
pressure vessel cladding, fatigue cracks, US inspection, computer imaging 86−66877
primitives chain code [image analysis] for image analysis 88−72763
PRIZ controllable transparency, space-time transfer charact. 88−13936
probabilistic image reconstruction using experimentalultrasonic data 86−12213
problem of robust shape descriptors 87−62371
process for automatically generating images 86−10470
programmable systolic chip, systolic algorithm for stereo matching 86−21730
progress in optics, conf., Melbourne, Australia (Aug. 1984) 85−60638
progressive image transmission by residual error vector quantization in transform domain 87−48012
progressive image transmission by transform coefficient residual error quantization 88−28027
progressive picture transmission using interleavedblocks 86−16505
progressive vector quantization of color images 88−46291
projection domain compression of image data usingvector quantization 86−16586
projection operator for reconstructing images from sparse, ungridded data 87−19965
projection operator for the restoration of divergence-free vector fields 88−41032
projection space map method for limited angle reconstruction 88−73263
projection synthetic discriminant function performance 85−25173
projective geometry and recovery of 3-D structure 87−62322
pseudo line-image coding and drawing method based on fractal theory *(Japanese)* 88−59326
pseudo-colour coding using gratings 87−19911
pseudo-Euclidean skeletons and medial axis calculation 87−48097
pseudo-Hadamard transform for binary image processing 86−69171
pseudo-random point images, statistical props., structural anal. *(Russian)* 85−36304
pseudocolor encoder for scientific imaging, white-light processing 86−10267
pseudocolour coding method using sensitive plate 87−39914
pseudocolour equidensities encoding using combined Ronchi gratings *(Chinese)* 87−55254
pseudocolour image enhancement, real-time large screen display 88−60840
pseudocolouring of black and white images using two arm coherent-incoherent optical system 85−51713
pseudomedian filter, image processing algorithm 86−30017
pseudonoise method, gray scale characteris., smoothing effect *(Japanese)* 87−47923
pseudoquadrature mirror filters, design considerations, digital picture subband coding appl. 87−73558
pseudostereo images, creation from monocular images by processing systems 85−30346
psychovisual bases of picture improvement *(French)* 86−37146
pulse noise reduction using statistical t-test *(Japanese)* 88−14821
pupil screen design for estimation of partially coherent images 88−28041
pyramid based image coding 87−48024
pyramid generating kernels, frequency domain anal. and synthesis 87−69274
pyramid image coding system 87−62263
pyramid scheme for multiresolution image representations 86−10483
pyramid transform coding using vector quantization 88−72765
pyramid vector quantisation for transform and hybrid transform/DPCM coding 87−33746
pyramid vector quantiser,transform coding of imagery, optimum rate allocation 87−62259
pyroelectric line scanner for remote IR imaging of vehicles 88−47523
quadcode and its appl. 85−30398
quadratic digital filters for image processing 88−59208
quadratic surface fitting Laplacian operators 87−48177
quadratic tasks and the ideal observer, imaging system performance analysis 88−21306
quadrature mirror filter banks for 2D appls., design with perfect reconstruction prop. 87−73555

picture processing continued
quadtree, soft linked, cascaded ring structure using flexible linkage concept 88−73358
quadtree representation of picture, using DF algorithms *(Slovak)* 85−63089
quadtree traversal algorithm, top-down method 85−33291
quadtrees for image processing 86−49034
qualitative optical flow 87−62327
quality control by means of image analysis *(German)* 88−60639
quality improvement by modification of laser recording beam 87−47879
quantised images quality criteria 88−66679
quantiser-selective DPCM encoding of image signals *(Japanese)* 87−33802
quantitative fidelity criterion for image processing applications 88−52552
quantitative qualitative effective fuzzy information and applic. to image processing *(Chinese)* 86−3712
quantization method of line drawings using directional difference codes with adaptive line segments *(Japanese)* 87−19916
quantum-limited imaging, use of Grenander's sieves 87−48248
quasars photographic images, deconvolution from point spread functions 85−2875
quasi interferometric set up, pseudocolour encoding, spatial frequency domain 87−33790
quasi-coding method for digital figures based onfractal dimensions *(Japanese)* 86−29733
quasi-periodic signals ARIMA models, appls. 86−64277
quasistatic TV pictures, compact noise-reduction system 85−58335
quaternary NMOS ICs for pipelined image processing 86−3999
radar image problem of moving object, accurate soln. *(Romanian)* 88−53325
radar image processing for surface aircraft recognition 85−57531
radar image reconstruction from samples of Fourier transform of target reflectivity function 87−49130
radar image signal processing 88−4087
radar image synthesis, lognormal random field models and their appls. 87−28658
radar imagery interpretation using secondary image products 87−57348
radar images, nonlinear filtering algorithm 88−60224
radar images model, appl. to adaptive digital filtering of multiplicative noise 85−14337
radar imaging, theory, ambiguities and trade-off between geometric and radiometric resolution 88−9648
radar imaging of ships, by inverse range-Doppler technique 88−4085
radar reflectivity image processing for tornado-related motion detection 85−37110
Radarsat synthetic aperture radar system for remote sensing satellite 87−28681
Rademacher transform image coding for large blocks, TV picture processing appl. 88−8852
radial histograms as inspection aid of circular objects 85−57466
radiation scanning for image recording 88−73200
radio astronomy, props. of CLEAN and Smoothness Stabilised CLEAN algorithms 86−59968
radio engineering systems, excitation functions for imaging devices *(Russian)* 86−23164
radio hologram quantisation effect on energy characts. of reconstructed images, eval. 88−20799
radio image construction of object, max. probability method 88−66681
radio interferometry, weak objects imaging in conditions of poor phase stability 87−63097
radiograph restoration using spatially variant filter 85−38115
radiographic image processing 86−25219
radiographs restoration using Wiener filters 87−55253
radiological image decomposition methods, dual energy, comparison 88−54513
radioscopy image quality enhancement 88−53590
Radon transform based invariants, object classification and registration 87−62232
Radon-based image processing in a parallel pipeline architecture 87−55280
rail cross-section measurement with solid-state sensor arrays 86−31651
rainbow holographic imaging with spatial filtering pseudocolor image plane *(Chinese)* 88−72434
randomly oriented workpieces acquisition through structure mating 86−4026
range from translational motion blurring 88−73326
range image analysis using level curves 87−75946
range image data, 3D, segmentation 86−16560
range image segmentation from equidistance contours 88−28126
range image segmentation via distance slicing 88−46233
range image understanding 86−4036
range imagery analysis, parallel fitting of quadric patches 88−41065
range imagery enhancement, mathematical morphology appl. 87−62236
range imagery processing for segmentation 88−66648
range images, segmentation and classification 88−3163
range-Doppler imaging of sea vessels, conventional Fourier processing limitation 88−3213
range-finding algorithm using stereo intensity images 86−4019
range-imaging system for 3-D object recognition 85−36413
rank algorithms for picture processing 85−57439
rank filters for edge preserving smoothing; performance study 87−69357
rank filtration of images based on inner product processor *(Russian)* 88−34755
rapid hidden feature elimination using an octree, robot vision appl. 86−59364
rapid magnetic resonance imaging using the Hankel transform approach 87−27632
raster display image information content interpolation estimation 86−54532
raster scanned data, scanning noise reduction, astron. appl. 88−29009
raster scanned images with multiple frame interlacing 85−2909
raster spectrometers, 1D rasters having autocorrelation functions with no secondary maxima 88−59237
raster technique for specklegram interpretation 88−46187
rasterization theory, architectures, and implementations for a class of two-dimensional problems 88−72937
ray tracing with cones 85−63123
real minimum ray marking and skeletonizing of images *(German)* 87−55266
real object, acquiring 3D spatial data 85−19501
real time IR image processing techniques, enhancement methods 86−10476
real time X-ray images, noise reduction 86−69955
real-time digital image reconstruction: a description of imaging hardware and an analysis of quantization errors 85−9386
picture processing continued
real-time digital scene based focusing algorithm 86−30026
real-time image processing using self-pumped phase conjugate mirror 87−13117
real-time image recognition by partially coherentlight 86−69106
real-time image subtraction using liquid crystal light valve 86−43321
real-time joint Fourier transform image correlation by partially coherent readout illum. 88−3141
real-time neutron radiography, digital processing to improve image quality 85−28276
real-time optical image subtraction by holographic shear lens 85−63107
real-time optical line detection using computer generated holographic elements 87−75877
real-time picture processing by four CMOS chips *(German)* 88−34743
real-time polarising optical image processing with dyed plastic 85−36310
real-time quadtree to raster conversion algorithm 86−37165
real-time signal processing, conf., San Diego, USA (Aug. 1986) 87−51708
real-time solar image processor for 8 cm radioheliograph 86−69875
real-time thresholding technique for noise-free and noisy images 87−39875
real-time transform coding and image/signal reconstruction 87−47861
realtime microprogrammable video signal LSI using 2.5 μm CMOS technology 87−62392
reconstructed image with projection data redundancy, algorithm for noise sensitivity-reduction *(Japanese)* 85−57509
reconstruction from coded data, algorithms 85−36343
reconstruction from coded data, coded aperture design 85−36344
reconstruction from incomplete coeffs. of orthogonal transformations *(German)* 88−8722
reconstruction from limited-data with histogram constraint 88−73267
reconstruction from photon-limited centroided data of randomly translating images 88−46185
reconstruction from projections, quantum noise statistical props. 88−41091
reconstruction from rotational shear interferograms, laboratory and astronomical results 88−45572
reconstruction from samples on linear and expanding spiral scans 88−73266
reconstruction of complex-valued propagating wave fields by Hilbert-Hankel transforms 87−27596
reconstruction of images by direct surface smoothing 87−13151
reconstruction of images from sine wave crossings 86−30046
reconstruction of multidimensional signals from zero crossings 87−27593
recovery of nonrigid curvilinear objects using optical flow *(Japanese)* 88−41104
rectangular parallelepiped coding for volumetric representation of 3D objects 86−69120
rectangular polyhedra image constraints, interpretation techniques 86−69128
rectangular window projection curves and Hough transformation relationship 88−3194
recursive 2-dimensional fixed-memory filter, image processing appls. 88−46282
recursive estimation of 2D processes 86−69111
recursive estimation of 3D features using a moving camera *(French)* 88−14817
recursive forms of optimal multidimensional filters for image reduction 87−59729
recursive image registration with application to motion estimation 87−33743
recursive least square technique and parallel implementation approach for image restoration 88−21334
recursive median interpolator using adaptive kernel, real-time implemented 85−30332
recursive multidirectional image filters 88−40936
recursive restoration algorithms, linear and nonlinear, origins 86−59326
recursive scene matching using pyramids, fast correlation technique 86−23140
recursive temporal filtering and frame rate reduction for image coding 88−3155
recursive two-dimensional median filtering algorithm 87−69355
reduced data ultrasonic imaging 88−10641
reduced resolution images, rapid recognition of object outlines 86−30006
reflection display of rainbow holograms 87−68635
region adjacency, object detection appl. 86−49009
region extraction method using a distancefunction between images *(Japanese)* 86−10493
region filling with the use of the discrete Green theorem 88−46153
region grouping from range image 88−73315
region growing, parallel and hierarchical algorithm 86−4055
region segmentation by motion-based criteria, hierarchical likelihood approach 87−62352
region symmetry analysis through Cantor number strings 87−48126
regions and volumes, comparison of regular and irregular decomposition 87−69307
registration of images by phase correlation between boundary maps 87−33742
registration technique for partially covered image sequence 87−48215
registration using 1D LPC based algorithm *(Korean)* 88−8826
regularisation for ill-posed problems 87−62351
regularized edge detection 88−66727
regularized iterative image restoration algorithm, 87−62278
regularized iterative image restoration in a weighted Hilbert space 87−19959
regularized solution to edge detection 88−59161
relative depths recovery in dynamic scenes using qualitative approach 88−28099
relaxation based adaptive filtering algorithm 85−30336
relaxation matching techniques, comparison 86−10474
remote sensing, atmospheric scattering effects correction 88−3186
remote sensing, instrument-induced spatial crosstalk deconvolution algorithm 87−42218
remote sensing, IR transmission system with image processing capability *(German)* 88−61670
remote sensing, max. likelihood classification comparison with nearest neighbour classification 88−36681
remote sensing, meas. of Thematic Mapper data quality 86−18550
remote sensing, processing techniques for digital sonar images from GLORIA 87−4148
remote sensing by radar imagery, detectability index for SAR image features 88−5150
remote sensing image classification and spatial anal. 88−5209
remote sensing images, noise rejection techniques 85−46961

picture processing continued
remote sensing radar imagery, SAR data compression techniques 88−5149
remote sensing radar imagery relative calibration 86−60927
remote video based vibration monitor 86−60169
remotely sensed image data anal. by means of category decomp. *(Japanese)* 87−55311
remotely sensed images, random striping noise removal 85−57525
remotely sensed multispectral image data, pot. information content comparisons, approach based on sensor system specifications 87−57423
remotely sensed multispectral images, adaptive area division, classification errors reduction 85−57528
Reo optic disc system, image processing for electronic document storage 88−66616
representation by zero and sine-wave crossings 88−14781
representation of images through group-delay functions 87−39883
representation of images with Gaussian random fields *(Russian)* 85−36302
representation scheme for local rotational symmetries 87−2637
representation system, part models 87−2625
requantization process for image data 87−13063
Reseau mark detection by hill climbing, cognitive heuristic algorithm 86−23130
restoration, fast iterative algorithm 88−34827
restoration algorithms, fast linear iterative *(Russian)* 88−63273
restoration by orthogonal expansion 85−36431
restoration of blurred image using a hybrid method based on a noncausal stochastic model *(Japanese)* 87−62224
restoration of blurred images of digital characters 85−41945
restoration of images, ringing reduction using mirror images and adaptive Kalman filtering 88−66718
restoration of images degraded by motion blur usingmatrix operators 85−51805
restoration of images distorted by sampling jitter 88−34828
restoration of images distorted by systems of randomimpulse response 85−63103
restoration of images distorted by systems of randomtime-varying impulse response 86−59327
restoration of images with missing high frequency components by minimizing the L_1 norm of the solution vector 85−30297
restoration using image polynomial 88−28057
retinal measuring system, diagnostic possibilities 88−36420
reversible image operators, cellular automata 87−48045
review *(Japanese)* 86−3973
RICA, radar image classification expert system 86−43345
rigid bodies motion estimation, linear approach improvement by nonlinear constraints 87−33772
rigid body motion estimation using straight line correspondences 87−48101
rigid body motion from depth and optical flow 88−73330
rigid body motion from depth and optical flow 86−64326
rigid object motion understanding 87−62210
rigid object point correspondences location and motion determination from two weak perspective views 88−73331
rigid object structure computation/kineopsis from image positions and optical flow 86−43313
rigid smooth space curve, reconstruction from multiframes 87−48102
road-finding algorithms, intermediate level heuristics 87−27666
Roberts effect in noisy quantized images 86−30057
Robot Research Inc. model 1200C colour slow scan converter 88−60410
robot vision, views planning for incremental construction of body models 87−48073
robust image modeling techniques with an image restoration application 88−73184
robust image modelling techniques with an image restoration application 87−39990
rolled steel inspection using camera-applied image processor *(Japanese)* 88−31881
rotary switch indicator hardware, cct 86−48999
rotated images registration 87−69330
rotating picture registration, reflecting similarity measure error of dynamic programming 87−75933
rotating reticles for image processing, design *(Spanish)* 86−63700
rotation and hidden parts in pictures, registration by dynamic programming method 87−48172
rotation invariant image recognition based on circular harmonic coeffs. 86−3943
rotation invariant texture classification, model-based method 86−69130
rotation method for raster image using skewtransformation 87−2629
rotationally invariant images, fragment identification algorithms *(Russian)* 85−30288
RrSst weighted median filter class, generation 86−64328
sampled complex-valued object reconstruction from discrete intensity data, uniqueness features 88−66649
sampled object reconstruction from discrete intensity data 88−8844
sampled radar images, scene reconstruction using singular value and signal sub-space methods 87−20588
SAR, image shift, three look correlation accuracy *(Japanese)* 86−30884
SAR, image texture over land, simulation 87−63058
SAR, object boundaries detection, human visual models appl. 87−27641
SAR, phase imaging by real-zero conversion 88−15514
SAR appls., conf., Frascati Italy (Sept. 1986) 87−43807
SAR classification, textural anal. appl. 85−63086
SAR clutter image interpretation 85−47563
SAR data for agriculture and forestry 87−49182
SAR data thematic classification method 88−15566
sAR detection of ships and ship wakes 87−49180
SAR digital image-formation processing 86−23948
SAR Doppler center frequency estimation algorithm 87−27638
SAR focus effects modelling of ocean surface 88−9624
SAR image area, limitations due to object motion through resolution cells 87−34642
SAR image formation, high resolution, accelerated skew coordinate transformation 87−28661
SAR image reconstruction algorithm with complex phase correction *(Japanese)* 87−77891
SAR image restoration using time-variant inverse filter *(Japanese)* 88−22189
SAR image segmentation, data reduction 88−15623
SAR imagery, airborne, processing and analysis, segmentation technique 86−55379
SAR imagery, algorithm for automatically acquiring ground control points 87−49184

picture processing continued
SAR imagery, geological feature enhancement 87−49152
SAR imagery, geometric positioning error prediction 88−15624
SAR imagery, nonlinear filter for speckle reduction *(Japanese)* 87−27614
SAR imagery, predictive compression methods appl. 87−33792
SAR imagery, radiometric quality study *(Japanese)* 86−55338
SAR imagery processing, appl. of shape from shading technique 88−10529
SAR images, 1D despeckling algorithm, approximation-theoretic and num. techniques 88−52521
SAR images, homogeneous and nonhomogeneous, spectral analysis 88−15509
SAR images, land use feature detection 87−49183
SAR images, non-disturbed, reconstruction method using stereo radar technique *(Japanese)* 85−30360
SAR images, smoothing and segmentation using automatic techniques 88−53323
SAR images, textural information 86−44764
SAR images, thin line detection 87−49181
SAR images, transform coding 87−63042
SAR images of moving targets 87−70111
SAR imaging, information extraction from speckle-degraded images 88−10528
SAR imaging, inversion problems 85−63748
SAR imaging, statistical modelling and suppression of speckle 88−10530
SAR imaging, unsupervised segmentation of speckled images 88−10532
SAR imaging of the ocean, inverse problems 85−47565
SAR instrument studies, summary 87−49185
SAR ocean wave imaging, inverse methods 85−64766
SAR radar images enhancement for edges and textures interpretation 87−63054
SAR ship imagery, image enhancement techniques 87−27629
SAR techniques for map making by side-looking airborne radar *(German)* 87−49160
satellite attitude determ. using CCD video 87−63881
satellite data presentation for environmental forecasting 85−26890
satellite geophysical data compression methods 88−10500
satellite image processing techniques *(Japanese)* 85−63104
satellite imagery, pattern anal., statistical model for localised natural features 85−53152
satellite radars metric accuracy, use of digital and optical processing techniques 86−18596
satellite remote sensing, microwave scanning radiometry and SAR technology, image processing developments *(Japanese)* 88−10512
satellite remote sensing data as input to geographicinformation systems 86−18543
satellite-SAR images and super-resolution 85−47564
scale change versus scale space representation 87−62369
scale-space filtering, uniqueness of Gaussian kernel 86−43307
scaling theorems for zero crossings 86−43306
SCANAGON dynamic scene projector for visible and IR spectrum 88−71991
SCANCAL, application of digital picture processing to prescan evaluation 86−4011
scanner signals, nonlinear and adaptive algorithm for noise reduction 85−57526
scanning heterodyne reconstruction of coded aperture images 87−7838
scanning laser acoustic microscope using surface acousticwaves and digital image processing 86−6152
scanning microdensitometers for image processing, photometric channel struct. and meas. errors *(Russian)* 85−31280
scanning moire topography, fringe sequence number automatic determ. *(Japanese)* 87−14239
scanning optical microscopy, lock-in technique for depth profiling and magneto-optical Kerr effect imaging 87−60990
SCAPE−a high performance image and signal arrayprocessor chip 87−792
scattered photoelasticity, image processing techniques appl. *(Chinese)* 86−54553
scene anal. and motions of frameworks, correspondence 85−7912
scene anal./recognition, peripheral visual perception simulation approach 85−36420
scene analysis, automatic edge detection using state-space techniques 85−51800
scene analysis, finding of objects moving against a static environmentby a moving observer *(Japanese)* 86−69170
scene image character recognition study *(Japanese)* 88−73234
scene matching by defocused images, concept 85−36429
scene matching technique, invariant feature vectors 85−51808
scene matching using edge direction histograms 87−47962
scene segmentation based on multiple threshold and texture meas. 85−36446
screen size serial access memory for videoapplications 85−61283
script recognition using hidden Markov models 87−27644
sea ice surface-based marine radar imaging techniques 85−48487
sea surface simulated images, optical analysis 88−30181
Seasat SAR and Landsat TM data, merging process 87−63991
Seasat SAR imagery, methods for extracting sea ice data 87−15072
second directional derivative zero-crossing detector usingthe cubic facet model 86−4062
sectioned optimization methods for image restoration 87−33808
security printing, rel. to optical security systems 88−52586
segmentation, combined decision-theoretic and syntactic approach 88−3228
segmentation, image quantisation approach 87−7856
segmentation, semi-Markov random field models 87−62248
segmentation, table anal. algorithm *(Chinese)* 87−27568
segmentation and edge detection using graph theory 87−27640
segmentation from visual motion using global optimisation 87−47900
segmentation method of document images by two-dimensional Fourier transformation *(Japanese)* 85−13630
segmentation of 2-D boundaries using the chain code 88−40797
segmentation of pictures, robust method based on split-and-merge algorithm 86−64325
segmentation of textured images using Gibbs random fields 86−69115
segmentation techniques, comparative study 88−3226
segmentation using contrast and homogeneity measures 87−55107
segmented block coding scheme of document images and its data compression 85−36391
segmented filtering for image restoration 85−51815
segmented images, efficient polygonal decomposition 86−4054
segmented video coding 88−66737

picture processing continued
segmented-image coding: performance comparison with the discrete cosine transform 88−34749
segmented-image interpretation using schemes and support logic 88−3176
seismic data, resolution enhancement using prior knowledge 85−51818
seismic velocity estimation, role in data processing sequence 85−15409
seismograms, coherence processing 86−10510
seismograms image processing, pattern detection and thinning processing, Hough technique 86−18528
self similar hierarchical transforms, block transform coding and human visual system model bridge 87−33615
self-adaptive edge detection scheme, appl. to picture coding 87−2652
self-scanning CCD image sensors operating as optoelectrical transversal filters 88−42160
semantic-syntactic approach to pattern analysis andimage processing 85−57516
semiconductor IC faulty action, feint luminesc. detection apparatus 88−44829
semiconductor picture pick up for X-ray technology *(German)* 87−1463
sensor photoresponse nonuniformity, real-time restoration 85−36378
sensors and signal processing techniques *(Japanese)* 88−8778
septree representation of 3D pictures *(Slovak)* 86−59316
sequences coding, post and preprocessing using filters with motion compensated history 88−66736
sequential edge detection in correlated random fields 86−10553
sequential Kalman filter for image restoration 87−69398
sequential stereo image pairs, robust algorithms for motion estimation 86−4043
sequential thinning algorithm forthree-dimensional digitized pictures *(Japanese)* 85−51769
sequential thinning of binary pictures using distancetransformation *(Japanese)* 85−51768
sequential thinning of binary pictures using distance transformation 87−48098
series-parallel optoelectronic processor for imageprocessing 86−15549
shading correction in visual inspection appls., imaging system response linearisation 85−26220
shape anal. using orthogonal polynomials 88−46194
shape analysis, quadtree, octree, and binary tree decomposition techniques appl. 86−23118
shape analysis of three dimensional objects usingrange information 86−4037
shape characterisation method 86−10485
shape classification, 2D, CARMA model method, eigensystem vs. LP norm 87−62252
shape coding details by frequency anal. of boundary 87−33783
shape correspondence detection using generalised Hough transform 87−48149
shape decomposition by mathematical morphology 87−62374
shape description using associative memory mappings 87−39937
shape determ. from object rotation 86−10575
shape discrimination using Fourier descriptors 86−54538
shape discrimination using shape vector 87−2594
shape from darkness method, surface information extraction from dynamic shadows 87−62364
shape from random planar features 88−46157
shape from shading algorithms, method for enforcing integrability 87−62321
shape from texture using Wigner distribution 88−73343
shape matching using curvature processes 88−66709
shape measures, study and comparison 86−64360
shape reconstruction on varying mesh 88−8878
shape representation method for discrete planar objects 87−48127
shape sequence correspondence detection using generalised Hough transform, expts. 87−75920
shape smoothing using medial axis properties 86−69133
shift-invariant imaging of photon-limited data using bispectral analysis 85−30352
shift-varying filters, optimised, for image interpolation 87−19948
SHIMaDZU intelligent medical imaging system *(Japanese)* 87−7843
Shimadzu magnetic resonance imaging system, SMT-50 *(Japanese)* 87−7845
Shimadzu SCINTIPAC-2400 for image processing in nuclear medicine *(Japanese)* 85−38102
ship targets, structural classifier using IR imagery 85−36406
Shuttle Imaging Radar-A and Landsat images, comparative geological analysis 85−64721
Shuttle Imaging Radar-B, multi-angle data set evaluation 86−18546
SICE committee for research on fault detection and prediction *(Japanese)* 87−58744
side-band Fresnel holograms recorded with self-imaging and general objects, comparative study 86−9981
Siemens mag. resonance imaging system design and evaluation, medical appl. *(German)* 86−38778
sifting theory in nonlinear signal and image processing 88−27728
signal detectibility improvement by multiple obs. 85−57504
signal subspace approach for angle of arrival estimation in radar low-angle environment 88−73261
signals, systems and computers, conf., Pacific Grove, CA, USA (Nov. 1986) 88−57
silhouette understanding system 87−19953
simple predictive transform coder for images 87−39979
simplified analytic video predictors 88−46245
simultaneous estimation of rotation and translation in image sequences 87−48041
single chip controller grapples with CRT graphics 85−58565
single-valued reconstruction of image from spatial spectrum modulus 86−16526
singular value decomposition of matrices *(Slovak)* 87−69267
SIR-B ocean-wave enhancement with fast Fourier transform techniques 87−71390
SIR-B use for height and wavelength determ. 88−10586
size invariant processor, discrimination against narrowband radiation 88−26888
skeletal maturity, fuzzy grammars for syntactic recognition from X-rays 87−21533
skeletonization using content-addressable memory-based symbolic substitution 88−66609
skeletons in derived grids, props. and algorithm 85−30410
skew symmetry figure, axes determ. 85−30409
slant transform, props. and fast algorithms 86−16540

picture processing continued
slightly distorted periodic structures unwarping using bidimensional polynomial representations 87−33798
small-format binary quantized signal processing 86−37150
smeared images subject to camera motion, restoration 87−39988
smoothing using weighted averaging method 87−48191
snow containing buried objects, holographic radar method for 3D imaging 88−68614
soft bit allocation 87−39674
soft bit allocation method, appl. to speech and image coding 87−47505
solar cells characterisation using laser beam induced current topography and image processing 88−18076
solar collectors, IR thermography study and digital thermal image processing 88−5908
solid-state TV camera for automatic calculation of pixel coordinates *(Russian)* 88−22300
sound fluctuations, image quality degradation, aperture size dependence 88−59334
source coding of picture signals *(German)* 85−25162
source coding of picture signals. X *(German)* 85−7933
space and time efficiency of the forest-of-quadtreesrepresentation 85−51700
space and transform domain filtering in hybrid coders with motion compensating prediction 88−66278
space-variant color image processing 86−69173
spaceborne imaging radar system for global resource monitoring, terrain models and SAR simulation 85−38331
spaceborne SAR, Doppler parameter estimation 85−25929
Spacelab Metric Camera monochrome images of Italy 85−64706
spatial filtering, tunable directional, linear struct. enhancement in pictures *(Chinese)* 86−68364
spatial filtering and frequency colour coding withphotorefractive crystals 86−69146
spatial filtering of distortions of color images 88−41093
spatial filtering of images, one-dimens., coherent noise suppression 85−2901
spatial filters for replicating images 87−2006
spatial image local information content extraction 85−36457
spatial light modulator, high-gamma, for nonlinear optical processing 87−12259
spatial representation, incremental construction using moving camera 86−4048
spatial transform technique, filtering and sampling 87−7814
spatial-frequency image filtering in laser scanning microscopes *(Russian)* 87−27574
spatially variant smoothing filter for imageenhancement 86−30039
spatio-temporal complexity in nonlinear image processing 88−73187
spatio-temporal filtering of moving image 87−39989
speckle encoding of images, rainbow holography with multiexposure holographic lens 88−34134
speckle image processing, augmenting shift-and-add with zero-and-add 86−64345
speckle images, boundary detection 86−16552
speckle in images, adaptive restoration 87−39884
speckle interferometry, imaging techniques comparison 88−45709
speckle noise reduction of 1-look SAR imagery 88−9628
speckled image restoration by adaptive block Kalman filtering 88−9627
speckled imagery enhancement, perspective on techniques 88−59295
speckled images, bayesian filtering for noise reduction 85−36367
speckled images, modelling and segmentation 87−62246
spectral and polarization stereo methods using a single light source 87−62388
spectrographic attachment, using TV camera with CCD sensor 86−31210
spectrum analyser based on pre-detector optical signal processing 87−14243
specular surfaces surface orientations determ., by intensity encoded illumination 88−53867
sperm motion analysis using automatic video image digitization 86−30982
spherical dual images, 3D representation method for solid objects 87−2624
spiral sampling technique for pattern recognition 88−41062
split and merge segmentation, use of compound predicates 86−4058
split-and-merge image segmentation using quadtree struct. and F-test criterion 88−41054
split-merge-merge segmentation capability 87−2636
SPOT, data processing and dissemination organisation 87−29964
SPOT imagery evaluation on analytical photogrammetric instruments 88−14802
SPOT images, in-flight verification *(French)* 86−64323
SPOT panchromatic channel integration into multispectral mode for image enhancement 85−48465
square images, realtime rotation and mirror transformation, frame buffered raster display appl. 85−7930
stabilised reconstruction in signal processing 87−48017
stack filters, convergence props. 87−5969
star tracking using CCDs, positional information extraction 88−16204
staring mosaic sensor clutter leakage, anal. using spatial temporal Fourier transforms 85−2905
staring mosaic sensors, line-of-sight jitter-induced-noise elimination 87−7851
staring-mode cameras, design considerations 87−77135
state of the art in image-processing technology *(Japanese)* 88−73197
statistical and geometrical edge detector for SAR image segmentation 88−9630
statistical filtering of motion field from image sequences 88−21338
statistical image coder with adaptive prediction unit *(Polish)* 85−2867
statistical image processing, optimal nonlinear estimation theory 86−43292
statistical image processing with hybrid flying window scanning system 86−43323
statistical multiplexing for packet video sources, perform. anal. 88−46363
statistical properties of radar images of fluctuating underlying surfaces 88−41721
statistical transformation of images, texture nonuniformity 87−27604
statistics reconstructed from projections, information-bearing signal, quantum struct. effect, anal. 88−41092
stereo analysis from multiple views 88−3250
stereo and motion parameters estimation using variational principle 87−62166
stereo correspondence, accurate, for 3D surface determ. 88−3270
stereo correspondence and surface reconstruction problems, concurrent solution 87−48202
stereo correspondence using dynamic programming technique 88−34815
stereo data interpolation using Shepard's surfaces 88−46235
stereo data interpolation using Shepard's surfaces 88−46235

picture processing continued
stereo images correspondence, interval matching using dynamic programming *(Japanese)* 85−51774
stereo images for depth calculations using optical flow 87−2595
stereo matching, constraint and consistency 87−27646
stereo matching by hierarchical, microcanonical annealing 88−3271
stereo matching by relaxation technique based on the connected edge region consistency *(Japanese)* 87−75896
stereo matching of edge segments using prediction and verification hypotheses 86−4059
stereo matching system based on dynamic programming 87−62339
stereo matching using Viterbi algorithm 88−8879
stereo triangulation, quantisation errors 87−62338
stereo vision, fast binary image correlation algorithms 87−75930
stereo vision, graph matching by parallel optimisation 85−36418
stereo vision, multi-channel Hough transform 88−46236
stereo vision algorithm using difference of recursive filters to obtain binary Laplacian image 87−13114
stereo vision algorithm with perspective distortions 85−30428
stereo vision by pyramidal binary Laplacian image graph matching 88−52574
stereo vision including multiple sensors optimal combination 87−62165
stereo vision system for dimensional meas. of 3-D object 86−16581
stereo vision theory formalisation 88−48091
stereo vision with sliding camera using coarse-to-fine control strategy 87−47904
stereo-radargrammetry, implications of Gestalt formations for Venus Radar Mapper 87−3214
stereoscopic perspective scenes, digital generation 88−3196
stereoscopic pictures, redundancy 85−57430
stereoscopic video system, binocular symms. as criteria for successful image transmission 85−52671
stereovision regions matching process 87−75928
still color picture coding with low bit rate *(French)* 86−59348
still picture encoding by multidimensional outer productexpansion at low bit rates *(Japanese)* 85−51761
still picture encoding technique, comparison using computer simulation *(Japanese)* 85−30359
still picture encoding with successive clustering and predictive vector quantisation *(Japanese)* 87−48002
still pictures, hierarchical coding method with component separation 88−14757
stochastic geometry and image analysis 87−5339
stochastic relaxation for image estimation, compound Gaussian case 88−66719
stochastically blurred images restoration, 2D Kalman filtering 88−66721
straight light detection in 2D images, Hough transform performance prediction 87−7829
straight line extraction algorithm 85−36394
straight line extraction in intensity images 86−69127
strain measurements, optical method using point recognition picture processing *(Japanese)* 86−11726
streaking in median filtered images 87−47893
stripe pattern projection technique for surface props. determ. 87−48212
strobe videography and CIDs a winning team, automated inspection and identification appls. 87−3445
structural filtering from curvature information 87−2550
structural filtering of greylevel images from principal curvatures analysis *(French)* 88−34797
structural image anal. using distance transformation methods 87−55353
structural image analysis, methodological justification of hierarchical approach 87−48115
structure and motion from line correspondences 88−59273
structure and motion interpretation from correspondences of 4 lines in 3 images 87−48209
structure detection in random image fields with syntactic pattern matching appl. 86−43346
structure from motion, correspondence problem using true motion invariants 86−10577
structure of image as basis for image processing 87−7855
structure runlength coding for digital images 87−27624
structure-preserved character-picture contractingmethod *(Chinese)* 86−37113
sub-band coding of video signals for packet-switched networks 88−46246
sub-band image coding 87−19943
sub-pixel geometric correction of picture bycalibration and decalibration 86−59362
subband coding, comments 88−66618
subband coding, design of 2D quadrature mirror FIR filters 87−69363
subband coding, optimal bit allocation algorithm 88−73245
subband coding, quantisation error anal. 88−59339
subband coding of color images using finite state vector quantization 88−73244
subband coding of images 87−13068
subband coding of images using vector quantization 88−59016
subband coding using vector equivalent of DPCM 87−75954
subband images, encoding using adaptive vector DPCM 88−59289
subjective mean squared error measure approach, quality evaluation 86−64336
submicron critical dimensions optical control, image modelling and line profile meas. 88−18518
suboptimal nonuniform codes for excluding redundant messages 87−19386
subpixel delay estimation using group delay functions 87−39953
successive image approximations, efficient transmission 88−41059
sugar-cane seedeyes detection, machine vision techniques 86−4056
superfine laser position control using statisticallyenhanced resolution in real time 86−29276
superresolving pupils, emulation through image postprocessing 87−7840
surface contamination, particle monitor, coincidence losses 88−29638
surface defects automatic inspection, using image processing techniques *(German)* 85−61024
surface inference from boundaries 87−62389
surface map computation from stereo pair of images 87−48136
surface mount cards, X-ray and picture processing for crossed gold threads detection *(Swedish)* 88−50516
surface normals from striped light 87−75945
surface orientation and structure of objects, computation using grid coding 87−39899
surface orientation from projective foreshortening of isotropic texture autocorrelation 88−73342

picture processing continued
surface orientation measurement using texture gradient found by Fourier transform spectroscopy 87−48204
surface position and orientation calc. using photometric stereo method 88−73339
surface reconstruction and representation of 3-D scenes 86−54549
surface reconstruction from planar cross-sections 86−4030
surface shape estimation of 3D objects from multiple 2D images 86−4015
surface structure and three-dimensional motion fromimage flow kinematics 86−29989
surface thermogram of buried heat sources, geometric reconstruction 86−11423
surfaces, fractal dimension estimation, variation method 88−41079
surfaces extraction from stereo images, integrated approach 87−62336
surfaces reconstruction from profiles 87−62323
SVD image coding scheme using vector quantisation *(Japanese)* 86−29994
switched prediction with dynamic decision rule, image statistics 85−63097
symbol recognition algorithm based on image vectorisation techniques, counter reading appl. *(Spanish)* 88−59222
symbolic description of edges using a geometric relaxation technique 88−46192
symbolic pixel array for representation of spatial knowledge 85−13647
symbolic scene matching, tree search approach 85−36421
symbolic signal representation using nonlinear filtering 88−66707
symmetric vector quantiser, design algorithm 86−64327
symmetry-seeking models for 3D object reconstruction 87−62335
synthesis and coding of natural structured textures 87−33786
synthetic aperture for subsurface radar 86−69807
synthetic aperture imaging airborne radar 86−17509
synthetic aperture radar algorithms, implementation on systolic/cellular architecture 88−74007
synthetic aperture radar focusing techniques, for imaging targets with random motion 85−8479
synthetic aperture radar processing, digital prefilter for MTI 85−58218
synthetic discriminant functions, minimum variance, alternate interpretation 86−69108
synthetic discriminant functions determ., hyperplane projection method 87−62195
synthetic discriminant functions for target correlation 88−21325
synthetic range image generation for cylinder detection and meas. 87−13127
system considerations for picture communication 85−14506
system design for local neighborhood processing 86−30018
system identification from unsupervised samples 88−3257
system theory, conf., Clemson, SC, USA (Mar. 1987) 87−65089
system theory, conf., Knoxville, TN, USA (Apr. 1986) 87−10035
systems on silicon, conf. Bournemouth, UK (Sept. 1987) 88−62847
systolic array for image processing using WSI *(Italian)* 87−67407
systolic arrays, design methodology 87−55132
tally process of Japanese sentence withvisual information in the world of two-dimensionalfigures *(Japanese)* 87−2493
target image tracking using nonlinear filter based on Pontryagin minimum principle 87−19847
target motion anal., fundamental limitations 87−7853
target recognition algorithms evaluation 88−54830
target recognition and tracing from visible or thermal imagery, optical processing system 85−51745
target recognizer evaluation criteria 85−7943
target tracking in IR images, correspondence anal. 85−36401
target tracking using nonlinear filter based on Pontryagin minimum principle 86−54569
teleconferencing services, international review 87−48325
teledata system from KTAS using picture compression *(Danish)* 88−34747
television dither encoder 86−55447
television image information estimate generalisation 87−28781
telewriting systems, coding schemes comparison 87−47529
TEM, HV, electronic image form. by sequential pixel acquisition 86−47267
temp.-driven segmentation approach 86−70055
template location in noisy pictures 88−52588
template matching, general theory, optimisation method *(Chinese)* 88−41003
template matching and image sensor noise anal. 88−28119
templates location in noisy environments 88−3229
temporal adaptive vector quantization for image sequence coding 88−27799
temporal coherence based optical sensor 88−35933
temporal edge-based image segmentor 87−69304
temporal propagation of channel errors in multimode adaptive coders 87−33613
tensor differential scale space systems 87−69373
terrain and obstacle avoidance for tactical aircraft, sensor blending algorithms 85−7946
terrain clutter at MWIR wavelengths, frame difference processing, analytic evaluation 88−22659
terrain height map with stereo side-looking radar, image construction method *(Japanese)* 85−20254
terrain-mapping SAR image quality optimisation 86−4735
test sequence for the parallel picture data processing *(German)* 88−59320
textons and texture boundaries detection in natural images 87−62334
textural edge detection, 2D, using ω-Gaussian filter 86−69105
textural segmentation of SAR images using first order statistical parameters 88−9629
texture, representation and 3D interpretation 87−62349
texture anal., basic concepts 88−14840
texture anal., digitised figure set adjacency graphs 85−36454
texture anal., edge preserving 85−36437
texture anal., gray tone cooccurrence approach, industrial appls. 85−30423
texture anal., local linear transforms 85−36451
texture anal. by self-organization method 85−36453
texture analysis 85−41946
texture analysis and classification, multiple resolution 85−19540
texture analysis based on local standard deviation ofintensity 87−2639
texture and intensity edge detection with random field models 88−28094
texture classification, sum and difference histograms 86−43314
texture classification based on two-dimensional autoregressive model *(Japanese)* 88−46274
texture description, visual perception approach 86−30062
texture discriminants from spatial frequency channels 87−33817
texture discrimination based on an optimal utilization of texture features 88−59241
texture generation using fractal concepts 87−7868

picture processing continued
texture image segmentation, estimation theory approach 87−48241
texture images with structural characteristics, anal. *(Korean)* 88−46176
texture imperfections, concept 87−62184
texture representation and synthesis by vector quantization 85−36456
texture representation by adaptive vector quantization 87−55355
texture segmentation, model-based 88−3242
texture segmentation, stochastic and deterministic algorithms 88−66740
texture segmentation, stochastic model based technique 85−36450
texture segmentation polynomial shift-invariant operators 88−73300
texture segmentation using a class of narrowband filters 87−62249
texture segmentation using Gaussian Markov random fieldmodels 86−10542
texture segmentation using linear prediction model *(Japanese)* 86−10498
texture segmentation using Voronoi polygons 88−73299
texture synthesis, multispectral, using fractal concepts 88−3173
texture synthesis on 3-D surfaces 85−36452
texture synthesis using 2-D noncausal autoregressive models 85−46932
texture synthesis using hierarchical linear transforms 88−73228
texture synthesis/compression using Gaussian-Markov random field models 85−57477
textured image recognition using hidden Markov model 88−66742
textured image segmentation, filter design approach 87−13134
textured image segmentation, unsupervised, Markov random field approach 88−66687
textured image segmentation as a multiple hypothesis test 88−59213
textured images, fast technique for automatic segmentation and classification 88−66743
textured images classification and segmentation, using 2D stochastic models 88−46218
textured images modelled by Markov random fields, segmentation/global parameter estimation 87−13135
textured images segmentation, optimum window sizes 86−10540
textured images segmentation using multiple resolution approach 88−66741
textured surface classification based on reflection data 87−13129
thematic classification error matrix anal. using categorical data techniques 85−57540
Thematic Mapper data, number of distinct spectral vectors determ., algorithm 85−25160
thermal imager, relation between instantaneous field of view and recognition performance *(Japanese)* 85−19531
thermal imaging, image deception emittance considerations 86−24374
thermal imaging technology and appls., conf., Orlando, FL, USA (Apr. 1986) 87−10010
thermal sensing for industrial quality control 87−10540
thermograms of lower extremities, eval. using TV image quantiser 86−18314
thermography for NDT of fibre-reinforced plastic components *(German)* 88−9916
thermoplastic holograms in optical metrology andimage processing 85−56876
thermoplastic holographic camera for industrial NDT, data acquisition and image analysis 88−34163
thermoplastic optical recording devices 87−21088
thin line preservation method for binary image reduction *(Japanese)* 87−62218
thinned binary image, line shape recognition 85−36397
thinned binary scenes, segmentation with good connectivity algorithms 85−30404
thinning algorithm, pattern adaptive 88−14791
thinning algorithm for binary images 87−48194
thinning of digital patterns, max. algorithm *(Chinese)* 87−27569
three dimensional digital pictures, properties recognition 86−23123
three dimensional picture transformation for bandwidth compression 85−7947
three dimensional spatiotemporal jittered sampling 88−52598
three dimensional structure, recovery from image curves 85−51688
three-dimensional data processing and display, conf., San Diego, CA, USA (Aug. 1984) 85−49250
three-dimensional digital binary images, distance transformation, reconstruction *(Japanese)* 87−33807
three-dimensional digitized pictures, processing algorithm basics *(Japanese)* 85−51766
three-dimensional hierarchical representation, using oct-trees and k-trees *(Slovak)* 86−43300
three-dimensional image processing using the concept ofnetwork resonance 85−57468
three-dimensional image reconstruction, computer tomography appl. *(Czech)* 86−43343
three-dimensional image technology, user acceptance of VISIDEP 88−4560
three-dimensional imaging, depth enhancement process 86−65142
three-dimensional imaging from moving platform 88−5063
three-dimensional information extraction using cone-shaped light beams, image processing *(Japanese)* 86−16544
three-dimensional interpolation and filtering ofbiomedical images 87−949
three-dimensional motion anal. of camera viewing fixed object *(Japanese)* 85−51777
three-dimensional motion anal. of object using fixed camera image processing *(Japanese)* 85−51778
three-dimensional motion analysis of scene containingmultiple moving objects from image sequence anddepth *(Japanese)* 86−69169
three-dimensional motion parameters of rigid body, direct estimation from image sequence *(Japanese)* 85−51775
three-dimensional object representation 87−62332
three-dimensional shape description using symmetric axis transform 85−41958
three-dimensional shape modelling and image generation based on distrib. function *(Japanese)* 85−51786
three-dimensional space from optical flow correspondence 88−46154
three-dimensional spatial information determ. based on perspective transform., appl. of vanishing points 85−51743
three-dimensional struct. determ. from image sequences given by moving TV camera *(Japanese)* 87−28857
three-dimensional symbolic descriptions matching for multiple views of scene 86−4047
threshold light modulator for A/D image conversion, using photoconductor and electrooptic medium 85−12659
threshold selection, parallel algorithm 87−19906
threshold selection in the presence of noise 87−2659
threshold selection using clustering criteria 86−16512

picture processing continued
threshold transform image coding systems, overhead information, representative root patterns. 87−48027
time differentiation by optically controllable transparencies with MIS-liquid crystal structure 88−46148
time varying imagery, stable feature extractors 85−36424
time-axis transform, bandwidth compression of picture signals 86−54559
time-axis transform system for high quality image compression 88−46284
time-dependent images, vel. calc. using continuity eqn. 86−10558
time-domain microwave target imaging 86−5495
time-multiplexed analog transmission of three broadcast-quality television channels through one satellite transponder 87−56319
time-varying corners detect. 85−30364
time-varying image coding, convex set techniques 88−3153
time-varying imagery, sampling and reconstruction theory, video systems appl. 85−51736
time-varying imagery coding using image restoration techniques 86−16546
time-varying scene, motion estimation based on Fourier analysis 88−34826
TIROS/NOAA satellite meteorological systems *(Polish)* 88−15430
tomogram reconstruction with limited no. of projections, spatial filtering method 85−30354
tomographic pictures compression, recursive (switched) quantizers appl. 88−21304
tone correction of digital half tone obtained byordered dither method *(Japanese)* 85−57488
top-down recursive partitioning algorithm fornonparametric classification 86−4032
topographic correction of radar images 88−10536
topological perspective on the structure of images 88−66500
townships road map extraction from aerial imagery 85−30470
tracing surfaces for surfacing traces 87−62333
tracking and classification of objects moving along a known path in an outdoor environment 88−3251
traffic appls. of fast millimeter wave imaging 85−63749
Traffic Research and Image Processing system, development *(Dutch)* 87−3327
transform coder for image sequences using difference pictures attributes 86−10512
transform coders for image transmission. design problems 85−57243
transform coding, adaptive block quantiser 87−33769
transform coding algorithm for motion-compensated frame-to-frame difference signals 87−33628
transform coding algorithm for motion-compensated interframe prediction errors 88−3148
transform coding for progressive transmission of stillpictures 86−54558
transform coding scheme for imagery based ondetection 86−48994
transform domain image data compression with vector quantisation 87−33813
transform encoding and dither binarisation of images for local resolution enhancement 86−30059
transform image coding 87−75887
transform image coding using directionally adaptive vector quantization 88−73253
transform image coding with a new family of models 88−73250
transform product code vector quantizer for digital image coding 87−39973
transform techniques for electro-optical pre-detectorsignal processing 87−2663
transform-coding of images with reduced complexity 88−41012
transform/time domain coding using project into convex sets 86−10514
transformation of image positions, rotations, and sizes into shift parameters 87−47880
transformation of signal-dependent noise tosignal-independent noise for color images 86−30021
transformations using spline functions 88−52572
transformed images, optical progressive transmission and reconstruction scheme 87−27660
transition detection in image processing 87−75899
translated and rotated images, registration using finite Fourier transforms 88−3172
translation invariant data structure, performance analysis 86−4033
translational motion recovery using depth-is-positive constraint 88−28107
tree coding of image subbands 88−73248
tree encoding scheme using a nonlinear smoothing filter *(Japanese)* 85−13627
tree searched chain coding for subpixel reconstructionof line drawings 86−64203
tree searching for DPCM image coding 85−13634
triangular decomposition 88−3178
triangulation errors in stereo algorithms 88−28100
trihedral polyhedron by binocular vision system, reconstruction from incomplete line drawings *(Japanese)* 88−34807
trinocular vision using edge continuity and local features *(Japanese)* 88−14819
triple correlation as phase closure technique 87−13083
TRIPS-1, 3D photoresist image simulator 86−2258
true three-dimensional animation in motion pictures 88−3200
tumour edges detection method, in X-radiographics *(Chinese)* 85−4263
tunable facet model likelihood generators for boundary pixel detection 88−28095
TV cameras, component signals processing and transfer *(French)* 87−13927
TV coding, DSP block operations 88−14806
TV coding for broadband ISDN 87−41227
TV colour processor, flexible high-performance 87−34803
TV devices with picture sampling, linear filters frequency characts. anal. and synthesis 85−8578
TV image block coding *(Russian)* 87−69339
TV image block coding *(Bulgarian)* 86−23105
TV image coding by vector quantization in a transformed domain 87−33773
TV image information theory *(Japanese)* 85−36358
TV image interpolation functions and image qualities *(Japanese)* 87−27619
TV image processing 86−23093
TV image reproduction, flicker reduction procedures *(German)* 85−63105
TV image sharpness, objective evaluation method 86−43341
TV images, isolated rigid object 2-D motion parameter, estimation algorithm 85−36405
TV images, large displacements meas. method 87−33787
TV images, motion compensated interpolation 88−28060
TV images, motion detector to control line scan upconversion system 85−47683

picture processing continued
TV images, structural noise reduction in adaptive group coding *(Russian)* 88−22299
TV meas. of high-speed process parameters, optimal signal filtering 86−30034
TV picture motion estimation; appl. of simplex search technique 88−3143
TV picture quality degradation due to video signal jitter, eval. method *(Japanese)* 87−70270
TV picture quality for component coding family below 4:2:2 *(Japanese)* 86−31007
TV picture resolution, systems and technology *(German)* 88−53428
TV picture sampling, temporal-spatial discretization, and spatial filtering in baseband *(Czech)* 87−20695
TV picture transmission, hybrid interpolative-predictive code 87−7672
TV pictures, sequential scan conversion using multidimensional digital signal processing 87−41207
TV pictures charact. *(French)* 86−37147
TV quiz program broadcast system with computer graphics *(Japanese)* 85−8526
TV receivers, colour processing state *(Spanish)* 87−7841
TV reception, digital signal processing, picture quality improvement *(Japanese)* 87−34758
TV sequence image coding *(French)* 88−22305
TV signal adaptive prediction coding, 15/30 Mb/s motion-compensated component coding *(Japanese)* 86−30998
TV signal coding, pel-recursive motion estimation technique 85−13640
TV signal processing, enhanced-quality, imaging *(French)* 86−37148
TV signal transmission, adaptive prediction DPCM schemes 85−46684
TV signals, bandwidth compression using 1D time-axis transform system *(Japanese)* 88−22304
TV signals, bandwidth reduction, slant transform coding appl. 85−57485
TV signals, digital processing, IC solution, system overview 88−41810
TV signals, discrete cosine transform coding 86−29992
TV signals, frame rate conversion techniques *(Japanese)* 86−69917
TV signals, motion blur due to field rate conversion 85−57542
TV signals, movement-compensated frame frequency conversion 88−9738
TV signals coding at 320 and 64 kbit/s 87−34796
TV signals interframe coding, uncovered background prediction method 86−23115
TV signals with expanded dynamic range, fast digital DPCM codec 88−4193
TV standard conversion with picture memories 88−41809
TV standards, convertors, interpolation filtering anal. and freq. response study *(German)* 87−28772
TV systems enhancement, using multidimensional digital filters *(Czech)* 87−49314
twisted cubic and camera calibration 88−41018
two dimensional systems, self tuning filters and predictors, smoothing appl. 86−3866
two source image coding, quadtree based 87−39977
two valued picture encoding, compression by prime implicant representation *(Japanese)* 87−75901
two view motion analysis 86−4065
two-dimensional adaptive image deblurring filter 85−51816
two-dimensional adaptive prediction, smoothing and filtering 87−55070
two-dimensional discrete Radon transform, image reconstruction appl. *(Slovak)* 85−25148
two-dimensional holographic topograms, quantitative deciphering 87−69254
two-dimensional hybrid image coding and transmission 88−40795
two-dimensional hybrid picture coding system optimisation *(Slovak)* 88−14808
two-dimensional image processing array, VLSI design 85−23838
two-dimensional image processor 87−63236
two-dimensional interpolative DPCM image encoder *(Japanese)* 87−33621
two-dimensional linear prediction models, spectral factorisation and realisation 85−46776
two-dimensional occluded objects, shape matching 88−41064
two-dimensional optimal frequency domain filter for textural edge detection 87−7869
two-dimensional recursive digital filters, VLSI implementation at TV frame rates 85−969
two-dimensional recursive digital filters for image processing, stability study 85−23043
two-dimensional self tuning image processing algorithms 88−46296
two-dimensional shape dilation, synthetic approach 85−30379
two-dimensional signal reconstruction from Fourier transform sign information 85−57353
two-dimensional switched-capacitor filter 85−17642
two-dimensional system synthesis dedicated to pattern recognition *(Rumanian)* 85−2882
two-direction Kalman filter of image additive white noise *(Chinese)* 85−46890
two-gradation picture filtering based on a Markov probability model 85−36389
two-level cartoon extraction from moving gray-level images, visual communication appl. 85−51739
two-level classifier for use in moment-based optical/digital processor, image segmentation and real image tests 85−7936
two-level images, adaptive Markov model encoding by dynamically selecting reference pels *(Japanese)* 87−75900
two-level quantisation of grey level picture signal *(Japanese)* 86−30036
two-level quantisation of signals from video sensors using a global threshold *(Slovak)* 88−21292
two-stage estimation of receivers formed image inhomogeneity 88−34787
two-step image filtering in the presence of correlated noise 87−47993
ultrasonic B-mode images, texture analysis by segmentation 85−25187
ultrasonic B-scan imaging system, Wiener filtering for resolution improvement 87−48235
ultrasonic bio-tissue characterisation, spectrum scalloping and frequency dependent reflection removal 85−46958
ultrasonic echo, specular and random components separation 85−46957
ultrasonic high resolution imaging with incomplete data 88−10642
ultrasonic phased-array scanner, image restoration 88−46315
ultrasonic transducer arrays, point-spread function background velocity variation effect 88−61696
uncertainty principle, constraints on process of vision 85−19523
underdetermined data cluster preservation, fast dimension reduction 87−55282
unified coding method of dithered image and text data using micro-patterns *(Japanese)* 88−34573

picture processing continued
unified description and recognition of continuous contours and regions 87−48218
uniform error threshold, local estimation 85−19521
uniform lightness, hue and saturation colour model, computer graphics appl. 88−66680
uniform region extraction with noise point effect minimisation 87−13140
uniformly redundant arrays, fast decoding algorithm 88−8806
unique object identification in high resolution aerial images 85−57494
universal image processing procedure, robotics appl. *(Polish)* 86−30014
universal real-time transformer for image coding 88−21336
unsteadiness perception, model *(Russian)* 86−69163
unsupervised Bayesian model-learning with application to textured and polynomial image segmentation 87−62382
US Constitution ageing monitoring, Charters Monitoring System using CCD camera 88−67904
US flaw detection, image restoration techniques 86−66879
US imaging, synthetic aperture focussing technique 86−66880
US pulse echo imaging, optical deconvolution using phase-holograms asspatial filters 85−53237
US spy satellites, remote sensing capabilities and operation 86−69712
use of high-speed motion picture photography in blast evaluation and design 88−47456
validation of the physically reasonable infrared signature model (PRISM) 88−52578
Vander Lugt correlator, appl. to industrial inspection 87−47010
vanishing point location using Hough transformation props. *(Japanese)* 87−62225
variable block size coding for the color pictures *(Japanese)* 87−75897
variable length DPCM images enhancement, 1D, corrupted by transmission errors 87−27663
variable region vector quantization, extended algorithms, speech and image processing appls. *(Japanese)* 88−34711
variable region vector quantization, space warping and speech/image compression 87−61776
variable resolution video codec for low bit-rate applications 88−3158
vector dithering: binarization through unconventional image plane tessellation 88−34829
vector DPCM: vector predictive coding of color images 87−39971
vector nature of light use in imagery and image processing 87−62191
vector quantisation, fast search algorithms 87−47538
vector quantisation, one-dimensional mapping 87−33738
vector quantisation, progressive image compression and transmission 88−41058
vector quantisation−a new, system oriented approach toimage coding 86−23173
vector quantisation for colour image encoding 87−62262
vector quantisation for picture signal encoding, fast techniques *(Japanese)* 87−33801
vector quantisation in orthogonal transform domain, fast search algorithms *(Japanese)* 87−27615
vector quantisation in orthogonal transform domain, fast search algorithms 88−59014
vector quantisation of 2-tone facsimile signals 86−16590
vector quantisation of images, introduction 86−16585
vector quantisation of picture signals, using discrete cosine transforms *(Japanese)* 86−31004
vector quantiser design, sequential initialisation technique 88−46190
vector quantization of differential luminance and chrominance signal 85−46694
vector quantization of images, conf., London, England (Nov. 1985) 86−13313
vector quantization results 87−48038
vector quantizer architectures for speech and image coding 87−61686
vector quantizer for adaptive stochastic picture coding 85−41996
vector wave interferometry appl. to real time image addition or subtraction 88−73198
velocity estimation from image sequences with second order differential operators 85−30368
vertex space anal., model-based object recognition appl. 88−73375
vertical/horizontal binocular disparities, qualitative depth information 88−73304
Very Large Array and VLBA radiotelescopes, construction and image processing developments 87−49214
video coding equipment, 64 kbit/s 88−45934
video coding in asynchronous time division environment 88−28085
video compression technique by projection onto convex sets 85−36322
video compression techniques, review 85−41995
video conferences, motion compensation coding 85−13632
video digitizer, gray scale 87−49285
video filter for digital picture processing *(German)* 87−66374
video high frequency data rate transformer 87−13062
video image compression, digital hybrid coding using ADM and vector quantization 87−19925
video images, block-recursive matching algorithm for displacement estimation 86−10516
video imaging systems, MTF meas. techniques 86−24376
video information, digital processing using universal system 85−3691
video information from satellite, image combination, principles 88−10605
video information processing with raster transformation of CRT memory *(Russian)* 85−46928
video inspection systems, image geometric correction, error modelling 85−25135
video mixing units, model system for operational technology assessment *(German)* 85−37287
video playback, variable-speed, anal., colour processing, dropout compensation 85−26076
video processor design in TV tracking system 86−31010
video processor for the home *(German)* 87−8411
video recording, experimental digital system 87−13962
video resolution enhancer 85−13591
video scenes, motion compensated noise reduction 86−10520
video sequence, predictive coding based on efficient motion estimation 85−13639
video sequence, tree motion estimation algorithm 88−4188
video signal, nonlinear transformation using histogram sliding-equalisation algorithm 86−23131
video signal coding and processing 85−25188
video signal compression technique *(French)* 87−33794

picture processing continued
video signal processing using digital filters, and NMOS gate array technology *(German)* 85−34068
video signals, adaptive parallel pre-emphasis and correction *(Russian)* 87−8430
video signals, DPCM coding, predictor switching scheme 85−36351
video signals, iterative gradient method for movementestimation 85−57529
video signals, multiband vector quantisation, adaptive transform coding 88−66754
video signals coding *(Japanese)* 85−52514
video-rate CCD two-dimensional cosine transform processor 88−41057
videoconference codec standards 88−21810
videoconference pictures, motion-adaptive interpolation 85−13641
videoconferencing, 384 kb/s coding scheme based on vector quantisation 85−57544
videoconferencing, bit-sliced progressive transmission and reconstruction of transformed images 87−19934
videoconferencing, motion compensated encoding and video signal adaptive control scheme *(Japanese)* 85−52566
videophone in digital telephone network *(German)* 87−27897
videoprocessor IC, digital control for colour TV set 87−13874
videotex, picture transmission 86−10731
vidicon camera image processing 85−48367
viewing angle corrections of airborne multispectral scanner data acquired over forested surfaces 87−63992
visible-surface representations computation 88−66622
vision adapted error criterion, still images colour information, transform coding *(German)* 85−63091
vision system in remote sensing, image processing sequence modelling 87−48224
vision systems, algorithm for optic flow estimation 87−62242
visual characterization of speech spectrograms 87−27319
visual communications and image processing, conf., Cambridge, MA, USA (Sept. 86) 87−43753
visual detection of differential movement, robotics appls. 88−34788
visual detection of orientation of images, angular encoding using orthogonal expansion based technique *(Spanish)* 86−54547
visual image processing in texture segregation 87−62340
visual information, feature extraction by hierarchical data structure 85−2895
visual limits to image quality 86−23149
visual maps building by noisy stereo measurements combination 86−59375
visual matching of soft copy and hard copy 86−59321
visual motion interpretation 86−37170
visual motion meas. convected activation profiles 88−73368
visual motion measurement, unified perspective on computational techniques 87−62331
visual processing, orientation extraction and 2D velocity through hierarchical processing 87−33767
visual quantisers for image bandwidth compression 85−41994
visual undersampling in raster sampled images 86−16513
VLSI 2D generalised mean filter, design 86−14393
VLSI character recognition implementation 87−69401
VLSI circuits, mask extraction from optical images 87−60578
VLSI for image and document processing *(Japanese)* 87−1596
VLSI image processing, book 86−33911
VLSI single chip implementation of real-time 2D moment generating algorithm 86−69121
VLSI wafer inspection, submicron struct. image processing techniques 87−67509
volume hologram long wavelength model, reduced sampling using interlacing technique 86−29261
volume/surface octree, generation from range data 88−73316
volume/surface octrees computation from contours and silhouettes of multiple views 87−2626
Voronoi tessellation for image representation 88−73319
Walsh-Hadamard transform optimal property 85−30459
water and waste water treatment, image recognition techniques *(Japanese)* 88−43518
water purity control for LSI IC manufacture *(Japanese)* 86−27750
water vapour imagery, expts. and appls. 88−15403
wave-front reconstruction from intensity distributions, adaptive optics methods 88−59238
wavefront inversion using thin phase hologram, computer simulation 85−19046
weather forecasting appl. of pattern recognition and extrapolation techniques 86−10468
weather image transmission by dial-line modems 86−37617
weather radar reflectivity images, spatial and temporal anal. 87−62256
wedge filter technique for convex boundary estimation 85−51689
Weibull radar imagery, robust detection of object boundaries 88−73262
weighted averaging method for image smoothing *(Chinese)* 87−39866
weighted median filters, selection for specific tasks and a parallel implementation algorithm 86−41249
weighted moments appl. to blurred image recovery 86−69147
white light signal processor effects of spatially partially coherent illumination on noise performance 85−19494
white-black images real time pseudocoloration method using $LiNbO_3$:Fe 86−64357
white-light image processing using orientedspeckle-screen encoding 85−57499
white-light optical signal processing, colour image processing 87−62228
white-light pseudocolour encoder for scientific imaging 85−57436
white-light real-time pseudocolour encoding system 85−57437
whole body X-ray CT scanner SCT-2500T *(Japanese)* 87−8917
wide-angle lenticular screens, parallax-panoramagrams projection progress 88−4558
Wiener filter construction using phase-conjugate filter, effect of dynamic range on image restoration 86−54024
Wiener restoration of sampled image data 88−52526
Wigner distribution in image representation analysis 87−48195
wire frame generation from multiple range views 86−59365
X-ray image intensifier with large input format, image processing diagnostic system appls. 85−1251
X-ray image restoration, Compton scattering suppression 88−8860
X-ray photogrammetry, bi-plane, correction angles of three-dimens. vertebral rots. 85−53030
X-ray real-time imaging for weld inspection, methods and equipment 87−23765
YUV colour images coding, 2D two component model based 87−33789

picture processing continued
zero crossings, image reconstruction 87−13067
zero crossings and spatiotemporal interpolation, 2D soln. 87−62353
zone-adaptive orthogonal transform coding−improvementsin reproduction of image contours *(Japanese)* 86−31002
AgCl emulsions as adaptive optical filters for image processing 85−12691
$BaTiO_3$, coherent optical images, photorefractive time differentiation 88−21302
$Bi_{12}SiO_{20}$ MIS-liquid crystal structure, dynamic image processing 87−33009
$Bi_{12}SiO_{20}$ grating modification in degenerate four wave mixing 85−29918
$Bi_{12}SiO_{20}$, optical image processing in photorefractive materials 88−40363
$Bi_{12}SiO_{20}$ photorefractive crystals, hologram recording, interferometry, wavefront conjugation and nonstationary image processing 85−29948
$Bi_{12}SiO_{20}$ real time intensity inversion by four wave mixing 87−68624
$Bi_{12}TiO_{20}$ photorefractive crystals, hologram recording, interferometry, wavefront conjugation and nonstationary image processing 85−29948
GaAs CCD imager, high speed, configurations 85−37486
GaAs, optical image processing in photorefractive materials 88−40363
Gabor dynamic volume phase holograms, contrast inversion 87−68650
InSb CID IR detector technology, status and applications 87−21090
InSb, nonlinear Fabry-Perot etalon, optical bistability and digital computing 85−51281
$LiNbO_3$:Fe, cryst., degenerate four-wave mixing in optical image processing *(Chinese)* 85−19492
Si V-groove structure geometry obs. by SEM, sensors appl. 87−65176
Si solar cells characterisation using laser beam induced current topography and image processing 88−18076
a-Si solar cells, vidicon mode characterisation 87− 4964

picture transmission *see facsimile*

picture tubes, television *see television picture tubes*

PID control *see three-term control*

piecewise-linear techniques
1/f power spectrum in one-dimensional discrete dynamical systems, intermittency 85−51463
2D multistage separable digital filters with freq. domain specifications, design 87−47762
2D nonlinear systems, switched and non-switched, uniqueness of asymptotic behaviour 87−65783
3D autonomous cct. family including one diode, chaotic phenomena study *(Japanese)* 88−70496
C^0-collocation-like method for two-point boundaryvalue problems 86−62114
L^∞-error estimate for an approximation of a parabolic variational inequality 87−52041
adaptive refinement techniques for elliptic problems 88−18659
amplifier with piecewise-linear approx. of amplitude response 88−70570
AR piecewise processes using adaptive lattice filters, jump detection and fast parameter tracking 87−61941
bifurcations of the double-scroll 86−57594
canonical piecewise-linear analysis: generalizedbreakpoint hopping algorithm 86−27037
canonical piecewise-linear hybrid analysis 85−44863
canonical piecewise-linear modeling 86−52638
canonical piecewise-linear representation 88−31969
chaos generating cct., described by piecewise-linear constrained eqn., anal. *(Japanese)* 88−56419
chaos generator based on a quasi-harmonic oscillator 85−44920
chaos via a piecewise-linear switched-capacitor circuit 87−73528
Chua's autonomous cct., periodicity and chaos 85−44861
Chua's circuit, chaos producing mechanism 88−44028
circuit comprising RL components, switching on current calc. *(German)* 85−6124
claw pole permanent magnet stepping motor saturation magnetisation curve 88−17671
convertors with series reactances feeding HV plasma arc loads, EM transients *(Russian)* 87−78772
coupled relaxation oscillators, anal. *(German)* 87−65921
cubic interpolating polynomials, surface construction 85−28162
current-limited switch-level timing simulator for MOSlogic networks 86−47830
current-limited switch-level timing simulator for MOS logic networks 88−50113
current-oriented analysis of PWM powerconverter circuits 86−57647
DC chopper controlled series motor, rheostatic and regenerative braking, transient responses 86−19290
DC series motor, chopper controlled, armature and field current dynamic responses, for traction applications 85−27429
DC series motor field control by sequential choppers 87−43082
diakoptic method for nonlinear network anal. 87−493
digital filter, optimisation of ε-filter *(Japanese)* 88−38636
digital imagery interpolation using hypersurface approximation 85−2902
digital piecewise-linear signal in Gaussian noise, estimation 88−34679
discrete box splines, piecewise structure 87−23541
divided-winding-rotor synchronous machine digital simulation with piecewise-constant feedback control 87−42902
double scroll, chaos existence proof *(French)* 88−6631
double scroll, unfolding, proof of chaos 86−66979
double scroll bifurcations in nonlinear elec. cct. 86−46516
double scroll family, proof of chaos 87−16463
double-scroll chaotic attractor in nonlinear elec. cct. 86−57593
driven relaxation oscillator with negative resistance device, transition to chaos, expt. study 87−10714
dynamic partitioning method for piecewise-linear MOS digital circuits 88−24899
earthquakes, micro, signal extraction by time series model and screening out 85−53145
edge detection on the basis of piecewise linear models 88−14832
electric machines, nonlinear magnetic field characterisation by direct convergence and Newton-Raphson method *(Korean)* 86−66039
ergodic properties of computer orbits for simple piecewise monotonic transformations 88−63237
FEM, optimal recovery from weighted L^2 fits 88−49739
ferroresonant circuit, transient characts. in AC failure *(Japanese)* 85−49735
finite element method for a singularly perturbed boundary value problem 87−16544
fixed points algorithms for nonlinear circuits solution 85−10946
four-element autonomous cct. with two-terminal nonlinear resistor, chaotic behaviour study 87−44513

piecewise-linear techniques continued
Fourier integrals evaluation using FFT, comments and reply 85−60931
function approx. method *(Russian)* 88−49738
global bifurcation analysis of an economic long-wave model 87−31679
homoclinic and heteroclinic orbits in the double scroll attractor 88−6632
hyperbolic conservation laws, moving mesh numerical method 86−34248
hysteresis chaos generator 87−475
invariant linear feature extraction theory *(Japanese)* 87−33752
K fault diagnosis of piecewise-linear systems 87−65775
Katzenelson algorithm for large networks, block relax. 85−17096
Laplace BVPS with singularities, nonconforming combined method 87−5378
large-scale thermal power system economic dispatch control model 86−39040
least square method, laser radar images enhancement, gray scales piecewise linear transformations 87−19966
limit equilibrium problems, variational-difference scheme *(Russian)* 87−31678
linear electric dipoles, design by method of moments 86−16014
linear ordinary DE, error estimation for collocation solution 87−31452
Lithuanian industry, formalising components of power-consumption systems *(Russian)* 85−53974
logarithmic convexity for discrete harmonic functionsand the approximation of the Cauchy problem for Poisson'sequation 86−66768
LSI circuits, piecewise linear simulator 85−23903
lumped mass finite-element method with quadrature fora non-linear parabolic problem 86−13694
Lyapunov functions for piecewise-linear systems, construction methods *(Japanese)* 88−49993
memoryless power amplifier system, piecewise linear limiter performance, optimal characts. study 86−775
ministepping step motor controllers design and accuracy 85−65285
missile synthesis with trajectory and propulsion system optimisation 88−68600
mixed renewal and Poisson inputs queueing modelwith a finite waiting room *(Japanese)* 85−54236
models for nonlinear dynamic systems 88−31968
monotone and convex spline interpolation 86−34209
MOS circuit simulation program, PLMAP, using piecewise linear model 85−18482
motor drives, electric, nonlinear torque control 87−22821
moving point trajectory approx. under interference conditions, mobile radio system *(Russian)* 88−3859
multidimensional piecewise-linear functions with piecewise-linear partitions 85−17123
n-port network synthesis 85−22622
NMOS logic ccts., Gbit/s, delay anal., piecewise-linear method 85−22806
nonlinear autonomous elec. cct., chaotic attractor, double scroll 85−54625
nonlinear cct. anal., single iteration approach to backward differentiationformulas 86−13955
nonlinear circuits, steady-state phenomena using piecewise linear approx. *(Russian)* 88−38368
nonlinear digital signal processing for data communication 86−29958
nonlinear magnetic devices, monotone and convex magnetisation curves 88−7794
nonlinear n-port network synthesis/anal., sectionwise piecewise polynomial functions 85−6129
nonlinear network anal., piecewise linear resistive networks with uniquesolutions 86−20235
nonlinear network canonical piecewise-linear anal., driving-point and transfer characts. 85−44859
nonlinear network mixed mode mixed level analysis with PWL systems 85−22623
nonlinear networks, numerical anal. *(Japanese)* 88−6634
nonlinear networks, piecewise linear anal. programs, DC soln. speed improvement 86−27035
nonlinear oscillatory systems analysis 86−67085
nonlinear resistive circuits, canonical piecewise-linear analysis and modelling 86−62407
nonlinear satellite communication systems, performance assessment, piecewise-linear models 85−25826
nonlinear switched-capacitor networks: basic principles and piecewise-linear design 85−45154
one-port resistors, piecewise polynomial, synthesis, basic cct. structs. 85−54622
optimal piecewise-linear curve approx., point number choice *(Japanese)* 85−41990
optimal polygonal approximation of digital curves 85−41979
optimum nonlinear turn-off snubbers, design and appl. 87−37005
overdamped double-scroll family, piecewise-linear geometry and normal form 88−63255
parallel ferroresonant circuit, subharmonic response and stability eqns. 88−31963
pattern recognition, feature selection for piecewise linear classifiers 86−10570
phoneme recognition based on output unification of phoneme discriminant filters *(Japanese)* 88−72788
photoresistors structs., distributed, function synthesis using relax. phenomena *(Russian)* 88−8063
plane curves, piecewise linear L_1 approx. 85−30380
power convertor harmonics in power systems, evaluation by direct state-variable approach 86−66176
power RLC circuits with rectifiers, Lagrange energy function gradient determ. *(Russian)* 87−9670
protocol with adaptation of frame length, aggregate model 86−10589
queueing systems, diffusion approx., modified methods *(Japanese)* 87−51924
ranges of transfer and return maps in three-region piecewise-linear dynamical systems 88−24943
rationalized Haar function appl. to linear DE soln. 87−225
Rayleigh random process, piecewise-polynomial transformation 88−6364
recognition algorithms, construction using convolution algebras *(Russian)* 87−69345
rectifier convertors, stability anal. using machine-oriented method 87−59120
resistive circuits, piecewise-linear anal., canonical form and soln. algorithms 85−22624
resistive multi-port networks synthesis *(Czech)* 88−70495
resistive network solns., MECA74 program 85−22621
resistive networks, nonlocal sensitivity study 85−17119
resistive networks, piecewise-linear type, homeomorphism of matrix eqns. 88−31970
resistive piecewise linear networks, DC anal. using Gauss-Seidel method 87−44512
resistor-diode network input resistance calc. 85−6128
Ritz operator associated with finite-element approx., L^∞ bounds 87−5379
SAR, signal phase dependence, piecewise-linear approx. 87−20587
SC resistors, nonlinear driving point and transfer charact. plot synthesis 86−7917
series kernel, truncated series 87−36639
series resonant convertor, steady-state/transient characts. anal. using state-plane techniques and piecewise-linear analysis 85−32615
singular integral eqns., polynomials and approximate soln. 87−16527
singularly perturbed finite element methods 85−340
sinusoidal signal synthesis by piecewise approximation methods *(Czech)* 87−69186
SLP recourse problems with arbitrary multivariate distribs., independent case solution 88−70241
state model map of piecewise linear resistive networks *(Chinese)* 87−36940
superconvergence of averaged gradients on an irregular mesh in the finite-element method 88−18618
superconvergent recovery of the gradient from piecewiselinear finite-element approximations 86−13673
TALISMAN: a piecewise linear simulator based on tree/link repartitioning 88−24898
thermal convertors, piecewise-polynomial expressions for approximating conversion function *(Russian)* 85−55085
third-order chaotic cct., one parameter bifurcation diagram 87−36943
three-region dynamical systems, transfer and return maps 87−31672
time function generator design using piecewise linear approx. *(Russian)* 88−70594
topological determination of the number of solutions of piecewise linear resistive circuits *(French)* 88−12174
torus knot oscillators, Van der Pol realisation 88−32041
transform, efficient algorithm 88−3059
transistorised pulse-width convertor HF noise generation forecasting and reduction *(Russian)* 86−6862
uniform vector quantisers, design and anal. 87−61590
uniqueness of the asymptotic behaviour of autonomous and non-autonomous, switched and non-switched, linear and non-linear systems of dimension 2 88−43842
variational soln. of piecewise-linear differential eqns., efficient soln. 88−63256
VLSI, time-domain anal. using piecewise-linear approach 85−23907
VLSI multilevel metallisation lines, capacitance coeffs. 87−45822
wire antennas anal. in presence of plane interface, hybrid technique 85−62880

piezo-magneto-optical effects *see magneto-optical effects; piezo-optical effects*

ZnO film SAW filter, 1.86 GHz operation 88−33492
ZnO film, prep. by reactive sputtering of Zn, c-axis orientation, O_2 partial press. depend. 86−46370
ZnO films, RF sputter deposition on GaAs substrates, piezoelec. props. 87−65568
ZnO films, high oriented, DC reactive sputtering 85−22541
ZnO films on ceramic substrates, high vel. and high coupling SAW 86−15301
ZnO, grain boundary inhomogeneity phenomena, microcontact meas. *(German)* 87−32323
ZnO in Au-ZnO-Au-fused quartz structure, I-V characteristics and breakdown voltage 85−55605
ZnO layer graphoepitaxy 85−54452
ZnO leaky SAW transducers on fused quartz, film thickness effect on performance 86−28582
ZnO on Si_3N_4 diaphragm pressure sensor, micromachines device with IC process compatibility 87−49732
ZnO, piezoelectric, RF magnetron reactive sputter deposition, position and press. effects 85−22524
ZnO piezoelectric film deposition on single-mode filters and appl. to phase modulators 87−65570
ZnO, piezoelectric, sputter deposition on SiO_2 optical fibre, acousto-optic interactions 86−57458

piezoelectric semiconductors continued
ZnO textured waveguiding films for planar acoustooptic devices 85−56384
ZnO thin films, RF sputtered, grain size and texture 86−52527
ZnO thin films, effects of substrate tilt, curvature, and deposition position 88−51070
ZnO thin films, laser annealing, guided optical modes anal. 85−12538
ZnO/Elinvar structures, MHz VCO resonators for TV oscillators 86−15308
ZnO/Si layered piezoelec.-semicond. struct., acoustoelectronic bistability phenomena 87−60156
$ZnO/SiO_2/Si$ diaphragm bulk acoustic wave composite resonators 85−18520
ZnO/glass layer system for SAW devices, expt. study *(German)* 86−9374
ZnO-Al_2O_3 structure, 1.1 GHz SAW excitation 85−56075
ZnO-AlN-glass, SAW characts. study 87−6975
ZnO-GaAs struct., SAW filter 87−38640
ZnO-Si layered structures, hysteresis of acoustoelectric effects 88−39759
ZnS, cubic piezoelectric crystals, influence of uniaxial mechanical stresses on linear photovoltaic effect 87−2013

piezoelectric thin films
light modulator using piezoelectric films with waveguides 85−2385
meter for piezoelectric modulus determ., of piezoelectric film on nonpiezoelectric substrate 87−77372
polymer film for transducers 86−50035
polymer films dielectric, elastic and piezoelectric constants meas. 86−31595
polyvinylidene fluoride, bioriented piezo-electric films 87−67623
polyvinylidene fluoride, physical basis for piezoelectricity 85−12446
polyvinylidene fluoride piezoelec. film transducer, charge output stress depend., gauge accuracy 87−21065
polyvinylidene fluoride piezoelectric film stress gauge response under impact loading 87−21064
polyvinylidene fluoride piezoelectric film uses and advantages 87−53778
polyvinylidene fluoride Solef piezo- and pyroelec. films for medical transducers 85−12447
PVDF films, high field poling, current limiting cct. 85−24026
PVDF piezoelec. profiles 88−26622
SAW speed and damping in piezofilm-dielectric structure, under transverse electric field 87−46292
sea wave to electric power conversion using piezoelectric film 86−65808
semiconductor composite resonator, perturbation calc. of Q-factor due to radiation in wafer 87−67663
semiconductor thin film devices, nonlinear acoustoelec. interactions induced by contra-directed SAW 86−9351
surface-acoustic-wave absorption coefficient, calc. in layered structs. 86−68149
US transducers fabrication, by polyvinylidene fluoride solution casting/solvent bonding 85−4511
vinylidene fluoride-trifluoroethylene copolymer thin films, electromech. props., US transducer fabrication 87−64004
AlN, RF reactive sputtering, effects of N content 87−16696
AlN epitaxial films for zero temp. coeff. SAW devices 86−9350
AlN films, C-axis oriented, high rate prep. by reactive sputtering 87−52173
AlN on Si, comp. and acoustoelectric characts. 88−13614
AlN piezoelec. film Q-factor reduction by radiation into bulk GaAs 87−1857
AlN sputtered films, struct. and quality for microwave acoustic resonators 86−2515
AlN-GaAs thin film resonator based low insertion loss filters 87−67687
AlN-Si thin film resonator based low insertion loss filters 87−67687
$LiNbO_3$ layer on quartz substrate, SAW excitation technique 85−12473
PLZT epitaxial thin films, SAW props. 86−15300
PLZT, ferroelectric films, properties and applications 87−32758
PLZT piezoelectric films, epitaxial growth and appls. 87−53812
PLZT piezoelectric thin film. Bragg acousto-optic deflector 86−54019
PZT piezoelectric films, epitaxial growth and appls. 87−53812
$PbTiO_3$, ferroelectric films, properties and applications 87−32758
$PbTiO_3$ piezoelectric films, epitaxial growth and appls. 87−53812
$PbTiO_3$ thin film prep. by MOCVD *(Japanese)* 88−70342
$PbTiO_3$ thin films, c-axis oriented, piezoelectricity 87−60712
Si-SiO_2-Si_3N_4-ZnO-metal, SAW monolithic struct., radiation damages evaluation *(Japanese)* 87−60764
Si-SiO_2-ZnO-metal, SAW monolithic struct., radiation damages evaluation *(Japanese)* 87−60764
$SiO_2/ZnO/SiO_2$ diaphragm air-gap type piezoelectric composite thin film resonator 86−42041
ZnO film model, modified, for calc. of elastic and piezoelec. props. 86−9328
ZnO films, RF sputter deposition on GaAs substrates, piezoelec. props. 87−65568
ZnO films for acoustoelec. device appls. 86−9327
ZnO films on ceramic substrates, high vel. and high coupling SAW 86−15301
ZnO layer graphoepitaxy 85−54452
ZnO, piezoelectric, RF magnetron reactive sputter deposition, position and press. effects 85−22524
ZnO piezoelectric film deposition on single-mode filters and appl. to phase modulators 87−65570
ZnO sputtered thin film, pyroelectric props. and applications 86−68151
$ZnO/SiO_2/Si$ diaphragm bulk acoustic wave composite resonators 85−18520
ZnO-Al_2O_3 structure, 1.1 GHz SAW excitation 85−56075
ZnO-GaAs thin film resonator based low insertion loss filters 87−67687
ZnO-Si thin film resonator based low insertion loss filters 87−67687
ZnO-SiO_2-Si thin-film temp.-compensated resonator for VHF voltage-controlled oscillator 87−1862

piezoelectric transducers
1-D piezoelectric composite transducer model 88−7785
2.3 MHz piezoelectric composite plate transducer, performance analysis 88−33490
2D and 3D finite elements, piezoelectric media simulation with vector processor *(German)* 87−8612
3 MHz pulse ceramic transducers, design, construction and experimental investigation 87−64009
3-D analysis of piezoelectric media 88−57891
8 MHz acoustic wave excitation and detection in air 86−2570
44 kHz piezomagnetic US alcofer transducers 88−13655
absolute displacement measurements with piezoelectric transducers 88−53679
acceleration meas., low-noise preamplifier with compensation for cct. noise 86−11537
acceleration sensor, development *(Japanese)* 86−5235

piezoelectric transducers continued
acceleration transducers, strain effect coeff. meas. facilities 85−8816
accelerometer calibration, sensitivity problems discovered at SIRA 87−77192
accelerometer for vibrational anal. 85−37582
accelerometers, compression damping by electro-mechanical feedback 88−53683
accelerometers, development 85−8963
accelerometers, dynamic matching for differential acceleration measurement 87−35209
accelerometers in seismology, low noise preamplifier with high input resist. 86−44777
acoustic accelerometers using piezoelectric crystals 87−46287
acoustic characterisation of laser energy for metallurgical thermal treatment 88−45528
acoustic emission, appls. to laser processing of ceramics 88−54815
acoustic emission piezoelectric receiving transducer, reciprocity calibration 87−35516
acoustic emission reception piezoelectric transducer series 85−59524
acoustic imaging, 2D ultrasonic transducer arrays appl. *(Spanish)* 87−50594
acoustic sensor using piezoelectric cable 87−70629
acoustic surface wave sensors for pressure, temp., force and acceleration *(Czech)* 87−70614
acoustic transducer, mechanical impulse response, optical probing 87−15093
acousto-optical filter appl., shear wave phase comparison technique 85−56382
acoustoelectric detection of ultrasound power with composite piezoelectric and semiconductor devices 88−54791
acoustoelectric response simulation by means of FFT algorithm 85−15451
acoustooptic devices, piezoelectric transducer, width optimisation 86−32608
actuator, digitally controlled *(Russian)* 86−35950
actuator, infinitely stiff, very high precision 88−51095
actuators, develops. and appls. 87−53841
actuators, pulse driving method 87−53843
adaptive self-calibrating raster systems andgratings, displacement meas. appl. 87−3766
AE, improved locations 87−73190
AE signal receivers, absolute calibration 85−49643
AE simulators, amplitude-freq. charact. 86−539
aerodynamic balance for small loads meas. 85−31460
aerodynamics balance for perpendicular forces determ. 87−56860
anisotropic piezoceramics for US probes 87−1806
apodized piezoelectric transducers, design and evaluation 88−10629
arrays, transducer interaction analysis 86−50764
arterial blood flow determ. using a piezoelec. sensor 88−16682
automatic meter for measuring the coefficient of ultrasound losses 88−4701
axisymmetric piezoelectric vibrators, finite element analysis 86−15317
B-mode imaging artifacts, ultrasonic transducer for reduction 88−57867
bar, pass-band broadening with capacitance compensation 86−2501
bar transducer depolarisation correction 88−5220
bar transducers, optimisation problem, selection of objective function 85−4513
Barker-coded multilayer transducers of polyvinylidenefluoride for use in the ultrasonic pulse-echo technique *(German)* 85−21026
biaxial vibration of shafts meas., using piezoelectric sensors *(Czech)* 86−50254
bimorph diaphragm transducer with step-shaped edge, vibration charact. *(Japanese)* 88−16958
bimorph-driven *x-y-z* translation stage for scanned image microscopy 87−46281
biomedical meas. with piezoelectric crystal *(Japanese)* 86−38741
biomedical US transducer array performance with PZT-polymer composite piezoceramic 87−3955
biomedical US transducers, PZT rod-polymer composite piezoelec. plate tailoring 87−3954
biomimetic tactile sensor with stress-component discrimination capability 88−42485
bipolar monolithic integrated piezoresistive pressure transducer, biomedical appls. *(Chinese)* 86−17915
bipolar uniaxial accelerometers based on piezojunction effect 88−53619
bonding to acousto-optic devices using Au-Ga alloy film 85−62417
bone transducer for US attenuation meas. in biological tissues 88−23042
Bragg cells, wideband acousto-optic, using phased array techniques 88−40020
broad-band driving of echographic arrays using 10 ns-500 V efficient pulse generators 87−63999
broad-band electrical matching of transducers for acoustic microscopy 87−35522
broad-band ultrasonic transducers based on fractured piezoelectric ceramics 88−13653
broadband piezoelectric sandwich transducer with perforated structure, analysis 86−12214
broken drill bit detector arrangement using piezoelectric acoustic emission pick-up 86−38986
buildings vibration dynamic measurement and evaluation *(German)* 85−37750
buzzers, East German products *(German)* 85−9397
CAD system 88−47481
CAD system for piezoelectric transducers 88−22555
calibration and practical appls. *(German)* 85−42965
cantilever type accelerometers, piezoresistive and capacitive, design optimisation 85−37556
car horns, appl. of piezoelectric flexural vibrators 88−68663
ceramic, cylindrical, 3-D analysis 85−24048
ceramic composite piezoelecs. for US transducers 87−53781
ceramic designed space forming technology 88−24808
ceramic materials for ultrasonic transducers 86−53842
ceramic rings, dynamic charact. 87−12012
ceramic thin cylindrical tube transducers, tangentially and radially polarized 86−32606
ceramic transducers, longit. and transversely polarised, transient processes 88−71861
ceramic transducers, spatial field charact. optimisation 87−67665
ceramic transducers for electronic telephone sets 86−53875
ceramic transducers for telephones *(Japanese)* 85−57829
ceramic tube, voltage-to-displacement conversion appl. 88−53667
ceramic type, charact. and development prospects *(Polish)* 85−1079
ceramic type, harmonic excitation effect on temp. 85−24051

piezoelectric transducers continued
ceramic US microphones, design and charact. for open air appls. *(Polish)* 85−4509
ceramics, fractured piezoelectric elements for broadband US composite transducers 87−71447
ceramics, piezoelectric charge coeff. and mech. quality factor determ. using electric-line theory *(Japanese)* 87−67632
ceramics for filter and resonator appls. 86−53843
characterisation of piezoelectric transducer coupled to a solid 88−57864
chirped PVDF transducers for medical ultrasound imaging 88−57892
chirped-frequency interdigital transducer for acousto-optic Bragg deflector 85−41227
circuit model of a piezoelectric transformer 87−53856
CMOS integrated Si diaphragm pressure sensor 86−68002
CMOS Si pressure sensors, nonlinear analyses 86−50091
composite piezoelec. transducers, limit thickness of piezoelec. plates 87−25745
composite piezoelectric polymer plates, transverse vibrations 85−48504
composite piezoelectric sensors, elec. charact., hydrophone appl. 87−38619
composite piezoelectric sensors, hydrophone figure of merit, review 85−12457
composite piezoelectric transducers for US medical imaging 86−50562
composite transduces for US diagnostic appls. 87−57456
conference, piezoelectricity in biomaterials and biomedical devices, Pisa, Italy (June 1983) 85−10310
contact compliance-type transducer 85−56069
contamination inspection of rigid computer discs 86−28699
copolymer, vinylidene cyanide-vinyl acetate, piezoelectricity, application to ultrasonic transducers 86−53849
correction element for straightness meas. *(Rumanian)* 86−24777
coupled acoustic-electromagnetic waves in piezoelectric plates 85−45937
crystal sensors for liquid phase chemical and physical analysis 88−35983
demountable piezoelectric transducer holder for use at low temperatures 87−56649
design, construction and force meas. appls. *(German)* 85−14760
design of piezoelectric polymer transducers for time delay spectrometry appls. 88−57869
design of piezoelectric transducers for US meas. using leading edge of signal 85−7130
developments in sensors rel. to force meas., piezoelectrics and vision 87−14308
diaphragm pressure sensors using diffused resistors *(Korean)* 87−3580
differential pressure/pressure transmitter using Si sensors 86−70103
digital optical profiler, three-dimens. noncontact, development and applic. to mag. media 86−65120
digital quartz pressure transducers for air data systems 86−11588
digital tactile sensor 85−20591
direct piezoelectric transducers design, equivalent generator theory appl. 88−7775
discharge of piezoceramic transducers with allowance for nonlinearity of the spark gap 85−12469
disposable blood pressure solid-state sensors 88−36428
distortion meas. in quartz envelopes of pulsed light sources 85−49195
double-ended tuning fork quartz accelerometer, design and charact. 87−35071
drop-on-demand ink jet driven by longitudinally displacing piezoceramic transducer, performance characteristics 86−65172
dynamometer, dynamic grinding force meas. of abrasive grain *(Japanese)* 87−29309
earphones utilizing housing vibration *(Japanese)* 86−6163
echographic probes, reson. phenomena, finite element simulation 85−15453
EEG, polygraphic recordings, piezo-elec. sensors 85−4321
elastic boundary conditions of a flexuralcircular plate transducer supported by a thincylindrical shell *(Chinese)* 86−70539
elastic wave propagation in perturbed environment, oscillators and sensors appl. *(French)* 86−9371
elasto-optical modulator with quartz transducer and liq. interaction medium *(Romanian)* 88−72175
electret transducer, diaphragm prep. *(Slovak)* 88−26629
electric quadrupole equiv. circuit *(Romanian)* 88−22534
electrical excitation of flexural mechanical resonances in symmetrically electroded piezoelectric and ferroelectric specimens 88−48393
electrical loading effects, block diagram approach 86−42080
electrical network analogy *(French)* 86−35960
electrical pressure metering on piezoresistive basis *(German)* 87−3583
electroacoustic, bimorph diaphragm design *(Japanese)* 87−29984
electroacoustic polymer microphones and earpieces *(German)* 87−29979
electroacoustic polymer transducers, function, appl. in telephone plant *(German)* 87−25733
electroacoustic sensor channel, operating freq. adjustment method 86−24454
electroacoustic transducers with piezoelectric film membranes, stability *(German)* 85−56062
electroceramic transducers, sensors, and actuators 87−12017
electrofluid transducer using piezoelectric benders, squeeze-film damping anal. 85−8838
electromechanical modeling of distortionless piezoelectric transducers with nonuniform parameters 88−68662
electromechanical transducers for vibrotactiledisplays using polyvinylidenefluoride films *(German)* 86−9346
energy scattering and temperature calculations for low frequency piezoceramics *(Russian)* 86−47926
equivalent cct. including dielectric loss effects 86−2511
Fabry-Perot interferometer, piezoelectrically driven, scanning motion linearisation 85−3934
fan-shaped SAW transducers, parameters calc. and optimisation 87−53855
fibre optic, electric field sensor, piezoactive jacket on fibre, technology, performance and advantages 88−16144
fibre optic sensors, piezoelectric copolymer jacketed single-mode fibers forelectric-field sensor application 87−3578
fibre polarisation state controller, using linearly birefringent fibre and piezoelectric transducer 88−33684
finite element modelling of piezoelectric ceramic disks 88−57866
flaw detection US transducer array processing system 88−12108
flexible element deflection analysis 87−6951
flowmeter, vortex shedding type with piezoelectric sensor 87−21004
focusing ultrasonic transducer with broad bandwidth of the plano-concave and plano-convex shapes 85−21031
foot stress, discrete vertical in-shoe, meas. with piezoelec. transducers 88−68337

piezoelectric transducers continued
force meas. in injection moulding processes control 86−11735
force measurements in aerodynamics usingpiezoelectric multicomponent force transducers 86−38880
force transducers, charge readout algorithm 87−56669
free-flooded piezoelectric cylinder transducer, mathematical model 86−65581
frequent mode piezoelectric transducers, KLM model appl., transfer matrix based *(Spanish)* 88−57846
gas flow control system for ion source 87−70978
guided acoustic wave liquid level sensor 88−61687
HF piezoelectric resonators and transducers 87−53863
high frequency piezoelectric acoustic transducers, temp. and irrad. effects 86−58650
high temperature pressure sensor for the combustion chamber of spark ignition engines 88−68079
high-coupling material, dielec. loss angle, elastic loss contrib. 86−47928
high-frequency piezoelectric transducers usinggrain-oriented films of organic compounds 86−47942
Honeywell piezoresistive pressure transducers, range and applications *(German)* 85−58693
HV sensor development using piezoelectric transducer and strain gauge 88−53681
hydraulic components: testing by acoustic emission *(French)* 86−32609
hydrostatic pressure change meas. for oceanographic appl., metrological charects. 85−4457
IDT ultrasonic beam scanning by frequency sweep 88−16963
ignition piezoelectric transducers, charects. and appl. *(Polish)* 85−1806
imaging of piezoelectric transducer vibrations byscanning acoustic microscopy 86−56287
impact print heads, vibration analysis of piezoelectric actuators 86−2572
impedance transformer performance calcs. *(Chinese)* 86−28579
industrial appls., technological developments 86−5276
industrial electronics 1984 developments review, effect on integrated manufacturing 85−31456
ink-jet printhead piezoelec. transducers, HV monolithic drivers 87−11006
input parameters calc. of vibration-meas. arrangements 87−3808
interdigital SAW transducer for NDT 88−13637
interdigital transducer, radiation of focused field into piezoelectric half-space, anisotropy depend. 88−33483
interdigital transducer, SAW in cryst. classes 4 and 6, closed form expression for Green's function 87−6974
interdigital transducers with variable electrode interaction, compensation techniques for SAW phase distortion *(Polish)* 85−1818
intuitive multilayered transducer model with losses based on transmission line theory 88−57868
KLM transducer model implementation using transfermatrices 87−4191
Kurtosis measurements on bearings at low speeds 88−29723
laser scanner using stacked piezoelectric ceramic actuators 87−12029
lattice model for the discrete time simulation ofa multi-layered piezoelectric transducer system 86−2573
lattice model of the thickness-mode piezoelectrictransducer 86−42071
linear-displacement transducers for surface acousticwaves 86−31385
longitudinal vibration transducer design using freq. proportional conversion *(Chinese)* 88−26632
longitudinal-torsional composite transducer and its applications 88−33473
magnetic disc recording, air bearings, microscopic fluctuations meas. by piezoelectric sensors 88−51341
magnetic disc-head interactions, monitoring with piezoelectric transducers 87−25828
magnetic head slider and disc impulsive force detection using small piezoelec. transducer 88−57983
magneto-acoustic sensing device for particulate mag. media 87−8597
magnetometer, magnetostrictive primary sensing and piezoelec. signal recovery 86−60219
magnetostrictive displacement transducer, secondary data conversion methods 87−63333
manganin foil stress gauges, piezoresist. response meas. 87−21066
manganin gauges, shock response to 90 kbar 88−4375
manganin stress gauges, dynamic release curves from resistive hysteresis props. 87−21036
manganin stress gauges, dynamically loaded, piezoresistive response 87−21034
materials selection *(Polish)* 86−42013
measurement applications *(German)* 85−26312
mechanical load meas., quartz crystal piezoelectric system *(Hungarian)* 88−16002
mechanical vibrating systems, theoretical design and experimental results *(Spanish)* 85−12460
mechanical-impedance, simple design 87−56627
medical imaging arrays, new vibr. mode 85−15286
medical instrument, US stimulated, holographic vibr. anal. 85−59320
medical ultrasonic probe using PZT/polymer composite 86−6169
medical ultrasonic transducers, ferroelectric ceramics vs. polymer piezoelectric materials 85−45942
medical US hydrophones, miniature piezoelec. polymer probes 85−15285
membrane keypad with pressure-sensitive crystal elements *(German)* 87−8620
metrological characteristics of strain gauges usingtransverse piezoelectric EMF 87−3571
micro-miniaturization 88−53676
microbalance using quartz-glass filament 85−37588
microdiaphragm pressure sensor, micromachining technology 87−49730
microelectronic press. transducers for process meas. systems *(German)* 86−65189
micrometric positioning appls. *(Italian)* 87−70554
microphone, miniature piezoelec. type, 2 μm thick diaphragm, design, fabrication and charects. 88−61685
micropositioning using piezoelectric translators 88−44937
microprocessor based US anemometer, for wind velocity factor meas. 85−43477
microwave thermoelastic tissue imaging−system design 85−4290
modular ultrasound equipment with piezoceramic transducers for semiconductor structure cleaning 87−42275
modulators, acousto-optic, for single mode fibres, design and performance 87−68229
monolithic high voltage drivers for ink jet printers 86−63447
monolithic piezoresistive silicon pressure sensors 86−55603
motor, piezoelectric type US, principles and charects. *(Japanese)* 86−38983
multichannel acceleration vibration meters, amplitude-freq. charects. identification 88−42332
multidimensional linear systems model, block diagram format 86−6173
multilayer actuator design, finite difference method 87−53844
multilayer piezoelectric actuators for scanning tunneling microscope 88−13651
multiple piezoelectric force sensor for meas. of contact insertion forces of linear connectors *(French)* 85−8792
multisensor piezoelectric polymer insole for pedobarography 85−15264
narrow-strip element resonance freq. dispersion diagrams, texture and ionic substitution effects 87−4183
narrowband US immersion probes for 3 to 170 MHz range 86−44828
NBS conical transducer analysis 87−25749
NDT, thick conical piezoelectric transducers 88−57863
non-invasive piezoelectric lithotripsy, kidney stones location 88−10431
nondestructive evaluation of adhesively bonded joints 87−5557
nonmonomodal nature of piezotransducers, effect on dynamic range of acousto-optic modulators 88−47491
nonuniformly poled spherical shell piezoelectric transducers 87−60731
normal modes of piezoelectric waveguide in form of plate with end electrodes, dispersion relations 85−49617
numerical model for a transducer *(French)* 85−62171
off-centric concave transducer for acoustic microscopy 87−15100
oil filled type high pressure sensor using a silicondiaphragm 86−5294
operational amplifiers, stability and appls. *(Spanish)* 87−5691
optical detection of transient mech. displacements 87−70811
optical fibre switch using piezoelectric actuated evanescent-wave directional fibre coupler 87−49037
organic polycrystalline film-based, charects. 88−42688
oscillatory section with parametric damping, transients 88−33478
parts cleaning line using piezotransducers with automatic freq. control 88−54809
passband calc. of acoustooptical modulator with cylindrical piezoelectric transducer 86−22196
patient monitoring system, press. distrib. meas. on plantar surface of diabetic feet 86−32236
$PbTiO_3$-polymer composite for piezoelectric transducers 87−74464
phase shifter calibration in phase-shiftinginterferometry 86−2490
photoacoustic optical power meter using piezoelectric detection 88−34091
piezoceramic, electrical equivalent for small acoustic transmitters 85−45932
piezoceramic acoustic transducers development *(Czech)* 87−46277
piezoceramic bar transducers, radiation of short acoustic pulses 85−12468
piezoceramic hydrophone sensitivity dependence on hydrostatic pressure determ., oceanographic appl. 85−9376
piezoceramic material analysis and characterisation for high-power US transducers *(French)* 88−39760
piezoceramic reproducibility for 33 mode transducer appls. 87−53814
piezoceramic sensors, features and appls. *(German)* 88−53611
piezoceramic sound elements, production technology assessment 88−33466
piezoceramic spheres, axisymmetrical vibrational modes 85−24050
piezoceramic thin tube transducers, electromechanical parameter calcs. *(Chinese)* 87−6959
piezoceramic transducer vibrational modes, 3-D analysis 88−7784
piezoceramic transducers, 3-D analytical modelling *(French)* 88−68658
piezoceramic transducers, internal defect detection, NDT method 87−56670
piezoceramic transducers with modular oscillators, magnetostriction transducers replacement prospects 87−6953
piezoceramic ultrasonic arrays, finite element calcs. 88−10619
piezoceramic-polymer composites for US biomedical transducers 87−53782
piezoceramics for high power transducers 87−53842
piezoelectric pressure measuring convertors, dynamic props. *(Polish)* 86−60235
piezomagnetic combustion pressure transducer, temp. distrib. calc. using determ. method *(Polish)* 87−77264
piezomagnetic properties of ultrasonic alcofer transducers for 22 kHz and 33 kHz bands *(Polish)* 88−16967
piezomagnetic transducer mode analysis 88−39780
piezooptical measuring transducers 87−3573
piezopolymer-headphones operating as electro-acoustic digital-analogue converters for linear and logarithmic quantised signals *(German)* 85−45930
piezoresistance gauges, dynamically loaded, resistive hysteresis 87−56631
piezoresistance gauges, longitudinal and transverse, shock wave measurements 88−29327
piezoresistive C sensors in contact with porous materials, shock wave effects determ. 86−65185
piezoresistive gauges: silicon makes the grade for pressure measurement *(French)* 88−53654
piezoresistive pressure sensor, analogue and digital modelling 86−55668
piezoresistive pressure sensor with analogue signal processing unit *(German)* 86−38366
piezoresistive pressure sensors, charects. *(German)* 88−4382
piezoresistive pressure transducers using monocrystalline silicon *(French)* 85−42952
planar piezoelectric ceramic ultrasonic transducers, theoretical analysis 88−61682
planar structures, GHz-sound waves, piezoelectric surface excitation and detection using Hertzian- and H-slot resonators 88−61684
planar ultrasonic transducers using $LiTaO_3$ poled with interdigital electrodes 87−12023
plane wave scattering, transfer function, transient response and phase reconstruction *(Chinese)* 85−24044
plano-convex transducer with broad bandwidth andfocusing effect *(Japanese)* 85−59526
plastic film transducers, props. and appls. 87−14267
plastic film ultrasonic transducers, performance charects. 86−56285
plate transducer vibrating in transverse mode, transient responses 86−63514
point contact wide band piezoelectric transducer, design 86−58645
polarisation state control using linearly birefringent monomode optical fibre and piezoelectric transducers 87−68102
polycrystalline strain gauges, longitudinal and transverse gauge factors 85−37562
polymer film based sensing devices 87−56674
polymer film deposition in glow discharge, automated apparatus for film mass meas. 85−31606
polymer film for transducers 86−50035
polymer hydrophone element, theoretical study 86−60994
polymer plates, flexural vibration freqs. 87−9043
polymer pressure sensors underwater shock wave pressure meas. 88−4387

piezoelectric transducers continued
polymer US transducer, wide-band, using acoustic impedance matching technique 88−54800
polymer US transducers, freq. response 88−48395
polymer US transducers, impulse response characteristics 88−54799
polymers, ferroelec., transduction phenomena rel. to biomedical appls. 85−12448
polymers for hydrophones 88−12099
polypropylene film, nondestructive dielec. evaluation 85−35239
polyvinyldene difluoride piezoelec. transducer, design for ultrashort acoustic pulse detection 86−6160
polyvinylene fluoride film, nondestructive dielec. evaluation 85−35239
polyvinylidene fluoride, ferroelec. and piezoelec. props., shock gauge and transducer appls. 87−53807
polyvinylidene fluoride, multielement electret for medical imaging 86−56112
polyvinylidene fluoride, multitransducer platform scanning, distributed multiplexing architecture 86−53878
polyvinylidene fluoride, physical basis for piezoelectricity 85−12446
polyvinylidene fluoride, piezoelectric coaxial cable 87−70628
polyvinylidene fluoride, piezoelectric film transducers for communications 86−56280
polyvinylidene fluoride, piezoelectric foil electroacoustic transducers, stability 87−71431
polyvinylidene fluoride, pressure transducers, characterisation 86−55639
polyvinylidene fluoride, sound transducer electroacoustic efficiency 86−56279
polyvinylidene fluoride films, hydromechanical and physiological mechanical-to-electrical power converters 87−70561
polyvinylidene fluoride films, piezoelec. props., transducer appls. 85−18506
polyvinylidene fluoride films, transducer applications 86−53848
polyvinylidene fluoride for hydrophone appls., mech. and piezoelec. props. 87−53808
polyvinylidene fluoride needle hydrophone for ultrasonic applications 85−45941
polyvinylidene fluoride piezoelec. devices, tech. develops in Europe and USA 87−53839
polyvinylidene fluoride piezoelec. film transducer, charge output stress depend., gauge accuracy 87−21065
polyvinylidene fluoride piezoelec. transducers for US dosimetry appls. 87−57457
polyvinylidene fluoride piezoelectric film stress gauge response under impact loading 87−21064
polyvinylidene fluoride piezoelectric foils for measurement of arterial pressure pulse 87−71074
polyvinylidene fluoride piezoelectric sensors for robot gripper control system 87−70627
polyvinylidene fluoride receiving array for US field measurements 87−71430
polyvinylidene fluoride shock wave sensors 87−70560
polyvinylidene fluoride Solef piezo- and pyroelec. films for medical transducers 85−12447
polyvinylidene fluoride thick films for large-area hydrophone arrays 86−56278
polyvinylidene fluoride transducer, hydrostatic piezoelec. const. meas. using press. pulses 85−24040
polyvinylidene fluoride transducer, temp. compensated, for dynamic press. meas. 85−37610
polyvinylidene fluoride transducer arrays for Braille cell appls. 87−57237
polyvinylidene fluoride transducers, design and performance 88−61690
polyvinylidene fluoride US transducers 87−71429
polyvinylidene transducers, MHz sound attenuation in metals, meas. at low temps. 86−53877
polyvinylidine fluoride film fabrication, props. and appl. 85−24028
preamplifier for piezoelectric accelerometers *(Czech)* 87−56602
precise positioning using PZT, alignment mechanism *(Japanese)* 88−5718
pressure convertor with mechanical stress concentrator, nonlinearity determ. 88−35928
pressure meas. in combustion bomb, effects of thermal loading 85−58938
pressure monitor for continuous positive airway pressure systems 87−50377
pressure piezoelectric sensors, temp.-pressure dependence 86−31365
pressure sensor, temp. dependence anal. *(Japanese)* 85−26320
pressure sensor applications and technologies 88−35987
pressure sensor fabrication, using piezoelectrically driven resonant ribbons 86−55656
pressure sensors, piezo-resistive semicond., noise meas. set-up, expt. study and low-noise amplifier *(German)* 87−63354
pressure sensors, ultrasensitive, noise due to Brownian motion of diaphragm 87−49674
pressure sensors on IC, using piezoresistive effects 86−31417
pressure sensors with internal gain equalisation *(German)* 85−64095
pressure transducers, piezoresistive type, miniature designs and appls. *(German)* 85−8796
pressure transducers based on piezoresistance, mechanical design and technology integration 87−70634
pressure transducers for press. and level meas. *(German)* 87−63357
pressure transducers using force-sensitive piezoresonators *(Russian)* 85−14779
pressure transducers/transmitters, survey *(German)* 85−42967
pressure-wave generation in impulse ink-jet head 88−16100
probes for momentum and kinetic energy of drops meas. 87−70886
proximity sensor using a single piezoceramic ultrasonictransducer 87−8598
pulsed laser drilling, acoustic emission detection *(Japanese)* 85−56905
pulsed ultrasonic transducer waveform simulation 88−54801
PVDF, computer simulation *(German)* 85−48501
PVDF broadband piezo-pressure probe for shock waves in water *(German)* 86−9347
PVDF film transducers, acoustic characts. *(German)* 85−45931
PVDF hydrophone with impedance matching 86−70545
PVDF piezoelectric film tone ringer, dynamic operation 88−57886
PVDF sound transducer efficiency 86−53872
PVDF transducers, transient pressure fields 87−71435
PVDF transducers generating Scholte waves 88−33460
PVDF ultrasonic resonator 85−38370
pyroelectric non destructive testing of BAWtransducers 86−2575
PZT, doping effects, piezoelectric props., elec. wave filter appls. 85−29382
PZT SAW transducers 86−42079
PZT/polymer composite US transducer characts. 88−10632
quartz accelerometers, SAW propagation, acceleration sensitivities 86−24471

piezoelectric transducers continued
quartz crystal, with digital storage, transient meas. signals analysis 85−37614
quartz crystal vibrating piezoelectric sensors *(Japanese)* 87−8621
quartz fluid density sensor pressure transducer, design and characts. 87−35069
quartz friction vacuum gauge, 0.001 to 1000 Torr operation 86−70114
quartz pressure transducer in engine combustion chamber, temp. meas. 85−15067
quartz pressure transducers with reduced hysteresis, extended range and active temp. compensation 88−22581
quartz resonator temperature transducer with no activity dips, expt. and theoretical study 87−35070
quartz suitability as piezo-sensor for freq. adapting pacemaker system *(German)* 86−50631
quasi-static meas., calibration techniques and appls. *(German)* 85−64126
quasi-static meas. in LF range *(German)* 85−58684
radial-longitudinal coupling and transmitting response *(Chinese)* 85−26918
range finding and surface characterization using high-frequency air transducers 87−50590
relative humidity measurements using a coated piezoelectric quartz crystal sensor 87−70598
remote-controlled calibration device for displacement transducers 87−49691
representation theorem of H^p functions *(Chinese)* 87−71427
resonant diaphragm pressure sensor, pressure dependence obs. 86−55652
robot end-effectors, piezoelectric film sensor for tactile information detection 86−38373
robot fingers using microcomputer-based intelligent sensor 88−35922
robotic seam tracking, US sensing system, industrial positioning/inspection appls. 85−4517
robots, application of piezoelectric and pyroelectric transducers *(Italian)* 85−31448
rotating wheel dynamometer, coordinates transformation and data processing *(German)* 86−31412
saddle-like bending-mode vibrator device *(Japanese)* 87−38638
SAW 2D planar transducers and blazed array-like interdigital transducer *(Japanese)* 87−60757
SAW filter with short delay time 85−12470
SAW interdigital transducer, influence of resistance on electrodes *(Slovak)* 87−60728
SAW multi-layered devices, acousto-electric field calc. 87−6976
SAW oscillators used as piezoelectric sensors 86−50066
SAW real-time programmable devices on electrostrictive substrates *(Japanese)* 87−60768
SAW transducer capacitance and coupling factor calcs. 88−51131
SAW unidirectional transducer with different finger pairs 88−33491
scanning tunnelling microscope, high-stability, for surface topography meas. 85−64291
screen-printing piezoelectric devices, feasibility for realisation of couplers and loudspeakers 88−1842
semiconductor laser-to-fibre coupling, all-elec. scheme for dynamic coupling control appl. 88−13908
semiconductor sensors, differential pressure/pressure transmitters 86−5293
sensor integration with signal-processing systems, challenges for Si IC technology 85−52751
sensors and instruments based on new materials 87−70567
sensors for controlling fuel-injection engine *(Spanish)* 88−42028
shaker technology developments 87−67674
shear mode transducers for high Q bulk microwave resonators, fabrication and noise performance 88−20217
single-phase unidirectional SAW transducer analysis 87−32810
soft body contact compliance meas. using piezoelec. transducer *(Japanese)* 87−41918
SOLEF PVDF biaxially oriented film appl. 88−4386
solid piezoresistive type water depth measurement and control equipment *(Chinese)* 88−60666
sonar transducer, radiating flexural shell, FEM analysis of acoustic behaviour 87−60777
sound buzzers for consumer products 85−9394
sound generator, Doppler effect demonstration 88−75002
spectrum analyser, bulk acoustic wave 86−38307
spherical, induced electrical polarization *(French)* 87−74482
spherical, transient response and phase spectrum reconstruction *(Chinese)* 85−29416
staircase model of tapered piezoelectric transducers 88−57865
static force measurement using resonance effect ofpolyvinylidene fluoride bimorph 85−64107
steel flatpack soil stress gauge, shock loading, elec. noise anal. 87−21070
strain gauges, development and characts. *(French)* 85−52750
stress transducer for use on continuous solid media *(Russian)* 86−38359
submersible 3D load transducer platform for vessel/pier collision modelling 88−22539
submillimetre wave resonators, low-mode, for piezoelec. surface excitation of sound 87−60730
surface interdigital transducers on anisotropic media, efficiency 85−24046
tactile sensing technology for robotics 85−58653
tactile sensors for industrial robots, design 88−39779
tall thin piezoelectric bar, two-dimensional equivalent circuit 87−1821
telephone sets, all-electronic, design and construction *(Japanese)* 85−3228
telephone sets, development of all-electronic sets *(Japanese)* 85−3223
telephone transducer *(German)* 86−69491
temperature determ. upon harmonic excitation 86−9363
temperature sensor using quartz tuning fork resonator, design, fabrication and characts. 87−35183
temperature-compensating piezoresistive sensor, evaluation of deformation in chip surfaces 87−35074
terminal selection using acoustic triangulationtechnique 87−4180
testing of operating efficiency, by electromechanical coupling coeff. meas. 85−45926
testing of output parameters, using DC amplifier and sawtooth voltage generator 85−26274
thick film pressure and force sensors, design, construction and characts. 88−4408
thick film pressure sensor, integrated type with free supporting structs., fabrication and characts. 88−4409
thick film pressure sensors, for automotive appls., design, developments and stability *(Polish)* 85−5468
thick film screen printed type, realisation and characts. 87−74475
thick-film technology, impact on miniaturised sensor development 88−67746

piezoelectric transducers continued
thickness mode, back-face only elec. connections 87−25736
thickness mode transducers, 3-part modelling using SPICE II 86−2574
thickness-extensional trapped-energy mode transducerswith no inharmonic spurious modes for any size ofvibration area 86−6167
thickness-mode piezoelectric transducer constants, automatic meas. and calibration system 87−4188
thin film strain gauges, piezoelec. charcts. and appls. *(Italian)* 86−5204
thin piezoelectric elements, parameter meas. using impulse method 88−16972
three-dimensional scanner for scanning tunnelling microscopy 87−1164
timing tank mechanical filter, 320 kHz, for digital subscriber transmission system 86−47930
Tonpilz piezoelectric transducer, equiv. cct. anal. 88−23202
Tonpilz piezoelectric transducers with acoustic matching plates, investigation 88−57873
Tonpilz transducers, in-air analysis using mixed finite element-plane wave method 86−9367
Tonpilz-type, optimisation of transmitting charcts. by proper choice of impedance matching layers 85−32042
toroidal and conical piezoelectric polymer transducers for long range focusing 85−38371
transducer carrying time-decaying space-charge, mechanical response calcs. 86−58644
transfer functions of piezoelectric final-control element *(Russian)* 88−67756
transformer insulation, piezoelectric transducers for detection and measurement of partial discharges *(Polish)* 85−21675
transient anal., inverse fuel Fourier transforms 88−30189
transient operation calcs. 88−39781
transient response anal. 86−42066
transient response under compressional vibrations 87−38630
transient responses to applied mechanical stresses 86−58643
transients, 2D approx, finite element method 88−7774
translatory drives, technology and appls. 88−76004
transmission and reflection coefficients of layers forpulse signals 86−2503
transmission-line approach for computation of staticcapacitance of interdigital transducers inmultilayered media 86−63524
triaxial piezoelec. tactile sensor array, 3D microstructure fabrication, robotics appl. 88−42079
tunable sandwich transducer 88−33461
tuning and matching network of US probe 88−23207
turbulent pressure fluctuations meas. 86−44475
two-layer piezoreceiver with opposite polarisation of layers, sensitivity freq. charcts. 88−49902
two-layered piezoelectric transducer characteristics *(Korean)* 86−2495
U LEVEL, 2-wire piezoelectric polymer ultrasonic level meter *(Japanese)* 88−74392
ultrasonic, admittance graph calcs. *(Chinese)* 87−32808
ultrasonic, calibration using time-delay spectrometry 88−54796
ultrasonic, composite, performance 86−2571
ultrasonic, parameter adjustment for bandwidth enhancement 86−12218
ultrasonic, transmission response, effect of pulser parameters 85−45940
ultrasonic, with nonparallel-faced wearplate, average pressure 86−25462
ultrasonic actuator using extensional vibration of cylindrical shell 88−13654
ultrasonic multichannel transducers 85−21032
ultrasonic piezomagnetic 2-window transducers, resonant freq. design *(Polish)* 87−60733
ultrasonic resonator meas. errors due to energy losses in piezoelectric plates 86−60993
ultrasonic transducer with variable weighting layers 86−18625
ultrasonic transducers, microprocessor-based, for shape determ. and robot arm position control 88−42692
ultrasonics conference, San Francisco, USA (Oct. 1985) 87−19
ultrasonics principles and applications *(Korean)* 85−4519
ultrasonographic linear array design 85−15273
ultrasound cleaning with metrological support, modular units 88−36691
ultrasound process units design 87−77906
ultrasound technical units, economy improvements 87−42274
underwater explosion transducers, electrical isolation 88−4362
unimorphic piezoelectric transducers for sonic signalling devices, operation and appl. *(Polish)* 85−4508
US, airborne, performance and appl. *(German)* 87−9039
US, composite piezoelectric eval. 87−57454
US, FET generator cct. appl. 88−12207
US array design, 3D equivalent circuit for tall parallelepiped piezoelectric 87−71440
US broadband axisymmetrical transducers of variable thickness, design and development 88−44936
US cleaning, piezoelectric transducer, constant vibr. amplitude method using PLL 86−15310
US composite transducer calibration 87−71442
US dental scale remover 88−68466
US displacement meas. system, microcomputer controlled *(German)* 87−35203
US emission measurements, piezoelec. transducers *(Czech)* 85−32043
US flaw detectors, direct combined piezoelec. transducer manufacture, lack of bonding defects 88−70371
US hydrophone design involving integral preamplifier 86−70548
US NDT probe assemblies performance, linear systems model of piezoelectric transducer 86−57508
US phased arrays, mechanical, electric and piezoelectric interaction 87−4185
US piezoelectric transducer pressure field calc. and expt. 87−4186
US piezoelectric transducers, quality inspection 85−5819
US PVF_2 transducers for sensing tactile force 85−15287
US radiation coupling for noncoaxial alignment and unequal size transmitter and receiver *(Japanese)* 87−71425
US robotic sensors for short distance meas. and object identification 86−70130
US tilted separate-combined transducers with equalised sensitivity, design calc. 86−57496
US transducer, internal loss effects *(Korean)* 87−35521
US transducer array elements, 2D displacement anal. 87−25735
US transducer charact., spectral anal. technique 86−6171
US transducer for flow detection, operating charcts. 85−4515
US transducers fabrication, by polyvinylidene fluoride solution casting/solvent bonding 85−4511
variable pulse width piezoelectric ultrasonic transducer driver 85−17016
variational analysis of SAW piezoelectric coupling coefficient and the short-circuit metal strip grating *(Chinese)* 88−26633
VDF-TrFE copolymer piezoelectric hydrophone 88−16962
VDF-TrFE piezoelectric film US transducers 87−12020
VDF-TrFE piezoelectric US transducers, short pulse response 88−16961
vibrating probes construction for electrical current meas. in solution 88−53669
vibration damping, expt. results *(Chinese)* 86−68143
vibration sensor for diagnostic purposes *(Hungarian)* 86−70116
vibration sensor with thermal compensation 87−3567
vibration transducers calibration, by electric impedance meas. 88−35925
vibration-sensors in product development *(German)* 87−70550
vibratory gyro, equiv. ccts., directional sensor appl. *(Japanese)* 85−64138
vibratory gyro, equivalent ccts. 88−53678
vibratory gyro of angular rate sensor, equiv. cct. for design appls. *(Japanese)* 88−29353
vinylidene fluoride-trifluoroethylene copolymer thin films, electromech. props., US transducer fabrication 87−64004
vinylidene fluoride-trifluoroethylene copolymers, ferroelec. and piezoelec. props., shock gauge and transducer appls. 87−53807
Viper Plus selective vibration detector for perimeter protection 88−43661
voltage converter for tank capacitor, using piezoelectric transformer 85−6156
voltage-microdisplacement correlation, using fibre optic interferometer 88−35947
vortex flowmeter using vortex shedding and stress sensing *(Japanese)* 86−24521
vortex-effect piezoelectric flowmeter *(French)* 85−31452
weighing device, construction and operation principles, for weighing masses in microgramme range *(Danish)* 85−58915
weight sensor using piezoelectric ceramics in high grade microwave ovens *(Japanese)* 86−68140
wide band, practical realisation and charcts. *(French)* 85−64779
wide band ultrasonic transducer using tapered piezoelectric ceramics for non-destructive inspection 85−21029
wide-band piezoelectric polymer acoustic sources 88−54795
wide-range low-voltage piezoelec. bimorph 87−12006
wideband multiple-mode transducer design 87−35518
wideband ultrasonic bulk-wave transducers for signal processing 88−33480
wideband underwater transducer arrays with single acoustic matching plate 87−71439
wideband US transducers for underwater use, design and charcts. 88−10626
wideband US transmitting transducer with piezoelectric layered ring *(Chinese)* 87−42273
working standard for sound pressure units in aqueous medium 86−44481
$BaTiO_3$ piezoelectric ceramics, studies for appl. in electromechanical filters 87−12018
CdS phase insensitive transducers for US inspection 88−23206
CdS piezoelectric transducer for phase insensitive detection of laser-generatedultrasound 86−38980
Cu-epoxy one-dimensional composite, acoustic wave transmission 87−71446
CuAl-quartz, SAW resonators, annealing behaviour and phase noise performance 87−6983
InSb-$LiNbO_3$, integrated thin film programmable signal processor 87−6973
$LiIO_3$, fabrication methods and electroacoustic parameters meas. *(Bulgarian)* 88−33459
$LiNO_3$ strip-type resonator 87−35519
$LiNbO_3$ bulk-acoustic-wave transducer consisting of interdigital electrodes on grooved surface 87−29978
$LiNbO_3$, hypersonic absorption of liquids meas., using hypersonic comparator technique 88−47730
YZ-$LiNbO_3$ loaded SAW group-type unidirectional transducers, scatt. parameters 86−42084
$LiNbO_3$ piezoelectric IDT, admittance calcs. *(French)* 87−53860
$LiNbO_3$ plates, ferroelec. domain inversion, appl. to piezoelec. devices 87−67631
$LiNbO_3$ plates, rotated Y-cut X-propag., substrate thickness and SH wave propag. 86−32605
$LiNbO_3$ single crystals, electromechanical coupling coeffs. *(Chinese)* 85−62168
$LiNbO_3$, ultrasonic absorption and velocity meas., using variable pathlength cell 85−26512
$LiTaO_3$ leaky-SAW interdigital transducer *(Japanese)* 88−51106
$LiTaO_3$ strip-type resonator 87−35519
$LiTaO_3$ wideband interdigital piezoelec. bulk-wave US transducers 88−42693
Ni electrodes appl., thickness and resistance meas. 88−29319
PZT ceramic transducers, performance under high hydrostatic pressure 88−10631
PZT ceramic-air composites for hydrostatic sensing 88−22524
PZT ceramic-air composites for hydrostatic sensing 87−56668
PZT monolithic multilayer piezoelectric ceramic transducers 87−53838
PZT multilayer piezoelectric ceramic actuators 87−53845
PZT piezoelectric ceramic prop. meas., applied compressive stress parallel to polar axis 87−25739
PZT solid-porous-solid sandwich composite broadband US transducer 87−57455
PZT tube-shaped piezoelectric transducer for ink jet nozzle 87−32776
PZT-4 transducers for photoacoustic signal detection, resonant charact. 88−16087
PZT-polymer composite piezoelec. materials for medical US imaging transducers 87−53784
$Pb(Mg_{1/3}Nb_{2/3})O_3$ stacked actuator, electrostrictive props. 85−37570
$Pb_{0.74}Sr_{0.18}Ba_{0.10}(Zr_{0.54}Ti_{0.46}\ Nb_{0.02})O_3$, electrostrictive material for transducers 88−57836
$PbTiO_3$ ceramic elastomer composite hydrophone 85−56078
$PbTiO_3$ piezoelectric ceramics based array transducers design 88−35971
$PbTiO_3$ piezoelectric underwater transducers 86−60995
$PbTiO_3$-based piezoceramics, processing and transducer appls. 87−53815
$Pb(Zn_{1/3}Nb_{2/3})O_3$-$BaTiO_3$-$PbTiO_3$ ceramic electrostrictors for micropositioner appls. 87−53816
Si diaphragm formation for pressure sensor, by anodic oxidation etch-stop 86−55690
Si diaphragm monolithic pressure sensor, KP100A, design, construction and appls. 85−20588
Si micromechanical cantilever structure, excitation motion meas. 88−36025
Si monolithic pressure-flow sensor 88−29314

piezoelectric transducers continued
Si monolithic sensor chips, modular accelerometer and pressure sensors design 88−35986
Si piezoelectric pressure sensors, monolithic type with cross-voltage temp. compensation, Motorola MPX-series *(German)* 85−64097
Si piezoresistive absolute pressure sensor, design and realisation *(Slovenian)* 87−49669
Si piezoresistive and capacitive pressure sensors, transducer noise 88−67748
Si piezoresistive micro-diaphragm sensor, laser recrystallised 86−55671
Si piezoresistive pressure sensor for leak detection and robot control *(German)* 87−77250
Si piezoresistive pressure sensors *(French)* 85−14756
Si piezoresistive tactile, sensor array, shielded design 86−55641
Si piezoresistive vibration sensor, frequency-selective miniature design 86−55655
Si, polycrystalline, as strain gauge material 87−24761
Si, polycrystalline, laser recrystallised and single crystal resistors comparison 86−55687
Si polycrystalline strain sensors, piezoresistance model 86−44287
Si pressure sensor, CMOS integrated type, nonlinear anal. 87−63361
Si pressure sensor, batch-fabricated, scaling limits determ. 86−55669
Si pressure sensor, with polycrystalline piezoresistors 86−55715
Si pressure sensors, batch-fabricated, scaling limits 87−49673
Si pressure sensors for 2 kPa to 40 MPa range 85−20606
Si pressure sensors, piezoresistive absolute, packaging eval. 88−53930
Si spacecraft solar cell US welding equipment 87−78935
Si strain sensor, polycrystalline, piezoresistance model and expt. verification 86−55688
Si-Al optically excited diaphragms, reson. freq., temp. depend. 87−14270
Si-diffused, design and development 86−50051
Si-piezoelectric integrated US transducer, spinned P(VDF-TrFE) copolymer layer use 88−61689
ZnO IC-processed piezoelectric microphone 88−1839
ZnO, acoustic microscopy appl., Elsam instrument 85−9390
ZnO bulk wave transducer struct. for acousto-optic phase modulation of single-mode fibres 87−67664
ZnO for Li_2TiO_3 highly stable, ovenized bulk shear mode resonators 86−42083
ZnO leaky SAW transducers on fused quartz, film thickness effect on performance 86−28582
ZnO multilayer thin film acoustic transducers for microwave freqs. 87−67685
ZnO on Si_3N_4 diaphragm pressure sensor, micromachines device with IC process compatibility 87−49732
ZnO phase insensitive transducers for US inspection 88−23206
ZnO piezoelectric capacitor tactile sensor array on Si chip 86−50090
ZnO piezoelectric film deposition on single-mode filters and appl. to phase modulators 87−65570
ZnO thin film SAW transducers, microstructural charact. 86−2553
ZnO toolbit mounted sensors for process control in lathe and milling machine appls. 88−56359

pinch effect
air-core power crowbar transformer for theta pinch expts. 85−60254
automatic system for holding pinch in equilibriumposition in Tokamak 86−57628
CERN Antiproton Collector, 400 kA pulse generator with pseudo-spark switches for plasma lens 87−21337
charged particle beam, focusing using z pinch 88−29745
conf., Saskatoon, Canada, May 1986 87−16277
CPRF poloidal field magnet design, ohmic heating and equilib. field optimization 88−65994
dense-pinch photocathode for linacs 88−54379
diagnostics of plasma using InP:Fe soft X-ray detector and bolometer 85−52979
diffuse linear pinch with multiple ion species, higher freq. spectrum 85−46576
electron flow in the pinch region of a relativistic electron-beam diode 85−34432
gas embedded pinch controlled diffuse discharge opening switches 85−23376
gas puff soft X-ray laser target design 85−29759
gas-puff Z-pinch plasma X-ray source characts. 87−14807
high-pulse voltages meas. method for plasma diagnostics 86−18052
hot deck amplifier, 800 A, 10 kV, for pinch plasma physics, design, construction and operation 85−23384
hypocycloidal pinch as laser pumping source *(Korean)* 85−12913
hypocycloidal pinch device development for dye laser pumping *(Korean)* 87−33251
inverse pinch ion diode, power increase using fast opening switch 85−1222
Kapitsa apparatus for studying microwave pinch discharge in gases 88−12574
linear theta-pinch, design and operating characts. *(Korean)* 85−52850
liner dynamics in megagauss magnetic field 88−40478
magnetic flux compression by plasmas, gas-puff Z pinch 88−40474
magnetic pressure variation in coaxial plasma experiments with low inductance drivers 87−19132
megagauss technology and pulsed power appls. conf. Santa Fe, USA (July 1986) 88−37833
multimode optical fibre probe in Z-pinch plasma expt., Faraday rotation 87−8717
narrow band gap semicond., with symm. electron and hole spectra, pinch effect 87−11325
plasma circuit breakers, double layers form. and growth 87−43297
plasma erosion opening switch, application to inductive energy storage and neutron burst production 88−24971
plasma focus as opening switch, preliminary studies 85−5310
plasma science, conference, St. Louis, MO, USA (May 1984) 85−22703
plasma vacuum opening switch at ILE, pulsed power compression research 88−30796
plasma X-ray source for X-ray lithography 86−38727
point pinch diode for intensive ion beam generation, cylindrical target compression 87−8811
pulse generation circuit for fast-rising pinching magnetic field, circuit anal. 87−22626
relativistic electron beam pinched diode collective acceleration system, electron flow 88−71273
reverse field pinch device shell, time-dependent field perturbations due to gaps and holes 86−42696
reversed field pinch, ZT-40M, current meas., Faraday rotation meas. technique in twisted fibre 87−18682
RFX field shaping winding, design 86−42194
RFX fusion expt., Italy, AC network transient anal. 87−22605
RFX fusion expt., Italy, design criteria for switching units 87−22606
RFX fusion expt., Italy, power supply protection against plasma disruption and fault conditions 87−22607
spheromak plasma, mag. flux injection through inductive transformer 87−22498
theta discharge in linear device expt. study of characts. *(Japanese)* 88−2438
TPE-2, high current pulse, high energy density capacitor *(Japanese)* 87−9697
TPE-2, pulsed power system, high voltage coaxial cable, polyethylene-insulated, breakdown properties *(Japanese)* 87−9167
TPE-2 device, performance and reliability with pulsed high power source 88−69517
virtual cathode oscillator, pinched diode driven, dynamics 87−24710
X-ray laser program at Sandia, gas puff Z-pinch implosions 87−12374
Z-pinch discharge for photopumping X-ray laser 88−40157
z-pinch like plasma produced by pseudo-spark diode 87−21935
Z-pinch plasma lens for high energy particle beams 87−56937
ZT-40U reversed field pinch expt., poloidal field system design 85−2499
ZT-H reversed field pinch expt., 2 MA, toroidal mag. field system, engineering design 85−2507
Si large diameter power semiconductor devices, nonuniform current distrib., self-mag. field effects 88−71511

bit-sequential VLSI 'pixel-kernel-processor' for image processing 87−18322
bit-serial multipliers 87−37243
bit-sliced high-speed FFT processor, firmware *(Chinese)* 88−19170
board power chases mystique, expense from image processing 88−8813
carry look-ahead adder, design and operation 86−52782
cascadable NMOS VLSI cct. for fast convolver/correlator implementation using Fermat number transform 87−37329
cell-based interconnection network 86−4282
cellular architectures for implementing projection operators 88−14673
cellular logic image operations, processor arrays versus pipelines 87−48050
clocked CMOS/SOS LSI time switch, 256 channel design using shift-register pipeline multiplexer 87−44993
clustering analyser for pattern recognition 88−41088
CMOS arithmetic processor chip for robot control architecture and appl. 86−20632
CMOS digital signal mixer for video signal processing 86−34877
CMOS floating point signal processor for sonar/radar appls. 85−49935
CMOS high-speed comparator using pipeline technique, ADC appl. 88−32283
CMOS LISP processor chip with 114 K on-chip RAM, architecture and self-test feature 88−6901
CMOS LSI data stream processor for digital filtering, serial architecture and implementation 85−22941
CMOS microprocessor, 32 bit, design with on-chip cache and translation lookaside buffer 88−6900
CMOS microprogrammable realtime video signal processor (VSP) LSI for motion compensation and vector quantization 87−59594
CMOS monolithic image edge detection filter 87−59595
CMOS multiple pipeline function unit chip as building block for parallel architectures 88−20134
CMOS parallel pipelined multiplier, 8-bit×8-bit, 70 MHz 87−622
CMOS pipeline D/A convertor, quasi-passive type based on switched capacitor techniques 88−70873
CMOS pipelined ADC, 5 Msample/s 9 bit design with digital correction facility 88−19221
CMOS pipelined comparator for flash ADC, 100 MHz operation, design and characts. 88−70875
CMOS pipelined image processor, 32-bit, design for medical diagnosis and remote sensing appls. 87−17159
CMOS pipelined processor, fourier transform algorithm and VLSI implementation 87−24247
CMOS pipelined video signal processor for decoding composite TV signals 87−8413
CMOS single-chip digital signal processor, HD61810, pipeline struct. 85−6368
CMOS systolic digital filter processor 88−25270
CMOS time-switch LSI for digital still picture exchanges 87−7914
CMOS V60 microprocessor, NEC 32 bit device with pipeline struct. *(Japanese)* 87−37335
CMOS VLSI 2D digital filter for TV pictures, FIFO memory/pipelined arithmetic unit config. 87−17269
CMOS VLSI chip for high-performance graphic control using multiprocessor architecture 86−20601

pipeline processing continued
colour palette for high-resolution graphic displays, Am8151 monolithic IC, pipeline struct. 85−45127
computer vision, projection-based, real-time, pipeline architecture 86−69191
computing projections of digital images in image processing pipeline architectures 87−39881
concurrent cellular VLSI adaptive filter architectures 88−6975
configurable core 80C51 microcontroller using datapath modules 87−59636
convolution, multidimensional, algorithm design, VLSI impact 87−69197
convolver of 2D signals, VLSI architecture *(Russian)* 88−9914
CORDIC array processor, doubly pipelined, for digital signal processing 87−19795
CORDIC implementation of pipelined Toeplitz systemsolver 86−58567
CORDIC silicon algorithm, pipelined, optimization 87−44933
CRISP, CMOS pipelined 32-bit microprocessor with 13 kbit cache memory 88−6897
CRT controller with high-speed area transfer fn., MN8355 LSI device *(Japanese)* 86−52878
curve detection, VLSI architecture 87−69351
custom digital signal processor architecture andimplementation 86−29957
customized MOS circuits, VLSI design for digital signal processing 85−6373
customized real-time VLSI data processor, NASA Earth observing system class missions 88−25268
D/A convertor config. with video freq. operation 88−32268
data broadcasting in VLSI array design 86−47695
data flow processor chip for image processing 86−8282
data-flow architecture for mapping large computations, mapping into shuffle arrays 88−70852
DES data encryption chip, security and performance optimisation 88−56662
design of fast prime factor DFT on finite field 88−34567
design rule checking computer design 87−59100
deterministic multidimensional signals, digital interpolation and decimation schemes for fast implementation 88−3086
digit-served multipliers, systolic/semisystolic designs 87−59412
digital and analog signal processing using pipeline techniques *(German)* 86−16287
digital convolution via parallel pipeline FFT, input/output memory requirements 86−37092
digital filtering algorithms, pipelined vector processor implementations 88−8762
digital filters, fault-tolerant bit serial array structure 88−70931
digital filters design, based on distributed arithmetics *(Slovak)* 88−56776
digital image processing, high-speed architectures 87−73552
digital lattice equaliser filter, single-chip design using 4 μm NMOS technology 86−34994
digital signal processing chips, parallel processing and pipelining 87−10892
digital signal processor, architecture, pipe line processing 85−45082
digital signal processor, VLSI-oriented design using residue number multiplier 85−28616
digital signal processor based on pulse-train residue arithmetic ccts. 86−62633
digital signal processors, general purpose and dedicated, monolithic *(French)* 87−10894
disc head inspection, visual monitoring system 87−44042
discrete trigonometric transforms, fast computation unified approach 87−58904
doubly pipelined CORDIC array for digital signal processing algorithms 88−8755
DSP, CMOS VLSI, architecture using pipelining 87−24262
DSP, complex arithmetic capable VLSI signal processor, PSI chip 88−56664
DSP line equalizer VLSI for TCM digital subscriber-line transmission; CMOS chip implementation 88−35326
DSP operation, general, multiple microprocessor system appl. 87−61988
DSP operations, synthesis of efficient pipelined architectures 86−29853
DSP VLSI, architecture considerations 87−17160
DSPs, Valvo/Philips SP 50 family, PCB 5010 and 5011 devices using 2 μm CMOS technology *(German)* 87−10901
dynamically reconfigurable interconnection chip, LINC 87−59685
elastic pipeline mechanism by self-timed circuits, VLSI implementation for data-driven processors 88−32243
electron beam technologies, 3D Monte Carlo calc. by supercomputer 87−36579
Elektronika NTs-03D computer in pipeline mode, tropospheric communication channels meas. appl. 88−29239
Fairchild CLIPPER 32-bit microprocessor *(Italian)* 87−52619
Fairchild Clipper 32-bit microprocessor range, architecture and charact. 87−5896
fast biased transform architecture for 2D convolutions 85−13576
fast object segmentation in textured backgrounds 86−16555
fast one pixel edge detector 87−3521
Fermilab Tevatron, beam orbit corrections, 53 MHz digital processor real-time calc. 85−48162
FFT efficiency improvement in high speed appls. 85−44674
FFT processor architectures, design 86−16441
FFT processors, architecture and VLSI implementation aspects 85−862
FFT processors, speed improvement using segmented memory and parallel arithmetic units 85−49929
FIFO memory, 256K×4 organisation, 20 ns access time 87−59477
finite impulse response filters, pipelining of concurrent VLSI processors 86−8394
FIR digital filtering, high speed 1D architectures using polynomial convolution 87−59777
FIR filter, bit parallel systolic algorithm/structure design 85−36296
flexible pipeline architecture for digital signal processors 87−66257
floating point DSP vector signal processor 88−70830
floating-point multiplier, double precision IEEE-754 type, 100 MFLOPS throughput; bipolar VLSI implementation 88−70696
FX FFT cross-spectrum analyser, 320 MHz bandwidth, 1024 channel config. for radioastronomical appl. 88−9692
general adaptive array processing algorithm, systolic implementation 88−73130
generalized dictionary machine for VLSI 85−29280
geometric image rectification using pipelined resampling processor 85−30325
graphic CRT controller using multiprocessor architecture, VLSI chip and language 85−33977

pipeline processing continued
HAL: a high-speed logic simulation machine 86−14101
hardware algorithm of an image processing VLSI *(Japanese)* 86−15215
hardware algorithms in scientific computations, supercomputers vs. special purpose systems *(Japanese)* 86−15216
Harvard architecture of a monolithic integrated signal processor as an example of a new type of control flow concept *(German)* 87−37345
high-speed 2 D digital filter structure 86−57991
high-speed CMOS TTL-compatible, numbercrunching elements for fixed- and floating-point arithmetic 87−59634
high-speed image processor with programmableneighbourhood operation window−PWIP-2 *(Japanese)* 85−51789
high-speed threshold decoder implementation, for long constraint length convolutional codes 87−31957
high-throughput architecture for regular excitation reduction speech coding algorithm, design 86−63411
IBM 801 processing unit, automatic synthesis using Yorktown silicon compiler 88−70630
IDATEN reconfigurable video-rate image processing system, development *(Japanese)* 87−2565
IIR digital filters, high-speed implementation using pipeline architecture 86−8377
IIR digital filters, pipelining techniques comparison 86−1320
IIR pipelined residue number system digital filters, realisation and stability 85−23048
image anal., pipelined system using custom ICs 88−33299
image convolver, real-time 85−30433
image edge detection, real-time parallel processing system 85−36449
image filtering and enhancement using human perception props. 87−69333
image manipulation with colour palette chip 86−5069
image processing LSI, Toshiba 32-bit device using parallel/pipeline processing *(Japanese)* 87−52636
image processing pipeline architectures, polygonal marks computing 86−3985
image processing pipeline architectures, polygonal masks computing, inspection appls. 86−10543
image processing pipeline architectures, projection computation 86−16571
image processing systems, digital image maxima and minima computation technique 86−3988
image processing systems equipped with hardware comparators 88−46196
image processor, functional built-in test 85−37545
image processor chip, NEC μPD7281 85−6334
image relaxation operations, pipelined architecture implementation, NMOS SIMD chip 88−25246
image sequence real-time vector quantisation, VLSI chip set design 87−66246
image sharpness enhancement using adaptive 3×3convolution masks 86−3982
image signal processor for gray-scale video 85−6346
image signal processor implementation, real-time, RISP-II model 87−52624
image warping on high-speed VME boards 88−16008
Imco picture processing system, knowledge based using microprocessors and CMOS arrays *(German)* 88−34746
integrated digital filter, for colour TV signals component encoding 85−6448
integrated optical pipeline processor 88−2041
Intel 80386 32-bit microprocessor, memory handling 86−20579
Intel 80386 32-bit pipelined architecture microprocessor 86−20580
Intel 80386 CPU architecture 87−5897
Intel 80386 microprocessor implemented in CHMOS process, hardware config. *(German)* 87−10899
Intel 8038 microprocessor address pipelining option provides bus flexibility 86−20613
Intel iAPX 286 microarchitecture 86−1113
Intel iAPX 286 microprocessor, pipelining techniques 86−1112
L-filtering, order statistic determ. 88−66578
large problems in fixed size systolic array, general approach to solutions 88−32265
large scale image thinning algorithm based on pipeline struct. *(Japanese)* 85−2904
lattice equalizer, pipeline implementation 85−17740
lattice filters, canonical pipelining 87−61838
LINC link and interconnection chip, architecture, pipeline processing 86−8344
linear phase decimation and interpolation filters for high-speed applications 88−56773
linear system equations solving using modified Given's algorithm and VLSI architecture 88−40940
linear systems solver, pipelined VLSI implementation 88−25267
LM32900 digital signal processor 86−34831
LM32900 digital signal processor chip in CMOS technology 87−59580
LMS adaptive filter implementation using SIMD multiprocessor ring architecture 86−16449
logic and circuit simulation, pipelined event-driven mixed-mode simulator 88−24915
loop winding−a data flow approach to functional pipelining 87−66247
low-sensitivity digital filter synthesis using T-cascade connection *(Japanese)* 87−52754
LSI chips for multiplier-accumulator and pipeline struct. *(Japanese)* 88−25108
MA7180 and MA7188 VLSI chip-set for real-time 1-D/2-D digital convolution 87−44951
MARS hardware accelerator, architecture and design 87−65703
MC68020, effect of pipelining on algorithms 85−61289
MC88100 RISC processor 88−44188
median filters on general-purpose image processing systems 87−13085
microcomputer-based 2-D digital filtering 85−49999
microprocessor, pipelined 32 bit type with 13 Kb cache *(German)* 87−59605
microprocessor for speech recognition 85−46712
microprocessor-based data links, error correcting rate 1/2 Golay (24, 12) codes 85−3182
microprocessors without interlocked pipeline stages, architectural comparison 85−17507
microprogrammable signal processor *(German)* 85−49925
Minnesota scanner for 3D tracking of moving objects, performance 87−63253
MIPS 32-bit processor architecture, measurement and evaluation 88−71812
MIPS R2000 RISC CMOS VLSI processor architecture, charact., and performance 86−57871
MIPS-X, 32 bit pipelined CMOS processor, on-chip instruction caches 87−66258

pipeline processing continued
modelling pipelined processors, use of Petri nets 88−70848
modular data flow image processor, NMOS VLSI 85−6369
module selection for pipelined synthesis 88−70449
modulo-3 residue checker, performance and cost, when providing concurrent self test for pipelined serial multiplier 88−44262
MOS transistor model-evaluation attached processorfor circuit simulation 86−28521
Motorola 32-bit M88000, supercomputing on chip 88−44214
motorola MC68020 32-bit microprocessor, basic barrel shifter algorithms 87−24240
moving average system identification iterative method 88−27897
multi-dimensional systolic networks for discrete Fourier transform 85−17339
multi-processor chip optimized for speech recognition 86−1131
multibit convolution using a bit level systolic array 85−25094
multichannel decimating FIR digital filter system for microprocessor-based acquisition, CAD 86−62757
multidimensional video image processing architecture 86−64353
multiple channel adaptive filtering, efficient algorithm and systolic architecture 88−66486
multiple-valued programmable logic array with application to pipelined signal processing 87−37372
multiplier macrocell, 16 bit×16 bit, implementation in 1.5 μm CMOS/BULK technology 85−45130
multiplier macrocell, 25 MHz 16×16 bit pipelined design 85−34021
multiplier unit, VLSI implementation 87−17041
multiplier unit and its hardware architecture for VLSI technology 88−44814
multiplier-accumulators, sub 15 nanoseconds, design 88−727
multiplying computers, pipeline-programmed, architecture and implementation *(German)* 85−49965
MVL image processing system based on combined CCD-CMOS process 86−4000
NASA Space Shuttle Orbiter 87−42082
National Semiconductor 32-bit microprocessor, CMOS design *(German)* 88−32230
NEC DSP LSI, 32-bit floating point arithmetic operation *(Japanese)* 87−24243
NEC uPD7281, image pipelined processor 85−22944
NEC V60 32-bit microprocessor, development 87−766
NEC V-series of microprocessors, application *(German)* 86−41142
neighbourhood operations, VLSI area-efficient computation scheme using linear programmable systolic array 86−23171
NMOS 32-bit VLSI CPU with 15-MIPS peak performance 88−6896
NMOS custom VLSI cct. for programmable signal processing 86−67263
NMOS high performance computer graphics solutions using silicon compilation 88−12443
NMOS multiplier test chip for image processing systems 86−34933
NMOS pipelined digital filter chip with a throughputrate of 100 Mbit/s 85−61383
NMOS pipelined image processor using quaternarylogic 86−10552
NMOS radix-2 FFT butterfly arithmetic unit 86−34873
NMOS VLSI fully pipelined bit-sliced correlator 85−45139
NS32532, on-chip MMU in pipelined architecture 88−70818
NS 32532 CPU, 32-bit system, four-stage pipeline processing *(Italian)* 87−73473
NS 32532 microprocessor, configuration and compatibility *(French)* 87−52603
number-crunching chips, importance of fast cycle times in design 85−17594
optical compare-and-exchange modules for sorting 88−51630
optical inspection using pipelined image processors 87−23386
optical linear algebra processors, Lanczos and conjugate gradient algorithms realisation 88−28074
optical parallel array logic system, architecture without memory elements 87−13054
PACS software tools and structure 86−32398
parallel hybrid A/D convertors, ADC600 with pipeline architecture *(Italian)* 87−44965
parallel VLSI implementation of Kalman filter 87−37380
parameter optimization of the CORDIC-algorithm and implementation in a CMOS-chip 87−44931
pattern clustering, VLSI systolic architecture 85−36354
pattern perception using parallel arrays, pipelines and pyramids, book contrib. 85−46951
PCB optical inspection device, hardware-software simulator *(Russian)* 88−1109
PCBs, visual inspection using connectivity-preserving shrinking 87−45378
PDSP 16112 monolithic multiplier for complex numbers *(German)* 87−44737
Philips digital signal processor family, parallel architecture 86−34833
Philips PCB5010/1 high-performance CMOS digital signal processor *(Italian)* 87−37322
photographic image enhancement processor, expt. 87−41209
picture processing, geometric feature computation in pipeline architectures 86−10584
PIPE VLSI processor architecture 87−59541
pipeline interleaved programmable DSPs: architecture 87−73475
pipeline interleaved programmable DSPs: synchronous data flow programming 87−73476
pipeline merge sorter organisation *(Japanese)* 85−33928
pipeline processing, DSP algorithms and architecture 87−47841
pipelined bit-serial squarer, digital signal processing appl. 88−19101
pipelined recursive residue number system digital filter 86−14373
pipelined signal processing architectures, reviews 85−30242
pipelined VLSI circuits for high-speed signal processing 87−17149
pipelined VLSI systolic array and algorithm for digitalfiltering 86−63471
pipelined-architecture processor design, logic synthesis algorithm 86−58563
polynomial transformer for parallel and pipeline VLSI algorithms 85−62056
power system stability analysis using VLSI systolic array 87−15141
PPPE, parallel pipelined projection engine, for real-time image processing in random space, VLSI implementation 88−25300
programmable FIR filter design using CMOS VLSI technology 88−19294
programmable VLSI array processor system for IIR/FIR digital filtering 85−49936
programmable window image processor, PWIP-1, high speed, performance *(Japanese)* 85−36386
pulse-Doppler radar, complex signal FFT processor with pipeline parallel architecture *(Chinese)* 87−76835

pipeline processing continued
PWIP-1 high speed images processor with programmable window 85−30441
pyramid architectures for bottom-up image analysis 86−31307
Q-p data driven processor, design philosophy 88−44199
Q-v1 one-chip data driven processor design 88−32258
quaternary logic pipelined image processor, architecture 85−19542
quaternary NMOS IC for pipelined image processing 87−37165
quaternary NMOS ICs for pipelined image processing 86−3999
radar pulse compressor, digital matched filter design for real-time signal processing 86−59945
Radon-based image processing in a parallel pipeline architecture 87−55280
raster scanning component labeling algorithm for video rate processing 88−28063
ray casting parallel synchronous machine, custom IC design and implementation 87−777
ray-casting machine architecture 85−33976
real time Kalman filter, VLSI implementation 87−17267
real time video processor design and implementation 87−17196
real-time image appls., parallel/pipelined architectures class 88−41087
real-time image processing chip set with pipelined and parallel dedicated architectures 87−17164
real-time image signal processor in 1.5 μm bipolar technology, microprogrammable and expansible architecture 87−24259
recursive digital filters, functional techniques comparison 86−57969
recursive digital filters, sensitivity to coeff. errors 87−24333
recursive fully pipelined addition algorithm, simulation and parameterisation in VLSI 87−620
recursive high-speed digital filter realisation using pipeline techniques 85−34063
Reed-Solomon codec suitable for VLSI implementation, systolic based encoder/decoder, design method *(Japanese)* 88−53064
Reed-Solomon decoder, VLSI pipeline structure 85−49915
registered PROMs for pipelined testable microprocessor systems 85−40070
residue arithmetic VLSI array architecture for manipulator pseudo-inverse Jacobian computation 88−63647
residue arithmetic VLSI array architecture for manipulator pseudo-inverse Jacobian computation 88−63647
residue number system chips, models 85−22942
RISC architecture for GaAs microprocessor system 87−17106
RISC II micro-architecture 85−11308
robot direct kinematics, VLSI architecture for real-time computation 86−58574
SAR images processing hardware pipeline concept 87−70503
SAR processor with high-speed real-time digital image processing fns. 86−59946
satellite on-board baseband message processor for Ka-band systems 85−25833
sea floor, geophysical prospecting, pipeline architecture of prediction algorithm 87−57335
second-order recursive digital filters, very-high-speed, design technique 86−57997
Sehwa, software package for pipelines synthesis from behavioural specifications 88−38464
self-testing VLSI processor structs., asynchronous vs. clocked 86−57874
self-timed elastic data transmission line chip for data-driven processor, VLSI implementation 88−6813
serial/parallel automultiplier 87−44733
Sharp SM812 CMOS 8 bit one-chip microcomputer, concepts, architecture and circuit design *(Japanese)* 85−22927
signal processing algorithms, parallel and pipelined VLSI implementation, book contrib. 85−46815
signal processing modules, AM 29500 series, bipolar VLSI implementations *(German)* 85−818
signal processing pipeline architectures 86−20718
signal processing systems, multidimensional memories appl. 86−16437
signal processor, programmable, for airborne radar 86−10458
signetics/Philips 5010/11, single chip DSP, architecture, operation and implementation 88−6924
Signetics/Philips 5010/11 CMOS DSP, architecture and features 88−811
signetics/Philips 5010/11 single-chip DSP, architecture, operation, and implementation 88−6929
smart memories for military applications *(Spanish)* 87−73456
SMT inspection, automated real-time X-ray imaging and interpretation 88−32668
SOAR, 32-bit microprocessor for Smalltalk, NMOS device, design and characts. 87−10905
SOAR, Smalltalk on RISC, 32-bit microprocessor, NMOS technology 87−17154
sorting and parallel processing 87−5938
sparse canonical signed digit FIR filter 87−59788
sparse network eqns., fast soln. method with array processor, new data storing scheme 87−30007
sparse network eqns., fast solution using array processor, transmission network appls. 86−56409
spatially modulated optical signals commutation, laser-generated beam array 87−54457
spectrum analyser, high speed, using VLSI circuits 86−50024
split-radix FFT, efficient implementation 87−62059
STC Semiconductors' DSP128, digital single-chip signal processor *(German)* 86−20591
stereoscopic image processing by high-speed processing systems *(Japanese)* 87−13146
suffix soln. for recurrence systems for parallel and pipelined machines 86−26993
surface defects real-time inspection, using dedicated image processing 88−49502
systolic algorithms design, system and implementation issues 85−51648
systolic array evaluation of polynomials with application to nonlinear spectrum estimation 87−19643
systolic array for 2-D adaptive beamforming 88−73164
systolic array for spelling correction 88−38583
systolic array of linearly constrained leastsquares filtering 86−16394
systolic array technique for adaptive antenna beamforming 86−57878
systolic arrays, implementation of factorised filter 88−73024
systolic arrays for recursive digital filtering 88−881
systolic arrays with bit-level pipelining, design 87−65997
systolic IIR filters with bit level pipelining 88−70930
systolic multiplier unit and its VLSI design 86−1010
systolic multiplier unit for VLSI 86−53732
systolic VLSI processor arrays, parallel implementation 87−52525

pipeline processing continued
TI SN54/74AS88xx microprocessor family, 32-bit parallel system building blocks 86−52752
time switch LSI design for 1.5 Mbit/s×128 channel digital still picture switching system 87−20328
timed Petri nets, modelling and optimising pipelines 87−23517
TMS34010 32-bit graphic processor 87−66228
Toeplitz system solver, pipelined, lattice filter array implementation 86−67248
transputer-based adaptable pipeline, design 87−66243
two parity error recoverable protocols, synthesis and performance 87−33850
two-dimensional recursive digital filters, hardware implementation using residue number system 85−34080
ULTIMATE: a hardware logic simulation engine 85−749
vector and cellular pipelines for implementing projection operators 88−3084
vector hardware accelerator with circuit simulation emphasis 87−65701
vector processors for high speed logic simulation 87−59081
vector quantised systolic array systems, LSI architecture 87−37374
vector reduction arithmetic unit, pipelined, for FIR filter implementation 87−59727
vector-radix 2D FFT chip 86−2440
video coding, pipeline processing, speed increase *(German)* 87−39648
video rate, A/D convertors, developments in CMOS implementations 87−66285
video rate 16×16 discrete cosine transform IC with pipelined concurrent architecture 88−70832
video signal processor, real-time microprogrammable CMOS LSI, config. performance and appls. 88−19178
video signal processor CMOS LSI cct., real-time, microprogrammable for motion compensation in teleconferencing 88−63705
VLSI architecture for cellular logic operations 86−35822
VLSI architecture for pipeline FFT processor *(Japanese)* 87−37356
vLSI architecture for the maneuvering target tracking filtering 87−19836
VLSI array architectures for device/cct./process simulation appls. 86−62620
VLSI array processor for linear phase transversal filtering, design and performance 88−44157
VLSI array processors for digital signal processing 88−13549
VLSI based ultrafast FFT 87−6818
VLSI bit serial vector quantizer, architecture 87−24283
VLSI data flow chip ImPP and its system for image processing 87−19939
VLSI design of pipeline Reed-Solomon decoder 86−16149
VLSI digital filter, area-time complexity using residue number systems 87−890
VLSI digital filter architectures, pipelined, FIR, FFT/linear transformation, signal processing appls. 85−34081
VLSI DSP architecture, practical study 87−27468
VLSI FFT processor implementation 85−30283
VLSI high speed area efficient adaptive filters architectures 88−890
VLSI high-speed implementation of adaptive filters, pipelined fast QR-RLS struct. 88−889
VLSI implementation of finite impulse response digital filters using residue number systems 85−40185
VLSI layout of a pipelined multiplier 88−71811
VLSI mask geometry checking, processor architecture 87−38460
VLSI pipeline number theoretic transform processor 86−67253
VLSI processor array for contour tracing 88−73275
VLSI processor arrays, large synchronising 85−55898
VLSI recursive filter architectures using scattered look-ahead and decomposition 88−70932
VLSI Reed-Solomon decoder, single chip design 87−27207
VLSI robotics vector processor for real-time control 88−63723
VLSI spanning tree generators 85−40839
VLSI structures for computing the Wigner distribution 88−73026
VLSI structures for iterative computations 85−2850
VLSI systolic array and algorithm for digital filtering 87−59538
VLSI systolic array processor simulation for band matrix triangulation 85−61309
wafer circuit pattern inspection system using pipelined image processing techniques 88−33297
wafer-scale integration of pipelined processors 85−33979
Walsh transform in silicon, new architecture and algorithm 88−1774
wavefront array architecture for executing sequences of matrix operations 88−29304
weighted binary number to residue number system conversion using VLSI architecture 85−11382
Widrow-Hoff LMS adaptive digital filter, CMOS gate array implementation 87−948
Wigner-Ville transform, software implementation 88−66464
WSI CMOS soft-configurable systems, switch design 87−31956
WSI reconfigurable microprocessor 87−31948
Z280 CMOS microprocessor, 16-bit, internal cache and integrated peripheral controller *(German)* 88−774
Zilog ZS8 pipelined microcontroller family 86−27358
GaAs 8×8-bit multiplier/accumulator using JFET DCFL 87−624
GaAs microcomputer reduced instruction set architectures 87−31944
GaAs pipelined SRAM achieving nanosecond cache performance 87−5892

Si:H,P amorphous and microcrystalline films, morphology and electronic props. studies 88−71316
Si:H,P, heavily doped films, microcrystallisation 87−65553
a-Si:H,P(As)(B), glow-discharge deposited coatings, doping efficiency investig. 86−35554
a-Si:O,N,H, p-type window layer in a-Si solar cell, optical props. 86−40083
a-Si:P, glow discharge deposited, elec. props., bias voltage depend. 86−47331
a-(Si-Ge):H, prep. in rotary plasma isolated reactor and props. 87−5472
Si-H back-to-back diode for addressing LCDs, plasma-enhanced CVD appl. 88−16307
Si-O-N as barrier layer in three-layer photoresist system 86−1893
Si-SiN:H TFTs, hydrogenation process, evaluation *(Japanese)* 88−44785
Si-SiN_x amorphous, thin film transistors, RF power density effects 88−7633
Si-SiO_2, MOS transistors with oxide gate, low temp. plasma enhanced CVD, elec. characts. 86−9173
a-Si-SiO_2 TFT, gate insulator plasma deposition 88−50951
SiBN amorphous films, plasma-enhanced CVD, dielec. props. 87−52185
SiC:B p-i-n devices, i-layer performance, low level B doping effects 86−20100
a-SiC:F,H, glow discharge deposition from SiF_2, elec. and optical props. 86−13805
SiC:H amorphous films, glow discharge deposited, photoconductivity, microstructure effects 87−33029
SiC:H, amorphous, plasma and photo-CVD deposited films 86−45701
SiC:H, amorphous wide band gap semicond. for photovoltaic appl. 86−42414
SiC:H films, amorphous, structural studies by IR vibr. spectroscopy 86−41557
a-SiC:H, glow discharge deposited, evidence for microstructure, IR adsorption peak 87−68257
a-SiC:H glow discharge deposited films, microstruct. and electronic props. investigation 85−55486

plasma deposited coatings continued
a-SiC:H, glow discharge plasma deposited films, influence of plasma excitation freq. on physical props. 86−35362
a-SiC:H,B, elec. and optical props., substrate temp. depend. *(Korean)* 87−74035
a-SiC:H,B films, glow discharge deposition, cond., optical gap rel. to B doping 85−10792
a-SiC:H,B, thin films, thermoelectric power 87−32261
SiC:H,B(P) amorphous films as passivation dielectrics 85−40635
a-SiC:H,F, photoconducting, glow discharge deposited, optical, electrical and struct. props. 86−36311
a-Si_xC_{1-x}:H films, light-induced effect 85−23459
a-Si_xC_{1-x}:H, gap states, spectral photoconductivity study 86−35364
a-$Si_{1-x}C_x$H, glow discharge deposited films, optical and electrical props. 86−40791
a-Si_xCi_{1-x}:H films, glow discharge produced DC dark conductance, surface adsorbate and light exposure effects 85−23470
$Si_{1-x}Ge_x$, amorphous, PECVD prep. from fluorides, photoconductive response improvement 88−26948
a-$Si_{1-x}Ge_x$ films, RF glow discharge prep., elec. and optical props. *(Japanese)* 85−40456
Si_xGe_{1-x} microcrystalline films, structural, elec. and optical props., annealing effects 86−66855
a-SiGe:H, F glow discharge films, elec. and optical props. 87−24812
a-SiGe:H, F, high performance solar cells, conversion efficiency study 86−35368
a-SiGe:H alloys for solar cells, electronic and optical props. 87−9865
SiGe:H amorphous films, glow discharge deposited, photoconductivity, microstructure effects 87−33029
a-SiGe:H films, glow discharge deposited, electronic and optical props. 86−36309
a-SiGe:H glow discharge film, struct., elec. and photoelec. props. 86−27932
a-SiGe:H thin film solar cells, RF discharge produced, elec., optical and structural props. 88−17993
a-SiGe:H,F alloy films, F incorporation and annealing props. 87−25095
SiGe:H,F, amorphous, steady state and transient transport props. 88−25911
a-SiGe:H,F glow discharge films, electronic transport and density of states 87−24811
$Si_{1-x}Ge_x$:B glow discharge alloy film, elec. cond. and thermoelec. power, crystn. effects 86−27930
a-$Si_{1-x}Ge_x$:H films, RF glow discharge decomposition deposition 86−46365
$Si_{1-x}Ge_x$:H films, amorphous, prep. by DC glow discharge deposition, photocond. props. 88−26951
a-$Si_{1-x}Ge_x$:H films, photoelectronic props. 86−58824
a-$Si_{1-x}Ge_x$:H,F films, optical and elec. props., photocond. meas. 86−27927
a-$Si_{1-x}Ge_x$:H,F glow discharge films, transport props., X-ray diffr. and Raman scatt. study 86−27931
a-$SiGe_x$:H,F film props., photocond., ESR, XPS, IR and optical absorpt. spectra studies 86−27926
a-$SiGe_x$:H,F films, glow-discharge deposited, electronic props. 86−35346
SiH,B(P) plasma CVD coatings with $(SiH_2)_n$ groups, doping, cond., optical gap control 87−53394
SiN films, plasma-deposited, antireflection coatings for Si solar cells 88−55629
SiN passivation of Si film, resistivity, annealing effects study 88−32751
SiN, plasma-enhanced CVD film deposition and characts. 85−12209
SiN, plasma-enhanced CVD film deposition for GaAs LSI 85−12210
SiN, plasma-enhanced CVD film deposition, mechanisms and characts. 85−12208
SiN thin films, MM plasma deposited, dielec. props. 87−18386
a-$Si_{1-x}N_x$ films, RF glow discharge prep., elec. and optical props. *(Japanese)* 85−40456
a-$Si_{1-x}N_x$ films, plasma CVD deposited, as antireflective coatings for solar cells *(Japanese)* 87−15976
Si_3N_4, Al-Cu-Si film passivation *(Slovak)* 87−37640
Si_3N_4 PECVD films characterisation as applied to novel MOS structures 85−45613
Si_3N_4 antireflection coatings for GaAs photodetector *(Slovak)* 86−31430
Si_3N_4 films deposition by liquid phase CVD and plasma-assisted CVD processes *(Slovak)* 88−32938
Si_3N_4, low-temp. plasma deposition 86−52516
Si_3N_4, plasma deposited film, compositions and phys. props. variation 85−10777
Si_3N_4 plasma deposited films, charactn. 86−21421
Si_3N_4, plasma deposited, impurity conc. and distrib. 85−50223
Si_3N_4 plasma-deposited films for IC encapsulation 88−20142
Si_3N_4 plasma-deposited wear resistant coating for ferrite read/write magnetic heads 85−7153
Si_3N_4 thin films, plasma enhanced CVD, influence of deposition parameters on props. *(Slovenian)* 87−44372
Si_xN_y composite insulator struct. for VLSI multilevel metallisation 85−55736
SiN_x PECVD films for GaAs ICs, charactn. 88−13506
a-SiN_x amorphous glow discharge films, gap state distrib., photocurrent phase shift anal. 87−1211
SiN:H, amorphous wide band gap semicond. for photovoltaic appl. 86−42414
a-SiN:H, electrical behaviour 87−1207
a-$SiN_{1.4}$:H/a-Si:H band offset and electronic struct., AES, XPS and IPES studies 87−53198
a-SiN_x:H films, glow discharge deposition, high rate 85−60996
a-SiN_x:H glow discharge film, elec. and optical props. study 86−27934
a-SiN_x:H glow discharge films, struct., elec. and optical props., deposition conditions depend. 86−27935
a-SiN_x:H, glow discharge prepared films, electrical and optical props. 86−35365
a-SiN_x:H, plasma deposited films, electronic props. 86−35344
a-SiN_x:H plasma-enhanced CVD film props. rel. to SiH_4-N_2 gas vol. ratio, RF power and substrate temp. *(Korean)* 87−325
a-SiN_x:H thin films, small polaron transport 88−50637
SiN_x:H,B microcrystalline films, B doping 87−25085
SiN_x:H,B(P) films, amorphous, doped and undoped, plasma enhanced CVD prep., phys. characts. 85−54502
SiN_x:P(B)(Na)(Li) films, amorphous, substitutional and interstitial doping 88−25910
Si_3N_4-Si interface characts., effect of NH_3 plasma treatment 88−57389
Si_3N_4-SiO_2-Si inversion layer solar cells, air mass zero behaviour 86−45660
SiN_x-Si:H amorphous multilayer films, charge transfer doping, cond., photocond. meas. 87−17730

plasma deposited coatings continued
a-SiN_x:P(B)(Na)(Li), interstitial and substitutional doping in glow discharge films 88−44644
SiO_2, Al-Cu-Si film passivation *(Slovak)* 87−37640
SiO_2 films deposition by liquid phase CVD and plasma-assisted CVD processes *(Slovak)* 88−32938
SiO_2 films, downstream microwave discharge deposition, comp., physical props. 88−49889
SiO_2 films, plasma-deposited, stability, stress and IR measurements 87−58982
SiO_2, low-temp. plasma deposition 86−52516
SiO_2, plasma deposited film, electrophysical props. 86−26873
SiO_2, plasma deposition, porosity, multilayer struct. 85−45601
SiO_2, prep. from plasma enhanced CVD of SiH_4-NO_2 mixtures 87−44391
SiO_2, reactive facet tapering for multilevel interconnect appls. 87−67131
SiO_2, remote plasma-enhanced CVD on Si, low interface state density 88−57386
SiO_2 selective deposition using plasma-fluorinated resist mask 88−64366
SiO_2 thin films, plasma enhanced CVD, influence of deposition parameters on props. *(Slovenian)* 87−44372
SiO_2 thin films, production from glow discharge decomp. of NO-SiH_4 mixtures, elec. props. 87−10482
SiO_2:Na^+ plasma-deposited layers, Na^+ ions neutralisation 85−33503
SiO_x:H,N/a-Si:H heterostruct., plasma deposited, photoelectronic and optical props. 85−50297
SiO/SiO_2 films fabrication in oxygen plasma *(Slovak)* 86−26881
SiO_2/Si_3N_4 structures deposition by liquid phase CVD and plasma-assisted CVD processes *(Slovak)* 88−32938
SiO_2-Al_2O_3, codeposited covers for solar cells, plasma activated CVD appl. 88−37458
SiO_2-Si_3N_4, low-temp. plasma deposition 86−52516
SiO_xN_y CVD plasma enhanced layer encapsulating GaAs surface, thermal annealing study 85−55463
SiO_xN_y films, plasma assisted growth, oxidation 85−44789
SiO_xN_y, plasma deposited film, compositions and phys. props. variation 85−10777
SiO_xN_y, plasma enhanced CVD on III-V semicond., growth and interface props. 86−13823
SiO_xN_y plasma-enhanced CVD films as selective Zn diffusion barriers 87−6516
SiON-GaAs interface, plasma enhanced CVD deposited SiON, NH_3 plasma pretreatment effects 87−306
SiO_xNdy films, glow discharge nitridation process for formation of MIS solar cells 88−49140
SiO_xNy plasma-deposited coatings, Na penetration study 86−26919
SiO_xNy thin films, plasma enhanced CVD, deposition rate and props. depend. on N_2O conc. *(Slovenian)* 87−44373
SiSn:Cl,H amorphous films characts. 88−26933
a-SiSn:Cl,H glow discharge films, photocond. and optical band gap, doping effects 86−27933
a-SiSn:H glow-discharge films, elec. and photoelec. props. 85−1331
SnO_2 thin film prep. by DC planar magnetron plasma CVD *(Japanese)* 88−18745
$TaSi_2$ films, plasma enhanced CVD, resist. rel. to annealing 85−10815
TiO_2, plasma deposition, porosity, multilayer struct. 85−45601
W films, plasma CVD, X-ray diffr., SEM, Auger spectra 88−39273
WC, thickness meas. using thermal wave imaging with RF induction heating 85−10890
WSi_2 for interconnections and gate electrodes, plasma enhanced CVD and characts. 86−13822
ZnO films, plasma enhanced c-axis orientation, adhesion to substrates 85−44740
ZnS(Se) film, plasma assisted deposition and epitaxy, opt. charactn. 86−13766
ZnSe layer growth by plasma-assisted epitaxy 87−23683

plasma deposition
assisted CVD deposited thin films for microelectronic appls. 87−10491
axial lateral plasma deposition (ALPD) technology for optical fibre manufacture 85−29536
borophosphosilicate glass, plasma-assisted deposition, depend. on substrate props. 88−6496
borophosphosilicate glass for VLSI device fabrication 86−28408
cathodic arc deposition advancements 87−58978
composite technologies of vacuum techniques and coating methods *(Japanese)* 87−58973
conference on plasma processing, Palo Alto, CA, USA (April 1986) 87−16293
CVD, development of multichamber plasma processing system for researchlaboratory use 85−54506
CVD, LSI manufacturing appls. *(Japanese)* 87−73124
CVD, plasma-assisted chem. vapor transport processes, theory 85−28246
CVD, plasma-enhanced, low press. chamber, flow visualisation using laser-induced biacetyl phosphorescence 86−26891
CVD, plasma-induced and plasma-assisted, principles and examples 86−20105
CVD process, geometric taper loss reduction 86−476
CVD system, programmable fully automatic *(Japanese)* 86−13802
CVD technology for LSI *(Japanese)* 85−33488
CVD using a triode reactor *(Japanese)* 87−10499
DC discharge plasma CVD method *(Japanese)* 87−10500
DC magnetron-discharge plasma CVD apparatus with facing-cathodes struct. *(Japanese)* 85−6010
diamond film, conductive, plasma assisted CVD deposition, struct. and elec. characts. 86−13821
diamond film prep. by plasma CVD, surface treatment effects 88−43946
diamond films grown by microwave plasma enhanced CVD, charactn. 88−63373
diamond semiconductive film, glow discharge prep. and charactn. 88−70353
diamond synthesis by hollow cathode plasma assisted CVD 88−63374
dielectric films for VLSI, deposition conditions rel. to performance goals 86−58499
dielectric planarisation techniques for narrow pitch multilevel interconnects 87−67149
1-1difluoroethylene fluorination by nonequilibrium plasma at atm. press 87−23761
ECR plasma develops. in wafer fabrication 88−39202
electron cyclotron resonance plasma deposition apparatus 85−22546
electron cyclotron resonance plasma deposition technique using raw material supply by sputtering 85−421

plasma deposition continued
electronic materials, plasma synthesis and etching, conf., Boston, MA, USA (Nov. 1984) 86−33933
epitaxy, plasma-assisted for low temp. growth *(Japanese)* 88−12011
ESSDERC 1985, conf., Aachen, FRG (Sept. 1985) 87−36319
gas panel repair and construction using in situ plasma-enhanced CVD 86−31495
glass films, low temp. plasma-enhanced CVD process for hot and cold wall reactors 88−24786
graphite fibres and films, highly conductive, intercalated with AsF_5, synthesis and preps. 87−44390
hollow-cathode evaporators 86−40774

IC fabrication, thin film processing 86−58551
III-V semiconductors, plasma-assisted epitaxial growth. on GaSb, GaAs, InP, S, for IR detectors 88−435
ion and plasma assisted techniques, conf., Munich, Germany (May 1985) 85−60666
ion beam techniques in thin film deposition 87−52201
ion bombardment, low-energy, during film deposition, effects on microstruct. and microchem. 87−52200
ion heating of substrate in a vacuum sputter set *(Polish)* 87−36791
ion surface interactions during vapour phase thin film growth, review 85−10805
Josephson junction oxidation process using glow discharge 86−15420
low press. and plasma-enhanced CVD for CMOS VLSI 88−13520
low pressure microwave ECR ion and plasma sources, characteristics and appls. 88−70362
low temperature deposition using electron cyclotron resonance plasma and appls. 85−61009
low-pressure RF glow discharges, transport equation soln. by staggered-mesh finite difference numerical method 88−64165
low-temperature RF plasma anodisation and deposition 87−53397
magnetically enhanced plasma deposition and etching 87−52198
materials preparation by means of electrical dischargeplasmas, review 86−34391
materials processing and synthesis, conf., Anaheim, USA (Apr. 1987) 88−49378
metal and metal silicide films, plasma-enhanced CVD 86−26911
metal-plasma source with semi-self-maintained vacuum discharge 88−31854
metallic compound deposition using electron cyclotron resonance plasma technology 86−41713
metallic thin films, plasma-enhanced CVD for metallisation appls. 87−5487
methyl methacrylate, plasma-polymerised, electron beam resist fabrication 87−58985
micro-optoelectronic materials, conf., Los Angeles, USA (Jan. 1988) 88−62854
microelectronics, dry and plasma etching, sputter and plasma deposition, colloquium, Antibes, France (June 1987) 88−11570
microelectronics, dry etching and plasma deposition, conf., Cachan, France (Nov. 1985) 86−57078
microlenses, substrate integrated, prep. by plasma CVD, for laser-fibre coupling 85−2078
microwave multipolar plasma for etching and deposition 88−33055
microwave plasma characteristics and applics. in thin film technology 86−13824
microwave plasma system for thin film deposition 86−34388
MOS gate engineering in rapid thermal/plasma multiprocessing reactor 88−7754
MOSFET fabrication in low temp. plasma-enhanced CVD epitaxial Si 86−47573
MOVPE, conf., Universal City, CA, USA (Apr. 1986) 87−9988
multipolar confinement HF triode for etching ordeposition reactor *(French)* 86−58219
optical fiber manufacturing process, microwave plasma appl. 87−74752
optical fibre fabrication and drawing standards 86−42297
optical fibre fabrication by ALPD for LANs 86−9559
optical fibre fabrication by plasma activated CVD 85−12634
optical fibre fabrication techniques 87−68067
optical fibre preform fabrication, CVD in microwave produced plasmas 88−20354
optical fibre preform fabrication by surface-plasma CVD process 88−65210
optical fibre preform fabrication using plasma technology, review 88−20353
optical fibre preform preparation, plasma-impulse-CVD process 86−36221
optical fibre preforms prepared by plasma-impulse-CVD 87−38804
optical fibre production by plasma activated CVD 88−45095
optical fibre production for high-reliability systems, plasma-activated CVD 88−58155
optical fibre production using plasma CVD 88−65204
optical fibres, fabrication of SiO_2 core by PICVD 88−20355
optical fibres for telecommunication, plasma CVD process for large scale prod. 87−38800
optical film, plasma assisted ion plating deposition and charactn. 86−15547
optical preforms and fibres, plasma CVD at high deposition rates 86−36234
optical single mode fibres production using plasma activated CVD process 85−46179
optical single mode high NA plasma CVD fibres, F doped, loss reduction 86−36233
organosilicon compounds. prep. for CVD processes *(Japanese)* 85−49602
PECVD process options and a thermally based monitoringtechnique 86−57488
phosphosilicate glass films, plasma-activated deposition 85−453
photon, beam and plasma stimulated surface chemistry, conf., Boston, MA, USA (Dec. 1986) 88−37842
photovoltaic advanced R&D, conf., Denver, CO, USA (May 1986) 87−65049
plasma enhanced CVD oxide for CMOS double level metal processing 88−7743
plasma jet welding and deposition, industrial applications *(French)* 85−5571
plasma wafer processing into submicron era 86−2056
plasma-activated CVD of telecommunication fibres 88−33677
polyacetylene films, glow discharge polymerisation and photoablation study 87−32416
polyethylene film fabrication, for improved adhesion to Au electrode 86−62261
polyethylene thin films, low temp. plasma polymerisation *(French)* 86−13819

plasma deposition continued
polymeric organosilicon cpds., plasma deposition, multilayer resist fabrication 86−483
polysiloxane plasma-polymerised passivating layer for GaAs 85−23709
PSG and BPSG, plasma enhanced CVD 85−10776
pulsed carbon-plasma source for coatings deposition 86−40776

Ge_3N_4 amorphous films, indirect-plasma enhanced CVD growth 87−52180
plasma deposition continued
GeS and GeSe, chalcogenide glasses for IR fibres, plasma deposition 87−18717
$GeSe_y$ glass films by plasma enhanced CVD, photoresist appls. 88−18730
$GeSe_y$ glass films deposition in industrial PECVD reactor *(French)* 88−12077
a-GeSi:H, deposition kinetics and structural control 87−23737
HgCdTe n^+p diodes, SiN_x passivation, plasma CVD deposition 88−57347
(In,Ga)(As,Sb) epitaxial layers, low temp. plasma assisted epitaxy growth *(Japanese)* 88−6473
InGaAs-Si_3N_4, multipolar plasma passivation, in-situ control by ellipsometry 88−13118
InP (100) surfaces, structural damage during plasma-employing deposition processes 85−55464
InP passivation by multipolar plasma in ultra-vacuum surroundings *(French)* 88−50739
InP, plasma stimulated MOCVD growth 88−38187
InP self-aligned inversion-mode MISFET, fabrication 88−13387
InP:Si, substrate, encapsulated annealing, using SiN encapsulant 87−17980
InP-InGaAs-InP buried-channel IGFETs, MOCVD growth 88−13389
InP-SiO_2 MIS structs. using plasma-enhanced CVD *(Chinese)* 88−7389
InP_xO_y gate insulators on InP, plasma-enhanced CVD 86−34359
$In_{2-x}Sn_xO_{3-y}$/InP solar cell, DC magnetron fabrication, elec. characts. 88−69690
Mo silicide film, plasma-enhanced CVD, struct. and elec. props. 86−7845
NiCr resistive films, high stability, production, plasmatron sputtering 85−16987
PZT ceramic, metallisation by Ni-Cu alloy vacuum plasma-arc deposition 85−449
Si, CVD in low press. discharge, overview 85−441
a-Si alloy solar cells, roll-to-roll mass prod. process 86−7019
Si, amorphous alloy tandem solar cells, roll-to-roll plasma deposition machine 85−21819
Si amorphous film, plasma CVD, using fluorosilanes *(Japanese)* 88−12045
Si, amorphous films, deposition from $SiCl_4$ glow discharges 87−73130
Si, amorphous, hydrogenated 85−10791
a-Si, band struct., plasma deposition and appls. *(French)* 86−14872
a-Si doping modulated superlattices, light-induced excess conductivity depend. on prep. conditions 86−41575
Si epitaxial films, low temp. growth by very low press. CVD 87−10439
Si, epitaxial films, plasma CVD growth at low temps. 87−65509
Si epitaxial films, plasma enhanced CVD 85−10685
Si epitaxial films, plasma-enhanced CVD growth, elec. characts., appl. to p-n junction diodes 86−27836
Si, epitaxial films, primary ion deposition from laser-induced plasmas 86−432
Si, epitaxial growth by plasma-enhanced CVD 88−6477
Si, epitaxial growth, low temp., by plasma-enhanced CVD *(Japanese)* 87−73109
Si, epitaxial layers, plasma enhanced CVD 85−10746
Si epitaxy at 650 to 800°C using LPCVD with/without plasma enhancement 85−49546
a-Si film growth by LF glow discharge decomp. of SiH_4, effect of electrode DC bias *(Japanese)* 86−26874
Si film growth from SiH_4 in CVD and plasma-enhanced CVD systems 85−440
a-Si, film growth mechanisms, diode and triode glow discharge systems 88−56308
Si film plasma enhanced chemical vapour deposition 85−443
Si films, amorphous and polycryst., plasma deposition, review 86−34391
Si films, laser plasma CVD growth *(Chinese)* 87−58957
Si films, laser/plasma CVD, dendrite growth model 88−38259
a-Si films, plasma CVD from Si_2F_6, structural and optical props. 86−34376
a-Si films, plasma CVD prep. from fluorosilanes *(Japanese)* 88−12062
a-Si films, plasma deposited, H impurities removal 85−39815
a-Si films, plasma deposition in mag. field, solar cell fabrication 88−31852
Si films, plasma initiated laser deposition, morphology, Raman spectra, TEM obs. 85−49579
Si films, plasma-enhanced chemical vapour deposition model anal. 87−16671
a-Si, glow discharge deposition, device appls. 86−46380
a-Si, glow discharge deposition from SiH_4 *(Japanese)* 85−33485
a-Si, glow discharge prep., electronics appls. 85−61702
a-Si, large are uniform thin films, production by scanning plasma method *(Japanese)* 87−5461
Si microcrystalline film prep. by plasma chem. techniques, elec. and optical props. 86−503
Si, microcrystalline films, plasma deposition 87−73129
Si, microcrystalline, glow discharge deposition, electronic props. 86−47289
a-Si monolithically interconnected photovoltaic panels, single chamber glow discharge manufacturing process 87−9788
a-Si p-i-n solar cell stability, deposition rate effects 87−78910
a-Si photovoltaic cell prod. using separated chamber deposition system 86−40146
Si, plasma CVD growth, effect of substrate temp. *(Chinese)* 87−36787
a-Si plasma CVD process using magnetised SiH_4 plasma, spectroscopic studies *(Japanese)* 88−12065
Si plasma anodisation, ionic transport mechanisms study 88−56291
Si, plasma deposition from $SiCl_4$ in cold RF plasma, doping gases effects 85−22544
a-Si, preparation, applications and prospects *(Korean)* 85−40460
aSi solar cell manufacture, plasma deposition process control by expert system 88−24157
a-Si solar cell prod. in consecutive decomp. and deposition chamber, role of $In_{2-x}Sn_xO_{3-y}$ layer 86−40144
α-Si solar cells, DC magnetron glow discharge prep. and elec. characts. 85−60418
a-Si solar cells, high conversion efficiency, formed from disilane deposition 88−37468
Si solar cells, polycrystalline, efficiency improvement using plasma treatments 87−9808
a-Si superlattices, doping modulated, plasma deposition from SiH_4-Ar and light-induced excess cond. 85−61720
a-Si technology, review of developments 87−17735
a-Si thin film, deposition from microwave plasma 87−65556
Si thin films, glow discharge deposited from S:Cl_4; XPS and conductivity 85−22538
a-Si_{1-x} C_x:H films prepared by plasma CVD method, props. *(Japanese)* 87−6388

plasma deposition continued
Si_3N_4 insulating thin film deposition, remote plasma enhanced low temp. CVD process 87−5481
Si:B(P) amorphous films, bias effects on preparation in triode glow discharge 87−65558
a-Si:C,N,H films, plasma deposition, plasma mass spectra studies 88−6521
a-Si:C,N,H films, plasma-activated CVD growth and struct. 88−6520
a-Si:F,H films, glow discharge deposition, B doping efficiency 87−6532
a-Si:F,H films, low press. microwave plasma deposition 86−34377
a-Si:F,H thin films, glow discharge deposited, optoelectronic and structural props. 88−57326

magnetoplasma slab within parallel-plate waveguide, wave propag. study 86−42883
magnetospheric ducts, whistler wave propag. 87−75455
metallic waveguides inhomogeneously filled with dielec. materials with surface plasma layers, characts. 87−61426
microwave plasma generator, energisation by leaky wave struct. 88−58872
microwave propagation through an apertured coaxial waveguide 88−27590
microwave pulse compression 86−64042
millimetre-wave radiation generated by counter-streaming beams 88−25368
MM slow surface waves, maximum entropy anal. 86−35058
MM wave solid-plasma waveguides, slow-surface-wave propag. with applied current 86−1340
MM-wave phase shifter, buried layer waveguide type with optical control, config. and anal. 87−66533
nonstationary stimulated Brillouin backscatt., optical and plasma fibres, inertial response study 88−2001
one boundary-corrugated parallel-plate waveguide filled with isotropic warm drifting plasma, characts. 88−70953
periodic plasma waveguide accelerator 86−31833
periodically plasma-induced semicond. waveguide, MM-wave radiation characts. 86−54328
plane plasma waveguide with random density inhomogeneities, parametric interaction of waves 87−33483
plasma and dielectric Cherenkov masers, particle simulations 88−45331
plasma cylinder, loop antenna EM field radiation 85−2647
plasma strip-line, envelope solitons 85−51452
plasma-controlled semicond. waveguide, time-varying MM-wave vectors meas. using dynamic bridge method 87−21218
rectangular, EM radiation by modulated electron beam 86−29519
rectangular cavity, plasma filled, resonance property study using plasma simulation techniques 88−19337
rectangular plasma waveguide, excitation 88−50292
rectangular plasma waveguides, excitation study *(Japanese)* 87−33488
rectangular waveguide and cavity filled with strip-simulated plasma, propag. and resonant characts. 86−64010
rectangular waveguide filled with a warm isotropic lossydrifting electron plasma 86−20781
relativistic backward-wave oscillator sensitivity to Budker's param. 86−21055
relativistic high-current plasma microwave electronics 88−64180
resonant loop antenna for ICRH plasma heating, design, 2-D anal. 88−21014
ridged waveguide, T-shaped, input impedance characts. 86−68818
semiconductor waveguides with strip-shaped plasma, anal. and appls. *(Japanese)* 88−40646
solid-plasma circular guide, millimetre nonreciprocal component 88−7020
solid-plasma circular waveguide, wave propag. 87−75544
solid-plasma nonperiodic circular backward wave struct., propag. characts. 88−34386
surface EM waves 88−52273
surface wave from plasma filled waveguide, energy extraction 86−3627
surface waves in plasmas and solids, conference, Ohrid, Yugoslavia (Sept. 1985) 88−50297
TMX-U ECRH circular waveguide system development 87−11016
tokamaks, ICRF heating, dielectric-filled rectangular waveguide launcher study 88−19311
transversally magnetised plasma waveguide, EM wave interaction 87−73597
two-component warm plasma, e-m, electroacoustic fields, circular path microstrip antenna 86−10109
unipole multipactoring discharge in the LHRF launcher 87−19154
Vlasov-Poisson equations in planar magnetron, 2nd-order stability anal. 88−32719
warm lossy transversely drifting plasma with strong transverse mag. field, guided waves study 86−3537
waveguide step connection, plasma effect on admittance 86−20782
CO_2 laser RF discharges, plasma chemistry 85−12815
n-InSb filled rectangular waveguides, EM waves, stimulated Brillouin scattering 88−14277

plasma focus
charged particle streams, time course meas. in PF-150 plasma focus 88−16602
coaxial rail gun tests in high vacuum 87−26718
conf., Saskatoon, Canada, May 1986 87−16277
conference, St. Louis, MO, USA (May 1984) 85−22703
deuteron beam, high energy, generated by plasma focus device 85−52957
drivers, efficiency parameters for reactor conditions 87−43488
fast ion generators, models 85−26675
heavy ion source using plasma focus for controlled thermonuclear fusion 86−11832
helical magnetic flux compression generators for plasma focus 88−49059
hypocycloidal pinch device development for dye laser pumping *(Korean)* 87−33251
inductive energy storage plasma focus device, num. simulation 87−43263
inductive-capacitive energy storage supply 87−43487
magnetic flux compression generator powered plasma focus device expts. 87−43264
magnetic flux-compression generators for energy supply of plasma focus loads 87−43262
medium for high-energy particle acceleration *(French)* 87−77486
microwave emission from the dense plasma focus 85−22704
neutron emission localisation 85−31682

plasma focus continued
neutron yield of plasma focus device, nonlin. damping resistors influence 87−41892
opening switch, preliminary studies 85−5310
radiation source for X-ray lithography 86−25160
relativistic electron beam mag. focusing in planar diode 86−1633
switching problems, inductive storage plasma focus device, num. calc. 87−43486
time-resolved Thomson spectrometer study of plasma focus produced ions 87−21505
voltage amplification in dense plasma focus, appl. to car spark plugs 87−43585
X-ray calibration of CCD sensors and photodiode array cameras, plasma diagnostics appl. 87−14189
X-ray source for lithography 88−39305
H_2-rare plasma focus, soft X-ray generation for X-ray lithography appl. 86−41630
N_2 laser, four-channel TEA, for interferometric meas. on plasma focus 87−26282

plasma generation *see plasma production*

plasma guns
AC plasma gun power supply using short-term-duty turbogenerator, operation anal. *(Russian)* 88−48856
bore erosion due to plasma armatures in EM launchers 88−40516
coal ignition using electric-arc plasma guns in power stations 85−4917
DC electric arc plasma guns, controlled power sources 86−45516
electron beam controlled discharges, charactn. and switching performance 87−17435
electron beam triode for multiple microsecond pulse operation 85−1221
electron diode, mag. insulation disruption dynamics 86−41472
EM gun armature, current distribution determ. by least square fitting of BDOT coil voltage 88−40517
EM railguns, explosive-mag. generator study 87−54504
erosion opening switch, application to inductive energy storage and neutron burst production 88−24971
hypervelocity railguns, plasma armature growth and drag. importance of high injection velocity 88−40518
macroparticle acceleration from a modified Mather-type plasma gun 88−27463
magnetically insulated transmission line, rod anode, low inductance, operating specifications 85−1228
microwave plasma guns, measurement of electromagnetic field distribution 85−43086
power system using rectifiers with transformer 88−54846
pulse accelerator expts. 87−26707
pulsed electron beam generation by cold cathode plasma guns, appl. to laser excitation 87−17591
railgun bore material test results 88−40513
railgun bores, EMEMT concept, use to overcome ablation of rail 88−40512
railgun plasma acceleration of metal plate 87−26671
railgun plasma armature characteristics 87−26712
railgun plasma armatures, partition functions 88−40515
railguns, hypervelocity, armature options 88−40514
reconnection gun, computational modeling, diffusion-convection problem 88−40519

plasma heating

2732 programming using 2716 PROM programming module 85−11256
asynchronous state machine challenge digital engineers, designers guide 88−50090
automatic partitioning of programmable logic devices 88−692
automatic test generators for PLDs clean up your logic designs 87−72787
BCC180 multitasking computer/controller 88−25222
bipolar PROMs, adaptor for programming *(German)* 85−23930
CAMAC-compatible programmer for memories, logic arrays, and logic controllers 88−25079
CMOS EEPROM, 64K, dual control gate cells, 50 ns access time, 200 μs programming 86−41129
CMOS EPROM, 1 Mb device with page mode programming 86−8256
CMOS Logic Cell Arrays: a better ASIC approach 87−59435
CMOS mask ROM, 2 Mb, 70 ns, programmed memory cell 87−17069
CMOS programmable electrically erasable logic offers a versatile yet practical alternative to conventional PLDs 87−59434
CMOS programmable logic modules using EEPROM cells, Lattice Semiconductor device GAL 16V8 *(German)* 86−20428
coding verification for programs in PROM and PLD components *(Italian)* 86−67217
cost reduction on total system using CMOS programmable logic 87−6921
data integrity using in-circuit programming 87−66182
DENI Microsystems SP85 EPROM programmer, low-cost design *(Italian)* 87−73444
device programmers, product report 85−54863
device support selection 86−1023
digital design curriculum, PLDs, new laboratory technology introduction 88−18355
digitally adjustable supply for an EPROM programmer *(German)* 85−33628
EEPROM programmable logic chip for design in one day 86−47803
EEPROMs technological aspects, programming and erase techniques 86−1074
electronic equipment programmable checking device, using BASIC language *(Hungarian)* 86−19826
EP1800, revolutionary architectures lend increased capability within high density EPLDs in CMOS 87−59436
EPLD architectures of the future *(Spanish)* 88−6851
EPLD logic reprogramming *(Italian)* 88−56584
EPROM burner, self made EPROM programming system *(German)* 87−24177
EPROM cell struct. for erasable programmable logic devices compatible with single poly gate process 87−24128
EPROM developments in capacity and power 85−11234
EPROM fabrication and charact., NMOS process 85−22897
EPROM intelligent programming method *(German)* 88−6847
EPROM memories, MOS devices, architecture, operation and programming *(Spanish)* 86−27305
EPROM practical considerations for programming *(Spanish)* 88−56609
EPROM programmer, design 87−10883
EPROM programmer, design and construction *(Spanish)* 86−52842
EPROM programmer, microcomputer interface for recording and reading *(Spanish)* 85−49868
EPROM programmer, software techniques 85−22858
EPROM programmer and Handi-type typewriter, FORTH-based designs 86−57841
EPROM programmer based on Z8 85−28513
EPROM programmer for SC84 microcomputer 85−11242
EPROM programmer for student hardware research lab. 87−31166
EPROM programmer for student hardware research lab. 87−31166
EPROM programmer from ZX81 *(German)* 85−49858
EPROM programming 85−40075

PLD programming continued
EPROM programming, menu system, hardware design *(German)* 85−17416
EPROM programming algorithms 87−5863
EPROM programming algorithms 87−5863
EPROM programming at longer word lengths 87−37269
EPROM programming device *(German)* 88−70761
EPROM programming instrument for C64 *(German)* 85−54885
EPROM programming of CPUs, bootstrap firmware 86−34752
EPROM programming set for 21 V, 28-pin EPROMs 86−27281
EPROM programming unit for the Atari ST *(German)* 87−746
EPROM programming units and systems *(German)* 85−11238
EPROM programming using Intel intelligent algorithm *(German)* 87−52574
EPROM U2732 programming device *(German)* 88−6848
EPROMs, 15 years of programmable Si *(German)* 86−14186
EPROMs, 512k bit, interface circuitry and programming algorithms 86−1025
EPROMs, Intel 27512/27513 512K devices incorporating firmware, programming aspects *(Italian)* 86−34758
EPROMs, partial reprogramming 85−28515
EPROMs, processor embedded, array programming 86−1048
EPROMs−erasure and re-programming 87−5862
erasable programmable logic devices, A+Plus software package 85−28446
erasable programmable logic devices, EPLDs, and development system *(German)* 86−34679
erasable PROM programmers for large memories up to 512K *(Italian)* 87−44825
erasable/programmable solid-state memories 86−20515
evaluating device programmers−by yield 88−44167
fast MPUs direct EPLD development 88−32229
feature-packed universal programmers deliver good value 88−63003
field programmable devices and their programmers 85−11232
field programmable gate arrays, use of PROM technology 86−27250
FIFO DRAM buffer, programmable logic cell array controller 88−50135
focused-ion-beam fuse cutting for redundancy technology 88−64661
GALs, Basic EMUF programs for programming *(German)* 88−32144
gate array design productivity: an empirical investigation 88−70692
general-purpose high speed EPROM programmer *(Chinese)* 85−40072
hardware aid for programming and testing of programmable memories *(Croatian)* 85−40067
high speed PROM programming routines and modern PROMprogramming equipment requirements *(German)* 86−20524
in-circuit programming techniques *(Italian)* 86−62590
in-circuit PROM programmer to speed up operation and reduce costs *(French)* 87−52571
integrated fuse logic, standard ccts. for user-specific programming *(German)* 86−20429
ispGAL 16Z8 E^2CMOS logic array, reprogrammable in-circuit 86−67149
JMC Promac Model 2A MOS device programmer programs megabit EPROMs in seconds *(German)* 88−44163
keyboard encoder 85−40201
large state-machines implementation using PLDs, partitioning 87−73389
logic cell arrays, developments *(Dutch)* 88−6734
logic design, programmable hardware 87−24032
logic device and PROM test tools 86−9194
LSI programmable logic elements, state of the art and application possibilities *(Slovenian)* 88−19037
manual EPROM programmer for 2508/2516 and 2716 EPROMs, cct. 85−54889
microcoding and bit-slice techniques, PROMs 88−25179
minimal EPROM programmer 87−59446
MMI M2064 CMOS field programmable gate array 87−66124
MOSFET programmable cell utilising insulator breakdown 86−46851
nonvolatile memories, control logic, bulk operation 88−32213
NP003 microcomputer-based programmer appl. *(Slovak)* 86−1057
optimisation tools 87−59439
PAL programmer board for IBM PC 87−24036
PALs Boolean minimisation using graph colouring on personal computers 87−59441
PALs in logic design 87−24034
PC-hosted design system for PLDs gives engineers more freedom 88−32097
personal computer based device programmers, product survey 86−8206
PLD-design software meets the challenge of multiple-device PLD applications 88−32091
PLDs and gate arrays CAD, Semicustom Development System lets engineers use functional design descriptions 87−59438
production speed and cost 85−45041
programmer for the μPD77P20 signal processors *(Czech)* 88−44213
programmers, review *(Italian)* 86−14126
PROM, field programmable devices and their programmers 85−11232
PROM, hardware aid for programming and testing of programmable memories *(Croatian)* 85−40067
PROM programmer, mass storage memories demand 86−27301
PROM programmers, device support 86−1023
PROM programmers, workstation host 86−8201
PROM programming tools *(Swedish)* 86−8217
PROM programming trends, universality and use of PC *(French)* 86−46791
PROM semiconductors programming and current state, 85−772
PROM/PLD programmers, advantages of universal types 86−52756
ROM programs correction *(German)* 86−1036
Salsa logic minimizer tuning 88−63638
semi-standard components choice in programmable logic circuits *(French)* 87−10778
serial-port EPROM programmer, BASIC listing 85−22846
software packages for programmable logic design 85−11206
stand-alone EPROM programmer 87−66161
static RAM cell programming with hot electrons for personalising chips 87−5876
testing of programmed PLDs 88−44114
testing PLDs and PROMs 86−20472
Texas Instruments programmable sequence generator increases density and ease of design 87−59437
tools for programming PLDs 87−52508
tools for PROMs *(Swedish)* 86−8217
Toshiba memory-cell config. for UV-erasable programmable logic 87−31892
trends, universality and use of PC *(French)* 86−46791
trends and products 86−8218

lightning backflashover rates of HV lines, line parameter sensitivity 86−6417
lightning channel propagation with modelling in HV transmission lines and towers 86−56467
lightning strikes to radio transmitter towers, upward streamer production 88−9710
lightning surge response of transmission towers and lines 86−6418
lightning-CN tower interaction, numerical anal. 86−15921
linear and nonlinear finite elements in structural design *(Hungarian)* 88−36872
live line insulator washing system develop. 87−57674
low-loss pole-mounted transformer *(Japanese)* 86−61565
mast antennas, wind loading effects 88−40668
mast antennas subject to non-stationary random excitation 86−64096
mast foundations for 132 kV transmission lines, special design for BKW *(German)* 86−25616
masts for tactical and mobile antennas 87−2383
masts for tactical antennas 87−27093
materials and methods to improve reliability and maintenance in wood-pole replacement 87−35676
MF broadband omnidirectional and directive antenna erection on high-rise tower *(German)* 88−66172
MF tower broadcast antenna stays, insulator design 88−34512
microcomputer program for determining sag and tension 85−48601
microwave, telecommunications tower, construction and antenna-mounting features *(German)* 85−13369
microwave antenna support structures, deflection criteria 85−41810
microwave communication towers, ice and snow-pack effects 86−4099
microwave communication towers, Xe discharge lamp marking 87−48910
microwave tower construction 88−59992
microwave tower structural safety in icy environment 86−17231
Morinomiya Electric Car Depot, distrib. tower power fuse holding insulator failure *(Japanese)* 87−51388
multiband transmissions/receptions combined onto single tower cable 88−15774
multipole transmission structure analysis program HFRAME-84 user's manual 86−18863
MV network earthing plants dimensioning and building for towers and transformer substations *(French)* 87−50865
MW aerial masts, metallic corrosion prevention 87−8386
MW antennas on towers, directive patterns *(German)* 86−42995
NDT eval., speed of sound meas. and spectral anal. of sonic waves 87−57681
Netherlands 380 kV overhead line design optimisation and conductor choice *(Dutch)* 86−12464
Norwegian transmission line construction, climatic and topographical difficulties 88−69037
overhead distribution line or pole mounted fault indicator 86−32870
overhead line breaking device with electrical and remote control 86−56916
overhead line conductor mechanical characts., compensation for thermal expansion *(Russian)* 85−59762
overhead line design and planning computer program system 85−64926
overhead line protection by pole-mounted autoreclosers and sectionalisers 86−56451
overhead line structure analysis and design, program users' manuals 86−61172
overhead line towers, anchor-tube type foundations 85−59796
overhead line towers, ladder network earth resistance calc. without shield wire disconnection *(Russian)* 86−44995
overhead power line mechanical characts. computing, nonlinear equations solution using Newton method *(Slovak)* 88−30396
overhead power line pylon foundation measurements, probability bases *(German)* 87−21960
overhead power line route planning and tower design using computers 88−68999
overhead power lines, concrete mast repair procedure using wet processes *(German)* 88−61948
overhead power lines, support footing resistance and soil resistivity meas. 88−55045
overhead power lines and towers, medium voltage, effects of snow 85−59774
overhead power supplies, failure due to electrocution of birds, engineering solutions 85−15656
overhead power transmission line construction, maintenance and reliability *(German)* 88−68968

poles and towers continued
overhead transmission line supports using SV-3 stanchions, testing *(Russian)* 86−32799
overhead transmission lines, fault voltage effects of earthing neutral conductor to mast *(German)* 85−4670
pole-mounted transformed characteristics, urban appls. *(Japanese)* 86−61567
pole-top power-factor-improvement equipment evaluation 85−64928
Polysil transmission line pole and substation bus support design and construction 86−12481
post-mounted transformer substation development and testing *(Croatian)* 88−11338
power apparatus cubicles, stain meas. and stain resistant structures to reduce flashover *(Japanese)* 87−4646
power distribution system design, probabilistic techniques appl. 88−10898
power installation earthing regulations, Switzerland *(German)* 88−5385
power line supports earthing equipment, computer aided calcs. systematisation *(Russian)* 86−32844
power overhead line construction, CAD and foundation example *(German)* 86−12475
power overhead line design and pole detuning to avoid RFI 86−15910
power overhead line insulation gap rationale, stresses caused by reduced line size 86−51053
power overhead line pylons, optimum spacing basic calc. procedures *(Russian)* 87−42489
power overhead line towers, load transfer of main leg tensile forces tofoundations [overhead line towers] 86−51077
power overhead lines, 230 kV double-circuit wood pole structures, two and three pole designs *(Czech)* 86−25627
power overhead lines, CAD of towers and conductor spans using MAST package *(German)* 88−68974
power overhead lines, computer aided analysis of repair work for wooden supports *(Russian)* 86−25618
power overhead lines, computer aided optimisation *(German)* 86−25605
power overhead lines construction, tools, methods and protective measures in use in Switzerland *(German)* 85−43634
power overhead lines on wooden support, lightning protection, improved reliability *(Russian)* 88−10910
power overhead lines profiles design, by interactive computer-based graphics system *(Finnish)* 85−21217
power overhead transmission line vertical clearance upgrading for 100 degrees centigrade operation 86−25615
power overhead transmission structure of weathering-steel, rehabilitation and corrosion protection 86−61169
power supply lines of Zamosc district, Poland, failure evaluation *(Polish)* 85−48562
power transmission line capacity, reliability based design 87−21955
power transmission line system design microcomputer-based nonlinear structural anal. 86−18819
power transmission lines, earthing of poles and balancing capacitors *(Spanish)* 87−71744
power transmission tower foundation, grounding resistance estimation 88−36867
power transmission towers, lightning outage prediction using tower travel time 86−12479
prestressed concrete poles for transmission lives, innovations and cost anal. 86−65746
pylon stresses induced by foundation dislocations *(Hungarian)* 86−6392
pylons, concrete portal design used in conversion of power transmission to 380 kV *(German)* 85−9521
pylons, overhead lines and insulators, short-term dynamic stress calculations *(German)* 85−9514
railway electrification of Ansbach-Crailsheim-Goldshofe line *(German)* 86−26360
reinforced concrete supports for 750 kV overhead power line network in USSR *(Russian)* 86−32793
remote surge analyser for ZnO arrester performance monitoring 86−65780
resonance suppression, power lines detuning by isolating towers 87−19322
RF current flow in power line, comparison of computed results with full scale measurement 85−14084
self-supported delta type towers, theft proof fasteners, ground wire segmentation, path clearing 87−15340
self-supporting tower for microwave antenna 86−68943
skeletal and complete support structs. effect on horizontal radiation patterns of antennas 86−68842
solar power tower heliostat control using computerised communication and DC drive operations 88−23802
southern pine transmission pole strength, nondestructive assessment 86−12482
stacked antennas, four, on self rotating tower 87−2354
stayed lattice steel mast, 180 m high with 41 m cantilever, oscillatory behaviour study *(German)* 85−36093
steel pole transmission line, longitudinal dynamic loading, structure flexibility 87−50843
steel support structures for power lines and outdoor substations, CAD *(Polish)* 86−18853
steel tower, seismic performance *(Japanese)* 85−43632
steel tubular transmission line poles, buckling studies 88−36874
stork nests removal from power transmission poles and towers *(Slovak)* 87−71715
support tower insulation of 10 kV overhead lines, number of trips calc. *(Russian)* 87−42516
surge impedance meas. 88−42883
T-2 motion resistance conductors and lattice arms on tangent poles of overhead line 87−15321
telecommunication towers can match an urban setting 86−4098
telephone poles designed for social needs 87−28253
telephone poles in the BT network, wood poles 86−16775
telephone poles of alternative materials in British Telecom network 86−34104
telescopic mast for amateur radio, construction details 85−41707
Telex/Hy-Gain 'Tailtwister' HF beam antenna rotator 87−68900
test facilities at CPRI for testing transmission line tower prototypes 85−32203
TLWorkstation software package, EXECUTIVE, MULTI-FLASH and TLOP programs 87−15242
TLWorkstation software package incorporating CUFAD code for transmission structure foundation anal. and design 88−36873
tower and foundation testing for Quebec-New England HVDC line 86−18861
tower insulation requirements for 345 kV transmission lines at altitudes of 1250 to 3680 metres 85−27091
transformer load telemetry and overload detection *(Japanese)* 86−51163
transmission and distrib. systems conf. London, England (Feb. 1987) 87−43784
transmission line effects on AM radio broadcast antenna radiation patterns 86−48690
transmission line grounding systems under fault conditions, anal. 88−55055
transmission line lightning protection using shield wires, technical/economic anal. 86−51150
transmission line pole earthing resistance rel. to concrete foundation conditions *(Croatian)* 87−15331
transmission line pole foundation stone calcs. *(Croatian)* 88−61958
transmission line rebuilding and uprating by reconductoring and lattice structure refurbishment 88−5372
transmission line structural develop. studies 87−15322
transmission line structures, reliability based design 87−57680
transmission line supports and guy ropes, electric strength of air clearances *(Russian)* 86−32795
transmission line tower, effective inductance, mathematical model 87−57678
transmission line tower, surge impedance calc. by EM field theory 86−61159
transmission line tower safety, corrosion protected steel appl. *(German)* 88−69016
transmission line towers, chainette structure development at American Electric power 86−12477
transmission line towers, reverse erection technique 88−69034
transmission line towers vee cross arms design, by approximate method using computer program 85−38539
transmission poles, direct embedded setting depths reduction research program 86−61171
transmission structure step and touch potentials, engineering evaluation 86−51069
transmission structure touch and step potentials, methodology for anal. 86−51068
transmission tower foundations, uplift resistance calc. models 88−69041
TV antenna guyed masts, prior displacement meas. *(German)* 86−5530
UHF communication and TV antennas mounted on same tower, compatibility 86−16025
UHF transmitting facilities design 85−3625
UHV electric power transmission R&D, technical, economic and environmental aspects 86−6305
UHV transmission lines without ground return wires, lightning performance 87−64181
vibration-control system using an active-mass damper *(Japanese)* 85−4662
Virginia Power overhead line towers multi-helix screw anchors 88−75211
weathering steel H-frames for 230 kV overhead line 87−15337
weathering-steel H-frames direct embedded for 345 kV overhead line 86−61170
western red cedarwood pole strength and stiffness test results 87−21963
wind induced vibration damage detection using radiography 87−50831
wind load probabilities for overhead power lines, IEC/TC 11 recommendations *(German)* 86−12456
wind tower augmentation of wind turbines 85−27359
wind turbine performance and fatigue life rel. to atmospheric turbulence and wind speed 86−12760
wood H-frame transmission line design on a personal computer: using mainframe programs on a PC 88−61951
wood pole distrib. line refurbishment programme in north Scotland 87−50789
wood pole fungal decay repair system 86−61163
wood pole management, use of nondestructive eval. 88−42884
wood pole preservatives, influence on fire and electrical safety, comparative study 85−15647
wood pole resources management, computing and mathematical anal. appl. 88−23547
wood pole strength restoration by fungicidal epoxy aggregate filled sleeve 86−18859
wood pole structural assessment using hand held computers and PC 86−45007
wood poles for overhead conductor support, nondestructive testing technique 87−50846
wood poles for overhead lines, refurbishment in UK 85−59794
wood technology and preservatives enhancing telephone pole line reliability 86−17173
wood telephone pole as engineering structure in British Telecom network 86−34103
wood-pole transmission line grounding 88−23536
wood-pole-management program using nondestructive-eval. techniques 88−5373
wooden pole tester for decayed poles strength determ. 85−21040
wooden poles for overhead distribution lines 87−30234
wooden power line poles strength testing, repairs and preserving 88−10893
wooden supports, protection against splitting by lightning *(Russian)* 86−61160
Na vapour lamps, mast lighting systems for floodlighting appls. 88−31174

poles and zeros
2-D digital filter separate approx. of phase/magnitude response by denominator/numerator *(Japanese)* 88−19279
2-D stability testing, continued fraction expansion of 1-D complex reactance functions 87−59776
2D causal recursive filter design using separation-of-spectra algorithm 86−29954
2nd-order digital filters, computationally efficient low roundoff noise 88−63811
3-pole network selection for amps. with programmed transfer ratio 87−44639
4-pole networks, noise characts. *(German)* 87−31624
AC/DC 3 area system, optimal modulation controllers, design using eigenvalues sensitivities 87−77978
acoustic echo canceller, pole-controlled, config. using parallel connected IIR adaptive digital filters *(Japanese)* 88−45726
active R filters, second order, frequency-quality product 86−20689
active RC filters with nonideal amplifiers, parasitic poles parameters, approx. calc. 87−868
active-R all-pass circuit compensating influence of 2nd order pole of op. amp. *(Japanese)* 87−37458

poles and zeros continued
adaptive digital filter using a system of orthogonal functions *(Japanese)* 87−66392
adaptive digital notch filters with constrained poles and zeros 87−37463
adaptive echo canceller filter 87−68804
adaptive filters, recursive or IIR, sequential regression algorithms 85−2795
adaptive notch filter, minimal parameter, with constrained poles and zeros, performance anal. 87−27523
adaptive notch filter, minimal parameter, with constrained poles and zeros 86−8381
adaptive notch filter with constrained poles and zeros 86−14403
adaptive notch with constrained poles and zeros, performance anal. 88−59143
adaptive pole-zero predictor for ARMA processes 86−64288
ADPCM speech coding, all-pole, all-zero and pole-zero predictors expt. comparison 86−43199
algorithm for pole-zero modeling and spectralanalysis 86−64260
all-digital PLL design 88−70608
all-pole and all-zero 2D systems, minimal state-space realisations 87−45077
all-pole biquadratic filter realization with the minimum ripple due to parameter variations 85−6425
all-pole low-pass filters for pulse appls., steady-state and transient response characts. 87−24304
all-zero representation of pulse functions in freq. domain, filters appl. 85−17621
analog computer simulation with automatic scaling bydigital computer 86−57539
analogue filter network identification from steady-state meas. 85−17610
analogue RC filter circuit *(German)* 85−55029
arbitrary digital transfer functions synthesis using allpass-based structures 87−10978
ARMA fast pole-zero least squares algorithm, geometric projections appl. 87−27449
ARMA modelling by cascading a linear-predictor anda pole-zero structure 86−3920
ARMA processes, adaptive prediction two-stage approach 86−16445
ARMA processes, approximate maximum likelihood estimator based on power cepstrum 88−73059
ARMA processes, pole identification by extended Levinson recursion 86−48918
ARMA spectral approx. methods, freq. weighting functions *(Japanese)* 85−7886
ARMA transversal RLS filter, fast algorithm 88−34657
artificial pancreas design based on pole-assignment self-tuning algorithm for blood glucose regulation 86−18378
band-pass Butterworth filter, 20-120 Hz, design and applic. to seismic data 85−49967
bandpass adaptive pole-zero filtering 87−27452
bank-to-turn missile, digital controller for CLOS guidance 88−36701
bank-to-turn missile, digital controllers for CLOS guidance 88−42719
Bessel digital filters which are all-pole in the z^{-1} domain 85−11427
bilinearly transformed all-pole analog filters, switch capacitor synthesis *(German)* 87−66360
Bruijn Newman constant, lower bounds 88−56199
Butterworth & Thomson poles, interpolation *(Slovenian)* 88−500
Chebyshev band-pass prototype filters, generalised 86−34945
classical filter, design methods 86−62674
closest stable polynomial to unstable one, minimisation problem 88−70195
CMOS combinational logic gates, timing model and error anal. 86−20445
CMOS logic gates, timing model for charact. waveform 86−970
CMOS operational amplifiers, two-stage, compensation technique 87−65871
completeness of zero curve tracing for analytic functions 87−65390
condition numbers and distance to nearest ill-posed problem 87−65378
control system design *(Japanese)* 85−22577
controller for unregulated synchronous machines, design using decoupling techniques 86−12787
convergence order of accelerated root iterations 85−325
coupled-circuit filters design using microcomputer 87−66314
coupled-inductor Cuk converter, small signal model 87−17293
crystal filter design and-realisation with asymmetric transmission zeros 86−1207
current source inverter fed induction motor drives, multivariable control strategies 86−40211
DC stepping motors, comparison of linearised and nonlinear control 86−51653
DC/DC tapped-inductor convertors, static and dynamic modelling *(Chinese)* 87−73304
deadbeat control: a special inverse eigenvalue problem 85−22426
decentralised pole placement 86−56381
digital, linear prediction filters *(French)* 87−13037
digital bandpass, rejector and high-pass filters design 87−45094
digital bandpass comb filter implementation for discrete sine transform 87−52745
digital filter coefficient computation algorithm 85−28652
digital filter simulation on IBM PC 86−57988
digital filters, direct form sensitivity reduction by order increase 87−59765
digital filters, error analysis and reduction methods 88−56800
digital filters, error spectrum shaping structs., optimal and suboptimal 86−57999
digital filters, magnitude and phase, simultaneous approx. using decomposition of max./min. phase components *(Japanese)* 88−38633
digital filters, maximally flat passband and equiripple stopband magnitude 85−55043
digital filters, recursive, synthesis by state feedback of nonrecursive cascaded filters 86−47004
digital filters, root locations of 2-D polynomials 86−52956
digital filters, stopband sensitivity rel. to movement of transmission zeros with coeff. quantisation 87−59736
digital Nyquist filter design based on meas. of squared error at sampling points *(Japanese)* 86−52961
direct static converters, control strategies for numerical simulation program 86−61654
discrete signals, 1-D and 2-D, pole-zero modelling 85−25134
dominant complex pole-pair, iterative method for obtaining argument 87−52018
economical information structure for decentralised control, synthesis methods *(Chinese)* 87−54770
electrical networks, sensitivity function max., theoretical anal., digital filter appl. 85−61035
poles and zeros continued
electromechanical filters, input impedance calcs. 86−34952
elliptic digital filters, anal., optimisation and CAD *(Korean)* 88−6988
elliptic filter design 88−44277
elliptic filters, active realisation, pole-zero pairing method 86−1238
elliptic filters, dynamic range enhancement for active realisation 86−57933
elliptic filters, phase and time domain characts., anal. 87−31980
elliptic transfer functions for low-pass filters, TI-59 program 85−28619
EM problems leading to transcendent equations, zeros finding algorithm 88−40458
EM scattering, K-pulse estimation from impulse response of target 88−8437
essential frequency ranges for filter adjustment *(German)* 87−52693
even-order elliptic filter functions 87−17202
explicit nearly optimal linear rational approximation withpreassigned poles 86−66769
extended zeros and model matching 88−31916
feedback amplifiers, freq. response calcs. for loop-gain transfer function poles/zeros determ. 85−44898
filter design with wide suppression bands 87−45017
filter transfer function, shift of poles caused by inductor losses 86−14335
filters, equidistant linear phase functions with improvedselectivity and stopband attenuation 86−41194
filters, low-pass logarithmic weakly resonant type, anal. 87−66319
FIR digital filters, location of zeros using simple method *(Japanese)* 86−67377
FIR digital filters, relation between effects of coeff. quantisation and zero locations *(Japanese)* 87−24355
FIR filters, linear phase, cascade realisation with low sensitivity 86−14384
FIR multichannel lattice-ladder structures with applications to pole-zero modeling 85−17736
FIR partial response filter pairs with equiripple stopband attenuation, design 88−56808
fixed-point digital filters, residue feedback, roundoff noise minimisation and pole-zero sensitivity 87−12983
flat-group delay filters with prescribed amplitude characts., design technique 86−1205
Flett's function, zeros 85−54333
fourpole network analytic theory 87−59717
frequency response eval. of state space designed controllers for systems with lightly damped oscillatory modes 88−48505
frequency-domain adaptive pole-zero filter withapplications 87−7759
frequency-domain adaptive pole-zero filtering, implementation, system identification appls. 86−14383
generalization of Tikhonov's regularizations of zero and first order 87−31464
generalized eigenproblem: pole-zero computation 88−31935
generator unit governor loops online computer control system 88−23872
globally convergent iteration methods for determining zero of p-th order entire function *(Chinese)* 85−16882
Gray-Markel paralleled digital lattice filter *(Japanese)* 86−27488
half-plane 2-D digital systems, stability 86−35033
Hamming schemes, nonexistence of perfect e-codes and tight 2e-designs 86−66692
harmonic retrieval problem, perturbation anal. of SVD based method 86−10442
HF amplifiers, Miller effect model 86−772
higher-index semistate eqns., structural form, theory, appls. to circuit/control theory 88−31977
HP 3562A analyser, curve fitter for pole-zero analysis 88−4329
HP 3562A signal analyser for synthesizing freq. response of linear systems 88−4328
HV power systems, network reduction method for switching transients calc. *(German)* 88−48541
IIR digital filters with optimum magnitude frequency response 85−28645
IIR echo canceller, pole-controlled using adaptive digital filters, convergence characts. improvement *(Japanese)* 88−45727
IIR filters, sequential adaptation in cascade form 87−911
IIR filters with equiripple group delay, implicit soln. 85−45171
IIR noncausal filters, freq. domain design using multiple criterion optimisation 85−45177
IIR recursive digital filters realization using state feedback 85−34062
IIR-type discrete-time filters, general analogue-to-digital transformation 86−34496
ill-conditioned signals, digital inverse filtering using zeros in irrelevant freq. region. *(Japanese)* 87−7743
image reconstruction from sine wave crossings 86−30046
impulse response data in noise, max. likelihood estimation of poles 87−62016
induction motor drive, current source inverter fed, microprocessor based controller design 88−30724
induction motor drives, invertor fed, control scheme comparison 86−7215
inhomogeneous plane dielectric waveguide synthesis 88−44329
integrated four-pole filter for audioapplications *(Spanish)* 85−61371
interconnected power systems, load frequency controller design using unity rank feedback 86−6258
interval iterations for finding zero of polynomial with error bounds 88−11901
iterative methods for simultaneous approximation of polynomial zeros, computational efficiency 87−52016
K-pulse and E-pulse, radar targets 88−28927
Kalman filtering approach to short-time Fourier analysis 87−19652
lambda matrix eigenproblem, including iterations 86−7670
large signal-performance of active filters using amplifier pole 88−874
lattice filters, effective attenuation calc., influence of terminating impedance depend./independ. zeros *(German)* 87−37434
lattice filters, pole determ. 87−7729
lattice filters, poles determ. 86−20725
lattice filters, relationship between poles and zero of attenuation and phase *(German)* 87−31983
LC ladder filters, design using iterated anal. and computer program 86−20682
LC simulation active R filters, synthesis *(Japanese)* 87−5960
LCR filter synthesis for high-freq. active RC simulation *(Japanese)* 87−5941
leapfrog filter biquadratic cells, anal. 87−864
Legendre associated functions, common zeros 85−5946
limit relations for matching constant impedance networks 87−44507
linear cct. freq. charact. testing by complementary signals method *(Polish)* 87−72800

poles and zeros continued
linear circuit networks, determination of poles and zeros using function approximation 87−73247
linear circuits, time domain approximation methods appl. 86−62386
linear prediction digital filters, zeros and poles 87−47808
linear predictors stability and numerical range of linear operator 87−54780
linear systems, complexity reduction method using aggregation techniques *(Korean)* 87−31666
linear systems, pole retrieval by eigenvector methods 87−62017
linear two-port network parameters derivation from cofactors of node admittance matrix *(Chinese)* 87−65761
linear-phase digital and nonreciprocal lumped filters with stable transfer fns., analytic design 87−17248
liner prediction models for sinusoidal freq. estimation 88−59146
loaded laddernetworks, resonance phenomena anal. *(Russian)* 85−54982
low-pass generalised Chebyshev odd-degree prototype filter for suspended substrate stripline 86−34950
low-pass RC-active filter design, transitional multiple-real-pole/multiple-critical-pole transfer functions 88−50245
low-sensitivity digital filters based on zero extraction, synthesis procedure 88−25334
magamp reset circuits, small-signal feedback control loop model 88−72521
matrix pencil method and its performance 88−73088
maximally flat low pass filters with multiple-order imaginary-axis zeros 86−62666
maximum permanents of matrices of zeros and ones 88−49667
microstrip filters employing codirectional comb resonators with attenuation poles at finite frequencies, synthesis 88−63867
microstrip step discontinuities, modified residue calculus technique 85−34143
microwave multipole ladder network analysis 87−44502
missile autopilot, IEEE benchmark control problem 88−68691
model reference adaptive microalternator system for dynamic performance modelling 87−22276
multi-level IIR digital filters, two-level approx. and design considerations 86−46995
multicoupled microwave resonator filters, predistorted lossy design techniques 85−45221
multicoupled resonator filters, predistortion pole techniques 85−17630
multidimensional polynomials, discrete domain stability related props. 88−6594
multiple data sets for pole and residue extraction from measured data in frequency domain 85−35991
multiple polynomial zeros, higher-order methods for simultaneous approx. 87−5356
multiple zeros, interactive location 85−54342
multiple-real-root maximally flat filter, design technique 86−20697
multipole network, balanced flow 85−28283
multipole or n-port network, arms admittance or impedance parameters detect. 85−49677
multiport network cascade realisation via factorisation of rational matrix functions 87−405
multivariable generalized self-tuning decouplingcontroller and application 87−5094
natural resonance estimation, from scattering data 86−23038
network anal., modified nodal approach for avoiding zero pivots *(Chinese)* 86−62331
nonidentical actuator power distrib., successive pole assignment method *(German)* 88−75878
nonlinear eqns., noniterative quadrature method of num. soln. 87−10325
nonlinear programming method, target poles extraction 85−47558
nonminimum phase signals modelling 87−47797
nonuniformly-loaded ladder networks, resonances *(Russian)* 88−56736
notch filters, low- and high-pass types, active compensation using op-amp integrator loop 86−1256
optimum feedback amplifier design for control systems 87−37033
order-recursive algorithm for estimating pole-zero models 87−39746
orthogonal polynomials, asymptotic distrib. of zeros 85−54357
oscillator systems synthesis from segments of stepped lines 85−50036
Pade approximants to e^{-x}, asymptotic properties 86−66770
parallel iterative algorithms for the simultaneous determination for all zeros of a triangular polynomial 88−49744
parametric current source development using equivalent voltage source theorem 86−34961
parasitic insensitive SC large pole selectivity bandpass filter, low capacitor spread 87−52723
passive impedance two-pole, noise props. determ. *(Slovak)* 86−46956
passive two-pole synthesis, combinatorial approach 86−46955
phasor approach to digital filters 87−66385
PID power system stabilizer for synchronous generators 88−69336
pipelinable low-sensitivity digital filters based on the localization of transmission zeros 88−56809
pipelining recursive digital filters, functional techniques comparison 86−57969
planar structs., guiding, resonance and radiation modes, determ. 87−24408
PLL with complex zeros, phase-plane behavior 86−14073
pole deviations of actively compensated RC-filters 86−67342
pole extraction, pencil-of-functions method 87−55076
pole sensitivity to network component change 87−16846
pole-zero computation for networks with reduced rank components 87−65749
polynomial complex zeros, numerical stability of generalised root iterations 85−327
polynomial zeros, simultaneous determ., method for choosing initial approxs. *(Japanese)* 88−49755
polynomials orthogonal on the semicircle 86−62088
polyphase filters using all-pass sections, design method 86−46996
power electronic systems feedback control, optimal pole assignment 86−7884
power plant controllers, optimum parameters calc. *(Chinese)* 88−48772
power system control with minimum eigenvalue sensitivity to operating conditions 88−5253
power systems, adaptive control for large disturbances, simulation and experimental study 85−21115
power systems, pole-placement and model-order reduction techniques applied to a hydro-unit-system for dynamic stability improvement 88−54928
pseudo-lossless functions, appl. to polynomial zeros location 85−44832
pseudolinear voltage ratio tunable null networks 86−62387
quadrature formulas for functions with poles near theinterval of integration 86−66783

poles and zeros continued
quadrature method modification 86−20013
raised cosine filter family, pole-zero approx. 88−880
rapidly convergent algorithms for zero finding 85−33318
RC active filter, Friend's single-amplifier biquad predistortion 86−62693
RC active filter, multiple critical pole type, maximally flat with sharp cutoff, design 87−10967
RC active filter using operational amplifier pole, design *(Chinese)* 86−62678
RC active low-pass filter, multiple real/critical pole type, equiripple design 87−857
RC active network, variable response, transfer function 86−20707
RC admittance functions, three-pole, network struct. 85−530
RC filters with nonideal elements, pole sensitivity anal., quadratic approx. 86−57938
RC twin-T network biquad filter using op amp, sensitivity 86−57937
real analytic homotopies, regularity results 85−33295
real bandlimited signals, algorithm for complex zero location 88−34636
recursive algorithm for linear systemidentification 86−69060
recursive digital filter design and analysis, rapid graphical techniques 87−32022
recursive digital filters, low- and high-pass low-sensitivity and roundoff noise realisations 86−47000
recursive digital filters, low-noise, computationally efficient, sampling rate alterations appl. 85−45174
recursive digital filters realisation, nonrecursive systems state feedback *(German)* 85−45161
recursive sequential regression algorithms, improved convergence performance with modified gradient filtering 85−13543
regression functions, nonparametric sequential estimation of zeros and extrema 87−51935
RLC four-pole asymmetrical latticed circuit, immittance matrix, transformerless realisation 87−45022
root finding method of Durand-Kerner, observations on convergence 85−22367
s-z transformations method 86−57948
Sallen-Key ccts., op-amp configs., HF compensation based on pole sensitivity *(Japanese)* 88−70903
SC biquads, zero forming capacitors optimization 86−41215
SC filter, attenuation poles, design by oriented graphs *(Czech)* 87−59718
SCNSOP, switched-capacitor cct. simulation and optimisation program 86−34448
second order method for simultaneous inclusion of polynomial complex zeros in rectangular arithmetic 86−40665
second-order adaptive line enhancer 87−7760
second-order band-elimination filter, active-R realization *(Japanese)* 86−27457
second-order IIR digital filters with min. coeff. sensitivities, synthesis method *(Japanese)* 87−24356
second-order single op amp active filters, predistorted design 86−52944
second-order transfer fn. realisations, synthesis method 88−18889
sectionally meromorphic functions, determ. of poles 86−62196
selective RC filters *(German)* 87−45030
series resonant power convertor, cycle mode control 88−75766
signal processing through group delay functions 87−47803
signal-flow-graph synthesized SC filters sensitivity anal. 88−56426
simultaneous determ. of zeros of analytic or sectionally analytic functions 86−40664
simultaneous partial Pade approximants 88−38108
simultaneous stabilizability and pole assignability, genericity 87−10622
single operational amplifier pole active filter functions *(Chinese)* 88−32305
single-input/single-output system, pole assignment using dynamic compensation with prespecified poles 85−9434
single-pole operational amplifier effects on the performance of switched-capacitor filters 85−17676
sinusoidal frequency estimation, asymptotic zero distrib. of orthogonal polynomials 87−75808
spectral data, pole and residue extraction in the frequency domain 87−69319
spectral factorisation, improvement of Kolmogorov's method *(Chinese)* 87−55099
speech coding, ADPCM with backward-adaptive algorithms for noise feedback and postfiltering 87−61735
speech signal zero extraction from LPC residual *(Japanese)* 86−22960
speed and position control theory using Kalman filters 88−75596
square root iteration for polynomial complex zeros 86−46240
strongly unimodular matrices, structure and recognition 87−72998
superconducting tunnel junctions, pole-zero deletion method for calculating Padeapproximates 86−36101
SVD-based linear prediction method, perturbation anal. for multiple sinusoids freq. estimation 88−66476
switched capacitor biquads for leapfrog filters 85−23012
switched capacitor filters with a row dominant nodaladmittance matrix 87−878
switched capacitor networks, multiphase type, poles and zeros sensitivity anal. 85−34046
switched capacitor networks, sensitivities of poles and zeros, WATSCAD package implementation 86−62713
switched-capacitor filters, design package using pole/zero prewarping procedure 85−930
symmetric linear prediction models with poles on unit circle 87−12993
symmetrical polynomial two-port network synthesis, simplification 85−49676
synchronous generator excitation control, min. sensitivity microprocessor-based pole placer 88−48931
synchronous generator exciter and stabiliser systems, digital controller design, simulation 87−78641
synchronous generator voltage controller by pole assignment 86−51606
systematic approach to the design of stray-insensitive SC circuits from active-*RL* or *RLC* prototypes 88−6969
TBT polynomials, transfer function denominator, time-domain approx. 87−47651
telephony echo cancellation, pole-zero fast Kalman algorithm 86−30267
telephony echo cancellation using fast Kalman pole-zero modelling 86−30266
ternary polynomials, constraint on zeros, VLSI implementation of FIR digital filters appl. 87−44192
test polynomials, analytic approach to soln. of nonlinear eqns. 88−18642
thermal power plant, 180 MW, modelling and control 85−53284

poles and zeros continued
threefold Campbell-Bartlett's theorem for quadripole networks *(German)* 86−598
Thue-Siegel-Roth-Schmidt-Nevanlinna bounds, effective or better 86−20010
time domain approximation method, transfer function with imaginary axis attenuation poles 87−385
topology of algorithms for approximation zeros of complex polynomial 88−11904
turbogenerator control with output feedback, control system design for improved stability 87−9496
twin T-like ccts., oscills. in feedback systems 86−57716
two-dimensional filters, internal stability and BIBO stability 86−1273
two-port lumped networks, cascade realisation of irrational immittance 85−34035
two-stage pole-zero predictor for minimum phase ARMA processes 86−48919
unconstrained optimisation problems solving using BFGS's method *(French)* 85−22340
unsymmetrical quadripoles and their transformation *(German)* 86−597
upper bounds for the first zeros of Bessel functions 87−44098
VLSI interconnection, capacitively loaded, equiv. dominant pole approx. 87−38356
vocal tract freq. response estimation using algorithm based on pole enhancement 87−12938
voice speech, pole-zero anal., using group delay charact., comments 86−10282
voiced speech, poles and zeros estimation, group delay charact. use derived from spectral envelopes 87−2466
voltage amplifiers, two operational amplifier, actively compensated, design 85−54695
voltage controlled buck converter, pole-zero cancellation for compensation 86−66189
voltage-current digital filters with zero magnitudesensitivity in attenuation zeros 86−52954
waterwheel generators, calc. of pole flange losses 88−43069
weighted rational causal approx., algorithm 86−40660
wide-range oscillator systems, variable capacitor tuning, mutual compensation synthesis method 85−11088
wideband 90° phase-shift networks, phase-shift sensitivity w.r.t. poles location inaccuracy 86−57523
Wiener infinite impulse response filter design 85−55044
z-domain to s-domain transforms. 86−65093
zero excitation pulse model based on pitch synchronous analysis of LPC voiced residual *(Japanese)* 87−75757
zero placement and squaring problem: a state space approach 87−23814
zero spaces, pole spaces, duals, and inverse systems 87−44452
zero tracking filter by means of a recursive least squares algorithm *(Japanese)* 88−46078
zeros of special class of entire functions, computation 85−54336

police
35-GHz-Doppler radar for law enforcement agencies in Europe , operation and expt. eval. 88−74036
burglar and fire alarms, BT raises red alert with phone based link 85−16705
communications network management 86−54672
computer assisted voice identification system (CAVIS) 88−72833
computer networks, current status and future developments 85−25510
electricity meter theft prevention, Home Office perspective 86−39070
Japan, telecommunication systems *(Japanese)* 85−2972
Japan's Dial 110 emergency call receiving system for police activities 85−3023
Japanese police communication, current situation and prospects 85−25291
Lancashire Constabulary radio systems since 1924 87−28413
law enforcement/public safety communications/command and control 87−20087
mobile radio communications for police activities *(Japanese)* 86−69640
radar speed trap jammer device *(German)* 85−3504
remote UHF repeater, solar-powered 85−65179
RPS 80 from Ericsson, sophisticated police mobile radio system 87−55997
Swedish mountain radio system 85−52287

police data processing
fingerprint analysis, topological coordinate system 87−21011
fingerprint identification system for personal identification *(Japanese)* 85−25106
fingerprint imagery using frustrated total internal reflection for security access control 87−16345
fingerprint images, restoration algorithm 86−69162
law enforcement/public safety communications/command and control 87−20087
mobile communication system, design 86−4555
national network, police SAPHIR system *(French)* 87−62654
records, data compression algorithms for improved records 85−2911
speech controlled information system, experiences *(German)* 86−64222
Thames Valley Police Force communications, cellular radio, message switch network 85−42246
traffic violations, image processing for automatic detection 87−19937

poling *see dielectric polarisation*

polishing
see also electrolytic polishing
316L stainless steel tubes, charactn., surface treatment for gas distrib. systems 87−36473
AT-cut cultured quartz resonators, etching study using fluoride salts, HF, and $NH_4F.HF$ 86−42030
BWR station power resin condensate polishing plant for waste reduction *(German)* 87−64283
ceramic, surface machining damage, SAW meas. 85−6073
ceramics, void detection by scanning laser acoustic microscopy, reliability analysis 86−57506
condensate polishing in industry in 600 to 1800 psig boilers 86−61402
fibre optic connector polisher, Buehler Fibrpol, accessories 88−33700
fibres, single-mode polishing-induced birefringence 86−36122
furniture, grinding and finishing process, safety and automated system review *(Japanese)* 85−16509
garnet laser materials, tensile fracture strength 86−9448
geodesic lenses, fabrication and charactn. problems, outer rim design, substrate grinding, polishing 88−7964
HF chemically polished fundamental mode bulk wave quartz crystal resonators, filter appls. 85−61364
industrial condensate polishing, system selection criteria 86−45168

polishing continued
injection molded ST compatible connector for LAN, high performance 88−33698
lapping and polishing of plane-parallel parts in double-disk lapping procedure *(German)* 85−22241
laser accessories, deformation energy influence on laser damage threshold 88−40289
magnetic disc surface buffering monitor microscope and photometer head 85−1845
magnetic thin-film recording heads, polishing process end point, elec. detection 87−67760
magnetoabrasive polishing with ferromag. powder, theory of mag. reactions 86−26440
MIMS, cross-sectional prep. for electron optical imaging *(German)* 88−2502
optical components polishing for CO_2 lasers *(Japanese)* 86−29203
optical fibre connector reflection methods using index matching materials *(Japanese)* 86−36140
optical fibre devices, conf., London, UK (June 1988) 88−62904
optical fibre polishing technique 88−65276
optical fibre polishing with motor-driven abrasive wheel, technique and fibre characts. 88−58082
optical fibre termination and polishing, response to stresses 88−39956
optical fibre terminations, automated polishing 85−56338
optical fibres, polished, D-shape, geometrical birefringence 87−32980
optical polished single-mode fibre couplers, loss analysis; 86−2824
optical single mode fibre coupler fabrication using Si microelectronic technology 85−7214
plastic, magnetoabrasive machining 86−45866
power-driven rotary brush varieties 86−26449
quartz crystal chemical polishing in etching solutions that containsurfactants 86−42031
quartz optical fibres, drawing, laser surface processing of blanks 86−22165
quartz VHF monolithic crystal filters fabricated by chemicalmilling 86−42058
ROI, chemical vapor deposited device isolation with chemical/mechanical planarization 87−6581
semiconductor device specimen preparation for SEM analysis, using colloidal silica slurry 86−26937
semiconductor wafer glass planarization by stop-layer polishing technique 85−45771
semiconductor wafer perfect free zone quality determination 85−50407
Sendust video heads, precision machining method *(Japanese)* 87−77021
SOI, device layer transfer technique using chemi-mechanical polishing 85−18245
substrate preparation by contactless mechanochem. polishing 86−9024
tachometer, programmable for displacement velocity meas. 88−74599
UHF resonator chem. polishing and frequency-setting 87−1856
wafer deformation reduction 86−41693
wafer lapping and polishing techniques 86−15056
wafer preparation by hydrostatic float polishing 85−18416
$Al_yGa_{1-y}As$-$Al_xGa_{1-x}As$ DH MBE lasers, substrate polishing effects 85−29848
Au thick films, burnishing, impact on automatic wire bonding 88−1222
CdTe surfaces, excess Te removal, Raman scatt. study 85−6823
Cu/Pb-Sn solder interfacial reactions, Cu_3Sn intermetallic formation 87−23335
GaAs (001), chemomechanical polishing in aq. solns., STM images 87−53399
GaAs (001), cleaning procedures for MBE, XPS studies 86−2053
GaAs MBE growth, substrate preparation for oval defect elimination 86−34332
GaAs, polish-induced surface strain, Raman study 85−1499
GaAs, semi-insulating, LEC grown, deep trapping levels, optical transient current spectroscopy 86−58232
GaAs, subsurface damage in semi-insulating substrates 88−19839
GaAs wafer preparation, noncontact laminar flow polishing technique 88−26086
GaAs wafer processing techniques 88−26474
GaAs wafers, evaluation of fabrication damage 87−74152
GaSb, chemical polishing, solution in H_2O_2-HF-lactic acid 86−28192
InP (001), cleaning procedures for MBE, XPS studies 86−2053
InP (111), chemically polished and etched, characterisation of native oxide layer, ion scatt. spectra, AES, ESCA 87−11672
InP, polish-induced surface strain, Raman study 85−1499
InP ultra-flat substrates produced by chemo-mechanical polishing 87−53404
InP wafers, polishing processes, damaged layer evaluation, X-ray diffr. studies 87−53408
InP wafers, processing and polishing, double-crystal X-ray diffr. study *(French)* 88−50736
InP-Au(Al) Schottky barriers, defects introduced by mech. polishing 87−17966
InSb, chemical polishing, solution in H_2O_2-HF-lactic acid 86−28192
InSb surface, oxidation at room temp. 87−25128
Mn-Zn ferrite cores, magnetic charact., surface oxide layer and mechanical polishing effects 86−63570
Mo mirror, superpolished, for VUV Ar_2 excimer laser 88−45500
Nb supercond. resonator, fabrication and characteris. 85−12526
Pb salt, lasers, long-wavelength, LPE growth 87−39136
n-$Pb_{1-x}Sn_xTe$, chemical-mechanical polishing for damage layer removal 85−18244
n-PbTe, chemical-mechanical polishing for damage layer removal 85−18244
Si MIS capacitors, polish damage, gate oxide integrity, minority carrier lifetime 87−74118
Si materials science and technology, conf., Boston, MA, USA (May 1986) 87−16292
Si, nonequilibrium carrier recomb., thermal oxidation time depend. study 86−58404
Si polished and epitaxial slices, surface quality requirement and inspection techniques 86−21420
Si surfaces, oxidation, dislocation generation at cracks 87−45784
Si, thermally oxidised, exoelectron emission, machining effect, surface and oxide film struct. 88−57469
Si wafer polishing 87−17986
Si wafer polishing for VlSI 86−35735
Si wafers, polishing damage charact. using thermal wave mapping 87−17988

polishing continued
Si:B layers, prod. by pulse implantation doping, surface prep. effect, SIMS, SEM obs. 86−28163
Si:B-Mo interface, specimen preparation by chemical etching and polishing, for electron studies 87−17963
Si:H, B(Al)(GA)(In), polishing, acceptor compensation by atomic H 87−17987
Si_3N_4, surface machining damage, SAW meas. 85−6073
SiO_2, fused silica, CO_2 laser polishing for increased surface damage resistance 85−7563
SiO_2, fused silica, damage threshold at 1.06 μm, surface finishing effect 85−7198
SiO_2, fused silica, float polishing and defects 85−7197
ZnS-HgCdTe interface, surface and interface after polishing, etching and passivation *(Chinese)* 88−39199

pollution

power stations, maintenance and upgrading of control equipment 86−25447
process turbidimeters for measuring pollution in air and water *(Dutch)* 88−36678
radioactivity contaminated sites field surveys, commercial ranging system appl. 85−48357
regional social benefits of electricity use *(Japanese)* 86−66522
remote sensing, hazardous wastes location and determination 85−4502
sensors, air and water impurities detection *(Dutch)* 85−48494
Si(Li)-NaI(Tl) sandwich detector array for measurementsof trace radionuclides in soil samples 86−32170
space debris tracking radar, multimetre wave, system study 88−28952
spectroscopic trace gas and pollution measuringtechniques *(German)* 86−12190
steel industry pollution measurement instruments 87−14606
steel melting electric furnaces, dust and noise pollution control *(German)* 85−10249
surfactants role in new and emerging technology, conf., New York, USA (June 1986) 88−55839
toxic substance control trends for electric utilities 87−63853
transducers for meas. and control, book 85−44379
Rn flux from ground at U mining site, automated fluxmeter and meteorological package 85−26885
Si dendritic web photovoltaic cell manufacture, costs of controlling environmental emissions 86−26305

polyelectrolytes *see electrolytes; polymers*

polygonisation *see recovery*

polymer alloys *see polymer blends*

polymer blends
3-alkylthiophene-methylmethacrylate conductive copolymer synthesis, elec. and spectroscopic props. 88−24820
alphamethylstyrene-based copolymers with enhanced dry etch resist, lithographic eval. 88−13269
ambient temperature polymer solid state batteries 86−66248
4-butoxycarbonylmethylurethane-polydiacetylene, ultrafast nonlinear optical processes 88−2379
chloromethylstyrene-based blend resists, sensitivity and γ value 86−58354
conducting polymers and composites, mol. engineering 88−24824
copolymer, vinylidene cyanide-vinyl acetate, piezoelectricity, application to ultrasonic transducers 86−53849
copolymer positive near-UV resist for bilayer lithography 88−19892
copolymer substrates for optical discs 88−45036
beta-copper-phthalocyanine/poly(NVK-BMA), IR photocond. 88−26962
deep UV photoresists, new class of resins 87−11881
engineering applications of high-performance polymers 87−36822
ethylene copolymers, elec. breakdown 87−53757
ethylene copolymers, electric breakdown and high-field conduction meas. 87−18380
ethylene-propylene rubber, effect of molecular structure on dielec. props. 88−26624
ethylene-vinylacetate-Ag copolymer-metal contact, pot. barrier electronic props., photocurrent spectra meas. 87−17795
ethylene-vinylacetate-Au copolymer-metal contact, pot. barrier electronic props., photocurrent spectra meas. 87−17795
ethylene—aromatic monomer copolymers, elec. props. and breakdown voltages, new insulating materials 87−18379
ferroelectricity polymers, transduction phenomena rel. to biomedical appls. 85−12448
Fluonlex, insulation material for wires and cables 86−14585
humidity sensor using electrical resistance of ionic copolymers *(Japanese)* 86−44295
low warpage thermoplastic, MINDEL B-419, vapour phase solderable material for surface mount appls., props. 87−16715
methacrylamide copolymer resists for electron beam lithography 87−11884
optical and electronic appls. 88−65119
organosilicon polymers, electron beam and UV sensitivities, O_2 plasma stabilities 88−26165

polymer blends continued
photoresists, methylacrylate with methacrylic acid copolymers, sensitivity to short-wavelength UV radiation 85−50356
PMMA-bisazide photosensitive deep UV resist 88−26152
PMMA-hexachloroendomethylenetetrahydropthalic acid 1,2-propanediol systems, dielectric props. 88−71831
PMMA-maleic anhydride positive resists, dissolution characts. 87−74158
PMMA-polymethacrylic acid copolymer electron beam resist, reliable reactive ion etch processes 88−64464
poly(trimethylsilylmethyl methacrylate co-chloromethyl styrene), prep. and lithographic props. 87−11874
poly(trimethylsilylmethyl methacrylate-methacrylic acid)-nitrobenzyl cholate, bilevel, solution inhibition deep UV resist system 87−60227
poly-vinylidene fluoride copolymer poled guest/host composite for freq. doubling and waveguiding structs. 87−53933
polyacrylonitrile butadiene styrene sensitised with LMG, TSC obs. and electrothermographic behaviour 86−28531
polyallyl methacrylate-polypropargyl methacrylate copolymer negative-working resists 86−1899
polybutadiene resin system, modified for elec. and electronic appls. 86−63507
polycarbonate/polybutylene terephthalate blends, fracture characts. study by optical microscopy and SEM 86−20146
polyester resin and composites charactn. by DSC and TGA 86−62279
polyethylene, high and low density blends, treeing inception voltage and growing process *(Korean)* 85−18494
polyethylene, low density, additives for treeing resistance enhancement *(Korean)* 86−53856
polyethylene copolymerised with various monomers, high field cond. and carrier traps 88−51081
polyethylene-(ethyl-vinyl acetate copolymer) interface, elec. props. 87−67648
polyethylene-ethylene vinyl acetate composite insulating system, elec. props. 86−68100
polyethylene-ionomer blends, TSC peak assignment 88−64851
polyethylene/ionomer blend, TSC, poling temp., time and voltage effect 88−51084
polyethylene/ionomer blends, insulating material, aging characteristics 87−25713
polyimide copolymers, heat resistant dielectric film appls. 88−71832
polymethylstyrene (chlorinated)-poly-dimethylsiloxane, block copolymer as bilayer resist system 86−8929
polymethylstyrene-polydimethylsiloxane block copolymers, chlorinated, as bilevel resists 86−1894
polytrimethylsilymethyl methacrylate co 3-oximo-2-butanone methacrylate deep UV positive resists, O reactive ion etching resistant, prep. and props. 85−55628
polyvinyl butyral/Tedlar composite, polarisation effects as function of humidity 88−51045
polyvinylidene fluoride and related copolymers, struct. and elec. props. rel. to insulation appls. 85−35259
polyvinylidene fluoride-trifluorethylene copolymer, elec. and mechanical stresses, submillimetric study 88−49894
polyvinylidene fluoride-trifluoroethylene copolymers, piezoelec. consts. meas., hydrophone appl. 88−12099
polyvinylidene fluoride-trifluoroethylene copolymers, pyroelectric conversion materials 87−43476
silicon-containing negative resists for electron beam and masked ion beam lithography 88−39319
silicone-polyimide polymers as adhesion promoters 85−10832
Teflon FEP, copolymer, electret switch 86−53871
Teflon FEP foils, positive charging by low energy electron irrad. 85−40996
thermoplastic elastomers for cable and wire insulation, viscosity fn. 87−52923
two-layer photoresist 87−11896
VDF-TrFE piezoelectric film US transducers 87−12020
vinylidene fluoride-tetrafluoroethylene copolymer, prep. and ferroelec. 85−35243
vinylidene fluoride-trifluoroethylene copolymer, pyroelectric conversion cycle 85−50801
vinylidene fluoride-trifluoroethylene copolymers, dielec., piezoelec., and pyroelec. props. 87−53810
vinylidene fluoride-trifluoroethylene copolymers, ferroelec. and piezoelec. props., shock gauge and transducer appls. 87−53807
vinylidene fluoride-trifluoroethylene copolymers, piezoelec. props. and temp. stability 87−53811
2-vinylpyridine-methylmethacrylate copolymers, deep UV resists appl. 86−58355
XLPE blended with ionomers, charging behavior 88−26621
XLPE cable, AC breakdown strength improvement by adding N-vinyl carbazol 88−30385
Si/VDF-TFE copolymer interface, corona injection, field coupling and induced inversion studies 87−60111

polymer coatings *see polymer films*

polymer fibres
clothing textiles, antistatic mechanism of internally modified synthetics and quality requirements 88−27404
copper paste for additive multilayer ccts. 88−25736
engineering applications of high-performance polymers 87−36822
Kapton film, SF_6-impregnated, insulation for power transformers, partial discharges and breakdown behaviour 85−32565
kevlar, metallised, Cu-coated, undersea electromechanical cables appl. 85−28265
Mylar film, SF_6-impregnated, insulation for power transformers, partial discharges and breakdown behaviour 85−32565
nylon, twisted pair optical fiber pH sensors 86−55716
optical coupler, low-cost fabrication technology and loss performance 88−39923
optical fibres, manufacture, optical props., performance , review 88−72037
pentafluorotrideuterostyrene plastic optical fibers for near-infrared transmission 86−42237
plastic fibre dye laser characts. *(Japanese)* 87−68406
plastic fibre dye lasers, active clad type and coupling waveguide type 86−68489
polycarbonate core optical fibre, automotive appl. 88−39922
polymethylmethacrylate, twisted pair optical fiber pH sensors 86−55716
polystyrene, twisted pair optical fiber pH sensors 86−55716
scintillation fibres light yield dependence on refractive index of sheath, calc. and obs. 87−63669

polymer filaments *see polymer fibres*

polymer films
see also dielectric thin films; insulating thin films
acousto-optics characts., waveguide appl. *(Russian)* 85−41105
acrylate coating developments for opt. fibres 87−12141
acrylonitrile thin films, plasma-polymerised, electronic props. study 88−72224
AEBLE-150 electron beam lithography system, sub-0.5-μm resist. processes 88−13228
alkyd resin films, graphite loaded, elec. cond. and dielec. props. 86−42016
alphamethylstyrene-based copolymers with enhanced dry etch resist, lithographic eval. 88−13269
ammonium poly(p-styrene sulphonate), water-soluble cond. layer for electron beam direct wafer writing process 88−39341
aromatic polyamide type heat-resist. enameled wire 86−62879
aryloxy-polyphosphazenes films as negative O RIE resistant resist materials 87−38391
AZ111 photoresist, Bi implanted, diffusion, thermal stability 88−57547
benzimidazobenzophenanthroline type ladder polymer film, ion implantation doping, elec. props. 88−26043
bird protection measure on 6-35 kV power transmission lines *(Russian)* 87−78171
broadband deep UV pellicle for 1:1 scanning projection and step and repeat lithography 85−6784
capacitive polymer sensor for relative humidity meas. 86−5265
capacitor film surface assessment studies 85−34216
capacitor motor, magnetically-suspended rotor dielectric coating material selection *(Russian)* 86−56757
capacitors, radiation-induced space charge 87−24977
cellulose paper-polypropylene-paper insulating tape for URD cables 87−30197
chain-folded polymer monocrystal electronic devices 88−57702
chip assembly considerations for devices processed with polyimide 85−40853
chlorinated polymethylstyrene X-ray negative resists characterisation 85−50650
chloromethylated polystyrene negative resist, ion beam lithographic characts., ion species depend. 88−13202
coated optical fibres, mechanical reliability considerations 87−74783
coatings for optical fibres 87−7164
collimators for the vacuum ultraviolet and ultrasoft X-rayregions 86−2900
conducting type for electronic appls., manufacturing characts. and props. *(Polish)* 85−33526
conductive applications of PTF 86−1381
conductive material shielding effectiveness against ESD radiation 88−52249
conductive pastes, electrical props. and thick film hybrid cct. appls. *(French)* 87−16711
conductive plastics and plastic alloys, battery electrodes appl. *(German)* 87−73163
conductive two-layer resist system for electron-beam lithography 88−39316
conductor formation in polymer films by laser beam in new scheme for device packaging 86−40551
conductor pattern production on thin plastic foil and its transfer 85−11816
conference, San Diego, USA (Aug. 1987) 88−49336
conformal coatings for PCBs, effect of process parameters on insulation resistance 87−37649
copper phthalocyanine polymer films, form. by double source evap. 86−20094
corrugated PVDF bimorphs, actuation and sensing appl. 85−20612
data storage media and substrates appl. 88−26746
deep UV dyeable negative resist 87−11966
deep UV photoresists, new class of resins 87−11881
deposition in glow discharge, automated apparatus for film mass meas. 85−31606
diazide/novolak photoresist film, overhang form. by chlorobenzene soak process 86−35484
dielectric, elastic and piezoelectric constants meas., microcomputer-controlled apparatus 86−31595
dielectric dissipation measurement using wound capacitors 86−5492
1-1difluoroethylene fluorination by nonequilibrium plasma at atm. press 87−23761
direct imaging photopolymer film developments for PCB production 88−71201
directly solderable copper PTF for PWBs and hybrids 88−50558
dissolution rate meas. using laser interferometery 86−1884
dry etch resistance of metal-free and halogen-substitutedresist materials 85−50648
dye-polymer layer, laser-induced fluid motion, optical data storage 87−68572
electret generator, characts. 86−56794
electrical breakdown, mass spectroscopic studies 86−63481
electrical insulators evaluation of ageing effects measurements 86−62277
electro-optical ultrathin films, crystal streak camera appl. 88−51568
electroactive, in thin layers, potential appl. in gas sensor 87−56657
electroactive blends on electrodes, film preparation and props. study 88−18774
electron resists, ultimate resolution *(Japanese)* 85−18194
electronic materials 85−54539
enamel coating, corona resistant turn insulation in AC rotatingmachines 86−66042
epoxide resin polymerisation, IR spectrometry for glass fibre coating *(French)* 88−56326
epoxy encapsulation for thick film resistors, props. and quality study *(Slovenian)* 87−52881
epoxy resin, photocurrents and TSC, effects of mech. stress 88−63392
epoxy resin carbon black thick film resistors, conduction channel model and expt. study 87−52879
epoxy resin-C thick film resistors, temp. depend. of elec. conduction, expt. study 88−12624
epoxy-acrylate resin, primary coating charactn. for optical fibre 87−38806
film coated magnet wire, cure determ. 86−62280
fine-line multilayer substrate with photo-sensitive polyimide dielectric and electroless copper plated conductors 88−25747
flexible ccts. based on polymer thick film comps., elec. and physical characts. determ. 87−11137
flue gas desulphurisation plants, polymeric coating applicability and safety *(German)* 87−9379
flue gas desulphurisation system corrosion protective resin coating failure mechanisms 86−56639

polymer films continued
fluorescent plastic film coating for CCD detector 86−24353
fluorinated ethylene propylene/silicone oil composite, direct voltage breakdown with needle/plane electrode system 85−1773
fluorocarbon films, duplex reactive, with spin -off resist. characts. 87−44410
fluorocarbon polymer film proportional counter, holes cond. under α-particles irradiation 85−52967
foil polarisation, charactn. by DC transient meas. *(Hungarian)* 88−26609
free-standing type, fabrication techniques 85−22556
gas filled gaps, aspects of surface elec. charge 88−68961
glow discharge polymerised film for electronic devices 87−16712
gradient-type light guide with polymer protective cladding, strength characts. calc. *(Russian)* 88−45180
hardness indentation measurements on thin films 86−13895
heat-resistant dielectric films for capacitors *(French)* 88−33413
heavy ion track registration in polyvinylidene fluoride 86−50414
hexamethyldisiloxane films, plasma polymerised, dielec. breakdown 87−18357
hexamethyldisiloxane films, plasma polymerised, dielec. props., complex permitt. 87−18356
hexamethyldisiloxane films, plasma-polymerised dielec. props. 85−29356
high-density microelectronic ccts. using advanced polymer thick film materials and processes 88−1213
HPR/PMMA bilevel resist system 88−19891
humidity measurement using electrical and thermodynamic properties of water vapour/polymer film systems 86−31401
humidity sensor with long-term stability, using cross-linked cellulose acetate butyrate 86−55679
humidity sensors composed of graft copolymers, fabrication and props. 86−55677
image convertor, photomultiplier sensitivity in UV region increase 86−60598
implantable devices electric insulation, using composite polymer coatings 88−31494
improved nylon stability 86−62878
in-situ polymer film adhesion tester using US waves 85−15461
inks, processing and cct. appls. 86−52538
insulating films, residual voltage polarity 87−6948
integrated optic waveguide sensors, scatt. light intensity characters. at waveguide surface 88−45205
integrated optical waveguide chemical vapor microsensor 86−55601
integration of polymer thick films with PCB technology in the telecommunication field 88−1180
ion implanted, structure-majority carrier relationships 85−18107
ionised cluster beam deposition technique 85−10806
IR film thickness gauging, optical interference suppression 87−21252
IR scattering dispersion filters of air-crystal type *(Czech)* 87−68243
IR thermometer for medical use based on pyroelec. polymer film 87−63766
Kapton films for long life capacitors, materials performance 85−40948
Kapton polyimide film, wire insulation system 88−64009
Langmuir-Blodgett layers for GaAs Schottky diodes 86−22245
Langmuir-Blodgett multilayers, polymerisable, electron irrad. as model lithographic resists 86−35237
laser beam modulator and pulse former using electro-optic spectral hole burning 87−12533
laser interferometric monitors of polymer thin film props. during semicond. device fabrication 87−17861
laser photoetching for microelectronics fabrication 87−25530
LDPE, gamma-irradiated, carrier traps polarity determ. by TSC meas. using temp. gradient 88−470
LDPE, zero-field position determ. by thermally stimulated surface potential meas. with temp. gradient 88−469
LDPE films, charge trapping and cond., modification by additives 87−46268
LDPE films, corona and contact charged, surface charge decay 88−64852
LDPE films in cryogenic liquids, PD streamer interaction with polymeric films 88−44928
light guides with polymer protective coatings, torsional strength characts. *(Russian)* 88−51500
liquid crystal droplet-polymer light control film, struct., optical and thermal props. 87−68214
liquid crystal droplet-polymer light control film, struct. and optical props. 87−68213
liquid crystal films, polymer-dispersed, contrast ratios meas. 87−38868
liquid crystal-organic polymer photoconductor struct., space-time modulation of light 86−15527
low-pressure steam turbine corrosion-resistant coating performance tests 87−51048
magnetic tapes production by electron beam evaporation coating of polymer films 87−32873
medium-voltage busbar arc prevention by acrylic-TiO_2 membrane coatings 85−65375
membrane films of fluorinated organic polymer, humidity sensor appl. 88−35969
merocyanine dye polymer thin films, plasma polymerised, photovoltaic cells 88−72216
metal deposition, electron beam exposure of an Au containing polymer film 86−63140
metal-on-polymer patterning process using pulsed electron beams in soft vac. 88−64468
metal-poly(ethylene terephthalate)-metal struct., radiation induced space charge distrib. 88−50685
metal-polymer(-SiO_2)-Si structs., polymer surface charge traps, C-V study 86−67771
metallised polypropylene film dielectric power capacitors 86−61701
methacrylamide copolymer resists for electron beam lithography 87−11884
methacrylate resin and polysilane photoresists. for VLSI memory device fabrication 85−23854
methyl methacrylate, plasma-polymerised, electron beam resist fabrication 87−58985
methyl methacrylate dry film polymer, cathodic delamination on Cu 85−34267
methylmethacrylate-tetramethyltin plasma copolymerised resist, X-ray irrad. ESCA studies 86−53511
Michlers ketone-polymer double layer systems, electrophotographic props. 86−3456
microelectronics adhesives, volatile and absorbed species from curing/processing, expt. study 88−18773
micromachining using excimer laser projection etching techniques 85−56909
microplastic structures at micron scale 87−11879
polymer films continued
Microposit 2400-17 resist profile simulation for 0.5 μm photolithography at 248 nm *(French)* 87−67072
microwave plasma etching in air and O_2 in VLSI production 87−60344
miniaturised plastic film capacitors 86−1406
molecular electronics, review of appls. and role of chemistry, book contrib. 88−7435
multilayer 3D crossing optical waveguide circuit element, interferometric effect 88−58207
multilayer boards using PTF technology 88−12762
multilayer resist system for submicron lithography, contrast enhanced reflectionless process 88−19895
multilevel interconnection system for submicron VLSI using multilayered dielecs. of plasma SiO and polyamide 87−45820
multimode fibre lightguide power diffusion, influence of microbends and polymer coatings *(Russian)* 87−38833
nematic liquid crystal, polymer dispersed, for large area displays and light valves 87−1982
neutron irrad., radiation-induced cond. meas., nuclear reactor appls. 88−51074
nonlinear optical interactions 88−8289
nonlinear optical waveguides 88−51518
nonlinear polymer waveguides, intensity-dependent birefringence 88−33729
nonmetallic waterproof optical fibre cable using absorbent polymer ribbon, design and performance 88−67379
novolac resin film, positive photoresist, dissolution kinetics 88−13258
novolac resin photoresist based high dry etching resist. portable conformable masking 88−13272
novolac resin planarization layers for multilayer resist imaging systems 87−17865
novolac resin resist, fine line fabrication using focused ion beams 88−13229
novolak resin based negative-acting aqueous base-developable photoresist with submicron resolution capabilities over topography 88−13278
novolak resist patterns, UV hardening 86−1977
novolak resists, deep UV and thermal hardening 88−13273
novolak-based photoresists, glass transition temp. effects 86−1976
novolak-based resist systems for submicron optical lithography, develop. induction mechanism 88−13271
novolak/diazoquinone resist, thermal acceleration of UV hardening 85−1455
online on-line electro-optical instrumentation for continuous quality control of manufactured sheets 88−60689
optical bistability, planar quasi-waveguide interferometer made with conjugated polymer film 88−34115
optical bistability, polydiacetylene Langmuir−Blodgett film waveguides 88−34116
optical fibre coatings, mechanical characterisation by microindentation meas. 85−33532
optical fibre jacketing, liquid crystal polyesters appl. 88−67380
optical fibre waveguides low-loss with polymer coatings solidified by UV radiation 85−35502
optical thin film waveguide polariser with a-Si:H clad, realisation and characts. study *(Japanese)* 88−39979
optical third-harmonic generation from polydiacetylene thin films deposited by vacuum evaporation 87−54400
optical waveguide polarisers with a-Si:H film clad 87−60944
optical waveguides, loaded with nonlinear organic materials 88−39978
optical waveguides, polarised Raman spectroscopy, orientational effects in two dimens. films. 85−7255
ordered thin films, future appls. 88−1500
organic electro-optic devices 88−51567
organic molecules and polymers, electronic applications in molecular electronics 88−1288
organosilicon bilayer resist images, electron beam exposure parameters and etching selectivity 87−38129
organosilicon cpds., plasma deposition, multilayer resist fabrication 86−483
organosilicon plasma polymerised films, carrier photoinjection and energy levels 85−23481
oriented, thickness compliance determ. method 87−46258
P4BCMU, soluble polydiacetylene, negative electron resist, charactn. under electron beam irrad. *(French)* 87−67074
parylene conformal coating for PCBs, removing the unremovable with abrasive blasting 85−11707
parylene conformal coatings for PCB appls. 86−62907
parylene dielectric for wafer-scale interconnections in multichip packages, fabrication systems 88−64146
Parylene films, low defect density insulating films deposited on room temp. substrate 85−24030
parylene gate ISFET, pH sensor appl., surface modification with crown ether compounds 86−55685
pattern deposition using ion beams 87−24998
PC manufacturing, soldermask: an overview 85−61573
PC polymer thick film technology with etched CU base layer 87−11233
PCB, dual UV/moisture sensitive conformal coating, curing characts. 88−19492
PCB manufacturing, appl. of polymer thick films technology in telecommunication field 87−73896
PCB polyacrylate-based photoresist lamination, influence of substrate thickness and preheat on adhesion and dimens. stability 86−62917
PCBs, PTF technology developments in USA 87−24593
perfluoropolyether lubricant layers for thin film mag. recording media 88−57937
PET, thermal endurance tests combining reaction rate meas. with ageing tests 87−16743
PET film, breakdown time lags after step voltage application 86−63482
PET film, low-freq. dielec. response meas. 86−68125
PET film, mag. ink coated, creep in compression meas. 86−7863
PET film, uniaxially drawn, dielec. strength, effects of heat treatment and mech. stresses 85−1769
PET film/silicone oil composite with point-plane electrode system, prebreakdown phenomena 88−57830
PET films, cutting and ablative etching using 1 kHz XeCl laser 86−13848
PET films, heat treated biaxially drawn, dielec. and mech. props. 85−56028
PET films, uniaxially drawn, dielectric props., orientation effect *(Korean)* 86−47881
PET films for liq. cryst. displays, angular and spectral transmission characts. 87−18792
PET in MKT stacked film capacitor−advantages anddesign 86−1415
PET/silicone oil composite, direct voltage breakdown with needle/plane electrode system 85−1773

polymer films continued
PETP, charge storage props. 88−44914
pH catheter electrode, solvent polymeric membrane, for intraluminal meas. in gastrointestinal tract 87−63721
photoactive polyimide development characts. for VLSI multilayer metallisation 87−53587
photochromic polymer films appl. 85−24257
photoetching with excimer lasers 88−13286
photographic heat-sensitive layers development for elec. discharge method of surface flaw detection 87−36833
photopolymers, dye-sensitised, real-time holographic interferogram appls. 86−36605
photoresist, AZ111, Bi ion implantation, range measurements and thermal stability 88−64438
photoresist appls. *(Korean)* 88−1476
photoresist layers, silylation from gas phase, mechanism and kinetics 88−19887
photoresists, photoablation using synchrotron radiation 88−39333
photosensitive polyimide for packaging appls., eval. 87−74398
photosensitive polyimides processing for MLC package for VLSI chip 88−26109
piezo film sensing devices 87−56674
piezoelectric, polyvinylidine fluoride film fabrication, props. and appl. 85−24028
piezoelectric films with waveguides for light modulation 85−2385
piezoelectric polymer pressure sensors for underwater shock wave pressure meas. 88−4387
piezoelectric PVDF-films, LF and US appls. 85−15456
piezoelectric transducers fabrication, by polyvinylidene fluoride solution casting/solvent bonding 85−4511
pigmented polymer thick film conductors, processing and appl. *(German)* 88−44496
planarization of substrate topography by spin-coated films: a review 87−60253
plasma etching, behaviour, book contrib. 88−7676
plasma polymer electrets, fabrication conditions effects on characts. 85−29385
plasma polymerisation anticorrosion coating for vacuum-deposited Co-Ni-O tape layers 88−57936
plasma polymerisation technique, appls. in electronics 86−62281
plasma polymerised, semiconductor device technology *(Japanese)* 85−49603
plastic film thickness measurement using angle-scanning laser interferometer 87−49924
plastic film ultrasonic transducers, performance characts. 86−56285
plastic LCDs with polymer film substrate *(Japanese)* 86−44366
PMMA: benzil(benzildimethylketal), optical waveguide fabrication 86−2766
PMMA, acrylic acid calcium acetate modified, enhanced plasma etch resistance 87−38390
PMMA, electron beam irrad., spatial charge distrib. meas. using pulsed electroacoustic method 88−74578
PMMA, electron beam resist, multiple and cyclic layer, plasma polymers. parameters and etching characts. *(Japanese)* 86−14989
PMMA, submicron pattern delineation using a pulsed electron-beam in soft vacuum 87−67071
PMMA and Microdeposit 23M, As^+ ion bombardment, appl. for ion beam lithography and masking 87−11924
PMMA bilayer resist in hybrid deep UV/electron beam fabrication process for 30 nm scale devices 87−67068
PMMA bilayer resist systems, commercial dye charactn. 88−19893
PMMA binder-copper phthalocyanine corona charged layers, surface pot. decay characts. 86−2918
PMMA coating on Si solar cell, efficiency improvement 86−45713
PMMA containing a bisazide cpd., photosensitive UV photoresist 88−57548
PMMA films, excimer laser replication of ion-implanted photomasks 85−40801
PMMA films, irrad., ESR study 86−1978
PMMA films, UV laser ablative photodecomposition, time resolved transmission studies 87−38017
PMMA films, X-ray lithography with synchrotron radiation, photoelectron and Auger electron prod. 86−8923
PMMA films etching with intermediate-energy ions 85−45602
PMMA ion resist, in situ development of ion bombarded resist in reactive gas ambient 88−57538
PMMA light guides, fabrication by photo-induced self-condensation 87−54048
PMMA modification with di-butyl maleate, B^+ ion beam exposure characts. 85−45755
PMMA photoresist, profiles in masked ion beam lithography, mask scatt. effects 85−45756
PMMA photoresist spin coating mechanism related to polymer solution to rheology 88−26154
PMMA plasma polymerised films, X-ray resist characts. *(Japanese)* 86−1917
PMMA positive resist, ion beam lithographic characts., ion species depend. 88−13202
PMMA resist, degradation due to ion and electron beam irrad., Charlesby's law modification 86−1979
PMMA resist, electron beam irradiated, volume and surface comp. changes 85−40577
PMMA resist contrast meas. using develop. rate monitor 88−13275
PMMA resist films, dissolution and swelling 88−13252
PMMA resist films, energy dissipation, Monte Carlo simulation based on Mott cross section 87−38026
PMMA resist profile simulation for single and triple layer processes 88−26172
PMMA resists, exposure using 500 kV electron beams 87−38025
PMMA stripping from glass mask using glacial acetic acid, semicond. manufacture appl. 86−28186
PMMA synchrotron radiation X-ray lithography system, design parameters simulations *(Japanese)* 86−15188
PMMA thin film fabrication by vapour-phase photopolymerisation 85−39819
PMMA with Kodak 809 cap two layer resist for plasma etching 87−11908
PMMA-3-nitroaniline composite films, SHG obs. 87−33272
PMMA/polymethylacrylic acid bilayer UV resist system, resolution and reproducibility 87−11852
poly(2,6-dimethylphenylene-oxide) film, ion implanted, structure-majority carrier relationships 85−18107

polymer films continued
poly(3-hexylthiophene), field-effect mobility 88−64267
poly(3-methyl-thiophene) films, micropattern generation using microlithography, design of all-organic thin-film transistor 88−19966
poly(3-methylthiophene) film as cathode-active material in nonaqueous secondary batteries 87−64783
poly(*p*-phenylene) film, cathode material in rechargeable battery, discharge characts. 86−40046
poly(butene-1-sulphone), electron beam resist, optical and electronic props. 86−14983
poly(ethylene terephthalate) film dielectric, X-ray induced photocarriers, TSC studies 85−23982
poly(fluoroaluminium phthalocyanine), electroactive, in thin layers, potential appl. in gas sensor 87−56657
poly(MMA-co-t-BMA), electron resist., electron beam sensitivity and chain scission efficiency 87−53329
poly(n-butyl α-cyanoacrylate), highly sensitive and high contrast resist for lithography 87−67032
poly(N-vinylcarbazole) films, steady state and transient photocond. 88−24825
poly(p,p′-biphenol), electropolymerised thin film, FET fabrication 88−44783
poly(p-hydroxystyrene), selective gas-phase reactive microlithographic system, mechanistic study 88−13253
poly(p-phenylene sulphide) film, ion implanted, structure-majority carrier relationships 85−18107
poly(pyrrole) film, ohmic contact with p-Si, effect of counterions on formation 86−63067
poly(vinylidene fluoride) piezoelectric props., thermal response, thermal ageing and temp. dependence 86−52540
poly p-phenylene film, electrochemical prep., elec. cond., colour 86−35376
poly-2-methylpentene-1-sulfone, X-ray resist, spectral sensitivity by X-ray excited ion mass anal. 85−34695
poly-(fluoroaluminium-phthalocyanine) film behaviour obs. in gaseous oxidising atmosphere, sensor appl. 88−47497
poly-co-QTPP films, storage type electrochromic display 87−70720
poly-N-epoxypropyl-carbazole, electrophotographic image formation, latent, physical processes 85−56410
poly-N-epoxypropylcarbazole, electrophotographic layers, photodischarge kinetics 87−46659
poly-N-methylpyrrole films, electrochromism in acetonitrile and water 85−29522
poly-N-vinylcarbazole films, electrophotographic image formation, latent, physical processes 85−56410
poly-N-vinylcarbazole photosensitive film, holographic recording characts. *(Chinese)* 85−29941
poly-N-vinylcarbazole/phthalocyanine multilayered photoreceptors, electrophotographic props. *(Japanese)* 85−18782
poly-N-vinylcarbazole/ZnCdS(Ag), double layer system, electrophotographic characts. 86−68378
poly-p-phenylene, conducting, formed from anodic oxidation of biphenyl in aprotic solvents, electrochemistry and props. 87−65584
poly-p-phenylene azomethine thin films, kinetics of iodine doping and dedoping processes 86−1758
poly-p-phenylene vinylidene thin films, optical third harmonic generation study 87−75232
poly-p-xylylene, dielectric materials, phys. and elect. props. 88−26561
poly-p-xylylene/Si MIS structure, elec. conduction 85−50304
poly-vinylidene fluoride copolymer poled guest/host composite for freq. doubling and waveguiding structs. 87−53933
polyacetylene:Br(I) films, elec. and mag. props., local dopant struct. relation 85−11971
polyacetylene:I_2 films, elec. cond., mag. field depend. 86−14873
polyacetylene:K films, doping, redox potential studies 87−17918
polyacetylene electrodes for all-plastic battery 87−43359
polyacetylene film, n-doping by ion implantation, elec. cond. studies 86−47459
polyacetylene films, glow discharge polymerisation and photoablation study 87−32416
cis-polyacetylene films, non-solitonic conductivity, DC and microwave 86−47326
n-type polyacetylene junctions, photovoltaic effect 87−53265
polyacetylene-CdZnS heterojunctions, geminate recombination processes, Onsager approach 88−12998
polyacetylene/CdS photovoltaic cell, capacity-and dark intensity-voltage characts. 86−2957
polyacrilonitrile film undercoat, laser damage threshold of deposited MgF_2 film 86−42610
polyacrylonitrile, pyrolysed films, switching study 86−28366
polyacrylonitrile butadiene styrene sensitised with LMG, TSC obs. and electrothermographic behaviour 86−28531
polyacrylonitrile film, ion implanted, structure-majority carrier relationships 85−18107
polyamic acid films, vapour deposition technique 87−302
polyamide/silicone oil composite, direct voltage breakdown with needle/plane electrode system 85−1773
polyamidoimide film, vacuum behavior 85−12451
polyaniline as the positive electrode of storagebatteries 85−60389
polyaniline films, spectroelectrochemistry, display and battery appl. 87−58267
polyazulene, electrochemically formed, rechargeable Li battery appl. 88−30980
polybutadiene dielectrics, cyclized, thermal and mech. props. *(French)* 87−65585
polycarbonate capacitor failure incident on NASA Voyager spacecraft 85−34215
polycarbonate stacked film star coupler 87−60945
polycyanoacrylate films for electron beam/deep UV resist appls. 88−64465
polydiacetylene Langmuir Blodgett films as 3D mol. electronic storage 86−1599
polydiacetylene Langmuir-Blodgett films, gate insulators in planar Si FETs 86−58617
polydiacetylene with urethane substituents, P4BCMU, negative electron beam resist, exposure chem. 88−13204
polydiacetylenes, intensity dependent refractive index, appl. to nonlinear ultrafast signal processing systems 86−3304
polydimethylglutarimide bilayer resist process for poly-Si gate lithography, optimisation 87−11911
polydimethylglutarimide bilayer resist system using contrast-enhanced lithography with water-soluble photopolymer 87−11910

polymer films continued
polydimethylglutarimide resist, progress report 87−11909
polydimethylglutarimide-based aq. developable bilayer resist system 86−1896
polydimethylsiloxane films, O plasma etching mechanism study 85−23675
polyester, dimpled, Al coated, insulation for TOPAZ supercond. solenoid cryostat 87−41721
polyester based Te TFT, plasma polymerised films on double layered gate insulators 87−60445
polyester capacitors, metallised, quality profile of range 86−1407
polyester film substrates for twisted-nematic LCDs 87−49849
polyester films, charged, return voltage obs. 87−18365
polyester films for mag. recording media 87−46353
polyester miniature ultra-thin-film capacitors, props., manufacture and life testing *(Spanish)* 87−52911
polyester PWB bar-coding label materials eval. 88−32612
polyether ether ketone films, dielec. and cond. props. 87−46267
polyetheretherketone, Ag coated, flexible optical solar reflectors 87−52221
polyetherimide, Ag coated, flexible optical solar reflectors 87−52221
polyetherimide, RF elec. props., 10 kHz to 1 MHz 87−29250
polyethersulphone transparent film substrate for a-Si solar cell 87−9749
polyethylene, ablation using 157 nm F_2 laser, direct etching studies 86−54191
polyethylene, degradation by combination of thermal ageing and γ irrad. 85−35249
polyethylene, deposition by ionised cluster beam technique 85−10806
polyethylene, high-field dielec. dissipation factor 85−32190
polyethylene, low density, surface charge decay on insulating films 88−65955
polyethylene and polyethylene/ethylene-vinylacetate copolymer laminated films, anomalous discharge currents 85−40953
polyethylene film, effect of heat-treatment and mech. stress on dielectric strength *(Korean)* 88−6534
polyethylene film, highly elongated, surface potential decay and residual voltage 87−38626
polyethylene film, N and Si incorporation, plasma implantation technique 86−53533
polyethylene film, residual voltage characts. due to trapped charge carriers 86−70184
polyethylene film, short-term elec. strength 88−64849
polyethylene film adhesion to Au surfaces 86−62261
polyethylene film insulation, dielectric breakdown in liq. nitrogen 86−47921
polyethylene film-liquid N_2 composite insulation, breakdown characts. 88−26569
polyethylene film-liquid N_2 composite system, breakdown 86−68091
polyethylene films, charged, return voltage obs. 87−18365
polyethylene films, high field dielectric loss meas. 87−6943
polyethylene films, incorporated with silicon, anomalous photovoltaic effects 88−51666
polyethylene films, low density, opposite-polarity residual voltage 86−2448
polyethylene films, residual voltage, electron irradiation effects 86−47914
polyethylene films, surface modification by corona discharge 87−25637
polyethylene films with plasma-polymerized ethylene coating for charge injection suppression 88−24826
polyethylene films-liquid N_2 composite insulation for cryogenic power cables, breakdown by partial discharge 87−6942
polyethylene lightly doped films, breakdown strength meas., injected space charge effects study 87−18385
polyethylene microporous films, sulphonated, appl. to humidity sensors 86−5196
polyethylene oxide: Li humidity sensor 85−3943
polyethylene tape/oil cable insulating system subjected to elec. and thermal stress 88−68960
polyethylene terephthalate, ablation using 157 nm F_2 laser, direct etching studies 86−54191
polyethylene terephthalate, RF elec. props., 10 kHz to 1 MHz 87−29250
polyethylene terephthalate films under limited partial discharges, irradiation effect on lifetime *(Russian)* 85−62134
polyethylene terephthalate-Al(Au) struct. props. study using space charge mapping techniques 88−50684
polyethylene thin film as window for pulsed TEA CO_2 lasers 88−51867
polyethylene thin films, low temp. plasma polymerisation *(French)* 86−13819
polyhexafluorobutylmethacrylate plasma polymerised films, X-ray resist characts. *(Japanese)* 86−1917
polyimide, ablation using 157 nm F_2 laser, direct etching studies 86−54191
polyimide, Al-Cu-Si film passivation *(Slovak)* 87−37640
polyimide, patternable coating for monolithic optoelectronic appl. 88−2150
polyimide, submicron mechanical microlithography, potential 87−25436
polyimide, surface fluorination by CF_4+O_2 reactive ion beam etching 88−39242
polyimide, VLSI interconnection 86−9267
polyimide adhered films, solvent induced crack-like defects 87−23760
polyimide and polyamide photosensitive heat resistant coating materials for IC production 85−12333
polyimide buried ridge waveguide GaAs-AlGaAs laser diode, low thermal expansion 88−34027
polyimide capacitive moisture sensor design 86−55675
polyimide coating, screen printable on Si wafers 88−33056
polyimide coating of Al metallised corrosion devices, accelerated test performance of when organic coated 87−72844
polyimide containing Au, simultaneous vapour deposition of metal and monomeric compounds for lithographic appls. 87−10502
polyimide copolymers, heat resistant dielectric film appls. 88−71832
polyimide dielectric, electron injection effects in MIS structures 86−58329
polyimide dielectric Cu thin-film multilayer interconnects for high-performance packaging 87−72858
polyimide dielectric layers for multilayer hybrid ccts. 86−53266
polyimide encapsulants, laser induced etching 87−25153
polyimide film, high-temp. stability 85−22555
polyimide film, interlevel dielectric, props., selective LPCVD of W 88−64811
polyimide film, Kapton-H, photoreceptor, photoinduced discharge characteristics 87−12295
polyimide film etching using 9.2 μm pulsed CO_2 laser radiation 86−58398
polyimide film for development of super miniaturized and ultra high density packed resistor module 88−50541
polyimide film patterning using erodible photoresist mask, VLSI fabrication appl. 87−1437
polyimide films, anisotropy of photoconduction 88−64866
polymer films continued
polyimide films, charged, return voltage obs. 87−18365
polyimide films, dielec. props., effect of equal biaxial stretching 86−68020
polyimide films, etching and physical props. 85−33527
polyimide films, ion beam induced cond., appl. to micropatterning *(French)* 88−33359
polyimide films, microwave plasma etching, anisotropy rel. to ion energy 87−25120
polyimide films, mobile ion behaviour in metal-polymer-SiO_2-Si structs. 85−40554
polyimide films, near-surface damage induced by ion beam etching 86−9033
polyimide films, Ni lines, pyrolytic laser direct writing, microelectronic fabrication 88−39265
polyimide films, patterning method using taper control layer 85−1462
polyimide films, prebreakdown currents due to filamentary thermal breakdown 88−1829
polyimide films, pulsed laser etching 86−46396
polyimide films, rubbing, molecular alignment of nematic and chiral smectic liquid crystals 88−58248
polyimide films, uniaxially-stretched, conductivity and dielec. losses 87−25624
polyimide films for insulation, properties and modifications 86−62276
polyimide films for isolation in multilevel metallisation, physical characts. comparison 87−335
polyimide films for multilayer interconnects, stability and performance study 88−1190
polyimide films in ICs, moisture diffusion 85−45782
polyimide for advanced logic/memory double metal devices, material and processing technologies 88−19840
polyimide for fine line multilayer interconnection system 88−1276
polyimide high resolution ion implantation masks, thin film surface morphology and dielec. props. study 87−38074
polyimide humidity sensor, IC compatible 86−55678
polyimide Langmuir-Blodgett film as aligning layer in ferroelectric liquid crystal cell 88−65385
polyimide Langmuir-Blodgett films, ferroelectric liquid crystal devices, electrooptic bistability 88−51582
polyimide layer for self-aligned GaAs MESFET 87−45983
polyimide lightguides, humidity monitoring 88−42026
polyimide micromachining with focused ion beams 87−25124
polyimide passivation of Al-Cu conductor stripes, electromigration failure 86−67814
polyimide paste screen printing grade for alpha-particle protection of LSI memories 86−62284
polyimide photoconductor-liq. crystal structure, efficient reversible phase recording of optical information 86−2873
polyimide PWB bar-coding label materials eval. 88−32612
polyimide resist adhesion to Si_3N_4 surfaces, improvement using pre-treatment technique 85−34848
polyimide sloped via formation by RIE 85−40645
polyimide substrates, Ni-based electroless alloy thin-film resistor, resist. adjustment and props. 86−14748
polyimide thick film high temp. polymeric materials for non-flexible substrates, expt. eval. 86−53222
polyimide thick film resistor system on insulated metal substrate, characts. 88−50428
polyimide thick-film resistors, semi-precision N_2 curing for use with ceramic Cu conductors 86−62965
polyimide thin films, interdiffusion 87−23759
polyimide with Si_3N_4, isolation enhancement 85−18476
polyimide-based capacitive humidity sensor 85−58667
polyimide-Cr films, intrinsic adhesion, XPS and TEM study 85−12221
polyimide-Cu hybrid technology 86−62979
polyimide-Si_3N_4 dual dielectric interlayer for bipolar LSI multilevel metallisation 85−6873
polyimide-SiO_2 polyimide-SiO_2 adhesion with silane coupling agents, solvent effects 86−62285
polyimide-substrate bonding studies using γ-aminopropyltriethoxysilane coupling agent 86−62283
polyimide/plasma nitride as interlayer dielec. in LPCVD W interconnection 87−67161
polyimides, microwave plasma etching in O_2+CF_4 gas mixtures, mech. 87−25121
polyimides, polarisation effects 85−23619
polyimides, RF elec. props., 10 kHz to 1 MHz 87−29250
polyimides, sloped vias by RIE 86−2287
polymer:$AgNO_3$ films, fine metal line prep. by laser reduction 85−61868
polymer:I resists using O plasma resist. of I cpds., ESCA, two-layer photolithography microfabrication system 85−55715
polymer dissolution rates meas. 85−50645
polymer films, optical, waveguide and acoustooptic props. 85−35490
polymer solder mask testing: a progress report 85−61575
polymer thick film addition to PCBs 87−53034
polymer thick-film resistors for surface mount, stabilisation 87−73805
polymer-bisazide composite system negative resist for electron beam lithography 86−28093
polymethyl isopropenyl ketone, azide dry-developable resist in electron beam lithography 85−40802
polymethylmethacrylate resist film, X-ray lithography, electron scatt. effects 85−23615
polymethylstyrene, chlorinated, negative X-ray resist for X-ray lithography 87−38048
polymide, optical passivation of epitaxial GaAs 88−32780
polyolefins with amine additives, low temp. losses, expt. study 85−1802
polyphenylacetylene films prep. by photochemical polymerisation, structure and elec. props. 88−64867
polyphosphazene photoconductive films as electrophotographic photoreceptors 87−33040
polypropylene, biaxially oriented, high energy density plastic film capacitors 86−1414
polypropylene, cold plasma treated, physicochem. characts. 85−29392
polypropylene, laser-triggered dielectric switch appl. 86−28897
polypropylene, plasma-polymer contact, effect of low-energy particles 88−24827
polypropylene based HF high-power capacitors, materials consideration 85−34218
polypropylene dielectric capacitors for snubber ccts. in GTO convertors *(Italian)* 87−45316
polypropylene film, corona charged, surface and internal charge meas. *(Chinese)* 85−37745

polymer films continued
polypropylene film, DC, AC and impulse breakdown strength temp. depend. meas. 87−18382
polypropylene film, dielec. breakdown in high temp. region 85−29357
polypropylene film, elec. breakdown in high temp. region, expt. study 86−68051
polypropylene film, elec. strength, thickness, area, and vol. depend. 88−26571
polypropylene film, influence of PDs on props. with different insulation arrangements 88−26614
polypropylene film, metallised as capacitor dielec. 86−1408
polypropylene film, nondestructive dielec. evaluation 85−35239
polypropylene film electrets, corona-charge mechanism 87−25660
polypropylene film immersed in silicone oils, interface traps and swelling 85−56029
polypropylene film-liquid insulation for HV power capacitors 86−42017
polypropylene films, biaxially oriented, thermal ageing behaviour 88−26607
polypropylene films, breakdown under DC stress, effect of impregnation 85−29358
polypropylene films, compatibility with impregnants for power capacitor appls. 85−29391
polypropylene films, electrical strength investig. *(Russian)* 88−39765
polypropylene films, impregnated with insulating liqs., ion transport, breakdown voltage mechanisms 87−18387
polypropylene films, impregnated with phenyl xylyl ethane, dielec. props. 88−64858
polypropylene films, morphology and dielec. props., impregnants effects 87−25625
polypropylene films, multifactor stress ageing 87−74471
polypropylene films, oil-impregnated, interfacial phenomena, TSC study 86−68099
polypropylene films, PD degrad. study 88−26583
polypropylene films for liq. cryst. displays, angular and spectral transmission characts. 87−18792
polypropylene films for power capacitor, test methods 87−36088
polypropylene films immersed in different ambient media, long term breakdown study 86−68050
polypropylene films in cryogenic liquids, PD streamer interaction with polymeric films 88−44928
polypropylene-impregnant interactions in all-film capacitor configs., film swelling eval. 86−67536
polypropylene/silicone oil composite, direct voltage breakdown with needle/plane electrode system 85−1773
polypyrrole, conducting polymer, gas sensor fabrication 88−9974
polypyrrole, conductive, electrochemical polymerisation, patterning on polymer film 85−33524
polypyrrole, electrochemically formed anodes, appl. in Li secondary cells 87−78881
polypyrrole, electropolymerisation and electrochem. props., $Li/LiClO_4$/polypyrrole battery appl. 88−62571
polypyrrole electrode, hole injection into organic photoconductors 88−72209
polypyrrole film cathode in secondary cell, electrochem. behaviour in $LiClO_4$-propylene carbonate 87−51437
polypyrrole film electrode for anion detection 88−22572
polypyrrole-electrolyte-polypyrrole cells, large coulombic efficiencies 86−61711
polypyrrole/Li battery, PF_6^- anion effects 87−43358
polypyrrole/Li rechargeable cells, capacity and self-discharge 87−43361
polypyrrole/$LiClO_4$/Li battery, electrochem. kinetics, film thickness depend. 88−17868
polypyrrole/p-polythiophene rectifying heterojunction, elec. characts. 86−1814
polypyrrole/polythiophene p-n junction diode, electrochemical fabrication 87−53475
polyselenophene electrochemically grown films, comp., surface morphology and elec. cond. temp. depend. studies 87−60112
polysiloxane, spin-on-glass material as a planarising layer, O_2 plasma conversion to SiO_2 86−9031
polysiloxane electron resist with high resolution 87−53583
polysiloxane film, spin-applied dielectric for multilevel metallisation 88−57504
polysiloxane plasma-polymerised passivating layer for GaAs 85−23709
polysiloxane resists, appl. to multilayer resist systems for submicron lithography 85−1446
polysiloxane spin-on interlevel dielec. material for ICs processing and performance 87−1438
polystyrene, plasma polymerised, negative electron beam resist 88−39320
polystyrene film, cylindrical conf. with air gap, dielectric study 85−56034
polystyrene film, electron thermalisation and trapping 87−18437
polystyrene glow discharge films, self-heating breakdown, effect of press. 85−29355
polystyrene resist films, ion beam and electron radiation effects 88−71478
polystyrene thin-film waveguides, Brillouin scatt. 86−9489
polystyrene-3-nitroaniline composite films, SHG obs. 87−33272
polythiophene film, FET fabrication 88−57660
polythiophene film in electrochem. color switching cells, cycle life, stability and characts. 87−33007
polythiophene thin film based FET, characts. 87−53553
polythiophene thin film FET macromolecular electronic device 87−11766
polythiophene/n-GaAs organic-on-inorganic p-n heterojunction, realisation and charactn. 87−45647
p-polythiophene/polypyrrole rectifying heterojunction, elec. characts. 86−1814
polytrimethylsilylmethylstyrene deep UV 2-layer resist system 87−11876
polyurethane coatings, integrated optics applications 88−71995
polyvinyl alcohol, films, IR hologram recording 86−42658
polyvinyl alcohol metal liftoff process facilitated by the use of contrast enhanced photolithography 87−38405
polyvinyl butyral in solar cells, discoloration in real and simulated solar environments 85−5385
polyvinyl butyral with ZnO powder, dark discharge props. 87−33041
polyvinyl carbazole thin films, plasma-CVD polymerised, photoconduction props. 87−18814
polyvinyl cinnamate, integrated optical mixer formed in waveguide on basis of anisotropic diffraction grating structures 85−7286
polyvinyl photoconductive film, glow discharge formation *(German)* 86−28967
polyvinylcarbazole film based photoreceptor, photoinduced memory effect, appl. to laser recording *(Japanese)* 87−18803
polymer films continued
polyvinylcarbazole films, trapping rate distrib., photocurrent transient spectra meas. 88−1399
polyvinyldene difluoride piezoelec. transducer, design for ultrashort acoustic pulse detection 86−6160
polyvinyledene fluoride piezoelectric membrane headphone 85−3794
polyvinylene fluoride film, nondestructive dielec. evaluation 85−35239
polyvinylidene fluoride, bioriented piezo-electric films 87−67623
polyvinylidene fluoride, ferroelectric, for thermodielec. energy conversion 86−56955
polyvinylidene fluoride, high energy density plastic film capacitors 86−1414
polyvinylidene fluoride, mech. assembled nonbonded transducer fabrication 85−9398
polyvinylidene fluoride, multitransducer platform scanning, distributed multiplexing architecture 86−53878
polyvinylidene fluoride, physical basis for piezoelectricity 85−12446
polyvinylidene fluoride, piezo film sensing devices 87−56674
polyvinylidene fluoride, piezoelectric and conductivity when doped 85−22558
polyvinylidene fluoride, piezoelectric film transducers for communications 86−56280
polyvinylidene fluoride, pressure transducers, characterisation 86−55639
polyvinylidene fluoride, pyroelectric detector 88−20718
polyvinylidene fluoride, simultaneous pyroelectric and relaxation currents meas. 87−49870
polyvinylidene fluoride, sound transducer electroacoustic efficiency 86−56279
polyvinylidene fluoride film, fission fragment irradiation, coexistent gases effects on track etching 86−60611
polyvinylidene fluoride film based fibre-optical modulator 88−51580
polyvinylidene fluoride films, electrophotographic process 87−38897
polyvinylidene fluoride films, high-field conduction and space charge 88−24828
polyvinylidene fluoride films, hydromechanical and physiological mechanical-to-electrical power converters 87−70561
polyvinylidene fluoride films, piezoelec. props., transducer appls. 85−18506
polyvinylidene fluoride films, piezoelectric, pyroelectric and ferroelectric props., conf. (Dusseldorf, Germany, Oct. 1984) 87−65032
polyvinylidene fluoride films, transducer applications 86−53848
polyvinylidene fluoride microwave field detectors, using pyroelec. effect, struct. and characts. 86−31426
polyvinylidene fluoride piezoelec. film transducer, charge output stress depend., gauge accuracy 87−21065
polyvinylidene fluoride piezoelectric film stress gauge response under impact loading 87−21064
polyvinylidene fluoride piezoelectric film uses and advantages 87−53778
polyvinylidene fluoride piezoelectric US transducer fabrication 85−4511
polyvinylidene fluoride pyroelectric electret calorimeters, highly time resolved, high sensitivity 86−55881
polyvinylidene fluoride Solef piezo- and pyroelec. films for medical transducers 85−12447
polyvinylidene fluoride thick films for large-area hydrophone arrays 86−56278
polyvinylidene fluoride thin film IR sensor 88−36008
polyvinylidene fluoride transducer, temp. compensated, for dynamic press. meas. 85−37610
polyvinylidene fluoride US transducers 87−71429
polyvinylidene transducers, MHz sound attenuation in metals, meas. at low temps. 86−53877
porous films, diffusivity and surface area meas. using SAW device 88−60989
portable conformal mask resist process with RIE development for etching Al 87−11912
protective thin film coatings by plasmapolymerization 85−61864
proton beam lithography, low energy, with thin O-etch barrier layer 85−34736
PTF assembly techniques 88−191
PTFE and related materials, storage capabilities, electret props. 88−44914
PTFE coating on quartz core, composite opt. fibre for hydrophone realisation *(Chinese)* 85−1985
PTFE layers for thin film capacitors, plasma polymerised, dielec. props. *(German)* 85−40947
PVC coating for front surface protection of Si wafers during electrolytic Au backing 85−61863
PVC films, plasticised, DC props., plasticiser elec. effects 87−18362
PVC-graphite thick films, curing and thermal cycling processes 86−13847
PVC/polypyrrole electrically conductive composite films, preparation props. study 85−28261
PVDF, piezoelec. and pyroelectric effects after poling 88−44914
PVDF, structure, piezoelectric props., film development, sensor appl. *(German)* 87−74465
PVDF concave lens design for scanning acoustic microscopy 86−6179
PVDF film, implantable physiological power supply appl. 85−15350
PVDF film, low-freq. dielec. response meas. 86−68125
PVDF films, high field poling, current limiting cct. 85−24026
PVDF piezoelec. profiles 88−26622
PVDF pyroelectric film, improved poling conditions 87−32744
PVDF transducers for robotic tactile object recognition 85−20613
PVF_2 US transducers for sensing tactile force 85−15287
PWB conformal coatings packaging and assembly materials specification guide 88−32613
PWB engineering change order implementations, wireless dry PTF process 88−1145
pyroelectric PVDF detector extension to linear array, used as image sensor 88−4441
pyrrole, photoelectrochemical polymerisation on TiO_2, appl. to conducting pattern generation 87−53315
radiation protective coatings for SiO_2 core step index fibres, fluorosilicate clad 88−33674
radiation-insensitive conducting plastics, conductivity study 85−28260
reactive ion etching, selective metal atom removal 86−35590
relative permittivity and dissipation factor meas. using fixed noncontacting electrode system 86−70199
resin coatings, UV curable, for optical fibres, attenuation and buckling props. *(Japanese)* 88−26793
resists, ion beam induced degradation, hydrogen emission 86−40798
RIE in CF_4/H_2, polymer contamination thickness meas. method 86−15042
screen printed polymer thick film technology, advantages, appls. 88−12853
sealants, effect on electrophysical characts. of Si photovoltaic modules 86−51901

polymer films continued
secondary coating of optical fibres 87−7167
semi-conductor packaging featuring copper/polyimidemultilayer tape 86−61947
semiconductor technology, polymeric coating purity testing, instrumental techniques 88−18769
semicrystalline, struct. and morphology, Raman obs. using integrated optical techniques 85−50994
silicone composite films, heat treated, ageing effect on humidity sensing characts. *(Japanese)* 86−31345
silicone oil/polymer film composite dielectric breakdown and partial discharge obs. *(Japanese)* 85−50794
single-layer polymer hybrid ICs, thermosonic Au wire bonding study 87−53080
solar cells, optical characteristics of transparent polymer covers 88−43383
SOLEF PVDF biaxially oriented film appl. to piezo- and pyroelectric transducers 88−4386
solid dye lasers, thin films waveguide type, near UV to violet range operation *(Japanese)* 85−62538
solid electrolyte/n-Si photoelectrochem. cell, charge transfer study 86−1857
solid-state battery appls. ionic cond. props. 86−66229
solid-state battery electrode/electrolyte interface deformation 86−66303
spin coating and planarization 88−13263
spin-coated thin films topography-induced thickness variation anomalies 85−50415
star coupler fabrication by stacking polymer films 88−72011
static control using electron beam radiation cured coatings 86−13850
strip waveguides, charactn. by leaky-mode spectroscopy 88−7911
substrate for a-Si:H monolithic solar cell 88−62616
surface conductivity measurements on thin polymer films, using concentric cylinder arrangement 86−31584
SWK 436 photolithographic antireflective coating material for highly reflective surfaces with topography 87−11906
tape dielectrics, development and design parameters for flexible supercond. cables 88−55029
Teflon clad As-S glass IR fibre, optical loss due to water diffusion 87−32923
Teflon clad liquid Br filled IR waveguides 88−58124
Teflon in power-MOSFETs, accelerated corrosion testing in pressure cooker at130°C 86−63066
teflon protective film for laser processing of metals 88−58751
termination method combining technologies of connector design and polymer thick film processing 86−47138
thermally stable non-photoactive antireflective coatings for use over highly reflective topography 86−1916
thermo-recording on the liquid crystalline polymers 86−9453
thermoplastic materials, information recording procedures, review *(German)* 85−7549
thermoplastic media films for holographic recording, specific noises 85−35915
thermotropic liquid crystal polymer jacket for optical fibre 86−2804
thick film IC technology materials develops. 86−27754
thick film inks, props. and appls. in SMT 88−38883
thick film inks for PCB and surface mount technology 86−47217
thick film material appls. 86−27684
thick film materials, performance anal. 88−472
thick film pastes *(German)* 86−27755
thick film resistor network development for computer signal line terminator device appl. 87−11266
thick film resistors, laser trimming 86−53229
thick film techniques for circuit board production *(Norwegian)* 88−12777
thick film technology integration with SMT 88−32692
thickness coating on metallic substrate, albedo thickness gauging 87−36828
thickness of coating on metallic components, contactless inspection in prod. line 87−36832
thin-film infrared absorber structures for advanced thermal detectors, struct. and props. 88−67793
thin-film polyimide high density high performance substrates, dielec. thickness mapping 88−25745
time-domain dielectric spectrometer, water in polymer coatings determ. 85−58846
TN-LCD using polarizers as the main body 86−31510
triacetate films for liq. cryst. displays, angular and spectral transmission characts. 87−18792
trilevel resist film, etching by Ar-H_2 plasma in high press. reactor *(French)* 86−58419
TSC phenomena effects on double-layer dielectric films, carrier interaction and interface characts. 87−25622
Ultem in power-MOSFETs, accelerated corrosion testing in pressure cooker at130°C 86−63066
ultrathin films, resists and liq. cryst. props. 88−1499
ultrathin polymeric film growth monitoring using capacitance sensor 88−53615
UV curable coating advantages and limitations 88−18768
UV curable coatings for optical fibres, stabilisation 87−7165
UV curable resin coated fibre with low-temp. and lateral props. 87−7166
UV curable resins for cabling optical fibres 87−8330
UV photodefinable polyimides, charactn. and processing of photosensitive polyimide systems 88−64472
UV solder masks as insulators for PCBs 85−61574
vinylidene fluoride trifluoroethylene copolymer film, ferroelectric, MIS memory device appl. 86−47587
vinylidene fluoride-trifluoroethylene copolymer thin films, electromech. props., US transducer fabrication 87−64004
vinylidene fluoride-trifluoroethylene piezoelectric copolymer jacketed single-mode fibers forelectric-field sensor application 87−3578
vinylidene fluoride/trifluoroethylene copolymer film, SHG of pulsed YAG laser 87−39214
VLSI polyimide interlevel dielec. layers, book contrib. 88−7675
VUV photoetching of polymer films, nonstationary theory in diffusion regime 88−13205
X-ray irradiated, latent image development by photoetching in VUV 86−21296
XLPE, thermally stimulated surface pot. meas. using temp. gradient, trapped carrier polarity 87−67645
Au mercaptoterpene metallopolymer thin films, photolytic decomp. by UV direct laser writing 87−67040
CdZnS-polyacetylene heterojunction solar cell, spectral response 88−17999
Cu-polyimide thin films, outgassing studies 87−73164
H_2 generation from optical fibre coatings UV curable acrylated resins 87−8332

polymer films continued
p-InP (polyanthraquinone)/Pt(polypyrrole) photoassisted rechargeable cell expt. 88−75904
Li-I_2 battery with supported film polymer cathodes 86−66253
Li-$LiBF_4$-poly(2,5-pyrrolylene) secondary cell current and energy efficiencies 87−64781
Li-$LiClO_4$-poly(2,5-thienylene) secondary cell current and energy efficiencies 87−64781
SF_6-impregnated, for insulation of HV apparatus 86−68088
$Si_{1-x}C_x$:H polymeric film prep., struct. and electronic props. 88−456
Zn-$Zn(Cl,Br)_2$-polyaniline battery charge storage and cycling obs. 87−64779
Zn-ZnI_2-polyaniline battery charge storage and energy efficiency obs. 87−64780
ZnO/Si polymer-coated chemical sensors, using SAW and Lamb-wave oscillators 88−47492

cured epoxy die attach adhesives, meas. and significance of extractable ionic impurities 88−471
cycloaliphatic epoxy resin, ageing, irradiation environmental conditions effect 87−18430
cycloaliphatic resins for outdoor insulation systems, environmental ageing 85−40999
D1200-M2 small diameter shield tunneling system, resin mortar lining development 86−20116
data storage media and substrates appl. 88−26746
DC motors, fluid-filled, effects of polymer additives 86−12836
DC power submarine cables, life testing of LDPE insulation under high pressure 87−15304
deep trench structures in semiconductors, polyimide filling process 87−6584
deep UV photoresist, containing Si and ortho-nitrobenzylsilylether group 88−13199
Delvin, polyacetal, insulator in surface discharge switch, charging charact. 86−47911
Delvin surface, discharge inception by cond. particles, proximity effect 85−23991
deteriorated XLPE cables testing, diagnostic device develop. *(Japanese)* 88−30373
devices with cylindrical geometry, nonlinear optical interactions 88−2382
2,5-di-(p-tolyl)-1,3,4-oxadiazole, scintillation props. *(Chinese)* 86−56045
diazonium-phenolic resin two-layer resist system utilising photoinduced interfacial insolubilisation 88−13241
diazopolysiloxanes, positive photoresists, imageable barrier layers 87−25018
die-attach epoxy adhesives for microelectronic appls. developments 86−53285
dielectric aging in constant elec. field with suppressed partial discharges *(Russian)* 87−60696
dielectric breakdown, ageing and prebreakdown theory *(French)* 86−35928
dielectric breakdown in high electric fields, mechanical model *(Rumanian)* 87−46246
dielectric charact. meas., in mm wave range 85−48064
dielectric destruction in strong elec. fields, temp. drop eval. *(Russian)* 88−64803
dielectric measurements of common polymers at millimeterwavelength range 86−11681
dielectric strength under mech. stresses *(Korean)* 86−2451
dielectrics, charge injection and transport 88−51043
dielectrics, hot electron transport and elec. breakdown 85−40971
dielectrics, polarisation effects, theoretical model and expt. results 88−51044
diffusion enhancement using microwave heating processes 88−56329
digital PWBs using fluoropolymer substrates 88−7171
distribution cables with XLPE insulation 87−4383
dodecylbenzene oil/polyethylene tape cable insulation, effect of temp. on air bubble behaviour 86−68123
dosimeters, internal heating during electrochemical etching 87−21483
dry polymer for holographic recording 88−8304
durable optical adhesives for optical components *(Japanese)* 87−34546
dye laser with 10 kHz repetition rate 88−8153
dye lasers, polymer-matrix with rotating active media, energy charact. 86−48357
dye-polymer reversible media, thermal-mechanical modeling 88−65121
dye-polymer reversible optical recording medium 88−65157
dyed polyimide color filters for LCD color TV 88−47650
dyes embedded in polymer hosts, conditions for one- and two-band lasing 88−58483
dynamic parameters measurement, vibr. transducer design 87−35042
E-beam resists, polymethacrylates appl. 86−1919
E-beam sensitization of negative resists bychloromethylation 86−1920
elastic moduli meas. using US apparatus *(Japanese)* 86−24850
electrets, appl. for pollution studies 88−54765
electrets, characterization methods and appls. 87−53779
electrets, piezoelectric, electron-beam poling 87−74460
electrets, spatial distributions of polarisation and space charge, laser intensity modulation method determ. 86−50204
electric cables, PVC insulated, interaction with fires 85−21195
electric machine epoxy resin insulation, partial discharge charact. in void 86−45325
electric machine insulation, Friedelcraft polymer, polybenzimidazole and isocyanurate oxazolidone resin compositions 86−63500
electric strength at cryogenic temps. under vacuum 85−23997
electric submersible pump cable standards and specifications preview 85−21213
electrical cond., electronic and optical device appl. 87−53222
electrical engineering materials 85−6025
electrical industry polymer materials 86−34406
electrical insulation, conf., Montreal, Canada, (June 1984) 85−27930
electrical insulation polyurethane moulding compounds radiation resistance 85−40992
electrical props. eval. of microelectronic materials, novel expt. techniques 88−56357
electrical submergible pump cables on ethylene-propylene dimethyl 88−17167
electrical tape, matching substrates material to requirements 88−51078
electrical tree resist. tests, effect of sample prep. technique 88−30391
electrically conducting polymer shields for flexible cables 88−69013
electrically conducting polymers 86−519
electrically conductive polymers and their applications 86−26927
electrically damaged, water permeation 88−51059
electro-active, developments 88−50424
electro-insulating polymer classification *(Romanian)* 88−1828
electroacoustic polymer microphones and earpieces *(German)* 87−29979
electroacoustic polymer transducers, function, appl. in telephone plant *(German)* 87−25733
electroactive, electrode appls. for nonaqueous secondary batteries 87−43365
electroactive polymers, developments 87−5529
electrochemical method prep. insulating appls. 86−66866
electrodeposited polypyrrole, conductivity meas., X-ray diffraction anal. 88−29584
electrolytes for solid state batteries 86−45646
electrolytic hygrometer for harsh environments 88−29358
electromechanical transducers for vibrotactiledisplays using polyvinylidenefluoride films *(German)* 86−9346
electron resists, high resolution lithography *(Japanese)* 86−1876

polymers continued
electronic components, conf., Washington, DC, USA (May 1985) 86−13296
electronic materials and processes, conference, Santa Clara, CA, USA (June 1987) 88−18327
electronic polymeric materials and sensor appls. *(Japanese)* 86−14833
electronics appls. 85−22559
electronics industry, surface mounting technology impact on polymers 87−6275
electrostatic charging by particle stream impact *(German)* 85−35966
electrostatic precipitators, flue gas corrosion protection using nonmetallic materials 85−19102
electrostatic probe analysis of microwave plasmas used for polymer etching 87−38131
enamelled wire, polyester or polyesterimide, thermal capability anal. for elec. machines, tests 88−55304
energy discharge capacitors, effects of dV/dt in polypropylene insulation films 87−22684
engineering applications of high-performance polymers 87−36822
engineering product design with polymers, design procedure 87−5533
enhanced oil recovery, polymer, surfactant and alkaline flooding processes 86−39277
environmental sciences, conf., Las Vegas, NV, USA (May 1985) 86−26473
EPDM insulator weathershed materials, effects of accelerated weather ageing on dielec. props. 86−68128
epoxide insulation of Tokamak coils *(French)* 85−11615
epoxide-anyl-amine addition polymers, photoelectrical and electrophotographic properties *(German)* 88−8042
epoxide-novolac block-copolymer, dielectric losses freq. and temp. depend. *(Bulgarian)* 86−21923
epoxy, insulator for electronics, ion plated metallisation *(French)* 88−32682
epoxy blob top encapsulants, phys. and elect. testing 88−24575
epoxy casting resin characts. and perform. tests for outdoor insulation use *(Japanese)* 86−61168
epoxy condenser bushings, power factor and partial discharge values after ageing 85−38541
epoxy die attach adhesive, elec. conductive, ultra-high purity, characts. and testing 86−53286
epoxy electrostatic powder-coated wire for transformers 86−2485
epoxy encapsulating materials, concurrent enthalpy recovery and curing phenomena 88−56330
epoxy encapsulation compounds, bonding enhancement to Ag thick films 86−62961
epoxy impregnated superconducting coils, prequench cracks, frictional motion 85−50884
epoxy insulating materials thermal shock resistance 85−40993
epoxy insulation, elec. ageing at elevated freq., determ. of dielectric strength 87−38595
epoxy insulation, potted, in nonuniform electric field, electrical strength *(Russian)* 87−11997
epoxy insulation based on 4,4′-isopropylidiphenol, aging in electric fields 87−53824
epoxy insulation study using X-ray computing tomograph 87−6946
epoxy joints and matrices for composites that must endurethermal cycling 86−26926
epoxy laminate, failure analysis using microsurgery 85−54578
epoxy materials for hybrid construction, long-term reliability problems 85−28264
epoxy micaceous insulation, thermal and surface degradation due to discharge 87−6945
epoxy micaceous insulations, mech. fatigue, degradation characts. 86−35944
epoxy molding compound microstructure, post-mold curing effect 88−24561
epoxy molding compounds, moisture sorption and its effects upon microstructure 88−24582
epoxy moulding compounds, characteris. using polymer reconstruction investigative chromatography 85−54152
epoxy moulding compounds, post mould curing effect microstructure 87−16714
epoxy moulding compounds, time depend. props., high temp. storage life effect 88−6575
epoxy moulding resin impregnation and crack resistance tests using partial discharge inception voltage *(Japanese)* 86−58641
epoxy moulding system for the encapsulation ofmicroelectronic devices suitable for implantation 86−38814
epoxy novolac resins impurities influence on semiconductor device reliability 87−23360
epoxy resin, curing using pulsed or continuous microwaves *(French)* 88−62774
epoxy resin, dielec. response meas. and modelling during curing 88−71828
epoxy resin, dielectric breakdown under uniform and nonuniform fields 86−21921
epoxy resin, elec. props., γ-irradiation effects 87−25712
epoxy resin, glass reinforced, for cable ducts, advantages over other materials 85−9523
epoxy resin, health hazards for cable installers *(Dutch)* 85−61012
epoxy resin, mech. stress effects on photocurrent and TSC 88−26617
epoxy resin, moisture solubility and diffusion 85−22553
epoxy resin, subjected to partial discharges, environmental testing methodology, temp. effect 88−71851
epoxy resin, thin encapsulant films, dynamic cure and diffusion monitoring 88−63396
epoxy resin, tree growth at final stage of internal partial discharge degradation 86−28535
epoxy resin, treeing inception tests using needle electrodes 87−46248
epoxy resin accelerated dicyandiamide cure mechanism 88−24821
epoxy resin adhesive for joining ceramic insulators, technical characts. *(German)* 86−18855
epoxy resin as insulation in machines, properties *(Korean)* 87−78624
epoxy resin cast insulation life testing with maximum likelihood estimation *(Chinese)* 86−66886
epoxy resin compound, transformer appls. *(Japanese)* 87−72205
epoxy resin curing, microwave processing and dielec. diagnosis in single-mode cavity applicator 88−29609
epoxy resin encapsulation, improved comps. 85−196
epoxy resin housing materials, erosion resist. to UV irrad. and surface discharges 88−64853
epoxy resin impregnation in supercond. magnets 85−41085
epoxy resin insulation of HV transformer, microbreak detection by AE 88−33441
polymers continued
epoxy resin insulators, dielec. strength and ageing 87−25723
epoxy resin insulators, quartz-filled and unfilled, surface charge decay 85−29394
epoxy resin laminates with Cu sputtered coatings, technique for improving adhesion 85−34326
epoxy resin moulded instrument transformers for outdoor use 85−60244
epoxy resin passive component encapsulation for SMT and thermal shock resistance *(French)* 88−37990
epoxy resin PD testing, H_2 diffusion in epoxy resin and epoxy/mica composites 88−69306
epoxy resin spacer, DC voltage stressed, accumulated surface charge, numerical anal. 87−67647
epoxy resin-Ag, interfacial chem. comp. 86−520
epoxy resin-C black thick film resistors, cond. channels and contact resist. *(Japanese)* 85−55327
epoxy resin-Cu, interfacial chem. comp. 86−520
epoxy resin-ferrite blends, mag. and dielec. losses, EM wave attenuation, microwave absorber appls. *(Bulgarian)* 85−1859
epoxy resin-mica insulation, slow thermoelectric breakdown mechanism study using SEM *(Hungarian)* 88−13616
epoxy resin-Ni, interfacial chem. comp. 86−520
epoxy resins, complex permitt., freq. depend. 86−68113
epoxy resins, glass transition temp. significance for fibre optic appl. 88−1957
epoxy resins, partial discharge resist., testing method 85−29399
epoxy resins, photo-hardening 85−22557
epoxy resins, space charges and dielectric ageing 86−68039
epoxy resins for PCB manufacture 88−37975
epoxy resins microvoid formation and growth under mech. and elect. stress, meas. by laser scatt. 88−64860
epoxy spacer surfaces degradation characts., electron spectroscopy obs. 85−35254
epoxy spacers, influence of X-rays on partial discharges in voids 88−24536
epoxy spacers exposed to sparks and SF_6 arcing byproducts, surface characterisation 87−25638
epoxy spacers in compressed gases, surface flashover characts. 85−24017
epoxy substrate attachment, interface integrity 85−28882
epoxy surface, discharge inception by cond. particles, proximity effect 85−23991
epoxy thermoset adhesive system, film-type die attach adhesives 88−64157
epoxy thermosetting resin substrate for computer-use optical memory disc 87−25908
epoxy trickle impregnation with solventless resin 86−66045
epoxy-based adhesives for surface mounting technology in PWB assembly 85−22251
epoxy-based thermosetting networks, elec. and thermal props., environmental degradation 88−38276
epoxy-glass laminates, flame-retardant-grade development for PCs 86−67573
epoxy-impregnated AC supercond. winding, stability 88−65114
epoxy-impregnated AC superconducting coils, characts. study 88−51403
epoxy-impregnated superconducting coils, fracture induced premature quenches 85−50883
epoxy-impregnated superconducting coils, shear stress induced epoxy fracture 85−50882
epoxy-isocyanate resins, network polymers, as insulating materials 87−53826
epoxy-resin-molded instrument transformers for outdoor use *(Japanese)* 85−27473
epoxy-tetrachloromethane mixtures, partial discharge meas., microcomputer-based system 85−37747
epoxy/polyimide die attach adhesives, comparison of microwave assisted and conventional curing 88−1196
etch-back planarisation process, uniform polymer coating technique, low molecular weight polymers 88−57503
ETFE fluoropolymer insulation standardisation for wire-wrap technology 85−6563
ETFE fluoropolymer resin, extrusion foaming 88−24819
ethylene polypropylene rubber insulated cables, DC and impulse breakdown strength props. 87−18431
ethylene vinyl acetate copolymers, treeing breakdown phenomena associated with space charge formation 85−29352
ethylene-propylene-rubber extruded cables, short and long-term performance study 86−70678
ethylene-styrene copolymer, higher breakdown strength, spectroscopy 88−20199
ethylene-styrene copolymer, insulating material, breakdown strength 87−38596
extruded medium voltage cable materials and practices in the USA, Europe and Japan, survey 87−30208
extruded polyethylene cable insulation, voltage endurance tests at cryogenic temperature 86−6358
extrusion welding of longitudinal seams in thermoplastic cable insulation 87−15325
fatigue crack growth meas., computerised data acquisition system 85−44815
ferroelectric, struct., props. and appls. 86−53841
ferroelectric applications, conf., Bethlehem, PA, USA (June 1986) 87−43773
ferroelectricity, piezoelectricity and pyroelectricity 87−67624
ferroelectricity polymers, transduction phenomena rel. to biomedical appls. 85−12448
filling compound interaction at high temp. with solid MDPE and HDPE telephone wire insulation 87−5530
film for piezoelectric transducers 86−50035
film-insulated magnet wire, heat treatment in resistance furnace using HF current 85−45266
fire resistive cables, halogen-free, splicing system based on room-temperature curing two-component resin 85−9507
flame retardant irradiated XLPE wire, super heat resistant *(Japanese)* 87−30239
flame-retardant halogen-free cables, development and characts. *(Japanese)* 85−43599
flammable atmospheres ignition electrostatic risk from nonconductors, assessment parameters 88−72486
flashover potential, surface anal. using ESCA 87−18391
flexible cable insulation for low and medium voltage range, radiation-cross-linking of elastomers 86−67547
flexible ccts., tear props., reinforcement effect 88−25637
flexible circuit design, fundamentals 85−55254
fluorinated epoxy resins for durable optical adhesive 87−59024

polymers continued
fluorinated ethylene propylene copolymers, insulating, elec. conduction, chem. structure effects 86−21924
fluoro plastic insulated cables, extrusion lines 88−54992
fluoropolymer composites, high-temp. types, technological developments 87−52220
foam encapsulants protect electronic equipment 85−10504
foamable PVDF fluoroplastic for telecommunication cables 85−57910
foils in electrical and electronic industries, charge neutralisation *(Polish)* 86−15837
Fourier transform IR microspectroscopy appl. 87−49974
French 400 kV LDPE insulated cable installations 87−30193
FRPE, flame retardant polyethylene, insulation for intra-office termination cables 85−19998
fuel cell develop. 88−17924
functionalised, technological appls., review 86−66865
generator overheating faults in insulation, detection by gas and capillary chromatography 87−15686
glass-polymer optical fibres, polymer optical props., thermal changes 86−48146
glasses for nonlinear integrated optics, thin film processing 88−1919
glassy polymers, electro-optic, for integrated optics 88−7841
halato-telechelic polymers, thermally stimulated processes, elec. cond. props. 87−18436
halogen free cable insulation, NORYL PX 1766, for fire protection *(Italian)* 87−50802
halogen-free telecommunication cables, mould growth and metal carbonate deposition 88−25601
halogenated polymer telecommunication cables, engineering approach for fire situations 85−63473
HDPE insulation antioxidants, telephone cable appls. 88−19445
heat shrinkable transition joint between HV paper and XLPE insulated cables 88−55017
heat-resistant fluoroelastomer pad development for vacuum lift conveyor system *(Japanese)* 85−39276
heat-shrink technology advances rel. to insulation appls. 88−63391
heat-shrinkable terminations for 66 kV polymeric cables 87−15358
hexafluorobutylmethacrylate-glycidylmethacrylate copolymer, positive electron and X-ray resists, highly sensitive *(Japanese)* 85−18386
high conductivity solid electrolytes: a revolution insolid state chemistry 86−26924
high field phenomena in solid insulating materials 88−26616
high resolution positive e-beam resist with dry etch durability 88−13270
high solids wire enamels based on polyester resins 88−50455
high temperature polyamide-imide for connector applications 85−12453
high-polymer insulating materials at cryogenic temps., dielectric breakdown 87−6944
high-temp.-resistant plastics 88−38818
high-temperature engineering appls. 88−31871
highly conjugated, dielec. props. 86−63478
holographic record self-amplification on photopolymers, diffusion effects *(Russian)* 88−34172
hot-line XLPE cables with water trees, diagnostic method 87−35642
humidity sensor using ionic copolymer, characts. and appls. 86−55676
HV, XPLE insulated cables, reliability information system *(Czech)* 87−35635
HV cables, insulation using paper and polymers 87−35646
HV cables, polyethylene insulation testing using resonance tester *(German)* 88−69621
HV co-axial cable in pulsed power system, polyethylene insulated, breakdown properties *(Japanese)* 87−9167
HV DC cables, LDPE and XLPE behaviour, press. wave propagation method *(French)* 88−42861
HV distribution station components, Polish materials quality and availability *(Polish)* 87−15839
HV insulating systems, histogram for partial discharge signals 86−42018
HV polymer insulation, partial discharges and electric strength at cryogenic temperatures 86−9337
HV polymer technology, appl. in electric train bushings and interiors 87−79135
HV polymeric insulated cable accessories, test methods 88−23539
HV polymeric insulated cables, terminations and jointing 87−21946
HV power cables, insulation, ageing and testing *(German)* 85−32164
HV power capacitors, develop., testing 88−62554
HV surge apparatus, establishment of rejection criteria *(Russian)* 85−32235
HV transmission lines, polymer insulators, condition assessment *(Russian)* 87−57673
HV XLPE cable manufacture with continuous catenary vulcanising tube furnace 87−50820
hybrid polymer VPI insulation system with improved properties 88−64846
hydrophone transducer materials, overview 86−52541
hydrophones, piezopolymer US, performance specifications 88−10348
hydrostatic piezoresistive effect meas. as function of temp., computer-controlled system 87−70755
2-hydroxyethyl methacrylate-methyl methacrylate copolymers, electron beam resist. study 85−1663
8-hydroxyquinolineformaldehyde, electrical cond. meas. 86−63060
8-hydroxyquinolineformaldehyde metal chelates, electrical cond. meas. 86−63060
IC, polymers in electronics 87−52222
imide polymer based bilevel and mono-level positive resist systems 86−1905
implanted cardiostimulators, polymeric insulation degradation *(Czech)* 87−14933
impregnant-polypropylene interactions in the all-film capacitor configuration 88−1049
improvements for industrial applications 85−16901
industry involvement in electronics, review 87−52223
injection-moulded thermoplastic PCBs, materials and processing considerations 88−19493
inks, processing and cct. appls. 86−52538
insulated medium-voltage cables, service experience 88−23515
insulated power cable systems state-of-the-art Swiss technology 88−75180
insulated power cables, influence of water on service performance 87−15292
insulating, elec. cond. and breakdown phenomena 87−25703
insulating, surface flashover inhibition in vac. 87−38623
insulating, vacuum-induced changes in dielec. and elec. cond. processes 87−38628
insulating contact charging in polymer/oxide/metal systems 85−61776

polymers continued
insulating foil releasement investigation using transient current anal. *(Hungarian)* 88−20193
insulating layers hybrid IC characts. 88−7238
insulating material, dielec. breakdown strength rel. to lamella struct. 87−25658
insulating material performance in salt-fog, X-ray anal. of filler dispersion 87−46272
insulating materials, AC surface flashover voltage, effect of surfactant coating 86−47883
insulating materials, return voltage build-up 88−26603
insulating materials for power overhead lines, life testing *(Russian)* 86−35946
insulating solid polymers, status and future trends 87−18428
insulation, acidic gas emissions, influence on electronic components 88−64855
insulation, dielec. breakdown, review of Japanese research 87−25630
insulation, elec. breakdown by partial discharges in liq. dielectrics 85−45913
insulation, electrical breakdown from technical view point *(German)* 86−63499
insulation, intrinsic dielec. strength concept 88−39766
insulation, water tree growth appl. of instrumental neutron activation analysis 88−13624
insulation, water treeing, failure and growth mechanisms 87−25648
insulation, water treeing, ion penetration 87−25645
insulation, water treeing and morphology 87−25643
insulation and dielec. phenomena, conf., Claymont, DE, USA (Oct. 1984) 85−32911
insulation lifetime prediction from internal electric field intensity *(Russian)* 87−67641
insulation of geophysical cables, elec. characts., storage conditions and operating factors effect *(Russian)* 85−64912
insulation tracking obs. *(Korean)* 86−47916
insulation-enclosed MV-switchgear, long term behaviour 88−24095
insulator, pre-stressed, surface flashover, ageing and breakdown expts. 88−64842
insulator, V-t characts. and elec. discharge limitation in voids 86−68107
insulators, anomalous breakdown phenomena, effect of ambient temp. 85−40966
insulators, carrier injection, space charge, and elec. breakdown 87−67612
insulators, electric and mechanical breakdown, space environment effects simulation 87−18434
insulators, nonequilib. charge carrier transport, stochastic description 87−67643
insulators, polymer type, for overhead transmission lines, arc resistance eval. *(Russian)* 86−32794
insulators, radiation effects, Japanese research 87−25706
insulators, thermal ageing, effect of humidity 86−68112
insulators for 25 kV overhead line, water ingress between glass-fibre core and coating material, failure mechanism 85−9528
insulators for nuclear power plant components environmental influence on radiation ageing 86−70755
insulators with organosilicon resin cover, electrical characts., comparison with glass and porcelain *(Russian)* 87−4419
integrated optics appl., polymer waveguide fabrication 87−12099
integrated test ccts., plastic coated, reliability/humidity testing 88−56032
intelligent sensors using polymer materials *(Japanese)* 88−42041
interactions with water and suitability for use as electrical insulators 87−60709
interconnection insulators, high performance, designing in PPS resins compounds 85−12452
internal electric field evolution in polyethylene under electric stress 88−34211
interpretation of DTA/DSC thermograms for measurement of oxidative induction time 87−5534
ion beam processing and ion implantation, conf., Boston, USA (Nov. 1983) 85−16580
ion implantation masks for semiconductor doping, B ion range 85−29120
ion implantation modification of electronic and transport props. 85−18240
ion solid-state sensors, polymer electrolyte as internal ionic bridge 88−74376
ion-beam implantation treatment of metal, glass, ceramic and polymer surfaces 85−34765
ion-implantation induced elec. cond. 85−18106
IR heat sensors based on pyroelectric polymer polyvinylidene fluoride 86−55742
isostatic polypropylene AC breakdown, temp. history influence 88−30387
isothermal charge deposition to form electrets using electret ionisation chamber 85−19082
itaconic acid derivatives, electron resists, chain scissioning yields and dry etch durabilities 85−34720
Kapton back surface for photovoltaic module, flammability 86−7074
Kapton flexible PCBs with rolled annealed Cu foil, fatigue behaviour and ductility determ. 88−19477
KLPE, surface degradation characts. when exposed to partial discharges 87−25659
Kramers-Kronig relations applied to porous epoxy 88−56364
laminated and preimpregnated materials for standard manufacturing processes of multilayer ccts. *(Italian)* 88−19519
laser damage accumulation effect, microdamage due to ionisation absorpt. wave 85−12938
laser dyes, photostability in polyurethane under light excitation of different intensities 88−40346
laser etching and deposition, basic mechanisms, review 87−25100
laser excited fluorescence probes to study insulator damage 88−20198
laser high-power UV radiation evaporation appls. 88−27256
LDPE, aged, surface cond. 88−64864
LDPE, charge motion on moist surfaces 88−51085
LDPE, electrical tree nucleation 88−26568
LDPE, field-depend. water tree growth model anal. 88−71833
LDPE, initiation mechanism of electrical tree−chain scission by injection charge and role of oxygen 88−26625
LDPE, light emission during initiation of elec. trees 85−32180
LDPE, manufacturing process influence on behaviour under elec. stress *(French)* 88−39769
LDPE, probabilistic insulation life model for combinedthermal-electrical stresses 85−56026
LDPE, space charge accumulation meas. using field probe 85−32188
LDPE, space charge distrib., manufacturing process influence 88−51087
LDPE, space charge polarisation in divergent AC field, role of atmospheric gases 87−67646

polymers continued
LDPE, thermal stimulus current and space-charge meas. under needle plane electrodes 88−1827
LDPE, tree initiation, role of polymer interface 87−18426
LDPE cable insulation, gamma irradiation degradation, residual voltage 88−5355
LDPE cable insulation, multistress ageing 88−75190
LDPE insulation, space charge distrib., field probe techniques 88−71852
lens arrays and steric GRIN polymer optical waveguides, interfacial-gel copolymerisation technique for prep. 88−26836
Lexan and Lucite, charge injection and resulting charge distribs. in commercially available polymers 88−29569
Lexan insulation, surface withstand voltage improvement in vac. 88−39768
LIGA X-ray lithographic process microstructure fabrication techniques 88−39249
light filters with specified spectral characteristics for circular polarisers, polymer 85−24355
light-sensitive polymers, imaging props. of static and Doppler 3D holograms 87−26574
linear low-density polyethylene for cable sheath *(Japanese)* 87−30238
linear polyethylene telecommunication cable jacketing grades, high performance 87−5528
linear polymers with short relaxation for telecommunication cable appls. 87−5527
liquid epoxy photopolymer for PCB photolithography 86−58161
lithographic materials for semicond. processing 86−1942
low noise type cast resin transformers for building power supply *(Japanese)* 87−72213
low-density polyethylene, carrier trapping under high field conditions, effects of absorbed water *(German)* 85−35212
low-density polyethylene films, modified, electrophysical properties *(Russian)* 87−32769
low-permittivity expanded PTFE composit laminate spurs high-speed digital processing 87−53020
LPE cable insulation, moisture concentration measurement 86−65306
lubricant MKhO-155-1 containing polymer 88−24817
Lucite, PMMA, insulator in surface discharge switch, charging charact. 86−47911
LV cable advantages of XLPE insulation and concentric neutral conductors *(French German)* 87−35648
LV switch insulation, polymer charact. and perform. *(Italian)* 86−47128
machine winding impregnation varnishes, Polish production *(Polish)* 87−12000
macromolecular self-organised assemblies, lithographic appls. 88−39311
magnet wire dissipation factor−one layer at a time 88−50452
material processing, applications of MeV ion beams 85−61840
measurement of complex coefficients for thick PVDF polymer 88−56360
MEDIS dual coated magnet wires, development, properties and applications *(Japanese)* 85−40982
medium voltage XLPE cables, water trees in service aged and accelerated aged cables 87−15297
metal acrylates, photopolymers, holographic investigations of recording mechanism 85−12996
metal organic polymer route to produce wires of Y-Ba-Cu-O superconductor 88−65006
metal-polymer-metal cells, electrochemical effects 88−55612
metal-polymer-metal systems, open-circuit voltages, effect on dielec. props. 85−40559
metallopolymers, magnetic, and amorphous magnets, properties 86−9375
α-methylstyrene-maleic anhydride copolymer, electron beam lithographic sensitivity and contrast study 85−1662
mica-epoxy insulating, multistress degradation anal. by sequential stress appl. method 86−28557
microelectronic adhesives for hermetic packages, requirements of military specification MIL-A-87172 86−62950
microelectronics, conf., Anaheim, CA, USA (Nov. 1985) 86−52131
microlithography, polymer appls. 88−70057
Microposit 1400 resist patterns, UV hardening with XeCl excimer laser 87−25022
microwave drying of polymers, technical feasibility 85−60560
microwave PCBs, thermoplastic polymer resin appls. *(Hungarian)* 86−14676
microwave substrate materials for hybrid ccts. 88−38738
MIND cables, polymeric insulation to prevent water ingress 87−15290
Mitsubishi optical data link DQ1M, DQ4M for polymer-clad silica core fibres *(Japanese)* 88−28855
MLBs, polymer-on-metal type, thermal and thermomech. charact., reliability aspects 88−38857
model polymer/Cr(Cu) interface, core level photoemission studies 86−63210
modified polymers, use in laser optics, stability, thermooptic parameters 88−26741
moisture effects on dielectric properties and water contents determ. 86−47918
moisture swelling, bending-cantilever method 85−22554
Mol Pole integrated type cast resin transformer for outdoor use *(Japanese)* 87−72212
molecular and polymeric optoelectronic materials, fundamentals and appls., conf., San Diego, CA, USA (Aug. 1986) 88−5
molecular conductors, organic semiconductors and metals, superconductors 85−1350
molecular electronics, conference, Varna, Bulgaria (Sept. 1986) 88−69994
molecular electronics, developments and research 87−1224
molecular electronics, information transfer and storage 88−71259
molecular electronics, polyelectrolyte and heterogeneous junction development *(Italian)* 86−47220
monodispersed polystyrene/Cu phthalocyanine, thermoplastic/absorbent double layer for erasable optical memory media 88−51424
monolithic polymer insulation, life testing *(Russian)* 86−9336
motors, polyester for slot and phase insulation, criteria affecting insulation choice 88−37147
moulded electronic packages, resin selection criteria 87−10177
moulding compounds and hybrid technology 87−72829
moulding compounds for large surface mounting devices, special props. 88−63061
moulding compounds for small-outline packaged devices, props. 86−62286
multi-chip packaging 87−10163
multi-layered insulation structures, field grading 88−44920
multilayer interconnection system for submicron VLSI using multilayered dielecs. of SiO and polyimide 87−25170
polymers continued
multilayer PC manufacture, thermal charact. of epoxide resins 86−14682
multilayer PCBs, differential scanning calorimetry of prepregs 87−53055
multilayer polymer film insulation, impregnated with SF_6, electrical insulating charact. determ., for power transformers 85−48994
MV distribution, insulated overhead lines *(Spanish)* 88−5371
MV XLPE insulated cables, terminations, premoulded, Termini type 88−55056
Mylar samples, charact. of EMI generated during discharge 85−24866
Nafion based photoelectrochemical cell study 86−26243
NDT, computed tomography appl. 87−16753
NDT appls. of computed tomography, basic principles 87−16752
NDT using computerised tomography, of polymeric products 86−20120
negative tone high resolution photosensitive polyimide precursor 87−44414
negative X-ray resists based on phenolic resin, acid generator, and crosslinker 88−26159
nematic liquid crystal encapsulation, for display and light control appls. 86−31509
new materials, engng. appls., microstruct., defects and materials processing 88−468
nitrocellulose, focused ion beam etching 86−35592
nitrocellulose resists, ion beam exposed, self-developing characteristics 88−1481
nitrocellulose self-developing resist for fabrication of thin film warm carrier IR laser detectors 87−29124
non-polyurethane re-enterable encapsulant compatible with both filled cable and polycarbonate connectors 88−21894
nonlinear optical materials 87−12580
nonlinear optical properties of organic molecules and crystals, book 88−62862
nonlinear organic materials, new, prospects 87−46434
nonpolar, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
nonylbenzo-hexaquinone/Li cells, redox mechanism and cycling behaviour 87−72385
novolac positive resist, process parameters for submicron electron beam lithography 88−13255
novolac resin based electron beam resist, NPR, chem. factors affecting performance 88−13247
novolac resin-type high performance positive photoresists 86−35523
novolac resins, positive photoresists, dissolution kinetics, secondary struct. model 88−13257
novolak, silyl ethers for trilevel and bilevel resist systems 86−35519
novolak based multilayer systems, use of azo dyes 87−25020
novolak based negative electron beam resist, sensitivity and resolution charactn. 88−39321
novolak design for high resolution positive photoresists 88−13251
novolak resist/PMMA aqueous processable portable conformable mask for submicron lithography 88−33099
novolak-based negative tone electron beam resist with high resolution 88−64459
novolak-based positive resist for X-ray lithography, kinetics and simulation 88−26164
novolak-based positive X-ray resist with high X-ray sensitivity 87−25008
novolak-based resist image hardening using conformable mould 86−35522
novolak/diazoquinone photoresist, reciprocity failure with 364 nm exposure 88−26111
NTT flame retardant cable sheath compound *(Japanese)* 87−66609
nuclear track detector, CR-39, sensitivity, laser-induced enhancement 86−70349
nylon, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
nylon 12 filled with $KTiO_3$ whiskers as optical fibre secondary jacketing material *(Japanese)* 87−60937
nylons, flame retardant additives to polyamides, selection criteria for elec. appls. 85−120
oil rig submersible pumps, dielectric properties of power supply cable insulation, life testing 87−35639
oil-filled motors, polymer insulated conductors, thermobarometric pressure loaded, physical properties *(Russian)* 87−25702
olefinic dielectric materials, vented water trees length distrib 87−16710
olefinic polymer for dry development, appl. to deep UV lithography 88−7405
OMTI oil, incombustible for turbogenerators properties, influence on polymer materials for stator *(Russian)* 88−11172
optical circuits, design and fabrication *(Japanese)* 88−26874
optical disc recording media, performance of organic polymeric media 86−66863
optical disc substrate, moulding compounds, minimal birefringence 87−38722
optical fiber cable gas-tight dam using resin, structural design 88−35470
optical fibre cable, nonmetallic, waterproof, with absorbent polymer ribbon 88−22135
optical fibre cables, sheath retraction 87−8329
optical fibre cables made of polymer tubes, structural design 87−8301
optical fibre development, loss mechanisms and fabrication 87−46446
optical fibre materials 87−74657
optical fibre materials and props., conf., Boston, MA, USA (Dec. 1986) 87−72706
optical fibre waveguide, quartz-polymer, backscattered signal, temp. influence 85−24326
optical fibres, polymer, anal. of molecular features for telecommunications appl. 88−39912
optical material basic props., conf., Gaithersburg, MD, USA (May 1985) 86−13294
optical materials, laser-induced damage, accumulation effect 85−7507
optical microlithography, new materials 88−7407
optical nonlinearities, fundamentals and device applications 88−7838
optical recording media, diffusion processes studied by holographic relaxometry 87−19061
optical storage, conductive polymers as active media 87−60882
optical storage, erasable bilayer dye-polymer medium 87−60881
optical waveguide fabrication, acousto-optic spectrum analyser 85−46127
optical waveguide of polymethyl methacrylate doped with benzophenone and coumarin 88−45190
optical waveguides, efficient grating coupler fabrication by reactive ion beam etching 87−60892
optical waveguides, fabrication by ion implantation 88−65308
optical-fibres, progress, props. and possible applications *(French)* 85−50906
optically nonlinear polymers for optoelectronic appls. 88−58054

piezoelectric and pyroelectric polymers, props. and appls. *(Japanese)* 87−38618
piezoelectric polymer transducers for time delay spectrometry appls., design 88−57869
piezoelectric polymers, appl. in actuators *(Japanese)* 88−5809
piezoelectric polymers, properties and applications 87−46256
piezoelectric polymers for biomedical appls., conf., Pisa, Italy (June 1983) 85−10310
piezoelectric US transducers, freq. response 88−48395
planarisation in multilayer resist schemes 86−1897
planarization layers on semiconductor surfaces, polymer material casting 85−1507
plasma etching techniques for multilayer lithography 86−2078
plasma etching with microwaves 86−21408
plasma polymer surface adhesion modification method 85−28832
plasma-developable electron-beam resists 87−45727
plastic insulated electric power cables, DC pretesting methods *(German)* 88−23493
plastic lens for photocopiers, design 87−26128
plastic substrate for high performance magneto-optical disc 88−65396
plasticised PVC containing absorbed water resorption current and open-circuit voltage obs. 85−62133
plexiglass, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
PMMA: benzil(benzildimethylketal), optical waveguide fabrication 86−2766
PMMA:Cp_2TiCl_2, depth profiles in volume phase holograms 88−58700
PMMA:Si(Be), ion beam exposure charact., Monte Carlo simulation 88−33016
PMMA, azide sensitised, photoresist for UV lithography 88−44713
PMMA, cresyl violet doped, optical fibres, fluoresc. and absorpt. 88−58148
PMMA, DC tree associated with space charge 87−67614
PMMA, dielectric loss measurement method at microwave freqs. 87−70759
PMMA, elec. field and charge profiles of electron beam irradiated polymer to breakdown 88−29571
PMMA, electrical tree initiation, role of space charges 86−68030
PMMA, electron beam irrad., Kerr electro-optic field mapping meas. 87−18388
PMMA, electron beam irrad., Kerr electro-optic field mapping meas. 87−53758
PMMA, electron beam lithography, nanometer structure patterning on Si wafers 86−21309
PMMA, exposure in bilevel resist processing using deep UV source 87−67050
PMMA, flashover form., effect of environmental contamination 86−63511
PMMA, focused ion beam etching 86−35592
PMMA, instrumented falling weight impact testing 88−49916
PMMA, interrupted insulator surface, surfactants effect on flashover 85−1772
PMMA, ion beam modification for dry etch development ion beam lithography 87−45741
PMMA, ion implantation passivation for lithography system based on dry etch develop. 86−21320
PMMA, ion resist, resolution limits and sensitivities 85−34721
PMMA, laser damage resistance improvement 85−19002
PMMA, laser damage threshold, Abel inversion of knife-edge data from radially symmetric pulsed laser beams 87−61214
PMMA, leakage current, environmental contamination effect 88−71857
PMMA, lithography with Si ions 85−18201
PMMA, masked ion beam resist exposure using grid support stencil masks 85−29075
PMMA, meas. of space-charge distrib. using pulsed electrostatic technique 88−26620
PMMA, nearly monodisperse, electron resist. contrast, sensitivity 88−13293
PMMA, negative DC surface discharges, pulse-current waveforms 85−7108
PMMA, negatively charged, electrostatic discharges 86−68037
PMMA, plastic optical fibres, for near IR transmission, prep. 87−38771
PMMA, plasticized, laser damage 86−48072
PMMA, radiation induced graft lithography, optimisation of solvent development 86−35518
PMMA, real time laser damage detect. by Strehl intensities 86−29218
PMMA, resist, self-development by synchrotron radiation exposure 88−57523
PMMA, subjected to ns pulses, impulse tree and discharge light study 85−1770
PMMA, surface discharges and flashover voltages, effect of contamination 86−68121
PMMA, trapped charge distrib. from electron irradiation, electro-optic meas. 88−51082
PMMA bilayer resist., laser writing 85−50345
PMMA elec. trees with partial discharges, understanding 88−26582
PMMA film, 0.5 μm, Si substrate, 50 nm line fabrication with 20 kV electron beam 85−55619
PMMA fringing field effects in short-circuited volume-charged dielectrics 88−29570
PMMA insulators, 45° contact angle, breakdown under HV ns excitation, role of surface charging 85−29395
PMMA ion beam resists, ion beam impact and penetration, computer simulation 86−8927
PMMA laser damage resistant plastics, appls. 85−35376
PMMA media for IR hologram recording, time and exposure charact. 86−15806
PMMA nanometer dimens., ion beam lithography using light ions 85−29258
PMMA plate, crack tip propagation measurement by pulsed holographic microscopy *(Japanese)* 87−23797
PMMA positive resists, dissolution charact. 87−74158
PMMA resin, complex dielectric constant, meas. technique using H-plane dielec. loaded resonator *(Japanese)* 85−4080
PMMA resist, fine line lithography using ion beams 85−45491
PMMA resist, ion beam exposure 85−12083
PMMA resist exposed with scanning tunnelling microscope, lift-off metallisation 88−39255
PMMA resist heating in excimer laser lithography 88−33096
PMMA resist patterning, X-ray mask fabrication using focused Ga ion beam exposure and subsequent dry etching 86−9032
PMMA resist profile simulation in electron beam lithography 88−39335
PMMA resists, for recessed gate GaAs MESFETs, poly(2-vinylpyridine) adhesion promoter 86−58355

polymers continued
PMMA sheets, insulation failure by partial discharges, model 88−26581
PMMA surfaces, predischarge current and breakdown characts. in vac. and N_2 85−23989
PMMA thick resist, III-V semicond. integrated optoelectronics, micrograting form. by HV electron beam lithography 87−18866
PMMA X-ray resist, dissolution characts. 88−33087
PMMA-azide modified photosensitive resist, azide conc. depend. 87−53328
PMMA-methyl-red solutions for hologram recording 88−34143
PMMA/W/SiO_2 submicron lithography for Si localised epitaxy, appl. to PBT fabrication 88−26170
polar, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
Polish cable insulating materials, production status and trends *(Polish)* 87−12001
Polish insulating varnish production and development trends *(Polish)* 87−11999
Polish production of electrical insulation materials *(Polish)* 87−11998
poly(1-phenyl-2.2.2-trifluoroethyl-α-chloroacrylate), high resolution positive e-beam resist with dry etch durability 88−13270
poly(2,2,2-trifluoroethyl α-chloroacrylate), high sensitivity ion resist 85−1440
poly(2,2,2-trifluoroethyl-x-chloroacrylate), electron beam resist, sensitivity enhancement using quenching 88−13250
poly(2,6-dimethyl phenylene-oxide), ion-implantation induced elec. cond. 85−18106
poly(2-methylbutadiene-1,3), material for X-ray lithography 88−44717
poly(2-vinylpyridine), adhesion promoter for PMMA resists for recessed gate GaAs MESFETs 86−58355
poly(3-butenyltrimethylsilane sulfone): a sensitive positive electron-beam resist for two-layer systems 87−11872
poly(3-butenyltrimethylsilane sulphone), positive electron beam resist for nanolithography 88−64460
poly(4-(N,N-diphenylamino-)phenyl methylmethacrylate), electrochemical doping, rectification and photovoltaic props. 87−37920
poly(4-hydroxystyrene), positive photoresists, dissolution kinetics, secondary struct. model 88−13257
poly(acetylene)/poly(N-methylpyrrole) organic heterojunction, electronic props., oxidation state depend. 85−61736
poly(alkenylsilane sulfone)s as positive electron beam resists for two-layer systems 87−17873
poly(alkyl α-cyanoacrylates), positive resist for microlithography *(French)* 85−29107
poly(alkylmethacrylate) ester:F, positive resist for microlithography *(French)* 85−29107
poly(α-methylstyrene), electron beam lithographic sensitivity and contrast study 85−1662
poly(butene-1-sulfone) resist, ion microprojection, submicron deep UV mask fabrication 86−21624
poly(butene-1-sulphone) electron beam resist, interaction of low energy electrons, insulator model 88−57522
poly(chloromethylstyrene) X-ray resist characterisation by monochromatic synchrotron radiation 85−1628
poly(dimethylsiloxane)-$LiClO_4$(10 wt.%) electrolyte in Li electrochemical solid state batteries 85−49069
poly(ethylene oxide) based photoelectrochemical cell study 86−26243
poly(ethylene oxide) superionic conductor with n-Si/polypyrrole photoelectrodes for polymer solid electrolyte photoelectrochem. cells 86−13002
poly(ethylene oxide)-$LiClO_4$ complex solid-state thermoelectrochromic display 87−63462
poly(ethylene oxide)-LiX electrolytes, (X=I or CF_3SO_3) ionic transport parameters, potentiometric meas. 87−64771
poly(glycidyl methacrylate), negative resist cross-linking in X-ray lithography 85−55631
poly(methacrylonitrile-co-methacrylic acid) cross-linked positive resist 85−61805
poly(methylphenylsilylene), electronic transport props., hopping conduction 88−1400
poly(N-vinylcarbazole), organic photoconductor, hole injection from polypyrrole electrode 88−72209
poly(p-hydroxystyrene) positive photoresist, dissolution behaviour, comparison with novolac 88−13256
poly(p-methylstyrene-co-chloromethylstyrene) resist for electron and optical lithographics 85−34718
poly(p-phenylene) anodes for nonaqueous secondary batteries 85−65423
poly(p-phenylene sulphide), ion-implantation induced elec. cond. 85−18106
poly(p-t-butyloxycarbonyloxystyrene), acid-catalysed resist for nanolithography 88−39310
poly(p-vinylbenzoate) based positive/negative mid UV resists with high thermal stability 88−13243
poly(parabromostyrene) electrosensitive negative resists for microlithography *(French)* 85−35101
poly(parachloromethylstyrene) electrosensitive negative resists for microlithography *(French)* 85−35101
poly N-methylpyrrole based MOS and MIS diodes, electrochemical prep., C-V characts. 88−71619
poly-2-isopropenylnaphthalene, chloromethylated, negative electron beam resist. 86−35514
poly-2-vinylpyridine-I_2/Li battery, rate limiting mechanism, component morphologies, SEM study 87−43354
poly-2-vinylpyridine-I_2/Li battery, rate limiting mechanism, impedance spectroscopy 87−43355
poly-4 methyl pentene-1, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
poly-4 methyl-pentene-1, dielec. meas. in MM-wavelength range 86−28529
poly-4-bromostyrene, a high performance negative electron resist 87−25019
poly-N-epoxy propylcarbazole layers sensitised by pyryl salts, electrophotographic characts. *(Russian)* 85−46249
poly-N-epoxypropylcarbazole, amorphous semiconductor, charge carrier mobility 87−46658
poly-N-epoxypropylcarbazoles, brominated, electrophotographic props. 86−28961
poly-N-methylpyrrole/In conductive-polymer/metal tunnel Schottky junction 86−41596
poly-N-vinylcarbazole, amorphous semiconductor, charge carrier mobility 87−46658
poly-N-vinylcarbazole, drift mobility enhancement by adding pyrazoline derivatives *(Japanese)* 87−46644
poly-N-vinylcarbazole as holographic recording material 87−12605
polymers continued
poly-N-vinylcarbazole derivative sensitization, electrophotography appl. *(Japanese)* 85−35589
poly-N-vinylcarbazole photoconductive polymer, charge carrier transport *(Japanese)* 85−35588
poly-N-vinylcarbazole/phthalocyanine photoreceptor, carrier transport props. *(Japanese)* 85−18783
poly-p-phenylsulphide:TCNQ, carrier mobility, doping depend. 85−61709
poly-p-xylylene-metal interface, anode effects under photoillumination 88−50687
polyacetylene:$(FeCl_4)_y$, elec. cond. under high press., temp. depend. 85−11957
polyacetylene: alkali metal, vapour phase doping process 86−53535
polyacetylene:I, non-Ohmic conduction at low temps. 86−67708
polyacetylene:K, DC cond. and semiconductor-like behaviour 86−58286
n-polyacetylene:Li, electrochem. characts., electrode appls. 85−61793
polyacetylene, cond. polymers, future generation of plastic materials *(Italian)* 86−13849
polyacetylene, conducting polymer, 1D semiconductor, nonlinear optical susceptibilities 88−72422
polyacetylene, doped, DC elec. cond. studies 87−17750
polyacetylene, hydrogenous semiconductor neutron detectors 85−26812
polyacetylene, stability and electrochemistry in aq. media 85−39187
polyacetylene anodes for nonaqueous secondary batteries 85−65423
polyacetylene batteries, large-scale 85−65420
polyacetylene battery with $LiClO_4$/PVDF solid electrolyte 85−65425
polyacetylene cathode, impedance in electrolytic solns. of Li secondary cell 87−78880
polyacetylene electrochemical electrodes in light-weight rechargeable batteries 85−5363
polyacetylene electrodes, charge-discharge behaviour 86−26264
polyacetylene solid-state batteries 86−13019
polyacetylene/Al junctions, photovoltaic spectral response, geminate recomb. 86−1816
polyacetylene/Li cell 85−27608
polyacetylene/Li solid-state battery 87−72386
trans-polyacetylene/metal contacts, O_2 effects 85−45460
polyacetylenized surface based channel electron multiplier 87−53141
polyacrylonitrile, ion-implantation induced elec. cond. 85−18106
polyacrylonitrile-based cathodes, performance in Li-I_2 solid state batteries 87−30896
polyalkyl methacrylate, negative resists, electron beam sensitivity rel. to struct. 88−13206
polyalkyl-d-cyanoacrylates, two-photon four-level hologram recording 86−54221
polyamic acid esters for polyimide patterns using photoreactive precursors 87−53340
polyamideimide, solid breakdown process and pre-breakdown current 86−28537
polyamides, flame retardant additives, selection criteria for elec. appls. 85−120
polyamidethioethers as positive electron beam resists, electron sensitivity rel. to chem. struct. 88−57549
polyamidic resin insulation materials for LV use *(Italian)* 88−13623
polyaniline, electrochemistry and appl. to rechargeable batteries 87−43363
polyaniline, fibrous, appl. as positive active material in Li secondary cells 87−78883
polyaniline anode in $LiClO_4$/propylene carbonate electrolyte, electrochemical props. 87−43362
polyaniline conductive polymer as electrode in Li secondary cell *(Japanese)* 88−43373
polyaniline on ITO/p-Si, solar cells using conductive polymer 87−51444
polyaniline secondary batteries, performance study 86−71040
polyaniline synthesis for use in Li secondary cells 87−78882
polyarylate, track effects on chemical etching 87−21462
polybenzene, positive electrode in aq. secondary batteries 86−40044
1,4-cis-polybutadiene, material for X-ray lithography 88−44717
polybutene-1-sulphone, focused ion beam etching 86−35592
polybutylmethacrylate, aC admittance and electrochemical studies of thin insulating films on metal electrodes immersed in electrolyte solutions 88−29586
polycarbonate, electrochemical etching of particle track detectors, review 85−20844
polycarbonate, molecularly doped, organic photoconductor, hole injection from polypyrrole electrode 88−72209
polycarbonate core optical fibre, automotive appl. 88−39922
polycarbonate etched track dosimeters, polymerisation optimisations 88−23130
polycarbonate magneto-optical disc substrates, birefr. change under operating environments 88−45038
polycarbonate plastic, nuclear tracks, thermal annealing 86−65386
polycarbonate recoil track detector, energy-dependent neutron sensitivity 88−36385
polycarbonate substrate, dichromated gelatin holograms, fabrication 85−41518
polycarbonate substrate, display research conf., Kobe, Japan (October 1983) 85−39417
polycarbonate substrate for magneto-optical disc, optical anisotropy effect on CNR 87−38725
polycarbonate substrates for magneto-optical disks 87−60992
polycarbonate-barrier insulation assembly, prebreakdown current pulses, surface charge densities, and flashover voltage 86−68119
polycarbonmonofluoride cathode effect on Li primary cell discharge performance *(Japanese)* 86−19443
polychlorinated biphenols in elec. engng., hazards disposal *(German)* 87−64653
polychlorinated biphenyl air contamination reduction manual 86−12192
polychlorinated biphenyl combustion by-product analysis and safety measures 86−7486
polychlorinated biphenyl risks from transformer and capacitor fires and spills 86−61572
polychlorinated biphenyl risks from transformer fires and capacitors 86−61571
polychlorinated biphenyl waste biodegradation feasibility 85−59511
polychlorinated biphenyl waste disposal manual revision 86−12879
polychlorinated biphenylene for elec. equipment insulation *(German)* 88−7772
polychlorinated dibenzofurans and polychlorinated dibenzo-p-dioxins in transformers and capacitors 88−37281
polydiacetylene, dephasing time by photon echo method 88−2189

polymers continued
polydiacetylene as optical memory and information processor 88−51429
polydiacetylene single crystal, photo-stimulated charge carrier transport 86−68379
polydiacetylene-bis-p-toluene sulphonate, fast transient photocond. 87−61025
polydiacetylenes, electronic, opto-electronic props. 88−27304
polydiacetylenes as nonlinear waveguide materials 87−12581
polydimethyl glutarimide, dopant-induced ablation by 308 nm excimer laser 88−39334
polydimethylcomethylphenyl siloxane coatings for high strength optical fibres, fast curing low-modulus 86−42335
polydithienothiofene electrode, doped, in Li batteries, electrochemical behaviour 85−60383
polyene chains in molecular electronics, soliton switching 86−67709
polyester, carbonate loaded, insulation eval. for outdoor appls. 85−1797
polyester, liquid cryst., jacket for optical fibre, strain induced during heat cycle 85−1993
polyester fibre-epoxy resin insulator, prebreakdown space charge injection meas. 87−18383
polyester film capacitors, manufacture and appls. 87−17401
polyester film capacitors, thermomechanical props. *(French)* 88−32496
polyester foam insulating systems, elec. charactn. 88−64856
polyester foam mech. and dielectric characteristics *(Italian)* 86−9338
polyester foil capacitor, miniature type with ultra-thin dielec., reliability considerations *(German)* 87−11081
polyester glass mat, insulation eval. for outdoor appls. 85−1797
polyester insulation on enamelled wire, influence of temp. and reduced press. 87−66610
polyester powder painting for public telephone equipment *(Japanese)* 85−25587
polyester resin, stress wave generation by elec. discharges in voids 87−67613
polyester resin, unsaturated dielectric loss eval. using TSC method *(Korean)* 88−7763
polyester resin and composites charactn. by DSC and TGA 86−62279
polyester resins, unsaturated, and composite technology for elec. engng., appl. of ionised radiation *(Romanian)* 87−59021
polyestheric and epoxy resins, radiothermoluminescent phenomena *(Romanian)* 88−58348
polyethelene insulation for HV cables *(Croatian)* 88−68955
polyether electrolyte batteries for electric vehicle and ambient temp. appl. 85−60400
polyether-polyurethane-$LiClO_4$ networks, ionic cond. mechanism 87−72362
polyetherimide and its application in electronics and telecommunications industries 87−5522
polyetherimide as a high performance, high density interconnect media 87−36516
polyetherimide optical solar reflector as thermal control material for long-life satellite, reliability study *(Japanese)* 87−29859
polyetherurethane coatings for high strength optical fibres, fast curing low-modulus 86−42335
polyetherurethane compounds for cable fittings in the petroleum and chemical industries *(German)* 88−18259
polyethylene, AC elec., ageing phenomena, thermally stimulated discharge current meas. 87−46270
polyethylene, ageing phenomena at cryogenic temp., SEM study 86−68109
polyethylene, ageing phenomena at cryogenic temps., SEM study 85−35215
polyethylene, breakdown strength, thermal aging effects 85−40954
polyethylene, charge storage under high DC stress, effect of impurity ions 85−35256
polyethylene, chlorinated, voltage-reversal current, ion mobilities 85−56035
polyethylene, cond. polymers, future generation of plastic materials *(Italian)* 86−13849
polyethylene, cross-linked, cable insulation, water treeing mechanisms 85−35255
polyethylene, cross-linked, cables immersed in transformer oil, treeing breakdown 86−47885
polyethylene, cross-linked, surface charging and discharging currents, effect of absorbed water 85−35261
polyethylene, cross-linking, residual voltage due to ionic space charge polarisation 86−28567
polyethylene, crosslinked, morphology influence on treeing, rel. to cable insulation 85−1799
polyethylene, crosslinked, surface, degradation patterns after exposure to partial discharges 85−29401
polyethylene, dielec. breakdown, press. and temp. depend. 85−50790
polyethylene, dielec. loss and thermoluminesc. meas, in O_3/O_2 atm. 85−41003
polyethylene, dielec. meas. in MM-wavelength range 86−28529
polyethylene, dielec. props. degradation under combined γ-irrad. and thermal stresses 88−26605
polyethylene, dynamic mechanical props. related to high speed extrusion performance, telephone cables appl. 87−5526
polyethylene, elec. ageing effects 88−64863
polyethylene, elec. breakdown and high field conduction at high temps. 86−2453
polyethylene, elec. cond., 20 to 150 °C 88−71848
polyethylene, elec. cond., elongation effect 88−51088
polyethylene, elec. cond. between conductive fluid electrodes 85−41001
polyethylene, elec. prestressing, trapping centres and morphology 86−68036
polyethylene, elec. treeing props., effect of oxide layer at metal-polymer interface 86−68034
polyethylene, elec. treeing under hydrostatic press. 85−18499
polyethylene, electrical tree initiation, microscopic image and discharge pulses 88−51047
polyethylene, electrically stressed HV power cable insulation, thermally stimulated discharge current spectra 88−55013
polyethylene, electrolum. under highly divergent field 85−29390
polyethylene, electron beam charged, space charge decay currents 87−16713
polyethylene, extruded, electrical insulation, thermal contraction and cracking at cryogenic temps. 87−1811
polyethylene, filamentary thermal breakdown, pre-breakdown current 86−2452
polyethylene, gamma irradiated, carrier traps polarity determ. by temp. gradient thermally stimulated current 88−13622
polyethylene, gaseous decomp. products due to high fields and partial internal discharges 85−35220
polyethylene, growth of electric trees 86−70687
polymers continued
polyethylene, heat treatment effect on gamma treeing stability *(Russian)* 87−74472
polyethylene, high and low density, dielec. γ relaxation 87−25623
polyethylene, high density, field-dependent injection 86−21925
polyethylene, high density, space charge, thermal pulse response 85−50808
polyethylene, high density, surface potential kinetics, trapping model 85−55988
polyethylene, high energy ion irrad., chem. changes, ESR study 88−26604
polyethylene, high-density, effect of ageing on creep tests *(German)* 87−44412
polyethylene, high-density, elec. conduction, space charge effects 86−15304
polyethylene, high-pressure differential thermal analysis/dilatometric apparatus based on an Instron capillary rheometer 87−56882
polyethylene, insulating, elec. conduction, chem, structure effects 86−21924
polyethylene, internal structure and elec. behaviour of water trees *(Korean)* 87−74454
polyethylene, irradiated and moist surfaces, elec. cond. 88−33447
polyethylene, laboratory moulded, vented water tree growth 88−20173
polyethylene, latent thermal storage for solar total energy systems *(Japanese)* 85−60436
polyethylene, long term stabilisation for telecommunication wire insulation 85−57908
polyethylene, low density, crosslinked, insulation, temp. effects 86−2454
polyethylene, low density, elec. cond., hydrostatic press. effect, rel. to breakdown mechanism 85−35260
polyethylene, low density, electric breakdown and high-field conduction meas. 87−18380
polyethylene, low density and crosslinked, for cable insulation, morphology study 85−1800
polyethylene, low density semicrystalline, elec. strength temp. depend. meas. and calcs. 87−18381
polyethylene, low-density, AC elec. treeing phenomena, ramp voltage effects 87−18378
polyethylene, low-density, elec. discharges and tree channels under impulse voltages 87−18374
polyethylene, low-density, oxidised, reversal TSC 86−28569
polyethylene, low-density, time-depend. space charge conditions and initial breakdown 85−35224
polyethylene, low-density, water tree struct., gas permeation study 85−1771
polyethylene, measurements of volume charge accumulation and decay 88−49922
polyethylene, medium-density, noncontact monitoring of cyclic loading and stress relax. by US backscatter 87−31605
polyethylene, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
polyethylene, oil production power cable insulation technological quality prediction *(Russian)* 86−33890
polyethylene, partial discharge current meas. in VLF range 86−68040
polyethylene, partial discharge detection and processing *(German)* 86−50209
polyethylene, partial discharge resist. in air and inert gases, effect of antioxidants 85−35257
polyethylene, PD meas. with automatic measuring system 88−64838
polyethylene, perform. and process eval. for telephone cable manufacture 88−53112
polyethylene, photocurrent transients 86−15303
polyethylene, prebreakdown nondestructive current pulses 85−56032
polyethylene, radiographic screen material, image quality, inherent unsharpness for 8 MV X-rays and ^{60}Co γ-rays 88−18778
polyethylene, space charge accumulation under divergent field, TSC study 86−68019
polyethylene, space charge form., needle-plane arrangement, partial discharge and TSC meas. 87−18377
polyethylene, space charges and dielectric ageing 86−68039
polyethylene, thermally stimulated depolarisation cond. and luminesc., simultaneous meas. 88−51083
polyethylene, tree initiation under square pulse conditions, space charge effect 86−28566
polyethylene, tree propag., stimulated monochannel meas. 86−68033
polyethylene, treeing inception tests using needle electrodes 87−46248
polyethylene, treeing propag. and breakdown mechanisms study 86−68046
polyethylene, void detection using Compton scattering imaging device with gamma source 88−18802
polyethylene, voltage endurance test, meas. of treeing inception time and time to breakdown 85−1796
polyethylene, water tree growth, anion penetration 87−25644
polyethylene, water tree initiation mechanisms 86−41999
polyethylene, water tree propag., influence of mol. wt. 86−68045
polyethylene, water tree propag., salt soln. effect 86−47915
polyethylene, water treeing, microcavity distrib. and prebreakdown 86−68044
polyethylene, water treeing studies in dioxane-water mixtures 85−1774
polyethylene, water treeing under DC and AC voltages 87−25642
polyethylene, water-treeing, chemical structure and additives effects 87−25646
polyethylene and CdS based electrophotographic multi-layer plates 85−56400
polyethylene and XLPE insulation treeing in HV cables 87−42469
polyethylene as solid insulation for telecommunication cables, nonmigratory antioxidants behaviour 85−57909
polyethylene cable insulation, ageing characts., elec. and IR spectra meas. 88−26606
polyethylene cable insulation, ageing process, struct. and elec. props. changes 85−38516
polyethylene cable insulation, ageing study using IR spectroscopy 86−68110
polyethylene cable insulation, nondestructive anal. using microspectrophotometry 85−29393
polyethylene cable insulation, struct. changes caused by thermal ageing 87−25720
polyethylene cable insulation, surface partial discharges effect on endurance and short-time breakdown 86−68108
polyethylene cable insulation, water-treeing formation and growth *(Hungarian)* 85−18497
polyethylene cable insulation charactn. methods 87−25718
polyethylene cable insulation containing water trees, dielec. response 85−1798
polyethylene degradation by irradiation and thermal ageing 86−28565
polyethylene electric breakdown, electrical trees inception and growth, partial discharge phenomena *(German)* 85−23998

polymers continued
polyethylene electrical treeing, effect of absorbed O 85−56027
polyethylene extrusion-moulded connection box for 154 kV underground CV cable *(Japanese)* 86−51072
polyethylene film, charge carrier mobility, time of flight investig. 86−35353
polyethylene foam insulated communication cable, relative permeability *(Russian)* 85−30843
polyethylene foam insulation, permittivity analytical description *(Russian)* 85−62135
polyethylene foils, energy and ang. distribs. for 14 MeV protons slowing down 85−31763
polyethylene HV cable impulse testing, resonant overvoltages 85−32185
polyethylene HVDC insulators in compressed-SF_6-insulated transmission lines, elec. charge accumulation 85−29372
polyethylene insulated cables, premature failure prevention *(German)* 88−36845
polyethylene insulated cables, welded joints morphology study using SEM, TEM and light microscopy 87−15324
polyethylene insulated conductors, linked, reticulation density meas. using IR spectroscopy *(German)* 86−63501
polyethylene insulated extruded cables, dielectric loss tangent meas. at cryogenic temp. 85−56037
polyethylene insulated medium and HV cables, development and manufacture in Hungary *(Hungarian)* 85−21202
polyethylene insulation, long term stability tests 88−20195
polyethylene insulation extruded for supercond. cable 86−70694
polyethylene insulation lifetime rel. to temp. and pulse frequency *(Russian)* 88−7773
polyethylene insulation of 15 kV YHAKX power cables, water treeing exam. *(Polish)* 88−5358
polyethylene insulations, for power cables, effects on performance of chemical additives *(German)* 85−53329
polyethylene insulator, prebreakdown current meas. 85−23987
polyethylene IR absorption spectra modification by elec. fields 87−25717
polyethylene jackets for VPE-insulated medium voltage cables, stresses and behaviour *(German)* 86−6363
polyethylene low-loss dielectric waveguides atten. meas. by cavity resonator 88−63832
polyethylene materials for insulating and jacketing appls. in power cables 87−42480
polyethylene model insulations, SF_6 diffusion influence on channel application time *(German)* 85−50804
polyethylene oxide lithium trifluoromethane sulphonate complex as electrolyte for Li/Nb_2O_5 cell 87−51427
polyethylene oxide-$LiCF_3SO_3$ solid electrolytes for rechargeable solid-state cells 88−49120
polyethylene oxide/n-Si semiconductor/electrolyte interface, photoelectrochem. props. 86−35473
polyethylene power cables, insulation shrinkback, cable and splice load testing 85−59736
polyethylene power cables, size effect in testing breakdown voltage 85−32184
polyethylene resistivity, ageing by partial discharges 88−71858
polyethylene sheath of submarine telecommunication cables, residual stress calc. *(French)* 85−36888
polyethylene sheathing for medium voltage cables, stresses and behaviour 85−59800
polyethylene simultaneous measurement of microscopic image and discharge pulses at the moment of electrical tree initiation 88−20200
polyethylene surface, discharge inception by cond. particles, proximity effect 85−23991
polyethylene terephthalate, XeCl laser ablation, effect of optical pulse duration, photoacoustic spectra study 87−61216
polyethylene terephthalate elec. plugs with soldered surface contacts *(German)* 87−52955
polyethylene terephthalate plug connector material, Tynite FR 530, props. for PC mounted devices *(German)* 86−27677
polyethylene water treeing and ion injection 85−32177
polyethylene water treeing using the water needle method: the influence of the magnitude of the electric field at the needle tip 88−64840
polyethylene-insulated cables, weathering props. 88−61936
polyethylene/Al_2O_3/Al system, contact charging and interfacial dipole energy 85−61776
$(polyethyleneoxide)_6LiF_3CSO_3$ solid state rechargeable Li cells, fabrication and performance 85−10090
polyethylenes, dielectric breakdown, threshold field meas. 87−18384
polyethyleneterephthalate carrier migration under cryogenic temps., radiothermoluminescence study *(Romanian)* 88−56327
polyimide, direct patterning by pulsed electron beams in soft vac. 88−13225
polyimide, etched by excimer laser, CO_2 laser cleaning of black deposits 88−20803
polyimide, etching and passivation downstream of O_2-CF_4-Ar microwave plasma 88−39215
polyimide, filamentary thermal breakdown, pre-breakdown current 86−2452
polyimide, heat treatment study 86−66867
polyimide, high resolution high photospeed, for thick film appls. 87−1374
polyimide, insulator for electronics, ion plated metallisation *(French)* 88−32682
polyimide, integrated optical waveguides for wafer scale integration 88−72148
polyimide, integration into LPCVD tungsten metallisation system 87−67145
polyimide, large area microwave plasma etching 87−60331
polyimide, photoactive, development charact. *(Japanese)* 86−28101
polyimide, photoconduction anisotropy rel. to mol. orientation 87−54163
polyimide, photodefinable, die coating, plastic-encapsulated IC, stress relief 88−64747
polyimide, photosensitive, for advanced electronic devices, material and processing technologies 88−19864
polyimide, plasma etching in O_2-carbon tetrafluoride plasma 85−50418
polyimide, reactive ion etching, mag. field enhancement 85−12174
polyimide, reactive ion etching for multilevel resist and contact hole appls. 86−21415
polyimide, siloxane, package coating material for improved moisture resistance 86−13485
polyimide, thermostable polymers, appls. for electronic devices *(French)* 87−17875
polyimide, transient current, dielec. relax. and elec. cond. meas. 88−51086
polymers continued
polyimide, via hole plasma etching optimisation for overlay interconnections 87−38139
polyimide, XeCl laser ablation, effect of optical pulse duration, photoacoustic spectra study 87−61216
polyimide adhesion behaviour to Si/SiO_2 surfaces 87−24659
polyimide adhesion to Si_3N_4, mech. and surface analytical charact. 86−21392
polyimide as negative electron resist, appl. in crossovers and metal on polymer mask fabrication 86−35515
polyimide based thick film carbon resistors for an'IMST' system 85−55187
polyimide capacitive humidity sensor for digital hygrometer 88−56766
polyimide conductive adhesive film for dicing and die bonding 87−1124
polyimide covering on field effect transistor, residual currents, polar group and metal salt effects 87−53538
polyimide dielectric for multilayer hybrid cct. fabrication 87−1119
polyimide dielectrics for high density and high speed packaging 87−37768
polyimide discoloration, failure anal. study 85−33528
polyimide etching, using quartz fibre laser beam distributor 86−28184
polyimide filters for radiation with quantum energies 0.1-1.5 keV 86−58359
polyimide flexible multilayers with acrylic adhesives, drilling and etch-back optimisation during manufacture 87−37690
polyimide flow via profiling for VLSI multilevel metallisation 87−1706
polyimide for high resolution ion implantation masking 85−23900
polyimide glue, cold-curing, for resistance strain gauges for temp. range −200 to 300°C *(Russian)* 88−74360
polyimide II, optical waveguiding 88−1920
polyimide interlevel insulation process/design limitations for discrete semiconductor devices 85−6805
polyimide laminates, cost-effective PCB appls. 86−27718
polyimide laser processing for interconnect technology for hybrid IC 88−64139
polyimide laser RIE process for etching of organic materials 85−6833
polyimide layers, contamination effects of reactive ion etching, SIMS and AES studies 86−21413
polyimide lift-off for submicron metallisation patterns 86−21455
polyimide multilayer processing for PCB manufacture 85−55268
polyimide multilayer solves surface mounting problems 85−11717
polyimide multilevel interconnect LSIs, improved moisture resist. using Al-Si metallisation 86−15091
polyimide PCB processing 86−47184
polyimide planar optical waveguides, fabrication 87−54094
polyimide polymer coating effect on residual currents of MOSFETs 85−55836
polyimide protective film for ceramic substrates 85−28831
polyimide PWBs−materials and process 86−8616
polyimide resin for IC, thermal cycle and thermal shock tests 88−63394
polyimide screened tape cable 87−6178
polyimide substrates for continuous-mode fabrication of a-Si:H solar cells 87−72438
polyimide surface, in situ anal. of H,C,N and O using direct recoil time-of-flight technique 87−24769
polyimide surface modification in H_2S plasma 87−25107
polyimide thermal insulator for on-chip gas-flow sensor with PWM output 88−60972
polyimide via hole etching in metallised ceramic polyimide processing, end-point 86−8654
polyimide wire insulation, hydrolysis temp. depend. 85−35248
polyimide WSI optical interconnections 87−68310
polyimide X-ray masks fabrication, polyamide acid methyl ester prepolymer conversion 85−33525
polyimide-insulated Cu magnet wire, electrical heating 88−11492
polyimide-insulated wire, laser 85−34227
polyimide-insulated wire for aerospace systems, environmental degradation 85−1793
polyimide-isolated three-layer metallisation system for bipolar gate arrays 86−28475
polyimide/Cr interfaces, synchrotron-radiation excited c 1s photoemission studies 86−63212
polyimide/glass base processing for PCBs 88−32628
polyimide/Si_3N_4 composite, layer via hole RIE process 86−9017
polyimide/SiO_2 system, Na ion transport, quasistatic Q-V technique meas. 85−40835
polyimides, appl. as insulators in semicond. technology 86−1943
polyimides, applications in IC fabrication and packaging cycles 85−23607
polyimides, colour filters for liquid crystal displays 88−16358
polyimides, colour filters for liquid crystal displays 88−16362
polyimides, photoimagable, semicond. industry appl. 86−2061
polyimides in hybrid circuit processing 87−6299
polyimidesiloxanes, diglyme soluble, dielec. props. and appl. 88−18770
polymephthylmethacrylates, chloromethylated, polyaromatic negative resist material *(Japanese)* 85−18196
polymer concrete insulator for power distribution 85−32210
polymer-ceramic composite piezoelectric materials *(Korean)* 87−53775
polymer-ceramic composites, piezoelec. props. and hydrophone appls. 86−47898
polymer-piezoceramic composites for US biomedical transducers 87−53782
polymer/PZT composites for medical ultrasonic probes, electromech. props. 86−68069
polymer/water interactions study using SAW delay-line oscillator 88−44942
polymeric and elastomeric insulation materials, compounding 88−33442
polymeric compounds, qualitative estimation by NMR spectroscopy 85−1791
polymeric solid-state electrochromic cell, fabrication and props. 86−58797
polymethacrylate-co-methyacrylic acid, dry-etching durable crosslinked type positive electron resist *(Japanese)* 85−18197
polymethacrylonitrile as a resist in X-ray lithography 88−39290
polymethacryloyl chloride, positive-working electron resist, dry etch resist. improvement 86−2059
polymethyl methacrylate dielectric relaxation, computer-aided meas. using unorthodox stimuli 88−36186
polymethyl methacrylate ion beam resist, light ion ranges, Monte Carlo calcs. 85−1460
polymethylmethacrylate, damage by pulse-periodic CO_2 laser radiation 85−41449
polymethylmethacrylate, treeing propag. and breakdown mechanisms study 86−68046
polymethylmethacrylate bilayer resist, electron transport studies, 30 nm scale structs. 87−38386

polymers continued
polymethylmethacrylate scintillator, active charged-particle protection of neutral-radiation detectors 87−8869
polymethylsiloxanes for electron resists, mol. wt. change under electron irrad. *(Japanese)* 86−15016
polymethylstyrene, chlorinated, dopant-induced ablation by 308 nm excimer laser 88−39334
polymethylstyrene, chlorinated, electron resist 85−34722
polymethylstyrene, chlorinated, for negative X-ray resist 86−8938
polymethylstyrene, chlorinated, negative electron beam resist., dry etching resist., electron beam resolution sensitivity 87−1365
polymethylstyrene, chlorinated, X-ray negative resist, lithographic performance 87−74159
polymethylstyrenes, halogenated, appl. to X-ray resists 88−13268
polymide, passivating layer, on GaAs MESFET 88−13415
polymide insulator, prebreakdown current meas. 85−23987
polynuclear metal complex-containing solid polymer electrolyte for solid-state electrochromic device 86−63690
polyolefin insulating materials, bow-tie and vented-tree formation 87−25647
polyolefin insulation oxidative degradation due to surface influences 87−53827
polyolefin insulators, water tree degradation, review 85−18513
polyolefin materials for telecom. cable jackets, toughness props. 88−21892
polyolefin sulphone electron beam resists, review 87−11509
polyolefinsulphone-type resist, X-ray induced reaction, oxidation effect 88−57531
polyparaphenylene, p-n$^+$ junction in implanted electroactive polymer 88−39188
Polypenco Q200.5 crosslinked polystyrene dielec. waveguide filter 87−6057
polyphenyl ether connector lubricants 88−37972
polyphenylene layers, high pretilt, appl. for liquid crystal displays 88−7994
polyphenylene oxide negative electron resist. sensitivity control *(Czech)* 87−32363
polyphenylene sulphide resin props. 88−38280
polyphenylquinoxaline, thermostable polymers, appls. for electronic devices *(French)* 87−17875
polyphosphazene-polyethylene oxide, mixed polymer electrolytes, use in rechargeable Li solid-state batteries 88−37355
polyphthalocyaninato-μ-thiagermanium (IV), photoconductivity studies 86−28952
polypropylene, dielec. meas. in MM-wavelength range 86−28529
polypropylene, dielec. props. rel. to struct. 85−35258
polypropylene, electron radiation effects on electrical and mechanical props. 88−26572
polypropylene, insulating, elec. conduction, chem, structure effects 86−21924
polypropylene, insulating dielectric, surface conductivity, moisture effects 85−45921
polypropylene, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
polypropylene, multilayered insulation structures, influence of electrode area and weight 87−25715
polypropylene, space charge form., needle-plane arrangement, partial discharge and TSC meas. 87−18377
polypropylene carbonate-based electrolyte in Li/TiS_2 cell, cycling behaviour 88−17869
polypropylene dielectric in low inductance MKV-capacitors for GTO-thyristors 86−35136
polypropylene electric strength testing using cryostat system *(Polish)* 88−26610
polypropylene film, charge carrier mobility, time of flight investig. 86−35353
polypropylene film capacitors, thermomechanical props. *(French)* 88−32496
polypropylene insulating systems, dielec. strength and time-to-breakdown 88−1820
polypropylene IR absorption spectra modification by elec. fields 87−25717
polypropylene laminated paper and applicability to EHV UHV underground cables 86−70692
polypropylene low-loss dielectric waveguides atten. meas. by cavity resonator 88−63832
polypropylene substrates with low dielectric constant for printed antennas *(French)* 88−34479
polypropylene-Al AC capacitors, Al corrosion mechanism 85−1085
polypropylene-silicone oil interface, elec. charge meas. using electroacoustic transducer technique 86−70200
polypropylene-thin metal layer capacitor, self-healing electrical breakdown, chemical processes 87−17410
polypropylene/Mylar laminate structs. impregnated with caster oil, repetitive dielec. phenomena study 86−68049
polypropylene/paper laminates as HV power cable insulation 85−32182
polypyrrole, APFIM and STM of surfaces and interfaces 88−19746
polypyrrole, conducting polymer, radiation shielding appl. 86−22718
polypyrrole, conductive polymer, in Pt-insulator-polymer-Au junction, voltage-controlled negative resistance 86−8903
polypyrrole, oxidized, conductivity and tensile strength 88−24823
polypyrrole electrode, current injection into photocond. polymers 87−18824
polypyrrole positive electrode for Li battery 88−17892
polypyrrole-polyethylene oxide composite electrode for Li rechargeable cell, cycling behaviour 87−78887
polypyrrole-rhodamine B, two-layer organic photovoltaic cell, fabrication, optoelectronic props. 88−65488
polypyrrole-Si interfacial props., AC impedance study 86−41623
polysilane, self-developing deep UV resists, photochemistry, photophysics and submicron lithography 86−1901
polysilane positive type photoresists 88−26150
polysiloxane, dry etching characts., multilayer resist processes appl. 87−11647
polysiloxane, laser damage resistant, for liquid cryst. devices 86−68345
polysiloxane-based bilevel resist system for ion-beam and electron-beam lithography 86−1891
polysiloxane-type resists for three-layer resist systems 86−1975
polysiloxanes for deep UV lithography 86−21679
polystyrene, dielectric loss measurement method at microwave freqs. 87−70759
polystyrene, flashover form., effect of environmental contamination 86−63511
polystyrene, irradiation reticulated, electrotechnical industry appl. *(Romanian)* 87−59020
polystyrene, leakage current, environmental contamination effect 88−71857
polymers continued
polystyrene, nanosecond proton and He ion pulse radiolysis studies 87−11875
polystyrene, octaethylporphin doped, picosecond time- and space-domain holography byphotochemical hole burning 86−48509
polystyrene, plastic optical fibres, for near IR transmission, prep. 87−38771
polystyrene, radiography, X-ray scatt., coupled electron/photon Monte Carlo calcs. 87−36847
polystyrene, scintillation converter of X-ray images 86−70338
polystyrene, stability under β radiation 85−31720
polystyrene, surface discharges and flashover voltages, effect of contamination 86−68121
polystyrene absorbed-dose-rate calorimeter 87−57034
polystyrene and chloromethylated polystyrene, deep UV, electron and ion beam resists, photo- and radiation chemistry 85−12093
polystyrene bead foam, removable encapsulants for electronic devices 88−18504
polystyrene cap fabrication for Si lens at mm wavelength, thermal moulding 86−10188
polystyrene EHF nonradiative dielectric waveguide 85−55100
polystyrene film capacitors, thermomechanical props. *(French)* 88−32496
polystyrene low-loss dielectric waveguides atten. meas. by cavity resonator 88−63832
polystyrene optical fibres, scintillating and fluorescent, for sensor appls. 85−62356
polystyrene recovery voltage in capacitor dielec. absorpt. and equiv. cct. 87−52902
polystyrene resin, complex dielectric constant, meas. technique using H-plane dielec. loaded resonator *(Japanese)* 85−4080
polystyrene scintillators, stabilising influence of ionising radiation on excitation energy transfer 87−57037
polystyrene spun-on waveguide, efficient grating coupler fabrication by reactive ion beam etching 87−60892
polysulfide electronic potting and encapsulating materials 86−13484
polytetrafluorethylene, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
polytetrafluoroethylene, dielec. meas. in MM-wavelength range 86−28529
polytetrafluoroethylene grafted with quaternised polyvinylpyridine, humidity-sensitive and water-resistive sensors 88−35961
polytetrafluoroethylene insulated cable for hightemperature oxygen aerospace applications 85−55216
polytetrafluoroethylene thermal conductivity meas., 5 to 310 K 88−29677
polythene, multipulse electric strength, effect of mechanical stresses *(Russian)* 88−13625
polythiophene, stable polymer cathode for electrochemical cell 85−16213
polythiophene derivatives-GaAs based electronic structures and devices 87−53264
polythiophene film photoelectrochemical solar cell 85−53822
polythiophene potentiometric humidity sensor on AgI-Ag_2MoO_4 glass substrate *(Japanese)* 88−16054
polythiophene-GaAs p-n heterojunction solar cells 86−26312
polytrimethylsilymethyl methacrylate deep UV positive resists, O reactive ion etching resistant, prep. and props. 85−55628
polyurethane, HV insulating material for spaceborne electronics, failure prevention 86−38887
polyurethane acrylate, coloured with nickel dithiobenzyl complex, as laser passive Q-switch 87−54374
polyurethane casting resin, removable encapsulants for electronic devices 88−18504
polyurethane electronic potting and encapsulating materials 86−13484
polyurethane foam insulation, breakdown performance under AC voltage stress 86−68098
polyurethane insulation, thermal and elec. aging, prebreakdown phenomena, FTIR spectra study 87−18435
polyurethane matrix laser element, dye activated, nonlinear photochem. in high intensity light fluxes 86−9779
polyurethane networks, polyethylene oxide based, containing alkali metal salts, ion cond. 88−26883
polyurethane resin subbing layer for optical disc recording medium 85−6028
polyurethane thermal and elec. ageing obs. by Fourier transform IR spectroscopy 88−20196
polyvinyl alcohol, plasticisation by polyethylene glycol, rel. to soft ferrite fabrication *(French)* 88−39798
polyvinyl alcohol surface layer induced orientation of nematics, uniformity in bias tilt 85−4050
polyvinyl butyral, polarisation effects as function of humidity 88−51045
polyvinyl carbazole, spectral sensitisation in IR range 88−33856
polyvinyl carbazole electrophotographic layers, developed colour image retention *(Russian)* 85−46252
polyvinyl carbazole material for HOEs 87−12604
polyvinyl fluoride, transduction phenomena rel. to biomedical appls. 85−12448
polyvinylcarbazole, photocond., current injection from polypyrrole electrode 87−18824
polyvinylcarbazole, photocond. meas., dispersive hole transport obs. 88−2100
polyvinylcarbazole-ZnO(RhB) system, photoconductivity study 88−51665
polyvinylferrocene electrode-active material for polymer batteries 87−58280
polyvinylidene fluoride, bulk photovoltaic effect 85−12697
polyvinylidene fluoride, elec. power output per unit vol. and mech. to elec. conversion efficiency 87−53809
polyvinylidene fluoride, ferroelec. and piezoelec. props., shock gauge and transducer appls. 87−53807
polyvinylidene fluoride, multielement electret for medical imaging 86−56112
polyvinylidene fluoride, passive IR detector 87−70641
polyvinylidene fluoride, physical basis for piezoelectricity 85−12446
polyvinylidene fluoride, piezo-, pyro- and ferroelectric props., review 87−67622
polyvinylidene fluoride, piezoelec. consts. meas., hydrophone appl. 88−12099
polyvinylidene fluoride, piezoelec. transducers, transient anal., inverse fuel Fourier transforms 88−30189
polyvinylidene fluoride, piezoelec./pyroelec. props. and appls. *(German)* 85−7117
polyvinylidene fluoride, piezoelectric coaxial cable 87−70628
polyvinylidene fluoride, piezoelectric foil electroacoustic transducers, stability 87−71431

polymers continued
polyvinylidene fluoride, polarisation field depend. derived from quasi-stationary poling currents 85−35244
polyvinylidene fluoride, solid breakdown process and pre-breakdown current 86−28537
polyvinylidene fluoride, spatial and temporal buildup of polarisation 85−35241
polyvinylidene fluoride, transduction phenomena rel. to biomedical appls. 85−12448
polyvinylidene fluoride, TSC due to space charge, effects on high field cond. and piezoelec. effect 85−35242
polyvinylidene fluoride and related copolymers, struct. and elec. props. rel. to insulation appls. 85−35259
polyvinylidene fluoride electroactive sensor cable 88−64017
polyvinylidene fluoride for hydrophone appls., mech. and piezoelec. props. 87−53808
polyvinylidene fluoride piezoelec. devices, tech. develops in Europe and USA 87−53839
polyvinylidene fluoride piezoelec. transducers for US dosimetry appls. 87−57457
polyvinylidene fluoride piezoelectric cable in acoustic sensor 87−70629
polyvinylidene fluoride piezoelectric foils for measurement of arterial pressure pulse 87−71074
polyvinylidene fluoride pyroelectric focal plane array , technology and props. 88−74476
polyvinylidene fluoride receiving array for US field measurements 87−71430
polyvinylidene fluoride sheet evaluation for large sonar arrays 87−1808
polyvinylidene fluoride shock wave sensors 87−70560
polyvinylidene fluoride transducer, comparison with PZT and capacitive transducers 85−14744
polyvinylidene fluoride transducer, hydrostatic piezoelec. const. meas. using press. pulses 85−24040
polyvinylidene fluoride transducer arrays for Braille cell appls. 87−57237
polyvinylidene fluoride transducers, design and performance 88−61690
polyvinylidene fluoride-PZT composite materials with high dielec. constants 88−39744
polyvinylidene fluoride/$LiClO_4$ solid electrolyte for polyacetylene battery 85−65425
polyvinylpyridine crosslinked with dibromobutane, humidity-sensitive and water-resistive sensors 88−35961
positive resists, ion beam exposed, develop, charcts. 88−26145
potting and encapsulating materials for electronic components 88−18503
powder level sensors for plastics/resin *(Japanese)* 87−63363
power cable, water-tree-retardant insulation, development, manufacture and performance test 87−15275
power cable insulating materials development *(Korean)* 86−18828
power cable insulation, dielectric ageing in wet locations 87−15296
power cable insulation, extruded, elec. ageing determ. using dielec. loss meas. 87−46271
power cable insulation, high density polyethylene (HDPE), dielectric breakdown strength, comparison with XLPE cables 87−21942
power cable insulation, historical survey 86−44983
power cable insulation, radiation modification using electron acceleration 88−42855
power cable XLPE insulation, treeing breakdown 86−44972
power cable XLPE insulation develop. 86−51017
power cable XLPE insulation develop. and trial, Netherlands 86−51018
power cables, halogen-free, design and construction for improved fire performance 85−32173
power cables, heat treatment in microwave electromagnetic field 85−48594
power cables, polymer insulated, testing, HV laboratory *(French German)* 88−18448
power cables, polymer insulated power cables, life testing plant in Birrfeld *(French German)* 85−59742
power cables, tree retardant XLPE insulating materials for perform. improvement 88−55023
power cables, XLPE insulated, water content meas., operating experience, Norway 86−51022
power cables, XLPE-insulated, partial discharge testing; selection of criteria 85−48595
power cables with XLPE insulation, electrical insulating materials for end couplings 87−9177
power cables with XLPE or PE insulation, short-circuit impedance nonlinearity due to Cu-wire screens 87−15282
power capacitor polypropylene insulation, DC breakdown in high-temp. region 86−45627
power capacitors, dry type, utilising polypropylene film *(French)* 86−51874
power filtering and AC capacitor types and characteristics *(French)* 88−6648
power installation insulation resistance measurement, frequency of measurements *(Polish)* 87−21930
power transformers, insulation fire situations and liquid flammability tests relationship 87−72221
prefabricated joints and terminations for 90 to 150 kV cables with polyethylene insulation 87−15361
propagating brush discharges on flexible intermediate bulk containers, compounds and coated materials, hazards 88−27409
propylene carbonate electrolyte, appl. in Li secondary cells 87−78882
propylene carbonate-$LiClO_4$, Li cycling efficiency, effects of quinoneimine dyes 86−19457
protective polymer sheath removal from fibres using polar solvents 85−50953
Proto II accelerator, low inductance diode design for imploding plasma loads, insulator breakdown 87−22627
proton-conducting polymer blends, differential scanning calorimetry and complex admittance analysis 87−70852
PTFE, electret ionisation chambers, dosimetric props. 86−56050
PTFE, insulating, elec. conduction, chem. structure effects 86−21924
PTFE, insulator for electronics, ion plated metallisation *(French)* 88−32682
PTFE advanced connectors for high speed systems 87−17454
PTFE dielectric waveguide for 18 to 100 GHz *(German)* 88−44320
PTFE EHF nonradiative dielectric waveguide 85−55100
PTFE fine powder resins, differentiation methods for stress-crack performance 88−18767
PTFE flashover, effects of glow discharge conditioning and addition of gases 86−9316
PTFE laminates, test fixtures modification for dielec. const. determ. 88−60879
PTFE latex particles, fluoresc., polarised components, appl. to optical switches 87−54112

polymers continued
PTFE microwave circuit board development, qualification problems 88−44345
PTFE substrates for microwave PCB 87−6204
PTFE-based substrates for HF strip line assemblies, bonding techniques 88−959
PTFE/electrolyte junction, photoelectrochem. solar cells, carrier trapping and recomb. 85−60435
pulsed UV curing 88−18772
PV field with $Al(OH)_3$ or al_2O_3, discharge and tracking resistance 86−21920
PVA, chemically modified surfaces, contact electrification 88−72488
PVC, flashover form., effect of environmental contamination 86−63511
PVC, leakage current, environmental contamination effect 88−71857
PVC, surface discharges and flashover voltages, effect of contamination 86−68121
PVC, unplasticised, $Al(OH)_3$ and Al_2O_3 doped, insulation tracking resistance and scintillation discharge energy correlation 85−1803
PVC and XLPE cables for LV appls., comparison 88−55019
PVC cable sheathing, stress-strain relations 86−14584
PVC cable systems, jointing and cable faults 88−36868
PVC cable-ducting in electrical installations *(Italian)* 88−42876
PVC fill for counterflow cooling towers 87−50995
PVC films, plasticised, dielectric properties and thermally stimulated currents 85−45910
PVC insulated 3.5 mm galvanised iron wire use by Kerala Telecommunications 87−13548
PVC insulated distrib. cable, electric protection system for tracking troubles 87−42482
PVC soft compound insulation fault state insulation for LV conductors and cables 87−9198
PVC-S under fluctuating load, mech. behaviour *(German)* 87−44413
PVC-Sb_2O_3 flame retardant system, thermal anal. 86−70690
PVC/electrolyte junction, photoelectrochem. solar cells, carrier trapping and recomb. 85−60435
PVC/valinomycin overlayered substrates for K^+ selective electrodes 87−35059
PVCz-pyrazoline photoconductive polymer, charge carrier transport *(Japanese)* 85−35588
PVDF, piezoelectric props. and appls. *(German)* 85−45918
PVDF broadband piezo-pressure probe for shock waves in water *(German)* 86−9347
PVDF hydrophone appls. in medical US devices 86−50767
PVDF piezoelectric film tone ringer, dynamic operation 88−57886
PVDF transducers, transient pressure fields 87−71435
PVDF transducers generating Scholte waves 88−33460
PVDF ultrasonic resonator 85−38370
PVF_2 ferroelectric polymer, electrophotographic process based on pyroelec. and photovoltaic effects *(Japanese)* 85−56403
PWB polymer multilayers for chip carrier applications 85−40298
quaternised vinylpyridine and styrene copolymers, humidity-sensitive and water-resistive sensors appl. 88−35961
radiation cross-linked high-density polyethylene, as phase change material for spacecraft thermal management 85−53117
radiation crosslinked materials deployment in electronic and electrotechnical equipment *(Polish)* 85−17003
radiation curing of polymeric materials, report on technologies 87−334
radiation sensitive polymeric imaging systems, improved sensitivity, resolution, design principles 86−41645
railgun bore insulator material selection and evaluation 87−26706
reaction injection molding process for public phone mountings 85−49350
reactive ion beam etching 88−7487
reactive ion etching of sloped vias in polyimide 86−28229
reduced emissions plenum cable telephone jacket compounds 88−21907
Reoksan, 3-D hologram as a narrow-band spectral selector 85−56873
reoxan, holographic gratings recording using copropagating beams 87−39251
reoxan 3-dimens. holographic gratings, mol. refr. and diffraction efficiency, spectral depend. 85−13002
resin, heat-resistant impregnating, insulation system for traction motors 86−66098
resin encapsulated joints for 11 kV paper insulated cable systems 87−15347
resin for chip-on-board surface mount 86−62945
resin polymer insulation for electrical/electronic appls. 88−64847
resin-level gauges using temp. and electrostatic capacitance *(Japanese)* 86−31381
resins, encapsulation materials for photovoltaic modules *(French)* 86−26651
resins, photostructural material processing, negative image form. 88−13260
resins for cable jointing, 3M-supplier of resin cable joints, recent develop. 87−42511
resist processing, mould controlled profile technique 88−13262
resistive ribbon in thermal transfer printing, elec. props., conductivity meas. 86−11678
resists, bonds, radiation effects and crosslinking 87−17885
resists, ion beam induced degradation, hydrogen emission 86−40798
resists, multilevel, organosilicon novalac resin based 85−35048
resists, plasma polymerised, synchrotron orbital radiation vacuum lithography *(Japanese)* 87−6517
resists, surface film form. by reactions of sorbed water with $TiCl_4$ 88−26148
resists bearing tetrathiafulvalene groups, UV and electron beam irrad. effects 88−26155
resists for microlithography, book contrib. 88−1502
reversals in electrical current and other anomalies in insulating polymers 87−18427
rexolite low-loss dielectric waveguides atten. meas. by cavity resonator 88−63832
RF plasma and reactive ion etching in O_2, etch anisotropy rel. to plasma parameters 85−6849
second harmonic generation in doped amorphous polymers 88−58682
semi-insulating material conductivity and characteristics 86−66234
semiconducting hetero-aromatic conjugated, narrow-band-gap class 86−67706
semiconductor, nonlinear optical and structural props. 88−65861
semiconductor polymer electrode kinetics in Li cells 87−30908
semicrystalline dielectric cable insulation, differential scanning calorimetry for analysis 86−62314
service-aged, water-treed, XLPE insulated URD cables, voltage breakdown strength, thermal load effects 87−50812
shock absorbing characteristics of high polymers *(Japanese)* 87−59022

polymers continued
shock cyclic loading test equipment 88−38307
shock loaded target, stress meas. using transverse piezoresist. gauge 87−21068
silane crosslinked insulation for medium-voltage power cables 85−15605
silane XLPE, electrical breakdown study 87−11981
silicone oil/polyethylene powder mixture, breakdown, positive point-to-plane electrode system 88−39748
silicone resin sheathed polymer line insulators, field trial results *(Russian)* 87−4424
silicone rubber insulator weathershed materials, effects of accelerated weather ageing on dielec. props. 86−68128
SMD adhesives, critical performance parameters and process requirements 88−25707
SMD packaging, selection criteria for liquid encapsulants in new microelectronic packages 88−63052
SMT laminates, resins and reinforcements for ideal 88−32574
SMT material options for PCB designs 88−44448
solar cell embedding using PMMA and acrylic rubber *(German)* 86−40095
solar collectors using polymer materials, possibilities *(Czech)* 86−7166
solar energy utilisation, polymer appls. 88−75521
solar thermal technology, material priorities and appls. 85−29519
solid insulating materials, electrical degradation processes and suppression methods *(Czech)* 86−63491
solid insulation cable manufacture, polyethylene crosslinking methods 88−36848
solid polymer electrolyte cell with heptyl viologen, electrochromic effects 87−3672
solid polymer electrolyte fuel cell developments and prospects 86−51889
solid polymer electrolyte fuel cell feasibility for road vehicle propulsion 86−40073
solid polymer electrolyte fuel cells, low Pt loading electrodes 88−49124
solid-state battery porous and composite electrode phenomena 86−66233
solid-state battery prospects and market constraints 86−66311
solid-state electrochromic cell using luteciumdiphthalocyanine 86−54006
solventless epoxy impregnation materials for motor windings *(Polish)* 87−12002
solventless UP resin impregnation of elec. machines for insulation 88−43156
South Holland 150 kV underground XLPE cable transmission system *(Dutch)* 87−50809
space charge effects on electric field strength of polymeric insulating materials *(German)* 86−28568
space charge fields meas., progress 88−29572
space-time light modulator, high resolution 88−72166
spacecraft struct., graphite/epoxy composites appl., case study 87−23757
spray insulation polymers, for current conducting busses, comparative charact. 85−40994
standard specimens for reflectivity of radiowave absorbers 85−20712
structural thermoplastics, coloring by pigment concentrates 88−33444
styrene-maleic anhydride copolymer bead foam, removable encapsulants for electronic devices 88−18504
styrylpyridinium-based high temp. photonegative resists 88−13246
substrate materials for production of high-density boards *(Italian)* 88−19483
substrates for optical discs 88−45036
SUNFLON 200 fluorinated polymer insulated flexible wires, H grade *(Japanese)* 88−68953
superdielectric polymers, nomadic polarisation 87−18358
supertwist birefringence effect display manufacture, polyimide processing technique 88−16357
surface ageing estimation from change of contact angle 87−59023
surface mounted components, polymerisation procedures *(French)* 87−17534
surface potential decay on epoxy resin 88−27406
surface treatment, cold plasma appl. *(French)* 88−31872
surface treatment by low-temp. plasma *(French)* 87−73162
suspension of chalcogenide glass in polystyrene matrix, electroradiographic recording medium appl. *(Czech)* 86−66868
synthetic, elec. insulating solid, present status and future trends 88−51080
synthetic insulation, structural and physical properties *(French)* 85−15645
synthetic polymers for insulation: PVC, butyl rubber and chloro-sulphonated polyethylene 88−20191
synthetic rod insulators, for transmission lines, laboratory and operating experiences *(Hungarian)* 85−4659
syntoflex new electrical insulating material based on polar polymer films and elastomer coatings 85−40989
TAB encapsulants curing, simulation and anal. of thermal and microwave curing 88−24580
TAS negative photoresist for bilayer resist system 85−34716
Tedlar, polarisation effects as function of humidity 88−51045
Teflon, Cu clad, elec. high-freq. interconnection performance, interface charact. 86−14636
Teflon, dielectric discharge, discrete plasma emission 85−23988
teflon, six-point reflectometer meas. 88−16437
Teflon bonded O-evolving electrodes, effect of mesh size on performance 86−19440
Teflon low-loss dielectric waveguides atten. meas. by cavity resonator 88−63832
Teflon surface interaction of at. H 88−20529
Teflon-fluorinated ethylene propylene foil, corona charging with grid, expt. study 86−68024
Teflon/glass high-speed substrate for the Cyber 205 supercomputer 85−1154
telecommunication cables, foamed fluoropolymer resins extrusion 85−57921
telecommunication cables, halogen free, low smoke, fire retardant polymeric compounds 87−5536
telecommunication cables, nonblack sheathing compounds weather resistance eval. 87−5525
telecommunication cables with monolithic polyethylene insulation, pulsed electrical strength 86−37689
telecommunication earth and 20 kV cable laying in marsh, polyethylene outer jacket tolerance *(German)* 87−21959
temperature controlled combined microwave-convection drying of polyurethane foam 87−36254
templene, absorption coeff. and refractive index meas. in submillimetre wave range 88−68048
terephthalate, electrochemical etching of particle detectors, review 85−20844
thermal- and flame-resistant EPDM insulated cables, development and characterisation, for PWR nuclear power plants *(Japanese)* 85−43607

characteristic polynomial of integer matrix, exact computation 87−65285
Chebyshev coeffs. of moments of general-order derivative of infinitely-differentiable fn. 88−38110
Chebyshev differencing operator, results about spectrum 87−44210
Chenshaw method and generalisation to Faber series 88−56176
Christoffel functions estimates of generalized Freud-type weights 86−62087
circuit function generation by polynomial reduction method *(Russian)* 85−28298
circuit simulation, expansion methods in waveform relaxation 85−33598
closest stable polynomial to unstable one, minimisation problem 88−70195
clustering, limited branching appl. 86−10481
coaxial waveguides and infinite dipoles, gap length effect on admittance 88−27552
codes, Q-polynomial association schemes *(French)* 85−57260
coding theory and multivariate polynomials 87−68979
coefficients of tree polynomials of a graph 87−16506
collocation for initial value problems based on Hermite interpolation 87−36626
collocation matrix norms, asymptotic properties 85−44647
communications networks, nonlinear synthesis 87−33954
completeness of zero curve tracing for analytic functions 87−65390
complex orthogonal and kernel polynomials, roots computing 88−31675
complex plane, polynomial approx. with conformal mapping appl. 85−49481
complex polynomial approximation by the Lanczos τ-method: Dawson's integral 88−11909
complex polynomial phase integration 85−54375
complex polynomials, stability regions for which Kharitonov like theorem holds 88−38047
complex sequences convolution calc., polynomial method 86−46248
complex zeros, numerical stability of generalised root iterations 85−327
complex-coefficient polynomial splitting technique, filtering network synthesis appl. 86−34435
complexity of evaluating interpolation polynomials 86−52396
computational accuracy in determining the sign of analgebraic quantity *(Japanese)* 86−66652

computational and applied mathematics, conf., Leuven, Belgium (July 1986) 88−11555
computer communication networks, reliability polynomials 87−27685
computer networks, bounding all-terminal reliability 88−28387
condition numbers and distance to nearest ill-posed problem 87−65378
conference key distribution system based on the Lagrange interpolating polynomial 88−53044
confluent general-factorial difference and derivative operators and polynomial-exponential interpolation 85−39653
conjugate gradient method, practical use of polynomial preconditionings 86−7691
conjugate gradient methods, polynomial preconditioning 88−70266
continued fraction expansions of rational expressions with irreducible denominators in characteristic 2 88−272
continuous-time system polynomials with uncertain complex coeffs., stability criterion 88−56172
continuous-time systems, model approx., auxiliary denominator polynomial, minimisation of integral squared error *(Korean)* 88−11821
continuous-time systems and signals, concurrent numerical representation 88−3123
continuously imbedded Runge Kutta methods, stability 87−65420
convergence and divergence of Bairstow's method 87−36635
convergence of interpolatory product integration rules 86−46276
convergence of linear multistep methods with multipleroots 86−34208
convergence order of accelerated root iterations 85−325
converse rule of signs for polynomials 85−54347
convolution characterisation of polynomial splines 87−10296
convolution of signals calculation, modification of polynomial method 88−21189
convolutions, 2D, by means of number theoretic transforms over residue class polynomial rings 85−2815
corona power losses approximation using power function and fourth order polynomial *(Russian)* 86−61150
correlated or coherent signal and interference, optimum beamforming, polynomial approach 87−62116
cosine transform, fast algorithm, based on successive order reduction of Chebyshev polynomial 87−232
CRC polynomials, error detecting capabilities 86−68977
cryptology, polynomial and one-way functions *(German)* 88−45882
cryptosystems based on polynomials and finite fields *(Dutch)* 87−69008
cubature formula which are exact on spaces P, intermediate between P_k and $Q_{k'}$ 87−5372
cubic fields, totally real, with discriminant $D<10^7$ 88−49702
curve fitting, exact, BASIC program 85−28165
cyclic code spacing, algebraic calc. *(Russian)* 87−39657
cyclotomic polynomials, integer factoring methods 86−19999
cylindrical algebraic decomposition 85−16886
cylindrical algebraic decomposition 85−16887
decomposition solns., convergence region 85−22413
defect correction from a Galerkin viewpoint 88−56179
definiteness test for Hankel matrices and their lower submatrices 87−72983
delay-less nonlinear element, amplitude characts. 87−61900
density and complexity of polynomial coresfor intractable sets 86−66763
derivative generation from multivariate scattered databy functional minimization 86−19974
determinant and characteristic polynomial of matrix computation 88−63226
diagonally weighted conformal mapping, polynomial matrix spectral factorisation using Z-plane methods 86−19883
dielectrics, elec. fields, computer calc. 87−26611
digital communication systems, number theory and polynomial algebra appl. *(Italian)* 86−19885
digital filters, 3-D, symmetry results 86−67403
digital filters, multidimensional, BIBO stabilisation considerations 86−62766
digital filters, root locations of 2-D polynomials 86−52956
digital filters, stabilization of 2-D systems and characteristic polynomial assignment 87−69242
digital least-squares polynomial filters for initial point and slope estimation 85−28643
digital signal H(z) freq. response programs, FFT vs. real argument polynomial algorithms 87−69223
digital signature scheme based on polynomialoperations *(Japanese)* 85−57270
digital signature scheme based on polynomialoperations 86−68990
digitised curve recognition and charact. 87−47944
diophantine eqn. solution 86−62132
diophantine equation solution, resultant matrix approach 85−54230
direct sequence spread-spectrum communications, rapid acquisition technique 85−14092
directed graph edge disjoint paths, polynomial time algorithm for second shortest k-tuple determ. 88−18588
Dirichlet series and integrals associated with apolynomial with two indeterminates *(French)* 86−46198
discrete cosine transform, fast algorithm, successive order reduction of Tchebycheff polynomial *(Japanese)* 85−39607
discrete cosine transform algorithms, suitable for VLSI implementation 87−62060
discrete Laplace transformation, fast algorithm 88−49616
discrete scattering Hurwitz polynomials 85−25093
discrete sine transform algorithm based on successive order reduction of polynomial *(Japanese)* 86−34110
discrete time delay system, efficient simultaneous derivative estimation 87−47800
discrete-time filters, comparison between stability criteria 88−66471
discriminant computing of algebraic number field 86−26770
discriminants and the irreducibility of a class of polynomials in a finite field of arbitrary characteristic 88−38076
discriminants and the irreducibility of a glass of polynomials 87−65280
disjunctive normal form conversion of Boolean function into canonical Zhegalkin polynomial 86−8099
distributed arithmetic implementation of the DCT for real time photovideotex on ISDN 88−25260
distribution function of positive definitequadratic forms in normal random variables 86−46257
divisor generating functions and insertion into a heap 87−72985
divisors of polynomial over GF(2) 87−65278
Dolph-Chebyshev beamforming, matrix formulation 87−26929
doubly-terminated multivariable network synthesis using polynomial partial derivatives 85−40159
polynomials continued
dual polynomial approximation scheme for scheduling 86−19998
dyadic calculus with fractional order derivatives 87−31439
ECCs, algebra and algorithmics, conf., Toulouse, France (Oct. 1984) 87−65081
ECG baseline drift, cubic spline, polynomial and rational function approximations 85−28163
edge enhancement algorithm using a polynomial transformation 87−13070
electric circuit CAD, Laguerre polynomials expanded into series *(Russian)* 87−36872
electric polarisabilities of small apertures, polynomial approx. 86−68732
electric power generation schedule optimisation, analytical approach 87−29993
electronic equipment testing using polynomial-shaped meas. signals 85−33163
electrostatic field distrib., approx. using Chebyshev polynomials *(Polish)* 86−3429
electrostatic field model, algebraic eqn. soln. 87−54478
electrostatic interpretation iterative method for finding roots of polynomials *(Japanese)* 88−65950
elementary algebraic representation of polynomialspline interpolants for equidistant lattices and itscondition 86−62115
elementary functions evaluation with Chebyshev polynomials on pipeline nets 87−58856
EM field sources distribution, quadrature for integral eqns. *(Russian)* 88−40453
EM theory, conjugate gradient method reln. with polynomials orthogonal over spectrum of linear operator 88−14328
EM wave propag., beam modes, conventional and complex *(Japanese)* 86−29347
EM wave scattering from metallic circular discs, entire domain Galerkin formulation 88−72529
engineering problems, numerical soln. based on finite elements 85−334
enumeration of labelled threshold graphs and a theorem of Frobenius involving Eulerian polynomials 87−72923
equations, finding all solns using homotopy 85−39662
equispaced arguments, exponential evaluation 88−6339
error bounds computation for eigenpairs using precise scalar product 87−36645
error estimates for least squares approximation by polynomials 85−10632
error estimates for spline interpolants of odd degree on equidistant grids 85−322
error estimates for spline interpolants on equidistant grids 85−323
explicit evaluation of total variations of Fourier series approximations to functions of finite variation *(Japanese)* 87−72992
explicit formula for the general bilinear transformation of polynomials with its application 88−50267
explicit nearly optimal linear rational approximation withpreassigned poles 86−66769
exponential eqns., convergence of methods for simultaneous root finding 85−44636
extended Euclidean algorithm, matrix Pade approximants, Pascal procedure 88−70251
extended Jacobi polynomials, differential-difference props. 85−49519
Faber methods in numerical approximation 87−31440
factorisation and nonrandomness of bits of algebraic and some transcendental nos. 88−38081
factorisation of prime polynomials 86−19973
factorisation over Z(X) 87−65287
fast biased polynomial transforms 86−40695
fast Hensel's lifting implementation using partialfraction decomposition 86−40601
fast polynomial approx. algorithm 87−58855
fault escape in self-testing elimination, by polynomial division 85−33819
fault tolerant systolic arrays with linear cells 87−37202
FB320, Forth digital signal processing board 88−53588
FEM, high-order local convergence rate by mesh refinement 86−7709
filter design using transformed variables, polynomial operations concept 86−57923
filter impulse response, time domain synthesis using TBT polynomials *(Japanese)* 85−903
finite fields, polynomials with small value set 88−31641
FIR digital filter design using prefilters based on Chebyshev polynomials 86−62740
FIR digital filtering, efficient prefiltering techniques 88−19280
FIR digital filtering, high speed 1D architectures using polynomial convolution 87−59777
FIR digital filters, interpolated type based on cyclotomic polynomials, design procedure 88−19281
FIR digital filters, ultraspherical window 86−57996
FIR filter structs., multiplierless, based on running sums and cyclotomic polynomials 87−45108
FIR filters, maximally flat, design using Bernstein polynomial 88−25335
forecasting error anal. using least squares method *(Russian)* 87−16530
forward and backward autoregressive models, matrix polynomial computation 85−10569
four-terminal network, matrix parameters as rational fns. *(Russian)* 86−13943
Fourier analysis, conf., El Escorial, Spain (July 1983) 86−61865
Fresnel integrals, rational approxs. 85−49520
functional evaluation algorithm, high speed *(Chinese)* 87−72976
Galerkin method, convergence, for non-compact integral operator eqns. 87−73030
Galerkin method, superconvergence by average gradients using polynomials 87−44202
Galois groups computing of a polynomial over Q 86−62136
Galois groups computing over rationals 86−19994
Galois theory, computational methods for constructive theory 88−70196
Gauss-Hermite quadrature formula, abscissae and weights 88−31667
Gaussian blur and the heat equation 86−4061
Gaussian periods and cyclic units 88−49698
GCD computations, systolic VLSI arrays 85−832
general algorithm for the development of detailed algorithms for the extraction of integer roots 88−56173
general bilinear transformation, explicit formula, appls. *(Spanish)* 87−69235
general order derivative Chebyshev coefficients 88−18631
generalised, solution of $ax+by=d$ 85−54229
generalised Bessel polynomials, open problems 85−6104

polynomials continued
generalised cross validation, asymptotic props. of complete smoothing splines 88−31677
generalised Goppa codes, cyclicity in terms of Lagrange's interpolation polynomials 86−43157
generalised invariant polynomials and generalised companion form 87−36558
generalised stability criterion, general proof using cct. theory based approach *(German)* 87−65797
generalized Hermite polynomials and estimation of kernels for discrete *I/O* Wiener models 88−49608
geometric algorithm nonsolvability, appl. of factoring polynomials 86−57377
Gilmore-Gomory travelling salesman problem recognition 86−62083
global descent method for polynomials 85−22375
globally minimizing polynomials without evaluatingderivatives 86−348
Goldbach 3-primes theorem for polynomials of low degree over finite fields of characteristic 2 88−70232
Goppa codes, decoding method *(Japanese)* 88−59030
graded structures theory 86−57378
graph charact. equations 85−33286
graph theory, plane multicommodity flows and shortest paths *(Japanese)* 85−39641
graphs, matching polynomials, matrix approach 86−66705
grey-level images polynomial representations 88−66665
Grobner bases using SAC2 86−62127
half-plane 2-D digital systems, stability 86−35033
Hamming schemes, nonexistence of perfect e-codes and tight 2e-designs 86−66692
Hansel-code conversion problem 86−62131
harmonic generation with specified amplitudetransformation 86−62082
harmonic retrieval problem, perturbation anal. of SVD based method 86−10442
Helmholtz eqn., combined FEM-macro element solns. 87−5382
Hensel code conversion problem soln. 87−47508
Hermite-Fejer process on ultrasphericalpolynomial roots *(Chinese)* 86−57383
Hermitian Toeplitz matrices, generalised two-term recurrences and fast algorithms 87−58864
high resolution frequency estimates, fast computation 87−62025
high speed delayed multipath 2-D digital filter structures 87−19947
high-pressure meas. system with computer-controlled data gathering 88−10163
Hilbert irreducibility sequences and nonstandard arithmetic 87−58803
holographic fringe interpretation, using personal computer and four software modules 88−20793
hot wire anemometry, velocity calibration relationships 88−36241
Hurwitz filter-functions, higher-order type, generation procedure, CAD appls. 86−1204
Hurwitz polynomials, multidimensional discrete reactance and immittance 86−62676
Hurwitz polynomials, very strict, testing using modified Ansell-Hermite matrix method 87−58766
hypergraph colouring problem 85−5904
image block motion estimation using fit by generalized discrete orthogonal polynomials 87−47987
image decimation and interpolation, comparative anal. of digital filters 87−19883
image noise suppression 86−54540
image polynomial appl. to image restoration 88−28057
image representation by 2D polynomials 87−33784
image segmentation using unsupervised Bayesian model-learning 87−62382
imaging sensor jitter compensation for clutter rejection 88−22179
implicit Runge-Kutta-Nystrom methods for general second-order Volterra integro-differential equations 88−11926
information matrix charact. polynomial for 4^n-type balanced resolution V design using 2^{2n} factorial 88−14704
integration over polytopes 85−54380
intermodulation products, third-order, fast algorithm for sorting and counting 87−19375
interpolating nondifferentiable pulse with a more band-limited spectrum than a differentiable one 85−28167
interpolating polynomials: Lagrange vs. Newton 85−5938
interpolation accuracy improvement using FFT 87−44190
interpolation by a local taut cubic piecewise polynomial 87−65385
interpolation method based on piecewise polynomial *(Japanese)* 86−13679
interpolation using FFT *(Japanese)* 86−19997
interval iterations for finding zero of polynomial with error bounds 88−11901
invariance of strict Hurwitz property for polynomials with perturbed coefficients 85−10570
invariant polynomials and their application in field theory 87−52039
inverse scattering in remote sensing, topological approach 85−51409
iteration functions for simultaneous computation of multiple complex polynomial zeros 87−36623
iterative methods for simultaneous approximation of polynomial zeros, computational efficiency 87−52016
Iwasawa invariants and main conjecture 86−66717
Jackson theorems in Hardy spaces and approximation by Riesz means 87−52026
Jacobi, filters design, using analytical and optimisation methods 86−1200
Jacobi and Gegenbauer polynomials, properties of sequences of polynomials of 2nd kind 87−10302
jacobi polynomial solutions of first kind integralequations for numerical conformal mapping 85−54334
Jensen's inequality for polynomials withconcentration at low degrees 86−62118
Julia sets and localization properties of iterated families of algebraic integers *(French)* 85−10568
Karmarkar's Projective Method, polynomial algorithm for linear programming *(German)* 87−189
key distribution systems based on polynomial and Redei functions 86−64194
Kharitonov's generalized stability criterion, simple general proof 88−6584
Kleiser Schumann method anal. 87−23576
Kronecker algorithm for algebraic polynomial factorisation 87−65286
L_1-approximation of continuous real valued functions 87−23551
L-estimators in general linear model, numerical behavior 86−66761
lacunary prediction polynomials, zero location 87−72988
ladder oscillators having active elements with sharp saturation 86−57715
polynomials continued
lambda matrix eigenproblem, including iterations 86−7670
Lanczos method and the Rayleigh quotient 87−10322
Lanczos τ-method for polynomial approximation in the complex plane 87−58837
large-scale thermal power system economic dispatch control model 86−39040
LC ladder filter synthesis, algebraic approach *(French)* 85−34029
LC self-excited oscillators based on ideal convertors, nonlinear anal. 87−44657
least squares approx., nth degree, meas. system nonlinearity charact. 85−26159
least squares error estimate 87−10295
least squares inverse polynomials, stability considerations 87−206
least-squares fitting using orthogonal multinomials 87−201
Lebesgue constant for the numerical differentiationof periodic functions *(German)* 86−62097
Lee association scheme 87−54882
Legendre associated functions, common zeros 85−5946
Legendre polynomial and its derivative, results in interpolation theory 86−62093
light beam wavefront regeneration using polynomial method *(Russian)* 85−46465
limits of some q-Laguerre Polynomials 86−62086
line spectral frequencies computation using Chebyshev polynomials 87−19650
linear active circuit design, state-space technique for freq.-domain 86−673
linear discrete stationary recursive polynomial filters with high order lag. design 87−61820
linear equations systems, polynomial-time algorithm 86−7680
linear equivalent ccts, multivariant analysis, numerical method *(Russian)* 86−46427
linear feedback shift register based testing technique, role of primitive polynomials 88−63603
linear fractional transformations and spectralfactorization 86−46148
linear matrices with degenerate specialisations 85−54219
linear ordinary DE, error estimation for collocation solution 87−31452
linear phase FIR digital filter design with cyclotomic resonators 86−62741
linear phase FIR digital filters with cyclotomic resonators 87−37471
linear prediction polynomials, stability margins 87−27527
linear predictors stability and numerical range of linear operator 87−54780
linear recurrences, polynomial values 86−66711
linear recurrences formula 85−33355
linear sieve, A-dependence with appl. to polynomial sequences 87−16493
linear stochastic system, unusual polynomial signal detection *(Japanese)* 88−34639
linear time-invariant dynamic systems, eigenvalue spectra and bounds 87−16770
linearization of the measurement system characteristics by autocalibration and polynomial approximation 88−53527
load flow equations, solutions using Euclid's equivalent system of nested polynomial equations 86−32647
locally controllable spline with tension forinteractive curve design 85−49473
logarithms modulo a prime, anal. 85−28087
long convolutions improvement using generalised number theoretic and polynomial transforms 86−26696
long-term energy forecasting, multiple linear and polynomial regression anal. 88−48530
low-order Schur polynomials, robustness 88−56091
low-pass to band-pass transfer fn. conversion algorithm 88−63774
lower bound for polynomial multiplication 86−40670
lower bound for the class number of certaincubic number fields 86−52390
Lyapunov function perturbation, stability anal. for small stochastic effects 87−58886
m-sequence generation using general class of windmill polynomials 87−54958
M-sequences and GMW-sequences with same primitive polynomial, crosscorrelation 86−7617
machine equivalent circuit synthesis by polynomial approximation of transients *(Russian)* 86−45349
mappings of finitely generated Z-modules 87−58846
matching polynomial, relationship to rook polynomial 88−56175
matrix interpretation of formal orthogonal polynomials for non-definite functionals 87−58840
matrix multiplication systolic array 87−23563
matrix spectral factorisation algorithm 86−19881
maximally-flat low-pass delay approx. algorithm 87−839
measurement accuracy increase by commutation inversion method, polynomial error theory appl. 86−44078
measurement data, automatic digital correction, m-point autocalibration, inverse polynomial approximation 88−53540
measurement errors summing, using polynomial distributions 88−35760
measurement theory, predicted-value errors inherent in least-squares method *(Russian)* 85−14566
Merkle-Hellman public-key cryptosystem breaking using polynomial-time algorithm 85−19328
message switched communications optimal flow problems with path length constraints 86−59389
microwave linear phase filters 85−11444
minimal cost reliability ratio spanning tree, polynomial testing 85−5935
minimal polynomials with nonnegative coefficients, charact. and appl. 87−44178
mixed-discrete linear programming, NP-hard problem 86−19967
model reaction-diffusion problem, comparison of basis functions for pseudo-spectral method 86−62107
model reduction via Chebyshev polynomials 87−10297
modeling unequally spaced 2-D discrete signals by polynomials 88−3253
modular curves and codes with polynomial complexity construction 85−19345
moment images, polynomial fit filters, surface interpolation problems 88−73302
moving average separation problem 88−70193
moving coordinate frames for sweeping along 3D trajectory 87−23544
MTI pseudoregistration approach for IR background clutter rejection 88−22180
multi-input/multi-output systems numerical testability evaluation 88−15884
multichannel singular predictor polynomials 88−34667
multiconductor transmission line asymmetrical condition simulation by vector-matrix polynomial method *(Russian)* 86−44947

polynomials continued
multidimensional digital filter, linear shift-invariant type, PLSI polynomials and BIBO stabilisation 86−20736
multidimensional digital filters, recursive type, stabilisation using reciprocity concept 87−24330

nonChebyshev systems of fns., structure 86−46259
nonconvex waveguide anal., FEM based on Hermitian polynomials 88−20962
nonlinear circuit design using orthogonal polynomials 87−44519
nonlinear curve fittings, independent variable estimation primary sensors calibration appl. 88−63212
nonlinear difference eqn., period four soln. 85−44662
nonlinear eqn., formal linearization via partial differential equation solved by the Hermite expansion *(Japanese)* 87−16536
nonlinear eqns., convergent series soln. 85−5949
nonlinear eqns., practical problems of root-finding 86−354
nonlinear equation solution, generalised bisection tests 88−11921
nonlinear filters, variational synthesis of input signals from their response 88−66502
nonlinear inertial devices, polynomial representation 88−18891
nonlinear network synthesis for nonlinear distortion compensation *(Russian)* 88−38365
nonlinear ordinary and partial diff. eqns., analytical decoupling 86−62192
nonlinear PDEs, numerical soln. by Tau method 85−54402
nonlinear systems, transform-domain and time-domain characterization with Volterra series 85−6130
nonlinear volterra integral eqns., numerical soln. 88−363
nonminimum phase recursive digital filters 87−59744
nonuniformly spaced signal meas. for system identification 88−52465
normal forms near critical points for differential equations and maps 88−70275
NP-complete problems hypergraph degree sequences 86−62020
NP-completeness 87−65350
numerical performance of Tricomi's formula for inverting the Laplace transform 87−65398
numerical solution of matrix polynomial equations by Newton's method 87−72997
numerical solution of polynomial equations 86−13669
numerical treatment of differential equations with the τ-method 88−11935
optimal interpolation with polynomials having fixed roots 87−58835
optimal interval refinement near singularities 88−63261
optimal linear filter for self-tuning applications 86−54510
optimal systolic arrays, design 85−28455
orbit problem, polynomial-time algorithm 87−44195
Orlicz-Sobolev spaces, error estimates of piecewise polynomial approx. *(Chinese)* 86−34198
orthogonal on semicircle 86−62088
orthogonal polynomial digital filter structures, error feedback 87−7733
orthogonal polynomials, assoc. schemes and quadratic transformations 86−66688
orthogonal polynomials, asymptotic distrib. of zeros 85−54357
polynomials continued
orthogonal polynomials, asymptotic properties from recurrence formula 88−43826
orthogonal polynomials, Gauss-Christoffel quadrature formula 85−22404
orthogonal polynomials, recursive generation 85−54354
orthogonal polynomials−constructive theory andapplications 85−49478
orthogonal polynomials and Christoffel functions 87−23548
orthogonal polynomials in L^1-approximation 88−43822
orthogonal polynomials with asymptotically periodicrecurrence coefficients 86−62089
orthogonal polynomials with discrete spectra on real line 85−28166
orthonormal polynomials, appl. to calibration in high energy physics 86−34194
orthonormal system, construction from three consecutive member polynomials *(Italian)* 86−7684
P-adic numbers and polynomial transformations, fast digital convolution 86−13608
packet switching computer network, dynamic evaluation of error level in data link 88−66773
packet switching computer networks, with local congestion control for exposure to store and forward deadlocks 87−48669
Pade approximants, appls. to rational approx. and linear-order reduction 85−22293
parallel iterative algorithms for the simultaneous determination for all zeros of a triangular polynomial 88−49744
parallel matrix and polynomial arithmetic ccts. 85−33881
parametric characterization and an ϵ-approximation scheme for the minimization of a quasiconcave program 87−44189
parametric excitation circuit with two saturating cores, output waveform distortion *(Japanese)* 86−34494
partial differential equations, spectral methods for stiff problems 88−24677
partial fraction evaluation and decomposition of rational function with repeated polynomial denominator 85−39665
partially commutative polynomials, transfer theorems *(French)* 88−63218
passive switched-capacitor two-ports, synthesis procedure 85−22990
period over GF(2) *(Chinese)* 85−10626
permittivity meas. of lossy materials, using waveguide-fed series slot array 86−5488
permutation polynomial based cryptosystems 88−27787
phase unwrapping for multidimensional rational and finite-length sequences 88−72970
picture moments and polynomial representations 86−10568
piecewise blending function interpolation 87−44199
piecewise cubic interpolating polynomials, surface construction 85−28162
piecewise polynomial approximations for Cauchy singular integrodifferential equations 87−44214
piecewise polynomial probability densities, moments computation technique 87−65288
piecewise smooth solutions of some difference-differential equations 87−36661
Pieprzyk public-key cryptosystem insecurity 87−75703
pipeline fast biased transform architecture for 2D convolutions 85−13576
planar networks, multicommodity flow determ., polynomial-time algorithm *(Japanese)* 86−13909
planar networks, polynomial-time algorithms for reliability anal. 87−5274
Poisson problems with re-entrant boundary singularities, semi-infinite spectral elements 88−24681
polyhedra, symbolic method for calculating integral properties 85−16844
polynomial invariants of graphs 86−46210
polynomial with real coefficients, real and complex roots calculation, BASIC program *(Spanish)* 85−513
polyphase transform, definition, appls. to block processing and filter bank structs. 87−69221
positive roots of polynomials, bounds 87−5360
positivity of cubic polynomials on intervals and positive spline interpolation 88−63202
post-processor for the cosine method 88−31676
power losses in stripline conductors of square cross section, weighted Chebyshev polynomials *(Russian)* 87−37495
power spectrum of an oscillator signal under nonstationary phase instabilities *(French)* 87−44659
power system modelling and anal. 86−32641
power system telecontrol protocols, generator polynomials selection and anal. *(Chinese)* 85−30656
power systems, interconnected, PF control based on deadbeat controller, multivariable structure system approach 87−71542
Prandtl's integral eqn., quadrature rules 86−57390
predictor polynomial, stepup and stepdown computations, efficient procedures 88−63139
probability of values of m polynomials 87−58845
probability that a numerical analysis problem is difficult 88−49759
procedures for polynomial and rational function recognition 85−33344
products estimations of polynomials *(French)* 86−19995
products of linear recurring sequences with maximum complexity 87−27214
projection operation for cylindrical algebraic decomposition 86−62129
Prony's method for spectral density estimation of stationary random processes 87−47777
pseudo-lossless functions, appl. to polynomial zeros location 85−44832
pseudo-spectral method and path following inreaction-diffusion bifurcation studies 86−46291
pseudo-supplementary polynomial filters 88−32298
public key cryptosystem based on matrix rings 87−12893
public-key cryptosystems, permutation polynomials and functions basis, dissertation *(German)* 85−46698
PWM harmonic elimination calc. using symmetrical polynomials *(Polish)* 86−64175
PWM invertors harmonic elimination conditions *(Polish)* 86−56841
quadrature, nondefiniteness of Clenshaw-Curtis-type formulae 85−22400
quadrature formulae for singular functions 88−24664
quadrature method modification 86−20013
quantized Jacobi polynomials 88−43814
quasilinear parabolic systems, full collocation method *(Chinese)* 86−7712
quintic polynomials and real cyclotomic fields with large class numbers 88−49699
R-order of some recurrences with appls. to inclusion methods 86−34203
radio receiving sections nonlinearity approx., functions synthesis 87−20389
Ralston quadrature anal. 88−56188
random product homotopy and deficient polynomial systems 88−6397
randomly sampled signals, approximate reconstruction using polynomial interpolation 87−47759

polynomials continued
rational circular complex centered forms 87−44200
rational function approximations in the numericalsolution of Cauchy-type singular integral equations 86−13708
rational functions, Taylor-Chebyshev approx. using Pade technique 85−5931
Rayleigh random process, piecewise-polynomial transformation 88−6364
real polynomial roots bounds 87−58830
real predictor coefficients, computationally efficient stepup and stepdown procedures 88−72920
rectangular grid, interpolation on simplex, formulae for general multivariate polynomial 86−66771
rectangular isoparametric finite elements affine approx. 86−26758
recurrences, unique extrapolation 88−43794
recursive digital filter, design with prescribed amplitude and delay characts. 88−32344
recursive digital filters, stabilisation method 87−66384
recursive digital filters, sufficient conditions for minimum phase two-dimensional PLSIs 85−958
recursive integration and recursively defined polynomials, relationship 88−6348
Redei functions for power of two *(German)* 86−68985
reduced polynomial remainder sequence algorithm, validity proof 87−65270
reduction strategy for the Taylor resolution 86−62135
reductions among number theoretical problems 87−36591
Reed Solomon error correction code, polynomial roots determ. 85−7809
Reed-Solomon code error correction procedure using exclusive OR gate config. 85−46690
reflector antenna radiation integrals, circle polynomial series representation 85−13236
Remez-type algorithm for the calculation ofextremal fundamental systems for polynomial spaceson the sphere 86−57369
representations based on zero-crossings in scale-space 87−2549
reproduction vectors of vector quantisation codebook, least squares approx. by polynomials *(Japanese)* 88−27806
resistance thermometer using Rh-Fe alloy, interpolation procedures for 77 to 273K range 85−31461
reusable systolic optical matrix multiplication processor 88−26919
Riemann zeta-function, function S(T) 88−293
right half plane roots of real or complex polynomials determination using general Routh-like algorithm 85−39599
ring testing of discrete devices implementing polynomial forms 88−38432
ring-like testing of digital circuits 88−44105
rings without a certain divisibility property 88−31637
root distribution with respect to conic contours 85−5883
root finding, globally convergent method 85−39663
root finding method of Durand-Kerner, observations on convergence 85−22367
root neighborhoods of a polynomial 86−66756
root-finding iterative methods for 1D complex-valued fns. 86−7665
rootfinder using a nonmonotone rational approximation 85−33320
roots, absolute values 85−28085
roots of equations in given neighbourhoods 87−73011
roots of polynomials, computation on vector processing machines 85−54338
Runge-Kutta-Nystrom methods, Hermite interpolation polynomials 87−72984
saturated AC machines with cylindrical rotors, transient performance 87−15681
scattering Hurwitz polynomials in several variables, props. 87−23538
Schroder iteration fns., study of associated Julia sets and Mandelbrot-like sets 86−34196
scintillation gamma cameras, spectral-spatial-sensitivity distortion trends and correction method 85−48231
second directional derivative zero-crossing detector usingthe cubic facet model 86−4062
second kind Fredholm integral eqns., iterated collocation 85−54422
second order method for simultaneous inclusion of polynomial complex zeros in rectangular arithmetic 86−40665
second shortest k-tuple of edge-disjoint paths 87−188
second-order finite element approximations and a posteriori error estimation for two-dimensional parabolic systems 88−63259
second-order low-sensitivity digital filters, design and anal. 85−6450
second-order nonlin. BVPs, inform approx. soln. 86−13698
second-order state-space technique for circuitsdesign 87−861
segment approx. algorithm 86−46247
segmented-image coding: performance comparison with the discrete cosine transform 88−34749
self-dual principal nilpotent codes, automorphisms in certain modular algebras 86−43155
semi-Hurwitz polynomials, props. and 2D half-plane filters stability testing appl. 86−46238
semiiterative methods for nonsymmetric systems of linear eqns. 86−34214
sensitivity of orthogonal polynomials toperturbations in the moments 86−46244
sequential detection, robust approach 88−72914
Shanks' convergence acceleration transform, Pade approximants and partitions 87−10257
shape anal. using orthogonal polynomials 88−46194
shape preserving area true approximation of histogram by rotational splines 88−63201
side-looking radar for remote sensing, imaging geometry and errors 87−76822
sieved orthogonal polynomials, generating functions 86−62090
signal matrix, spatio-temporal spectral anal. by SVD 87−62125
signal processing, spectral anal. to obtain polynomial approximation *(Russian)* 86−37027
signal processing, spectral method of polynomial approx. *(Russian)* 88−21162
signal processing algorithm, Levinson-type recurrences and Toeplitz systems solving 88−332
signal processing algorithm, polynomial generator using geometrical patterns 88−331
signal processing algorithm, polynomials eval. using additions and subtractions 88−330
signal processing through group delay functions 87−47803
signature analysers, polynomials for aliasing reduction by test vector reversal 87−599
signature analysis register used in self-testing networks, aliasing errors analysis 87−24109
polynomials continued
signature analysis registers, aliasing errors with primitive and nonprimitive polynomials 88−19083
signature analysis registers behaviour monitoring, fast analysis 88−19084
signature ct. for LSI testing, analysis and proposal 88−19079
SIMD processor, ASPRO, real-time data fusion, in tracking systems 87−56253
simultaneous approximation appl. in combinatorial optimisation 86−20001
simultaneous determ. of zeros of analytic or sectionally analytic functions 86−40664
simultaneous modular equations of low degree, soln. for cryptographic appl. 88−45917
single-mode fibres with arbitrary index profiles, cutoff freq. calc. using Chebyshev polynomials 86−2686
singular integral eqns., polynomials and approximate soln. 87−16527
singular integrals evaluation using modified Gaussian rule 86−40667
sinusoidal frequency estimation, asymptotic zero distrib. of orthogonal polynomials 87−75808
sixth-order imbedded Runge-Kutta algorithm withcontinuously variable weights 86−62162
slightly distorted periodic structures unwarping using bidimensional polynomial representations 87−33798
small apertures, elec. polarisabilities, polynomial approximations 86−22653
small apertures, polynomial approxs. for transverse magnetic polarisabilities 87−33475
small sample algorithms for the identification of polynomials 87−44196
Sobolev spaces, fractional order, best polynomial approx. error and Lagrange interpolation error *(French)* 85−22351
solution of polynomial deflation *(Japanese)* 85−33346
sparse factorization, polynomials given by straight-line programs 86−20000
speaker-independent isolated-word recogniser based on polynomial classifiers 88−66341
speech signals, linear prediction polynomial, real-time factoring 85−51578
speech signals, linear prediction polynomials, real-time root factoring 86−10318
spline Galerkin methods for singular integral eqns. with piecewise continuous coefficients 86−34217
splitting of quartic polynomials 85−5947
square matrix characteristic polynomial computation algorithm *(Chinese)* 86−7587
square root iteration for polynomial complex zeros 86−46240
square roots computation, simple and fast probabilistic algorithm appl. 87−23447
stability constraints, sensitivities and applications 86−66654
stable discrete systems polynomials, Z-domain continued fraction expansion 86−20156
stable multidimensional polynomials, continuous case 88−6589
state variable switched capacitor filters, polynomial transform synthesis 86−57964
Stieltjes- and Geronimus-type polynomials 88−24614
stiff differential equations, anal., modified Laguerre polynomials 85−5960
straight line approximation for measuring characteristics of electric temperature sensitive elements *(Polish)* 86−17943
strongly NP complete problems, polynomial approx. schemes 86−7673
structurally bounded stochastic Petri nets 88−310
subroutines for convolution sums of Chebyshev and Fourier series 88−31668
superconvergence of the gradient of Galerkin approximations for elliptic problems 88−18625
surface/texture models unsupervised estimation, Bayesian clustering 88−66626
SVD-based linear prediction method, perturbation anal. for multiple sinusoids freq. estimation 88−66476
Swan's theorem, generalisation 86−34166
swirling flow effect on flowmeters 87−70869
switched capacitor fillers, state-variable type, design using polynomial transformation 87−17225
switched capacitor networks, symbolic analysis, interpolative 85−23021
symbolic integration of exponential polynomials 86−62137
symbolic matrix inversion based on multidimensional DFT; electronic cct. appl. 88−31684
Syracuse algorithm generalisation 87−36634
systems and signals models, Laguerre polynomials appl. 85−36282
systolic architecture of fast biased polynomial transform 87−59539
systolic architectures for polynomial and polynomial matrix manipulations 88−672
systolic array for the quotient difference algorithm 88−18624
systolic VLSI multi-precision polynomial evaluator and matrix multiplier 85−62054
tau method with perturbation term depending onthe differential operator 86−46243
Tau-method for numerical treatment of differential equations 87−44212
TBT polynomials, transfer function denominator, time-domain approx. 87−47651
telecommunication networks, disjoint bounded paths, heuristics for finding max. number 85−19646
telephony, dual-tone multifrequency receiver, polynomial classifier *(German)* 86−55050
term orderings on the polynomial ring 86−62133
terminating polynomial iterations 88−24671
ternary polynomials, constraint on zeros, VLSI implementation of FIR digital filters appl. 87−44192
test polynomials, analytic approach to soln. of nonlinear eqns. 88−18642
testability numerical evaluation improvements 87−70341
texture segmentation polynomial shift-invariant operators 88−73300
thermal convertors, piecewise-polynomial expressions for approximating conversion function *(Russian)* 85−55085
thermometric characts. of planar semiconductor diodes correction *(Czech)* 87−35065
Thue-Siegel-Roth-Schmidt-Nevanlinna bounds, effective or better 86−20010
time series analysis, shifted, numerical simulation *(French)* 88−49637
time-domain synthesis of impulse response using transitional Butterworth-Thomson polynomials 87−404
time-space efficient algorithms for computing convolutions and related problems 88−6367
Toeplitz matrices, three term recurrence and fast algorithms 88−49762
Toeplitz matrices with singular minors, Levinson and Schur algorithms 88−63137
Toeplitz systems of linear equations, Levinson recurrence and fast algorithms 87−61836

polynomials continued
tolerance design by orthogonal polynomial expansion *(Japanese)* 86−13436
topological type polynomial-time algorithm of real algebraic curve 86−62128
topology of algorithms for approximation zeros of complex polynomial 88−11904
transducer output signal processing using an eight-bitmicrocomputer 86−65151
transfer functions, algebra of multiple bilinear transformations 87−10550
transformation matrices for general double bilinear transform. of bivariate polynomials *(Chinese)* 87−65275
transformer for parallel and pipeline VLSI algorithms 85−62056
transient analysis of dynamic systems using spectral techniques 87−16534
transient dynamic analysis, nonlinear equation solution 86−62155
transitive graphs, max. k-colorings and k-coverings algorithms 88−11871
transmitter antenna on Shuttle Orbiter, orbital energy density profile 86−10191
trigonometric polynomials, factorisation 87−27579
trigonometric polynomials, generalised 85−33335
trigonometric polynomials, iterative evaluation of extrema of integrals 86−7720
tubular cylinder of finite length, interaction of modal currents, computational results 85−13032
Tutte polynomials and cycles of plane graphs 88−49682
two thin spherical shells, calc. of capacitance *(Russian)* 86−3421
two- and three-dimensional system theory, algebraic nature 85−46845
two-dimensional cosine transform using Chebyshev polynomial transform, computation *(Japanese)* 86−20019
two-dimensional nuclear reactors, neutronic simulation 86−39504
two-dimensional planar least squares inverse polynomials, stability, Shanks' conjecture 86−347
two-dimensional planar least squares inverse polynomials, stabilisation 85−10629
two-dimensional prime length DFTs, fast biased polynomial transforms 85−5969
two-dimensional recursive digital filters, 2-variable very strictly Hurwitz polynomial (VSHP) generation using matrix theory 85−46849
two-variable Hurwitz polynomials, identification method 85−22380
two-variable Hurwitz polynomials comprehensive study 87−5309
two-variable very strictly Hurwitz polynomial, generation using matrix theory, 2D digital filter design appl. 86−62750
unbiased Monte Carlo integration methods with exactness for low order polynomials 85−33358
unfactorable multivariate polynomials, approximate factorisation 88−40968
unified approach to approximation algorithms for bottleneck problems 87−52030
uniform norm approximation, discrete least squares 87−10293
unimodular matrix over $R[z_1, z_2]$, simplified derivation of completion theorem 85−28086
univariate quasi-interpolation using multiquadrics 88−70253
unrelated parallel machines, scheduling, anal. of linear programming heuristic 85−28143
upper bounds for the *fg*-chromatic index of graphs *(Japanese)* 88−18587
US echoes spectrum, gated, gated echoes spectrum, polynomial extrapolation toward LF for deconvolution 85−6083
variable order polynomial approximations for elec. engineering appls. *(Romanian)* 88−61776
variable-length codes, trends in theory 87−47489
vector optimisation and geometric optimisation, relationship *(German)* 85−54318
very strictly Hurwitz polynomial and recursive filter appl. 88−886
very strictly Hurwitz polynomial generation and 2D recursive digital filter design 86−62760
video cameras, method for correcting geometric distortion 86−11320
Vilterra integral equations, optimal solution 87−52081
VLSI architectures for computing polynomials in GF (2^n) 88−19100
VLSI built-in self-test, simultaneous signature and syndrome compression 88−50939
VLSI complex integer multiplier, using quadratic-polynomial residue system 87−66025
Volterra integro-differential eqns., high-order methods for numerical soln. 86−62104
Walsh filters for polynomial signals 86−69080
Walsh series, truncated, algebraic props. 88−34630
waveguide theory, dispersion equations solutions using parameter differentiation 87−47269
waveguides, inhomogeneous slab with even polynomial refractive index profile, guided-mode asymptotic soln. 86−63658
weighted rational causal approx., algorithm 86−40660
Wiener filtering theory, extension to multivariable ergodic stochastic systems by polynomial matrix factorisation 87−75769
Wiener-Hopf integral equation, solution algorithm using, modified method of indeterminate coeffs. *(Russian)* 86−370
zero tracking filter by means of a recursive least squares algorithm *(Japanese)* 88−46078
zeros of polynomial, simultaneous determ., method for choosing initial approxs. *(Japanese)* 88−49755
Zolotarev polynomials appl., electric-circuit synthesis problems 87−52024

Pontryagin maximum principle *see maximum principle*

Poole-Frenkel effect
bipolar transistors, base current nonideality at low temps. 87−32488
C-MOS p-well, soft reverse characteristics of n^+p drain diodes, anal. 85−50706
carbazole-based polymer semicond., carrier photogeneration and recombination *(Russian)* 85−29701
insulating films, electronic cond., book contrib. 87−60127
IR detectors, blocked impurity band devices, figures of merit, temp. dependence 88−67792
long S-diodes, I-V charácts., thermofield impurity ionisation effects *(Russian)* 86−47504
metallo-phthalocyanine/metal junctions, space charge layer form., adsorbed O_2 effects 86−1815
metallophthalocyanine/metal contacts, elec. props., large frequency range 85−6749
MOS structures, deep trapping of implanted Na^+ and Li^+ ion near Si/SiO_2 interface 85−50319
polysilicon TFTs, cond. mechanism *(Japanese)* 88−7605
polyvinylcarbazole films, trapping rate distrib., photocurrent transient spectra meas. 88−1399

Poole-Frenkel effect continued
semiconductors, field enhanced generation mechanisms 87−53153
[trans]-polyacetylene/metal junctions, space charge layer form., adsorbed O_2 effects 86−1815
β-B, quasi-localisation and electronic transport investig. 86−63016
CdF_2:Sm(Gd), electronic conduction before and after electrical conversion 85−45409
CdF_2:Y, high elec. field transport, Poole-Frenkel model 85−34535
Cu-SiO/Nb_2O_5-Cu, thin films, ESR meas., elec. charácts., before and after electroforming 85−50337
Cu_2O semiconductor, photocurrent decay, internal pot. barrier effects 85−7304
$Ga_{1-x}Al_xAs$ MIS and SIS structures, prep. by metallorganic chem. hydride method, electrophysical props. 87−11467
GaAs MIS structure with polysiloxane plasma-polymerised passivating layer 85−23709
n- GaAs VPE layers, C-U Schottky doping profiler, influence of deep surface levels 85−23448
GaAs p-n structures, current-voltage characteristics, reverse branch 85−34593
GaAs-Al_2O_3-Al structs. prepared by plasma oxidation, DLTS and C-V charácts. meas. 88−50677
GaAs-plasma grown oxide interface; elec. characterisation, capacitance and conductance methods 85−50296
GaAs-plasma oxide interface, electron states, small signal charge transient spectra study 87−67009
$GaTe_3$, amorphous film, monostable switching, Joule heating 85−55482
$Ge_4Se_{6-x}Te_x$ amorphous chalcogenide, elec. cond., prep. technique effects 87−1214
$Ge_4Se_{6-x}Te_x$, amorphous films and bulk glasses, conductivity, field dependence 87−66926
In/GaAs:Cu/In struct., I-V charácts., carrier recomb. and generation, impurity thermionic field ionisation effects *(Russian)* 87−11493
$InTe_3$, film, monostable switching, Joule heating 85−55482
Nb_2O_5, thin films, ESR meas., elec. charácts., before and after electroforming 85−50337
Si:O, energy levels and capture cross-sections of thermal donors 87−11344
Si-SiO_2, interface, impurity potential well probing by elec. field enhanced emission 85−50291
Si_3N_4 films in MIS structs., cond. charácts. 87−17838
Si_3N_4 sputtered thin films on (100) n-Si, chem. analyses and surface state density obs. 88−19759
$SiO_2/Si_3N_4/SiO_2$ stacked dielec. layer for MIS capacitor 86−14966
TiO_2-V_2O_5-P_2O_5 thin glass films, switching and crystn. in high elec. fields 88−25901
ZnTe, vac. evaporated films, electrical cond. meas. 87−60090

popcorn noise *see random noise*

Popov criterion
current limit controlled chopper-fed DC separately-excited motor speed controller design and stability analysis 86−45451
multi machine power systems, stability studies including automatic voltage regulators effects 86−39037
multimachine power systems, non-Lure type Lyapunov function construction 87−35534
power systems, transient stability anal. including voltage regulator effects 86−65643
synchronous machine transient stability region with second-order speed governor 87−42897

population inversion
see also laser theory; lasers; stimulated emission
adiabatic elimination procedure for lasers with slow relaxation of population inversion 87−74958
alkali metal-mol. gas mixture, cooling in supersonic nozzle, population inversion of electronic states 87−18898
amplification of light by stimulated emission of radiation, role of quasienergy levels 86−63742
anharmonic molecules, vibr. levels pop. inversion under the influence of optical and thermal pulses 86−29046
continuous wave operation at 2.1 μm 88−40181
dense relaxing gas waveguides, appl. to chem. and gasdynamic lasers 85−46339
dye laser, injection locked, optimum injection timing *(Japanese)* 87−2097
dye laser with DFB, biharmonic pumping 85−24497
dye solutions, phase response dispersion when exposed to picosecond excitation 85−24663
extreme UV lasers, lasing action, population inversion, X-ray laser progress *(Japanese)* 85−62482
gas lasers, condensed and compressed, review 87−18913
He like ions, population inversion possibility by UV optical pumping 85−56507
He-Ne laser, 632.8 nm line excited in hollow cathode, spontaneous lines from upper and lower levels, investigation 85−56539
homogeneous plasma prod. at high density and temp. appl. to X-ray laser design 88−40158
inversion production by Penning reaction, electron beam pumping 87−74971
IR laser, far, optically pumped, Raman and line-centre oscillations 85−12799
laser media inversion filament form. due to interatomic interactions via superradiation field 87−26256
laser oscillation in recombining H plasma interacting with He gas in TPD-I 85−46315
laser produced plasma, population inversion, X-ray emission, appl. to lasers 85−7345
multimode laser with modulated inversion, numerical anal. 87−61189
multiply charged ion recombining plasma for active laser media 86−15625
multistage ionisation role in inverted population prod., lasers with self-limiting transitions 85−41301
Na XI levels, soft X-ray population inversion by inter-combination line reson. photoexcitation *(Chinese)* 88−72255
passive modulation laser of resonator Q-factor *(Russian)* 87−26459
periodic layered structured laser using electro-luminescent excitation 87−74954
photoionisation lasers pumped by broadband soft X-ray flux from laser-produced plasmas 87−46757
photoionisation-recombination laser, broad-band VUV pumping by magnetoplasma-compressor 88−8126
plasma recombination lasers similar to thermionic convertors 87−7242
plasma X-ray lasers, review *(Japanese)* 88−14122

population inversion continued
recombination lasers in the XUV spectral region 86−22322
recombination plasma, stimulated emission, amplification of UV light and soft X-rays 85−18832
relativistic e^--e^+ γ-ray laser 87−7232
ring laser, bidirectional, stability anal., time depend. solns. 88−27229
ring laser, self-pumping wave refl. from population inversion gratings 86−63847
ruby, thermal energy conversion into coherent microwave radiation 85−41371
ruby MM band centre inversion characts. 88−33909
salicylamide pulsed laser, pop. inversion resulting from excited-state intramol. proton-transfer reactions 86−63772
semiconductor heterostructure Landau level laser in quantum Hall regime 86−36466
short-wavelength coherent radiation generation by anti-Stokes Raman laser 88−40344
single-longitudinal-mode laser as a discrete dynamical system 85−24507
soft X-ray laser experiments at the Novette laser facility 85−7350
soft X-ray laser plasma sources 88−20580
solid lasers, intraresonator nonlinear optical and magneto-optical phenomena, effect on interaction of oppositely directed light waves 85−56746
solid lasers made from activated ionic crystals, review 87−18953
stimulated two-photon emission in complex molecules, advantages 86−63741
two-level atoms, coherently driven, first-order phase transition 87−33280
wave amplitude spatial evolution, soln. stability, bifurcations in sum and difference freq. generation processes 86−29233
X-ray laser, photoionisation-line decay, Schafer's PHILDEX scheme, threshold estimations 88−20530
X-ray laser program at Sandia, gas puff Z-pinch implosions 87−12374
X-ray laser research at CEL-V 87−12376
X-ray lasers, hot plasma use as soft X-ray amplifiers 88−51728
X-ray lasers, matched line pumping for population inversion and gain in plasmas 85−7358
X-ray lasers, population inversions in highly ionised plasma 87−61091
X-ray lasers pumped by photoionisation, steady state inversion 87−12377
X-UV gain amplification studies in laser plasma using normal incidence multilayers mirrors 85−7352
Al XII ions, level population inversion in recombining laser plasma 85−24487
Al plasma, spontaneous emission amplification 85−7356
Ar+Xe mixture, laser working-level pop. processes, amplitude-time struct., spontaneous emission 88−8108
ArF, photodissoc., CARS 87−7444
ArII recombination lasers, magnetoplasmadynamic arcs as plasma sources 86−3014
B I isoelectronic sequence, short wavelength laser calcs. 87−12382
Be I isoelectronic sequence, short wavelength laser calcs. 87−12382
Be isoelectronic series, quasi-CW, UV and XUV lasers, design consideration 85−7359
C I isoelectronic sequence, 3s-3p laser gain and X-ray line ratios 86−58869
C I isoelectronic sequence, short wavelength laser calcs. 87−12382
C expanding fibre plasmas, population inversion and gain 85−7357
C fibre, plasma, population inversion and gain 86−15607
CN^-:KBr vibration laser, CW operation at 5 microns 85−29800
CO gasdynamics lasers, physical model for gasdynamic processes 86−3074
CO laser population inversion, role of Xe, physiochemical processes, investig. 86−29062
CO laser population inversion, role of Xe, physiochemical processes, anal. 86−29063
CO molecules, excited by electron-beam-controlled discharge, nonlinear absorption and spectral conversion of laser radiation 88−51903
CO visible pulsed laser, population mechanism, rot. intensities distrib. 86−29034
CO_2 gasdynamic laser, superequilibrium pumping mechanism using CO-N_2O-H_2 mixtures 86−58867
CO_2 laser FIR, Raman scattering and population inversion transition 88−27029
CO_2 pulsed lasers, quasi-periodic undulation 86−29039
CO_2 transversely excited 4.3 μm laser, simplified cavity design 85−18968
CO_2-Ar CW gasdynamic lasers operating on transitions among levels comprised of ν_1 and ν_2 modes, population inversion and gain 86−3075
CO_2-Ar laser, CW gasdynamic, population inversion calc. 85−35683
CO_2-N_2-H_2O gasdynamic lasers, collisional relaxation mechanisms 87−12365
COSe, photodissoc., CARS 87−7444
Cd I and II plasma recombination lasers, gain scaling, model calcs. 88−27038
Cr^{3+},Nd^{3+}:$Gd_3(ScGa)_5O_{12}$ crysts., laser active medium investigation, excited acceptor states populations calc. 85−24522
Cu II VUV laser transitions in Cu-He hollow cathode discharges, population density and optical gain 85−18835
Er:YAW_3, 3-μm laser transitions, spectroscopy 88−27118
Ge, hole population inversion in crossed electric and mag. fields 86−21091
p-Ge, hot hole FIR lasers and CR masers 86−29118
Ge hot hole inter-subband transitions for tunable far-IR laser 87−39036
Ge valence band direct optical transitions inversion, gain saturation 88−2197
H ion transitions in low temp. plasma, light amplification 85−56508
H^+ in water, stimulated emission and absorpt. *(French)* 85−56464
H_2 laser, spin-conversion process 88−8124
H_2, maximum specific deposited energy, role of VV processes 87−18897
H-like Balmer alpha lines, recomb. and photo-pumping mechanisms for gain prod. 87−12380
H-like ions, gain and population inversion meas. 85−7351
HCN FIR CW discharge laser, excitation, inversion and relaxation mechanisms 85−12763
HCN discharge laser, dynamics 85−35669
HF laser using high-pressure H_2-F_2 mixture, radiation amplification behind shock wave front 86−9752
He plasma, recombining, VUV laser oscillation, initial plasma density effects 88−51754
He-Ar gas lasers pumped by optical breakdown, inversion mechanisms 87−61101
He-Cd laser, population inversion discharge plasma instability 86−68430
He-Eu ionic laser, specific output energy of 5 J.litre^{-1}.atm^{-1} 85−24488
He-H_2 mixtures, Penning plasma laser utilising He atom transitions, visible light emission 88−58435
population inversion continued
He-Ne laser, population relax. and collisional excitation transfer, nonlinear modulation spectroscopy 85−7385
He-Ne long tube, 3391 nm superstimulation, competition with 633 nm laser oscill. 85−56526
He-Xe gas lasers pumped by optical breakdown, inversion mechanisms 87−61101
He+Ar mixture, laser working-level pop. processes, amplitude-time struct., spontaneous emission 88−8108
He+Kr mixture, laser working-level pop. processes, amplitude-time struct., spontaneous emission 88−8108
He+Xe mixture, laser working-level pop. processes, amplitude-time struct., spontaneous emission 88−8108
Ho:YAG laser, continuous wave operation at 2.1 μm 88−40181
I laser discharge-pumped, spatial distrib. of inversion population calc. *(Czech)* 88−20543
I laser, effect of inhomogeneous longit. mag. fields on energy stored in active medium 85−2240
I laser, electron beam initiated, kinetic parameters 85−41319
I laser, population inversion at transition $I^*(P_{1/2})\rightarrow I(P_{3/2})$ in chemical reaction $F+I_2\rightarrow IF+I$ 86−22328
I, photodissociation laser, amplified spontaneous emission and superradiant pulse 88−27039
I photodissociation laser amplifier, amplified spontaneous emission loss meas. 86−15627
I photodissociation laser kinetics with slow pumping 88−58416
Kr ions, X-ray lasing possibilities by using high-order multiphoton processes 86−42485
Li VUV lasers, electron shake-up mechanism 86−29071
Li-like ions, soft X-ray laser development in confined plasma column 85−7351
Mg plasma, spontaneous emission amplification 85−7356
N_2 laser, cascade population mechanism, IR and UV laser bands 85−24439
N_2^+ high press. quasi-CW laser, efficiency and output energy 86−15643
NH_3 laser, 16-21 μm line tunable, two-step optical pumping 85−2194
NH_3 laser, tunable 12 μm CW, dynamics, meas. with tunable-diode laser 85−46318
NH_3 optically pumped mid-IR laser, dynamics at high pump power, inversion gain 85−2207
N_2O unsteady supersonic jet, laser level populations study 85−18841
Na XI levels, soft X-ray population inversion by intercombination line resonant photoexcitation 88−14077
Na-He-H_2 discharge plasma, population inversion mechanism 86−15634
Na-Ne plasma environment, X-ray lasing 85−24452
Nd glass laser, inversion dumping and amplification dynamics of ns pulses *(German)* 87−68419
Nd:phosphate glass active elements, cylindrical and planar, inversion distrib. 88−20606
Nd^{3+}:YAG with vibr. resonator, emission spectrum, kinematic mode locking 85−24524
Ne I excited by discharge with hard component, inversion and stimulated emission due to 585.3 nm transition 87−54241
Ne isoelectronic sequence, scaling of collisionally pumped 3s-3p lasers 85−7369
Ne laser at 585.3 nm, inversion mechanism 87−61081
Ne laser, inversion basic mechanisms of 3p-3s transitions 88−58439
Ne, quasi-CW lasing in visible region 85−56533
Ne-H_2(Ar) dense mixtures excited by electron beam, Ne plasma laser emitting at 585.3 nm 85−56506
Ne-He laser, 632.8 and 1152.3 nm levels population ratio meas., Hanle effect *(Russian)* 85−7361
Ne-He-Ar plasma laser, electron-beam-excited Penning-removal, at 585.3 nm 86−63755
O, K-ion levels, pop. inversion, expt. investigation on Al_2O_3 target, plasma optical props. 88−8107
Se plasma, X-ray laser research, exploding foil amplifier concept for XUV lasers, gain lengths 88−2177
Se plasma laser as soft X-ray amplifier 85−24467
SiF chemical laser, feasibility 87−7249
Xe III states, population inversion due to selective Auger decay, state lifetime and branching ratio 88−2179
Xe laser-produced plasma, X-ray laser, Auger decay pumping 88−40155
Xe photoionisation-recombination laser, broad-band VUV pumping by magnetoplasma-compressor 88−8126
XeO photochemical excimer laser excited at optical clarity wavelength *(Russian)* 86−3032
Y plasma laser as soft X-ray amplifier 85−24467
Yb-Er glasses, laser excitation 85−56594
Zn^+ vapor, high-gain soft X-ray pumped photoionization laser 85−2196

porosity

microprocessor based servomotor control system 87−30674
microprocessor controller for positioning system 85−40582
microprocessor servomechanism design and parameter selection *(Polish)* 86−12865
microprocessor-based adaptive speed and position control for electrical drives 85−27688
microprocessor-based electrode movement controller, microprocessor-based, for spot weld quality assurance 85−65663
microprocessor-controlled DC servomotor position control system *(French)* 85−9911
microstepped positioning, a step in the right direction 86−39849
microstepping a step motor for greater position resolution 85−44018
microstepping model for stepping motor control 88−75659
microstepping motors for high accuracy positioning systems 85−9949
microwave positioning systems for solid-Earth science missions, data circulation 88−41763
mill head vision guidance system for large pipe internal welding 85−53983
miniature brushless DC motor/encoder, processor controlled, for incremental motion control 87−51240
mirror-deflector controller in laser graphics read/write device 87−26587
missile guidance and stabilisation, gyroscopes 88−16997
missile synthesis with trajectory and propulsion system optimisation 88−68600
mission and trajectory planner, automated, for piloted and autonomous vehicles 88−48417
mix and match lithographic system, moire alignment technique 88−39323
mobile robot for physically disabled, obstacle avoidance with ultrasonic sensors 88−54789
mobile robot navigation system, perception control architecture in image processing 86−4232
mobile robot navigation using sonar-based real-world mapping 87−76873
mobile robots, position referencing and consistent world modelling 86−4941
mobile robots, radiated optical communication system 87−8336
monitoring system for positioning of stepping feed drive *(Russian)* 87−30634
monolithic resolver-to-digital converter for brushless controlled drives 88−76006
MOSFET convertor-fed position servo-system with sliding mode control 85−65336
motion control, digital, with PWM controller chip and incremental encoder interface chip 87−45000
motion control circuit boards with significant software component 88−56591
motion control for automated NDT 87−56515
motion control system, high speed, high accel., from PORTESCAP 88−11254
motion control system or elec. drive, technological develop. 87−78992
motion control systems: applications and technological trends 88−69656
motion control systems, mismatching motor and load inertia 88−17661
motion control technology trends in automated environments 88−17515
motion drive algorithms for aircraft motion cue 88−16817
motion measurement around edges under the smoothness assumption 87−56853
motor combining step and DC features in integrated motion control technology unit 87−43116
motor containing CMOS microprocessors for simplified motion control 88−75551
motor control methods, conf., Long Beach, CA, USA, (Sept. 88) 88−70018
motor drives, design for programmable motion control 85−60456
motor position control, power IC packaging technology 88−63504
MOTOR-CON '87 conf, Hannover, W Germany (April 1987) 88−70019
motor-drive combinations 88−17489
motors, controllers and software for versatile position control systems 88−69424
motors, motion control and intelligent circuitry 88−75571
motors are revolutionized by digital controls, solid state switches and powerful magnets 86−6812
motors in control systems 85−5107
μR 100/μR 180 series industrial programmable intelligent recorders *(Japanese)* 87−8658

position control continued
multi-axis modular translating system for stepping motors, design and multiprocessor architecture *(French)* 85−16174
multi-axis step motor control microcomputer-based controller design, NC machinery appl. 87−43119
multi-motor control systems analysis and design *(Czech)* 88−24180
multibeam communications satellite, onboard antenna pointing control system *(Japanese)* 87−34475
multibeam communications satellite, onboard antenna pointing control system 87−48988
multichannel cross coupling systems, dynamic props. 86−30863
multielement ultrasonic ranging array [for mobile robots] for mobile robots 85−59532
multilayer actuator design, finite difference method 87−53844
multimotor systems, closed-loop stepping motor control appls. 85−21667
multiple antenna arrays and corner reflector assemblies in radio positioning appls. 87−3253
μR 250 programmable intelligent recorder with pen controlled by ultrasonic transducer *(Japanese)* 87−41567
myoelectric control of upper limb prostheses, response time and control accuracy 87−57232
navigation system based on computer processing of marine radar images, sea trials 87−41000
Navstar GPS system, program status 87−41069
nonactinic wavelength microscope, target alignment accuracy 88−1587
nonlinear observers and controllers, PM stepper motor control 88−37251
Nova laser alignment computer-based control structure and software methods 85−18998
nuclear power plants, fuel element positioner 86−12637
number-to-angle of rotation convertor, using programmable microcomputer 87−3543
object detection and identification using multi-sensor processing 88−59269
object recognition and visual positioning, scale-independent method 87−48169
ocean floor geodesy system surface element positioning by GPS 88−10591
ocean rift mapping acoustic transponder net maintenance 88−5201
offset unfurlable tracking antenna, 7 m, mechanical and control study 87−12821
operational amplifiers, stability and appls. *(Spanish)* 87−5691
optical correction in SMD fixing systems *(German)* 88−50513
optical disc drive, head positioner, high performance 87−43089
optical encoders, developments and market survey 87−29042
optical fibre straightedge reference 85−12588
optical fibres, polarisation alignment technique *(Japanese)* 88−58103
optical head controlled by double diffraction patterns 88−45064
optical linear encoding system, low-cost hybrid for robotic appl. 85−15029
optical pick-up servocontrol IC for compact disc players *(Japanese)* 85−42794
optical single-mode fiber manipulation with Inchworm piezoelec. translators 85−50955
optimally controlled DC brushless motor using Inductosyn feedback, VTR appl. 85−3758
optoelectronic camera internal calibration, 2D translational robot 88−42171
overhead line galloping control using weights and mechanical dampers for multiconductor bundles 86−51046
overview of industrial sensors in 1980s 86−31357
Pana-Servo AC driver for industrial sewing machines *(Japanese)* 88−23958
particle detector position changing and monitoring system, using M-6000 computer 86−50384
PASS, visual sensor for seam tracking and on-line process control in arc welding 85−14817
PCB, automated terminal pin insertion offers high throughput, CNC positioning 85−40337
PCB assembly, AUTOSERT flexible odd-shaped component insertion workcell 86−1556
PCB assembly robot, tracking pneumatic drive *(Russian)* 87−32168
PCB drilling machines using stepper motor positioning, microcomputer control 85−1177
PCB image registration, microcomputer appl. 88−1186
PCB pin insertion, robot appl. 87−17540
PCB printing, mechanical positioning and techniques *(Italian)* 85−40328
permanent magnet brushless servodrive controlled by 16-bit microcomputer 88−75655
permanent magnet DC linear motors for electrostatic separator corona electrode position control 88−11243
permanent magnet energised two-phase stepping motors, closed-loop microprocessor control system 86−51667
permanent magnet steppers with servomotor applications 88−23985
permanent magnet stepping motor, microstepping, position error analysis 87−30687
permanent magnet two-phase stepper motor with controlled dynamic behaviour, positioning control 86−19314
photo mask alignment technique using digital image processing, semicond. wafer fabrication appl. 86−14979
photodiode array optical encoder for accurate direct drive servo actuator positioning *(Japanese)* 88−40082
photoelectric angular displacement sensor 87−14293
photolithography, alignment tolerance determ. from die yields 87−11549
photolithography, alignment wavelength optimization for wafer stepper microscope 87−11547
photonics handbook 88−26
photovoltaic modular power system design and operation, computer controlled 86−39635
piezodriven spindle for specimen holder in SEM 87−24730
piezoelectric actuator, infinitely stiff, very high precision 88−51095
piezoelectric actuators driving computer controlled positioning turntable for microfabrication *(Japanese)* 88−1841
piezoelectric actuators for scanning tunnelling microscopy, behaviour and calibration 87−12007
piezoelectric drives for machine tool positioning *(German)* 88−57862
piezoelectric positioners with submicron accuracy, IC wafer manufacture appls. 87−12011
piezoelectric translation device for micropositioning 88−33479
piezoelectric XYθ table drive principles and functions *(Japanese)* 87−45735
piezoelectricdriven turntable with high positioningaccuracy for submicron lithography systems 86−34010
pilot command interfaces for discrete control ofautomated nap-of-Earth flight 86−18454
PLRS, position location reporting system, development testing 87−41081
pointed optics gimbal configurations and their characts. 88−61594
position control continued
PORTESCAP HPMC stepping motor position control system 88−75671
position control by DC motors *(Spanish)* 86−66092
position transducers: strategic components in motioncontrol loops 86−31341
positioning drive, computer-aided, counter cct. *(German)* 86−40983
positioning servomechanism for monolithic and hybrid ICs *(Slovak)* 85−50632
positioning systems, highly accurate, having active elastic compensators, dynamics *(Russian)* 85−58875
positioning-table selection for electronicsapplications 85−54112
power station air preheater seals, EM linear actuators for suspension and position control 87−35779
powered wheelchair joystick control box for quadriplegics, to encourage muscle use, training simulator 87−21648
precise positioning mechanisms *(Japanese)* 85−48087
precise positioning using PZT, alignment mechanism *(Japanese)* 88−5718
precision drives, positional control system, structure and parameter selection *(Russian)* 86−19538
precision motion control using PC compatible controller for electric motors 88−75569
precision positioning table for submicron lithography system 86−15247
precision stabilization system design to reduce the effects of friction 88−61595
precision stepper column optimisation, elec. methods 87−11550
precision X-Y stage, electro-hydraulic servo for electron beam lithography system 85−40575
programmable rotator control for antenna 85−36137
programmable rotator for wind tunnel balance, using SM-3 control computer complex 86−44738
prosthesis, microcomputer-controlled, position proprioception 87−57233
proximity and photoelectric sensors, latest designs and applications 87−29046
pulse count tracking electrical drive *(Russian)* 85−27681
PWB machining, microprocessor control of electric drives 88−62672
PWM converter fed asynchronous machine, position control 86−66084
PWM inverter-fed induction drive, flux control for optimum position control 88−69760
PWM transconductance amplifier for precise microstepping 86−62460
PWR nuclear power plant, self-tuning control appl. 86−51272
radiotelescope simulation using ISRSIM block oriented simulation language *(German)* 85−37153
RADLAC-II linear accelerator, mechanical and mag. alignment techniques 88−54022
RATAN-600 feeder drive automatic control system 86−37964
rectifier bridge assembly, robotised, incorporating diode classification and dependable positioning 88−37945
reflector antenna, 64 m, computer-controlled pointing system, deep space probe communications/tracking appls. *(Japanese)* 86−36831
reluctance feedback sensors for brushless DC servo systems 87−35968
remote control of position using optical beam *(Russian)* 87−49587
resolver-to-digital conversion 88−12455
reticle-to-wafer alignment system, automatic two-points, using projection column servo 87−11545
robot, computer-vision based, position/orientation estimation, power line maintenance appl. 87−64162
robot aid to persons with high spinal cord injuries 87−21640
robot appls. of linear motors *(Russian)* 85−5569
robot arm position control, angular meas. using resolver *(German)* 87−24275
robot checking DC drive and digital position controller design 88−18134
robot direct kinematics, VLSI architecture for real-time computation 86−58574
robot eye in gripper, composed of solid state linear array sensor 87−14161
robot for military system maintenance and repair, man-machine interface for safety 87−43925
robot manipulator compensating load effect trajectory control by force sensor 88−42076
robot navigation using single camera, location problems 88−41017
robot safety position sensing system 85−60715
robot spacecraft trajectory guidance decision tree for inflight data processing 86−12110
robot systems, speed and position controller of DC servomotor, design study *(Korean)* 85−21657
robot weld seam tracking by laser dimensional meas. sensor 88−34192
robotic arc welding using vision sensor-based control systems, appl. 85−53995
robotic linear actuator design and control schemes 86−70942
robotic manipulators, accuracy test procedure using vision based 3-D position sensing system 85−3907
robotic MIG welding using vision/seam tracking, car industry appl. 85−53994
robotic military land vehicle autopilot develop. 88−36699
robotic seam tracking, US sensing system, industrial positioning/inspection appls. 85−4517
robotic sensors for electronic cct. assembly 88−74393
robotic vision tray picking system design using multiple optical matched filters 87−39931
robots, autonomous, mobile, sonar-based mapping and navigation system 86−59959
robots, path control of 3D linear motion using a laser 86−3406
rolling mills, multiprocessor-based, digital AC drive system appl. 87−43680
rotary excavator drives positional control optimisation using multichannel setters *(Russian)* 85−44241
rotary solenoids for angular movement control 87−47112
rotating laser range finder and attached data interpretation for use in an autonomous mobile robot 88−74042
rubber industry process drives, coordination of motor drives with programmable controllers 85−10286
sampled servo control loop digital algorithmic LSI unit, mag. disc file appls. 85−39156
SAR, bistatic, motion compensation 86−17510
satellite Doppler navigation systems, ARGOS and SARSAT, random errors calc. 86−23994
satellite ground station antennas, corrected equatorial assembly *(Czech)* 88−35448
satellite navigation systems for land vehicles, global positioning system 87−63086
satellite tracking antenna position control using microcomputer 85−58050
sawmill, increased sideboard yield and customer oriented production via edger optimisation 88−34196

position control continued
scanning optical microscopy, MICROB system, planar technology characterisation 87−18283
SCARA-hype pick and place robot, metrological study of small displacement behaviour 88−74597
scene interpretation refinement object recognition and location 88−73381
SCR-DC motor drive, digital position control algorithm 88−43420
self-controlled synchronous motor, dynamic response improvement using sliding mode controller 87−42844
self-controlled synchronous motor with sliding mode controller as servo-control system 87−51173
self-excited synchronous motor control electronics *(French)* 87−58036
semiconductor components fabrication, positioning system *(Czech)* 86−8930
semiconductor laser-to-fibre coupling, all-elec. scheme for dynamic coupling control 88−13908
semiconductor processing, resist clearing from alignment mark areas using excimer laser 88−39324
semiconductor wafer handling robot for angular positioning 85−34745
semiconductor wafer pre-align station capable of pre-aligning variouswafer sizes 86−35757
semiconductor wafer transfer system with mobile robot, path planning algorithm 87−23319
sensor system for positioning tasks *(German)* 86−11328
sensor type automatic steering control system for rolling mill, anal. and expt. results *(Japanese)* 86−52070
sensors photoelectric, inductive and capacitive 86−31639
sensory feedback in upper limb prostheses, robotics perspective 87−21673
series resonant convertor, control methods 85−32616
series-/shunt-wound motor, speed/rotation direction control, SCR bridge cct. config. *(German)* 85−32506
servo actuators for positioning appls. 87−4852
servo drive, DC, parameter selection with digital control 87−9886
servo drives for dynamic positioning, choice of motors and regulators *(German)* 88−17664
servo feedback sensing to machine tool fabrication 88−42271
servo motor controller IC MC33030 86−35859
servo systems, linear and nonlinear bounds, appl. in NC control 85−27586
servodrive systems for high precision position control appls. 88−75995
servomechanism resonance, elimination using bridged-T compensator 85−34110
servomotor autonomous positioning systems, command language comparison 88−75675
servomotor based positioning systems, digital control for performance improvement 85−60217
servomotor position control system for robotic appls. 88−75674
servomotor position control systems, standardisation problems 88−75672
servomotor position control using microprocessor technology 85−5133
servomotor positional drives with piezoelectric motors, response speed improvement method *(Russian)* 88−49004
servos with programmable ramp startup control, for heavy industrial applications *(German)* 85−5128
shaft position control techniques 86−44417
ship control systems conf., London, UK (Jan. 1988) 88−36723
ship design for autopilot using roll stabilisation by rudder 88−36725
ship hybrid navigation system, adaptive Kalman filter for improving positioning accuracy *(Japanese)* 85−20281
ship positioning using acoustic location method, calibration procedure 86−60947
shipboard mounted tracking antennas, dynamic analysis 85−7748
single mode fibre switch, high-precision multiposition, using magnetic levitation 88−13884
single-chip brushless DC motor IC, Hall effect sensor, logic technology 88−75639
smart motor controller for position control 88−75621
SMC technology, automatic placing machines *(French)* 87−17533
SMD assembly, optical correction system for automatic positioning *(German)* 88−19514
SMT, parts centering motion sensor 88−44478
SMT state of the art in surface placement with placement correction for board distortion 88−12837
solar cell array shadow-following module and sun-tracking control 87−9863
solar collectors, sensor system for single-axis tracker alignment with direct solar insolation 87−16056
solar electric station heliostat field, crossover effect on automatic control system 87−30435
solar electric station heliostats, automatic control system using diff. eqns. 88−43100
solar energy concentrators, automated control system for heliostat field, parameter determ. 88−17432
solar power plant heliostat field control, optical communication system philosophies 86−51533
solar power tower heliostat control using computerised communication and DC drive operations 88−23802
SPACE automated meas. system for contactless exam. of machining workpieces *(German)* 88−22789
space curve generation, reference-pulse interpolation method *(Spanish)* 86−62124
space vehicles, analytical dispersion anal. of orbital manoeuvres strategy 87−77705
spacecraft, Solar Dynamics Observatory, momentum biased, active nutation control 85−26831
Spacelab Instrument Pointing System 86−32447
spatial uncertainty estimation and representation 87−47918
speed and position control theory using Kalman filters 88−75596
stabilisation of large mounts through auxiliary inertial instrums. 88−61527
standard bench transducers for pulsed automatic data systems, discreteness determ. 86−24486
stationary neutron radiography system, component positioning systems 88−18809
stationary neutron radiography system using parts-positioning manipulator 88−18808
statistical control of stepper alignment for VLSI lithography 87−60243
steelworks electric cleaning line drive and control equipment *(Japanese)* 86−57054
step and servomotors, position control with programmable controllers *(German)* 87−51254
step motor time-optimal control problem 87−30692
step-and-repeat alignment systems and wafer scanners, mixing and matching 87−11552

position control continued
stepper motor as digital positioning device *(German)* 88−49005
stepper motor driven robot gripper for PCB manufacture 88−49007
stepper motor movement control, two speed option, counter cct. 86−19308
stepper motor-based position control systems 87−51248
stepper motors, computer controlled single drive cct. 85−27447
stepper motors using microstepping for high positional accuracy systems in test and meas. instrums. 87−30638
stepping and DC motors technology and control conf., Boston, MA, USA (Oct. 1986) 87−43799
stepping and reluctance special-purpose drives developments for industrial appls. *(Czech)* 88−24177
stepping and servomotors, universal motion controller, benefits 88−75663
stepping linear motor, positioning mechanisms comparison with rotational drives *(Czech)* 85−21658
stepping motor, computerised control system using IEEE-488 bus *(French)* 87−64626
stepping motor, feedback control *(German)* 87−64639
stepping motor actuator for positioning appls., structure and design anal. 88−43357
stepping motor autonomous positioning systems, command language comparison 88−75675
stepping motor closed-loop drive, digital controller design 87−9594
stepping motor control on a CNC measuring projector *(German)* 88−17658
stepping motor control system interfaced to IEEE 488 controller for industrial computer control 85−9948
stepping motor controllers for detector, samples and beam-line optics positioning 87−41658
stepping motor electronic registering focus 86−15202
stepping motor integral position transducer 85−9935
stepping motor microcomputer-based control *(Czech)* 86−45462
stepping motor motion control, indexers add precision 86−33442
stepping motor position control, FORTH appl. 87−64632
stepping motor position sensors for control system appls. *(German)* 88−69427
stepping motor speed and position control, new approach 85−48982
stepping motor time optimal position controller, microprocessor-based, implementation 86−51672
stepping motors, drives in positioning systems of manufacturing equipment *(Polish)* 85−16064
stepping motors, major types, popularity because of wide application range *(Danish)* 85−5129
stepping motors, position control using microprocessor based system 88−49015
stepping motors, positioning tools, function provided 87−35967
stepping motors, principles and control aspects *(Spanish)* 87−72170
stepping motors for data storage units, bearings selection and lubrication *(German)* 86−51656
stepping-motor commutator based on read-only memory, microbatcher drive appl. 87−9895
stepping-motor position controller based on EPLD 86−46670
stepping-servo controller for DC motors 87−30669
Stewart platform commensurate positioning for six-axis machining 88−49315
submersible ROVs in offshore oil industry, sonar positioning methods 87−76874
submicron lithography, alignment system using rocking illum. of Ar ion laser 87−11546
submicron lithography, double diffraction alignment method using checker grating 88−7534
submicron lithography, performance of a wafer stepper with automatic intra-die registration correction 88−1586
subsea positioning and control in hydrocarbons exploration, use of transponder network 87−42284
superconducting torquer for Infrared Satellite Observatory camera 87−38706
superfine laser position control using statisticallyenhanced resolution in real time 86−29276
synchro/resolver convertor ICs for motion control 87−10930
synchro/resolver testing, Natel L200 dynamic-angle simulator 87−64625
synchronised PDM/number convertor *(Slovak)* 88−70947
synchronous motors, digital controller for speed and position control 88−75580
synchronous motors, robust position servo system design using sliding mode control 88−69339
synchronous permanent magnet superconductive servodrive for cryogenic camera positioning 87−43122
synchronous servo drive, microprocessor based speed and position control 86−66184
synchrotron radiation X-ray lithography, alignment exposure system 88−39326
synchrotron radiation X-ray lithography, mask-to-wafer alignment technique 88−13208
tacholess DC motor with digital control *(German)* 87−43321
tap-changing transformers microprocessor based controller appl. 85−65358
target maneuvering in 3-D space, tangential/normal accel. estimation, direct method 86−3895
telescope rotary chopper, electronic circuit for remote control 88−38648
three-coordinate positioning instrument for magnetic induction vector meas. *(Slovak)* 85−8767
three-phase induction motor servo and spindle drives for machine tools *(German)* 86−19266
threshold displacement meas. at output of optical device mechanisms, positioning efficiency estimation 87−3755
time optimal trajectory control with induction machines of machine tools 88−49217
tool path guidance contour tracking system with photodiode array sensor 88−36078
tools, in-process measurement using simple sensors 88−47433
torque indicator for motor driven positioning element *(German)* 87−41616
Toyota electronic modulated air suspension system for the 1986 Soarer 88−55703
Toyota electronic modulated air suspension system for the 1986 Soarer 87−43615
tracked vehicle remote control, transmitter mixer cct. design 85−11103
tracking electrical drive, module for matching with source of test signals *(Russian)* 86−40204
tractor automatic electronic steering system with remote control and repeatable positioning facility 87−51591
transducers using pseudorandom encoding 87−70534

position control continued
TRANSIT and NAVSTAR satellite systems for precise time and positioning using oscillators and clocks 86−17535
translation devices, dynamic piezoelectric 87−25738
TRANSRAPID Maglev system, long stator propulsion system develop., vehicle position control 87−64922
turbine blade pitch control and modelling 88−62230
two-axis Sawyer motor 87−30642
two-axis Sawyer motor for motion systems 88−11250
two-phase 50 pole AC servo, hybrid stepping motor 88−55386
two-phase brushless servo system , closed loop position control 88−75638
UC 3517 smartpower, IC for stepping motor position and speed control 88−71661
ULN-3750 family of power op. amps. simplify drive circuits 86−750
ultrasonic transducers, microprocessor-based, for shape determ. and robot arm position control 88−42692
underwater vehicles, autonomous and cooperating, hierarchical value-driven control system for coordination 88−36700
underwater vehicles, demonstration of closed-loop trajectory control 86−65561
universal stepping-motor interface *(German)* 85−60214
unpositioned workpieces handling robot with visual andforce sensors 86−47205
US machine tool datum accelerometer 86−70553
user's requirements definition for step motion system 88−75666
variable reluctance stepping motor phase plane anal. 87−30537
variably shaped electron beam exposure system, EX-7, 0.25 μm pattern form. 88−19899
vehicular positioning system (MAFIS), military and commercial appls. 86−43913
velocity prediction algorithm for systems with discretized positional feedback 87−30681
video tracking, adaptive approach 88−53475
VLA 51 synchronising controller and VLA 55 position controller for VLT freq. convertors 87−72229
VLSI, direct step on wafer microlithography 88−1510
voice coil DC linear motor development *(Japanese)* 86−51651
VP100 electropneumatic valve positioner *(Japanese)* 88−71870
VTR servo systems for tape winding drum speed control and head alignment *(Spanish)* 85−47725
WABOT-2 robot musician 88−4249
wafer probing, microcomputer control of two-dimensional positioning *(German)* 85−37445
wafer stepper, 0.5 μm, holographic nanometer alignment system 88−39649
wafer stepper, holographic nanometre alignment 87−25486
waveguide end milling tool path error control by magnetically suspended spindle 88−44331
weld joint location technique for robot welding system *(French)* 85−35940
welded joint automatic tracking system using arc as a sensor 85−53984
welding by robots, software and sensory system 86−61827
wide-range low-voltage piezoelec. bimorph 87−12006
wind tunnel instrumentation, electro-optical positioning system 87−71235
wind tunnel magnetic suspension and balance systems, digital control 87−71236
wind turbine generators, adaptive digital controller for dynamic performance improvement 87−15616
wood block shape identification for automatic centring in peeling machine 88−36084
wrap-rib antennas, free vibration continuum model 86−3686
write once optical memory using 130 mm disc, techniques for fast data retrieval 88−45060
X-ray lithographic mask alignment using moire signals in refl. 87−63245
X-ray lithographic mask positioning technique using moire interference 87−24987
X-ray lithographic masks, automatic alignment technique using moire interf. 87−38034
X-ray lithographic masks, precision alignment technique using moire interference *(Japanese)* 86−14987
X-ray lithography, high speed zone plate alignment systems 87−38033
X-ray lithography, SR-1 step-and-repeat system, mark detection characts. 85−1615
X-ray lithography system, SR-1, alignment accuracy eval. *(Japanese)* 86−1866
X-ray mask full-field alignment meas. method 87−53622
X-ray masks, alignment mark stability 86−35504
X-ray stepper with plasma source for high throughput and accuracy 88−13213
X-Y positioning table controls and applications 87−10148
CO_2 laser wavelength tuning system, microcomputer-controlled 86−3254
CO_2 lasers, appl. to high speed blanking 87−75281
$Pb(Zn_{1/3}Nb_{2/3})O_3$-$BaTiO_3$-$PbTiO_3$ ceramic electrostrictors for micropositioner appls. 87−53816
WC plate brazing to diesel engine rocker arms 87−22935

position finding *see navigation*

position measurement
2S80 resolver to digital convertors for position and velocity meas. 88−74240
3-D coordinates and attitude of polyhedra *(Japanese)* 85−52873
3-D measuring machine guideway errors *(Japanese)* 85−4112
3-D objects using recorded image projection and 2 cameras *(Japanese)* 85−52874
3D coordinate meas. using position-sensitive device *(Japanese)* 87−21253
3D industrial objects position and orientation detection, efficient image processing method 88−52575
3D meas. using slit ray projection *(Japanese)* 87−56838
3D measurement of polyhedron position and orientation using multiple binary images *(Japanese)* 86−55849
3D position meas. using stereo TV, appl. to fish 85−48084
3D position recognition using shape, error analysis and optimisation of observation system 88−29645
3D position recognition using shape, problem formation and iterative soln. 88−29644
absolute-type position transducers using a pseudorandom encoding 88−16069
accuracy using magnetic field *(Japanese)* 87−56837
acoustic array sensor tracking system, appl. in E Arctic Ocean 86−60957
acoustic positioning system, using demodulated signals of FM. US wave 85−64780
acoustic ranging equipment evolution, 54 to 108 kHz 88−41758
actuator, infinitely stiff, very high precision 88−51095
adaptive unbiased estimation using bearings observations for moving object position determine *(Japanese)* 87−75837
aerospace detection, tracking and classification system 88−15690
angle-position meas. error anal. in production systems 87−49438
Anglescan laser beam system for near-shore positioning 88−8391
angular coordinate meas. in lidar systems, source coherence effect 88−35594
angular measurement systems, sensors and A/D conversion 85−28584
angular position detector based on lateral photoeffect 86−5243
angular position detector using position sensitive detector, line tracer appl. *(Japanese)* 86−24781
angular position meas., optical transmitter for servo drives *(German)* 85−47923
animal psychology research, IR touch detector for TV screen 88−4216
arm movement tracking using computergraphic modelling/analysis 87−29279
array sensor for tactile sensing in robotic applications 88−42087
articulated whisker probes, proximity sensing 86−5224
ASIC with CMOS-compatible light sensors for optical shaft encoder with 14-bit resolution 87−59409
attitude calculations, four-point, error sources 88−47680
automatic 3-D coordinate meas. machine for workpieces, image processing *(Japanese)* 88−53859
automatic vehicle location system, error sources consideration 85−3387
automobile electronics, inductor contactless position sensors 85−60507
automotive position sensors, low cost, performance expectations 88−4641
automotive sensors fabrication technology 86−57006
azimuth meas. for moving target, recursive and global approaches *(French)* 88−22791
ball bond location, elec. meas. technique 88−64162
balloon-borne radiometer, attitude determ., use of two-sided limb scanning 87−71333
bathymetric survey positioning system calibration performance appraisal 88−10592
BBC-microcomputer-based limb-movement measuring system 86−38763
bearings-only target motion analysis estimationcharacteristics 86−37921
biomechanical analysis of whole-body movement in sports activities, automatic marker classification procedure 88−61231
biomechanics, gait and energy expenditure analysis of above-knee amputees, Vicon system 88−54487
brushless DC motors, optic commutation system 87−51235
brushless DC servo systems, velocity and position feedback for control schemes 86−51669
buried pipe and cable locator limitations and selection criteria 87−21023
buried pipeline location by EM induction 88−60921
buried pipes, mag. Detection, mag. field anal. 88−53854
cable laying tunnelling machine position and attitude meas., method 88−53107
camera calibration in multisensor robotic locating system 87−20941
capacitive sensor for proximity measuring robot, protective device construction and operation *(French)* 88−16056
Cartesian oval fibre-optic lens as linear to angular position converter 87−26019
CCD line sensor, thermogravimetry appl. *(Slovak)* 88−36053
CCD sensor appl., L110C and L133C East German models *(Czech)* 86−18116
CCD sensors, increased accuracy *(Russian)* 85−20593
CCD-line camera meas. of velocity and position *(German)* 85−64275
ceramic sensors, materials and operating principles *(German)* 86−55606
CID based retroreflector field tracker 85−58599
CMOS, rapid recognition of interconnect features for customisation 88−13186
CMOS monolithic optical position encoder with on-chip photodiodes 88−51008
co-ordinate meas. instrument deviations and acceptance tests *(German)* 86−18124
codeless GPS positioning technology for future viability 88−9687
collimated synchrotron radiation, Z-shaped wire profile and position monitor 87−21350
commercial transducers, various types, for measuring temp., pressure and position, survey *(Danish)* 85−26476
Compumotor Plus AC servomotor with integral posn. sensor 88−55381
computer vision program, position measuring accuracy of loading surface mount components 87−73861
computerised relative position sensor using structure light 88−41989
conducting plastic potentiometers as position and angle sensors *(German)* 85−8790
conducting wall position meas. in metal vessel 87−3744
constant heading trajectories, maximum likelihood estimation 88−15555
contactless measuring technique for testing VHS video cassettes *(German)* 88−9835
contactless optical-electrical position and dimension meas. and industrial applications *(German)* 86−11711
contactless position transducer using electrical commutating cct. and Hall effect *(Russian)* 85−14777
coordinate measurement in unmanned machines and error correction *(Hungarian)* 86−31647
coordinate measurement with a tracking laser interferometer 87−34935
coordinate measuring machine accuracy anal. 85−31592
COSPAS-SARSAT search and rescue system trials and long-term prospects 87−41144
CPL 40 process monitoring system, position meas. and control using potentiometers *(German)* 88−47673
crane runway meas. using laser beam *(Czech)* 87−49923
cryogenic motors/positioners for space systems 85−48983
cylinder position detection using inductive proximity switches 88−29652
deep-ocean buoy position location system evolution 88−5196
dentistry, alignment inclinometer in tooth prep. 87−63805
design of optical gratings for position transducers 85−29672
detectors for automatic handling systems *(French)* 86−31347
diagnostic equipment quality testing with CNC co-ordinate meas. devices *(German)* 86−17778
Differential GPS and GEOLOC hybrid system for accurate long-range dynamic radiolocation 87−41140
differential optical position detector for magnetic suspension systems 85−64133
differential transformer position sensors , manometer piston pairs comparison 88−74347
differential transformers, engineering analysis for design optimisation 88−44394

position measurement continued
digital readout for manual machine tools, costs, benefits and principles 87−29208
digital standard star tracker for precise attitude determination 85−15384
direct-write electron beam patterning reregistration and metrology 85−29248
disabled driver assessment with motion analyser 88−54486
disc drive technology application of heterodyne interferometry 87−47047
disc magnet motor with integrated position sensors 88−75574
discrete position encoders for velocity observation appls. 88−47429
DO 28D aircraft longitudinal motion parameter estimation, effect of measurement errors *(German)* 86−38174
East-Scheldt storm barrier construction, ship-borne position measurement systems 87−28916
ECDS1, industrial position measurement system 86−31633
eddy current displacement transducers built into hydraulic cylinder 86−5261
edge position meas., microcomputer based system using fibre sensors 86−60347
edge-position transducer employing reflectance 86−31360
electric field meas., probe position determ. using differential transformations *(Russian)* 85−26431
electro-optical position measurement for active magnetic bearing 85−31593
electromagnetic suspension system levitation parameters regulation gauges *(Russian)* 85−39268
electron beam lithography, Cramer-Rao accuracy bound for optimal signal processing 87−11851
electron beam lithography system, with high speed precision X- Y stage 85−29077
electron micrographs, standards for three-dimens. mensuration 88−7273
electronic device for position-sensitive detectors in VUV spectroscopy 87−35097
electronic tablet Billiard Scanner using laser beam scanner *(Japanese)* 85−52875
EM testing using RL- and RC- multivibrators 85−39830
encoders and resolvers for accurate position data 86−31358
encoders in laser graphics-data read-write apparatus 86−70064
Engineering Test Satellite-3 attitude motion obs. with vidicon camera 85−48367
error detect. with incremental position sensors *(German)* 88−53656
eye and head movement meas. of small animals using mag. field search coil system 87−50204
eye position measurement, instrum. amplifier appl. 86−792
eye position sensor, differential meas. generalisation 85−38009
eye position sensor, fibre optic 88−4940
fibre coupled white light interferometers for high accuracy position sensing 86−5527
fibre optic based position sensing on aircraft, time and wavelength division multiplexing 88−48276
fibre optic interferometer position sensor, design and implementation 85−35472
fibre optic position sensor, hydroelectric power station appl. 87−29090
fibre optic position sensor, using FM semiconductor laser 88−42142
fibre optic position verification device, radiation therapy appl. 87−29810
fibre optic proximity probe, theoretical and expt. anal. 85−24283
fibre optic proximity probe response, reflectivity compensation and linearisation 85−56339
fibre optic remote sensor for angular position determ. 88−42126
fibre optic resonant serial-transmission position encoder, optical actuator multiplexed 88−36040
fibre optic rotary position transducer 88−42143
fibre optic sensor, intensity-modulating, loss compensated sensors of ang. position and displacement 88−16167
fibre optic sensor, LED transmitter/detector config. without directional couplers 86−42253
fibre optic sensor appl., principle and limitations *(German)* 85−42968
fibre optic sensors *(Italian)* 87−53987
fibre optic sensors appl. to automobiles 88−43469
fibre optic sensors utilising surface reflections 85−24282
fibre-optic angular sensor with interleaved channel spectra from LED 86−68275
floppy disc drives, read-write head alignment, EM meas. methods 86−63566
force transducer system for force sensing in magnitude, direction, and position 88−9968
functional cosmetic arm, 3D co-ordinate meas. and DP 88−48233
galvanometer scanner, high precision control 88−51646
geodesy, carrier signal multipath interference effects on relative GPS positioning 88−54729
geodetic Doppler positioning, direct and iterative methods for least squares problems 86−65037
geodetic position determin., cm baseline accuracy of NAVSTAR system 85−59444
Geometrical Dilution of Precision, Navstar/GPS and multilateration systems *(French)* 86−23997
Geostar satellite system positioning technique and accuracy 87−41146
geostationary satellite, position meas. using ground radiobeacons 87−34665
geostationary satellite positions determ., by time/frequency methods 86−23988
Global Positioning System C/A code receivers, positioning and timing study 88−22049
GPS, outline and receivers *(Japanese)* 87−76887
GPS, velocity accuracy meas. 88−15709
GPS at a fixed station, accuracy of position fixes *(Japanese)* 87−76889
GPS calibration of French LORAN chain 88−4138
GPS development and potential changes affecting civil use 87−41135
GPS integrity check using maximum solution separation 88−74069
GPS marine kinematic positioning accuracy and reliability 88−9681
GPS measurements, reference trajectories 88−74072
GPS navigation uncertainty, statistical techniques and scale estimators 88−4139
GPS pseudorange meas. smoothing by Doppler phase meas. 88−9682
GPS-aided marine positioning developments 88−10590
grinding machines, specifications of electronic checking and control gauges 85−14834
ground vehicle, positioning and guidance by laser and corner cube 86−59002
ground vehicle position and heading measurement using laser/optical beam system 85−3516
ground-level transponders relative vertical position meas. with ERS-1 altimeter 86−56231
position measurement continued
Hall effect position sensors, adaptable calibration and linearisation 87−14276
Hall effect sensors for contactless position meas. *(German)* 87−14526
Hall generator appl. *(German)* 88−29635
Hall sensor in digital position detection system, simulation model 86−55636
Hall-effect sensor signal convertor appl. *(Dutch)* 88−42058
Hamamatsu R1548 PMT, position sensitivity increase using pulsed magnetic fields 87−45546
heading-dependent error correction for MF and LF position-fixing 88−4140
HEDS-5500 rotating angle transmitter for electric motor appls. *(German)* 88−55268
high accuracy distance and attitude measurement using slit-ray projection method *(Japanese)* 87−35201
high precision coordinate meas. system, using pencil type indicator *(Russian)* 86−5335
high precision positioning system, simulation *(Russian)* 88−4626
high resolution optical metrology and edge detection using a PC-controlled smart CCD camera 88−10135
high-speed capacitive meter for small movements of a conductive surface 88−60697
high-temperature position/velocity sensor, compact module design for motor appls. 86−50086
Hudson Bay navigational survey for high-resolution geophysics 88−53391
human 3D movement, improved accuracy of tracking system 86−70215
human body stability investigation by sway magnetometry 86−60715
hydrographic positioning accuracy improvement using multiple lines 88−5198
hydrographic survey positioning by spread-spectrum radiolocation 88−10588
Hydrorange seismic streamer tracking acoustic system 88−9669
hyperbolic navigation systems, position determ. algorithm errors 85−47613
hyperbolic radionavigation systems, coordinate conversion techniques in microprocessor based receivers 87−41048
hypersonic vehicle pitch stability measurement 88−23158
IBM personal computer data interface to hole-locationmeasuring machines 86−14684
image motion estimation, appl. of maximum a posteriori principle 88−52597
image sensors using low cost dynamic Si MOS RAM chips *(German)* 85−42884
incremental rotary optical encoders for industrial appls., Hewlett-Packard HEDS-5000/6000 series *(French)* 87−41421
indicator based on Z80 microprocessor *(German)* 87−28908
inductive linear position transducers, calibration methods and curves *(German)* 85−26310
inductive position sensing: insights into manufacturing productivity 88−29650
inductive proximity detectors *(German)* 87−49727
inductive sensor for distance, movement or position meas., design, operation and appls. *(German)* 85−37574
industrial 3D surface co-ordinate sensor with high dynamic range 88−36081
industrial position and vision sensor technology, overview 87−77266
INSEN transducer based meas. system. for speed and position meas. 88−74397
INSEN transducer for commutation and current profiling in electric motors 88−69303
integrated circuits, automatic assembly *(Polish)* 86−19828
interactive triangulation, folded optical system for sensor sighting 86−5513
internal threads testing, by numerically controlled test device *(German)* 86−31183
invertor-fed synchronous motor rotor position sensor *(Polish)* 86−12794
IR homing missile, measurement of seeker's aiming point by high speed TV camera 88−22786
jaw movements recording, He-Ne laser position recorder 85−15298
Kalman filter for video target tracking 87−70301
KERN SPACE, automated noncontact 3D position meas. system using computer-controlled theodolites 88−41986
KSY 10 and KSY 20 Hall sensors for noncontact position detection 86−63227
Lamb wave graphic tablet 87−74484
large-ship GPS evaluation 88−9680
laser and reference points, vehicle position and heading measurements *(Japanese)* 86−11714
laser coordinate measuring machine for cylindrical aircraft parts 88−8376
laser Doppler meas. of vibration and motion 86−5531
laser interference measuring system for electronics *(Czech)* 85−52871
laser interferometer-fringe counter for position and velocity sensing 88−74594
laser interferometry appl. 88−4646
laser measurement system for fast, precise positioning 88−45604
laser range finder, synchronised scanner approach, signal processing requirements 88−53726
laser range finder based on synchronised scanners, for surface topography meas. 85−15021
laser scattering appl. in components positioning 86−3401
laser system for length meas. *(French)* 88−42278
laser-based gyroscopes for inertial navigation, configs. and characts. *(Spanish)* 86−54237
laser-based system with triangulation format 87−21233
laser-beam incidence, position meas. and display *(Russian)* 85−26425
LCD with input function using conventional electrodes 88−16276
light source, photodetectors array reception, angular position estimate 85−15035
lightning surge and transient protection and warning systems 87−21978
limit switches which use sealed-contact reed relays *(Russian)* 85−14778
line-like object, 3D position meas. using defocusing of imaging system *(Japanese)* 87−70809
linear motor vehicle, position detection using inductive radio system, influence of transmission line cross-talk *(Japanese)* 87−56300
linear optical encoders, error sources 86−38354
linear synchronous motor vehicle position detection using inductive radio system, digital signal processing method *(Japanese)* 87−55942
linear variable differential transformer performance prediction 86−44302
linear-motor vehicles, influence of crosstalk on accuracy in inductive radio system 88−53849
lithographic exposure tools, overlay and resolution errors, moire technique 85−29249
Loran-C marine predictive positioning corrected by area modelling 88−4137
LORAN-C network expansion and further applications 87−41131
Loran-C position correction and comparison with GPS data 88−9684

position measurement continued
LORAN-C prior calibration and stationary monitoring method 88−4141
LOROP imagery processing, use of computer-aided photointelligence workstation 88−48416
LVDT signal conditioner, signetics SE/NE5521 87−70523
M530BH high-speed displacement meter using laser beam *(Japanese)* 88−16473
MAGLEV vehicle position detection system using power feeding lines 87−31039
magnetic field appls., accuracy *(Japanese)* 85−58893
magnetic field sensitive semicond. position sensors, config. and appls. *(German)* 86−11528
magnetic flux compressors, plate-motion uniformity detection using triboluminescence 88−49055
magnetic position encoders for floppy disc drive appls. 88−74395
magnetic rotor position sensor for permanent magnet motor appls. 88−75565
magnetic sensors, VAC products for position control appls. *(German)* 88−16059
magnetic storage, track sensing using diffraction gratings 85−2113
magnetic system for finite position Hall effect sensor *(Russian)* 87−49950
magnetic test range, computerised, trolley position measurement system 87−21215
magneto-inductive angular position sensors for difficult conditions *(Spanish)* 87−35030
magnetoresistive sensor appls. 86−5270
magnetoresistive sensors for motor vehicles *(German)* 85−48041
magnetoresistive transducer for absolute position detection 85−26302
marine benchmark accuracy improvement by acoustic instrumentation development 88−5199
marine geodetic methods and positional changes 88−5202
marine position fixing 86−59962
marine radionavigation systems for USA Federal operation 85−3545
marine research applications of NAVSTAR-GPS 88−53390
markers measurement mixed into video pictures, computer controlled *(German)* 87−56474
Markov-chain methods for radio meas. system analysis 88−35571
mask-to-wafer alignment technique for 0.25 μm synchrotron radiation lithography 87−25036
meter, design *(Spanish)* 85−20726
microcomputer controlled position sensitive measurementsystem, using hybrid integrated optical sensor 87−3765
microcomputer-based on-line dynamic measurement and analysis of ball screw travel deviation 87−63254
microlithography, automatic mask alignment 87−25007
mine roof instability detection by movement rate monitoring 88−68035
mining, position finding with ELF waves 87−2836
Minnesota scanner for 3D tracking of moving objects, performance 87−63253
mobile measuring system to follow the paths of industrialrobots *(Hungarian)* 86−31132
mobile radio station location, automatic position determ. techniques, VHF/UHF propag. aspects *(German)* 85−52280
mobile robot position-finding algorithm using ultrasonic sonar rangefinder data 87−49196
mobile robots, navigation system using pattern of angles to identical beacons observed by laser 88−68036
mobile robots and automatic guided vehicles, on-board meas. procedure *(German)* 87−41608
model-based recognition and localization from sparse range or tactile data 85−25149
modular monitoring devices, specialised sets, for electric machine components meas. 85−43105
MOS photodetector, position sensitive, using lateral photovoltaic effect 87−41512
motion measurement and compensation of 3D objects 88−58720
motion measurement around edges under the smoothness assumption 87−56853
motion monitoring, using light as tool 87−77427
movement recording in real-time, inexpensive microcomputer-based system 88−42470
movement sensor using inductive slot switch *(German)* 85−3944
moving acoustic source in ocean, signal filtering and tracking 86−64300
moving objects during manufacture and storage, position meas. with IR CCD camera and picture processing *(German)* 88−34745
moving objects in production and storage using computer vision *(German)* 88−53850
moving target position, radar estimation using broadband signals 87−49920
multimode-fiber coupled white-light interferometric position sensor 88−10026
multiple moving object tracking, intelligent real-time system 88−67447
multiple resolvers for angular position meas., error study 88−74596
multiple stereoscopic measurement of fine particle *(Japanese)* 87−47873
navigation by Global Positioning System (NAVSTAR), potential of TI-AGR equipment 85−58255
navigational positioning methods in oceanography, space-time resolution 86−65544
NAVSTAR/GPS evaluation method 87−41148
NC machine tools, motion accuracy, motion error meas. and eval. *(Japanese)* 87−14532
noise-limited instrument analysis, using maximum likelihood estimation 86−55846
non-contacting position detection with Hall sensors *(Italian)* 87−77396
noncontact techniques 85−31588
NSS satellite position error, relation to polar ionospheric disturbance *(Japanese)* 88−46969
object motion detectors, aid to high speed production lines 86−17917
object pose measurement by computerised image comparison with database 87−14542
object proximity photo-sensor based on IR beams *(Russian)* 86−24540
ocean bottom position determination for GPS satellite method 85−59495
offshore structures, strain gage technology 85−64111
on-board antenna radiation field characts. of flying vehicles meas., coordinate determ. errors 85−64214
optical digital potentiometer *(German)* 88−4525
optical double phase-conjugate resonators, possible relative position sensing 86−42634
optical encoders, developments and market survey 87−29042
optical noncontacting probe for detection of displacement, position, and angle *(Japanese)* 86−38343

position measurement continued
optical position sensing in aerodynamic research 87−71206
optical position sensing using Si photodetectors 87−29293
optical position sensor using pn diodes and with integrated signal processing *(German)* 85−42993
optical position sensors for magnetically suspended wind tunnel models 86−31420
optical position transducer, digital, WDM, design and eval. 86−30810
optical position transducer, simple, low-cost design 87−63378
optical position-sensing circuitry design using op amps 88−22532
optical proximity sensor for surface shape measurement 85−14776
optical proximity sensors, techniques; characts. and appls. *(Italian)* 87−70642
optical sensors and transducers *(Danish)* 87−70896
optical sensors for digital system interfacing *(Danish)* 86−31431
optical sensors for industrial appls. 85−47987
optical shaft encoder, high resolution design 85−40136
optical stepper eval., position meas. using optical instruments 88−4640
opto-electronic measurement system for vesselmotion in waves *(Japanese)* 86−18110
optocoupler characts. for position sensing and domestic equipment control *(Russian)* 86−70059
optoelectronic equipment for meas. with submicron accuracy *(Slovak)* 86−70217
optoelectronic path measuring system *(German)* 87−41604
optoelectronic position detectors, signal evaluation system *(German)* 86−44309
optoelectronic scanning systems for measuring coordinates of moving emitters, error anal. *(Russian)* 85−14650
optoelectronic semiconductor position-sensitive sensor 87−29130
overview of industrial sensors in 1980s 86−31357
particle, holographic meas., digital image anal. *(Japanese)* 88−10128
passive position location estimation using the extended Kalman filter 88−14688
pattern quality specifications for masks and lithographic equipment 87−11554
pendulum position meas., by electric and optical methods *(Slovak)* 86−50219
Permalign shaft alignment system *(German)* 87−77084
phase sensor power supply 87−78762
photo mask alignment technique using digital image processing, semicond. wafer fabrication appl. 86−14979
photodiode IC, position sensitive *(German)* 88−26985
photoeffect based position sensor with 86−55745
photoelectric interferometer with digital output *(Russian)* 86−38438
photoelectric position relay *(Russian)* 85−26338
photoelectric transducers for displacement, velocity, position and level meas. *(Italian)* 88−22586
photogrammetric methods appl. *(German)* 86−5533
photogrammetry, signal-coordinate meas. in digital images 88−3217
photolithography, alignment tolerance determ. from die yields 87−11549
photolithography, optical overlay meas. system 88−4635
plane-like object, 3D position and orientation meas. for robot manipulation 86−66606
plane-like object, three-dimens. position and orientation meas., appls. *(Japanese)* 85−26482
point objects, coordinate determ. by means of television systems, error 88−36218
polyhedron, 3D position and orientation meas. using multiple binary images 87−47995
Position Location Reporting System development testing 88−74010
position transducers using pseudorandom encoding 87−70534
positional drive with digital position sensor, microprocessor system *(Russian)* 88−49183
positioning systems, highly accurate, having active elastic compensators, dynamics *(Russian)* 85−58875
precise positioning mechanisms *(Japanese)* 85−48087
probe design for pulp-froth interface position determ. in flotation cell 85−15039
Profil'-1 measuring complex, US meas. in aqueous media, depth, position and geometric dimensions 86−11499
prototype laser tracking system for corner cube to realize active position measurement of three-dimensional vehicle 87−77399
proximity detectors, Braumer Electric contactless inductive types *(Spanish)* 87−77189
proximity sensor, multifunctional, optical, using phase modulation 87−49693
proximity sensor for conductive metals using eddy current transducer 88−47508
proximity sensors, flow meas. with beam-scanning LDV 87−21282
proximity switches for factory automation *(Japanese)* 88−16075
pulse-packet time-position gauge 88−52448
PWB automatic optical inspection, feature location algorithm processing 88−25686
RAFOS navigation system 88−5193
RAFOS neutrally buoyant subsurface float, acoustic tracking, data acquisition and telemetry 87−77883
railgun diagnostics and performance test results 87−26680
railway overhead lines, optical measurement of contact wire position *(German)* 85−27718
ranging and processing mobile-satellite, cooperative surveillance and data link service 88−46962
reentry vehicle performance meas. using photodiodes 88−5040
registration accuracy meas. using integrated elec. vernier 87−1586
relativistic electron beam current and position monitor 87−14661
RELEDOP: a full-scale antenna pattern measurement system for high-powered HF transmitting antennas 88−67714
remote control of position using optical beam *(Russian)* 87−49587
remote positioning sensor system using Moirefringes of two Fresnel zone plates 86−5108
resolver-to-digital conversion 88−12455
resolver/digital convertor for position/speed meas. in servo systems *(German)* 86−47032
resolver/digital convertors, Analog Devices monolithic ICs 87−44955
resolvers as velocity and position encoding devices 87−35056
rigid body 3-dimensional position meas., error anal., optimisation *(Japanese)* 87−29300
rigid body 3-dimensional position meas., iteration *(Japanese)* 87−29299
road surveying by Position and Azimuth Determining System Mk II 87−41613

position measurement continued
robot 3D data acquisition system for position meas. 88−67700
robot 3D position meas., calibration of theodolites 88−68037
robot dynamic performance measurement using laser tracking system 87−35205
robot end effector position measurement by laser tracking interferometer 86−36619
robot end-effector position measurement by automatic laser tracking 87−14545
robot end-effectors, piezoelectric film sensor for tactile information detection 86−38373
robot manipulation of overlapped variably shaped components, vision based sensing of position and orientation 85−45302
robot mechanical misalignment determ. using laser diodes and position sensitive detectors 87−19110
robot tool position meas. using freq. stabilised laser interferometry 88−34193
robot trajectory motion, remote measurement 86−5021
robot vision, camera location *(Russian)* 87−49364
robotic locating system, test bed for visual measuring system feasibility assessment 87−63390
robotic manipulators, accuracy test procedure using vision based 3-D position sensing system 85−3907
robotic manipulators contouring accuracy meas. scheme using laser beam 85−13010
robotic servomotor drives, resolver to digital convertor for velocity and position meas. 88−75996
robotic vision tray picking system design using multiple optical matched filters 87−39931
robots, multisensor manipulator actuator information integration for state estimation and failure detect. *(Japanese)* 88−49590
rolling mills, microcomputer-aided IR meas. system *(German)* 88−37780
rotary encoder using amorphous star-shaped core field sensor 88−53635
rotary position indicator using LEDs or digital display, design and construction *(Spanish)* 86−60284
rotary position sensing using differential capacitor technique 88−29651
rotary velocity and position transducers 87−49719
rotating angle and position measurement using optical rotating field *(Japanese)* 86−24780
rotor position detection in stepping and switched motors by current waveforms monitoring 85−65284
rotors in crane drive techniques, power electronics freq. control gear for squirrel-cage motors *(Dutch)* 88−43351
runways meas. using laser beam, rolling mills appl. *(Czech)* 87−70798
Sakigake and Suisei deep space probes, tracking by random data processing *(Japanese)* 88−35461
satellite acquisition and tracking, model-based 88−48275
satellite systems, time and position determination *(German)* 86−4597
screened inductance sensor: design methods for printed circuit windings 88−1119
Seafloor Benchmark Positioning System expt., acoustic positioning accuracy 88−5197
seam-position detector for electric-resistancewelded tubes, IR/visible type, online US ATE appl., *(Japanese)* 86−38386
semiconductor, lateral photoeffect position-sensitive device *(Japanese)* 86−24537
semiconductor chip alignment system, stored pattern comparison using digital matched filter 86−31290
semiconductor chip sites, automatic position location and recording system 86−4963
semiconductor chip-orientation detector for manufacturing placement operations 86−58528
semiconductor chip-placement alignment technique 85−34413
semiconductor position sensitive detector, light spot position anal. 87−77246
semiconductor position sensors, mag. field sensitive type, characts. and appl. *(German)* 85−64099
semiconductor wafer microparticle analyser 88−7722
sensor array and linear-period-modulated signal for position and velocity finding *(Japanese)* 87−76875
sensor types and appls. *(Japanese)* 87−70565
Sensorimotor position sensing system, design and perform. 88−75564
sensorless brushless motor microcomputer control 85−53677
sensors, high resolution, long life 86−50063
sensors, recent trends, productivity 85−3950
sensors, Spanish market *(Spanish)* 88−60904
sensors photoelectric, inductive and capacitive 86−31639
servo feedback sensing to machine tool fabrication 88−42271
shaft position determination for a restricted rotation angle 88−74587
shaft position encoding by rotary automation switch 86−65180
shaft position sensor resolution improvement by frequency multiplier 86−65159
ship's motion meas. using turning fork angular rate gyros *(Japanese)* 88−42274
ship positioning, hyperbolic pattern adjustment 85−47614
ship tracking test results from Motorola Eagle GPS receiver 88−9683
Shipboard Data System III positioning and navigation system 88−10589
shipborne GPS kinematic positioning for hydrographic applications 88−74071
Siemens IR, pressure and position sensors, review *(Dutch)* 85−20572
signal source angular coordinate meas. using antenna array, estimation accuracy study 85−14381
signal sources, position estimation with spherical wavefront 87−19698
small animals, temp. and location monitoring, computerised telemetry 85−47865
Small oceanographic data acquisition (SODA) system 86−60966
smart sensors 88−4358
SMD assembly, optical correction system for automatic positioning *(German)* 88−19514
sound source, position and waveform estimation using sensor array *(Japanese)* 88−8777
spectral range sensing using dynamic chromatic aberration 85−47939
star camera and aspect determ. system for balloon-borne payloads 87−28962
STARFIX geostationary C-band satellite-based positioning system 88−9678
step-and-repeat alignment systems and wafer scanners, mixing and matching 87−11552
stepping motor control using EMF commutation 87−15814
stepping motor integral position transducer 85−9935
stereo-vision high-speed range finding system *(Japanese)* 88−60919

position measurement continued
switch, simple inductive contactless, using coil/mag. core as position sensor 85−52726
system-slave clock, automatic correction type, position detection error anal., broadcast station appl. *(Japanese)* 88−22808
target motion anal., fundamental limitations 87−7853
Telestar system for spatial orientation of satellite using optoelectronic technique *(Polish)* 85−4393
thick film technology for new sensors *(German)* 86−17927
thin, flexible position sensor and appl. *(Japanese)* 86−24522
thin-film resistor alignment using active resistor position sensing 86−55833
three-dimensional co-ordinate meas. instrument applications in production control *(German)* 86−18125
three-dimensional location of hole position, manufacturing appl. 87−49943
three-dimensional motion parameter estimation by holographic acoustical systems 88−36693
three-dimensional position meas. using photocell arrangement 85−8953
thyristor motor with incremental rotary encoder for rotor position sensing *(Japanese)* 86−51663
tool wear rates in flexible production modules, optimal unbiased linear estimation 88−36294
top dead centre measurement in engine, microwave technique and errors 86−31641
TOPEX Earth satellite orbit meas., SERIES-X test results 85−38312
Toyota electronic modulated air suspension system for the 1986 Soarer 88−55703
trans-Pacific optical fibre cable route survey navigation data processing 88−5200
transducer, inductive with transverse excitation *(German)* 87−49726
transducers, currently available, review 85−8842
transducers and meas. systems for industrial appl., book 88−55889
transducers for meas. and control, book 85−44379
translation devices, dynamic piezoelectric 87−25738
TRISTAN main ring, magnet alignment 88−54058
tunnelling machine, horizontal position meas. method *(Japanese)* 86−38549
tunnelling machine, position and attitude meas. method *(Japanese)* 87−8743
tunnelling machine position and attitude measurement *(Japanese)* 87−56836
turning the aid of electronic position measuring devices *(German)* 85−10278
two dimensional real time positioning with CW propagation and stationary active reflectors 87−29302
two-channel systems for measuring the coordinates of anobject edge 86−5515
two-dimensional submicron metrology for electron beam lithography 85−31589
ultrasonic presence sensors with wide range and high local resolution 87−50589
ultrasonic proximity sensor for profile-following work by robot manipulators *(Japanese)* 86−31416
ultrasonic remote sensor for position meas. *(German)* 87−35054
ultrasonic system measures distance, position and thickness 87−35525
ultrasonic-oscillator position sensor 88−61688
ultraviolet position locator system 86−60258
underwater acoustic transponder network calibration using GPS 88−53389
underwater petroleum connections, measurement apparatus for guidance implementation *(French)* 85−37491
US liquid resonator appl. 86−11703
US proximity sensor for robot manipulator profile following *(Japanese)* 87−4182
variable inductance position sensors, linear displacement type, design for automotive appls. 86−50084
variable reluctance machine's rotor position detection, predictor corrector estimator 88−69335
variable-reluctance position sensors, high bandwidth and low-temp. drift 86−65169
vehicle position finding, automatic, laser appl. 86−59003
vehicle position meas. using laser beam tracking, expt. 88−47223
vehicle-to-vehicle communication by laser/optical beam system 85−3515
visual motion meas. convected activation profiles 88−73368
wafer stepper, holographic nanometre alignment 87−25486
wafer steppers, optical alignment models 88−1588
weld joint location technique for robot welding system *(French)* 85−35940
welded structural shape inspection by automatic co-ordinate meas. systems 87−56835
Western European radio location service project 87−49204
Wiegand wire based bistable magnetic sensor, principle, construction and appls. *(Czech)* 87−14285
wind tunnel testing, model position measurement using optical techniques 85−43454
wire position indicator for thermocouple cables *(Czech)* 88−15928
X-ray lithographic mask positioning technique using moire interference 87−24987
X-ray lithography, SR-1 step-and-repeat system, mark detection characts. 85−1615
X-ray mask full-field alignment meas. method 87−53622
xy-coordinates meas. system with TV camera, for astron. plates *(Japanese)* 87−41609
Fe-Co-Mn-C alloy hard magnet based high-resolution mag. scale with magnetoresist. sensor 86−17961
GaAs monolithic Hall IC high-temp. position sensor, design automotive electronics for app. 86−38372
Ge gamma-ray detector cryst. position estimation within spectrometer housing 85−15258
Si photodiodes, position-sensitive, appl. *(German)* 88−42060
a-Si position-sensitive photodetectors 87−70638
a-Si:H junction position sensitive photodetector 87−35098
a-Si:H, position sensitive detectors 88−36001
Si/Ti amorphous superlattices, high resolution photovoltaic position sensing 87−29117
SiO_2:Ge fibres, direct core obs. method using thermal radiation *(Japanese)* 88−33692

position sensitive particle detectors
see also bubble chambers; cloud chambers; spark chambers
2D spatial shower measurement using scintillator-photodiode position detector 86−50341
8-hit sample and hold circuit for drift chamber *(Chinese)* 85−31714

position sensitive particle detectors continued
absolute thermal neutron fluence rate meas. by muscovite track detector *(Chinese)* 86−11891
accelerator detector, liquid scintillator and proportional drift tubes for monopole searches 85−31747
advanced detectors, conf. Castiglione della Pescaia, Italy (June 1986) 88−18292
Advanced X-ray astrophysics facility (AXAF), imaging detector design for optical-UV monitor 85−43197
air proportional counters, detection efficiency 87−35356
Aleph EM calorimeter, gaseous calorimeter operated in high mag. field 85−9041
Aleph event builder, FASTBUS based CPU 86−25149
ALEPH expt. highly segmented EM calorimeter, electron-pion separation 88−22948
ALEPH time projection chamber, gating grid 87−21428
ALEPH time projection chamber, TPC90 test model 87−21426
ALEPH time projection chamber, wire gain and track distortion studies 87−21427
analogue signals optimal processing, from drift chamber 88−16660
Anger camera, fast parallel encoding scheme 85−15209
Anger-type neutron position detectors, resolution and linearity simulation 85−43202
ARGUS vertex drift chamber, design and performance 87−21424
attenuation length measurements in narrow drift channels 87−29458
avalanche counter, large area transmission, internal time delay 85−64472
back-to-back fission chamber, detection efficiency meas. *(Chinese)* 86−11873
background in escape gated detectors for hard X-rayastronomy 86−65348
BES main drift chamber, testing by the K2 Test Beam of the KEK Proton Synchrotron *(Chinese)* 88−22911
BNL hypernuclear spectrometer-drift chamber system 85−26728
Bragg curve spectroscopy and position sensitive detector system 85−4236
breakdown phenomena associated with very large gains in drift chambers 87−29452
calorimeters using thin MWPCs operating in a high gain mode 87−29447
calorimetric drift chamber Soudan 2 data acquisition and trigger electronics 86−50424
cathode readout MWPC for ISTRA setup 85−20815
CCD, appls. as high-resolution tracking devices for high energy physics 88−42410
CCD position sensitive high-energy particle detector 86−5793
CCD-based vertex detector for flavour tagging at CLIC 88−4837
CCD-based vertex detectors for high-energy colliders 88−4853
CCDs, use in vertex detection 87−29552
CCDs as position sensitive particle detectors 87−63657
CDF, central EM calorimeter, electron response maps 88−47988
CDF, EM calorimeter, small angle regions 88−47984
CDF, fast hardware track finder for central tracking chamber trigger 88−54404
CDF, RABBIT data acquisition front end system 88−54402
CDF, two level, FASTBUS bared trigger system 88−54400
CDF calorimetry 88−29859
CDF central and endwall hadron calorimeter 88−47987
CDF central and forward tracking chambers 88−29839
CDF central calorimeters, cosmic ray test 88−47989
CDF central drift tube array, design, construction and streamer mode operation 88−48023
CDF central electromagnetic calorimeter 88−47985
CDF central EM calorimeter, calibration systems 88−47990
CDF central muon chambers, electronic levelling system, operation and readout 88−48019
CDF central muon level-1 trigger electronics for central muon drift chamber 88−54401
CDF central tracking chamber, design and construction 88−48021
CDF central tracking chamber, drift velocity and Lorentz angle meas. 86−70350
CDF detector, status report 88−36376
CDF detector at Fermilab, overview, physics capabilities and subsystems 88−74741
CDF end plug electromagnetic calorimeter using conductive plastic proportional tubes 88−47986
CDF FASTBUS data acquisition front end system 88−54403
CDF forward muon system, PSL TDC and UW HOPU module operation 88−48020
CDF vertex time projection chamber, construction and electronics 88−48022
CDF vertex time projection chamber, prototype flash ADC system 87−77578
cellulose acetate, solid state track detector, proton and α-particle discrimination *(Chinese)* 86−70335
cellulose acetate track detector, etching conditions *(Chinese)* 86−11856
cellulose nitrate, solid state track detector, proton and α-particle discrimination *(Chinese)* 86−70335
cellulose nitrate detectors, heavy ion track study 85−48188
central drift chamber for BES, 45° prototype, beam test results *(Chinese)* 88−61074
central drift chamber for BES, prototype construction and testing *(Chinese)* 88−42417
central drift chamber for rare kaon decay spectrometer, design 86−50317
Central Tracking Chamber of Fermilab Collider Detector, performance in tagging $p\bar{p}\rightarrow W^+W^-+X$, $W\rightarrow tb(l\nu_l)$, $\sqrt{s}=17$ TeV 88−4836
charge division in a small proportional chamber constructed with aluminized mylar tubes 88−74742
charge division position sensitive proportional detectors 86−60561
charge equilibration mechanism in position sensitive gas detectors *(Rumanian)* 86−25136
charge position readout devices for imaging photon detectors 88−36391
charged particle tracking in CDF 85−26722
charged particle zero-time detector based on secondary electron emission from dielectric 85−59223
charged-particle spectrometer using plastic scintillators and MWPC for neutron-induced reactions study 85−52989
CHARM II neutrino detector, test results of streamer-tube system 87−21468
Cherenkov radiation ring spectrometers using proportional and drift chambers, accelerator appls., review 88−54449
Cherenkov ring imaging detector, prototype tests at SLD expt. 87−41835
4-circle neutron diffractometer with fly's eye position sensitive detector, data reduction 85−15229
4-circle neutron diffractometer with two-dimens. position sensitive detectors 85−15228
CLEO II detector construction at Cornell electron storage ring 88−48002
CLEO II drift chamber, design and construction 87−21416
closed filling and drawing system for liquid scintillators *(Chinese)* 88−74758
CN α-particle detection sensitivity, γ-ray effects *(Chinese)* 86−11861
CN SSNTD, etching behaviour *(Chinese)* 86−11857
CN-8022 film preparation *(Chinese)* 86−11852
coaxial proportional counters, gas amplification meas. 86−18241
collider vertex detectors, prospects 88−29848
combined photon-hadron hodoscope calorimeter, steel-scintillation sandwiches, wavelength-shifter readout 88−54405
compact imaging photon detectors, wedge and strip anode detectors 86−50338
compact multiwire proportional chamber system with 250 μm wire spacing 85−43236
compact X-ray generator for the bench test of a resistive plastic tube position detector 87−50198
complex ions, neutralisation in proportional counters and MWPCs, cathode effects 87−29454
computer modelling of position-sensitive scintillator detectors 85−15212
conductive plastic tube counter for colliding beam experiment 88−16657
conf., Munich, Germany, March 1986 87−22963
conf., Vienna, Austria, February 1986 87−22962
conference, developments in silicon detectors, Munich, Germany (Nov. 1983) 85−15156
conference, High energy particle physics, London, UK (Apr. 1988) 88−62898
conference, Stanford, CA, USA (July 1985) 86−60533
coordinate-sensitive detector on the basis of microchannel plates 85−9082
coordinate-sensitive detectors using microchannel plate, review 85−9076
CP/M VMEBUS control system for MWPC HV power supplies 87−22541
CR-39, tree track formation *(Chinese)* 86−11865
CR-39 detector, plate-out effects 86−18256
CR-39 detectors, electrochemically etched, passive fast-neutron spectrometer 87−77561
CR-39 nuclear track detectors, factors affecting etching props. for α-particles 88−54437
CR-39 plastic, etching tracks by dyeing method *(Chinese)* 86−11864
CR-39 plastic detector, effect of post-irradiation annealing 85−64488
CR-39 plastic doped with chlorinated cpds., track etch rates 88−48027
CR-39 plastic track detector, etching properties *(Chinese)* 86−11855
CR-39 plastic track detector, low energy ion identification 85−37921
CR-39 plastic track detector, response dependence on registration temp. *(Chinese)* 87−50182
CR-39 plastic track detector, sensitivity, etch rate response 85−15248
CR-39 plastic track detector, sensitivity and etching improvements 85−15247
CR-39 track detector, electrochemical etching, props. 85−20848
CRISIS, charge sensitive drift chamber performance and calibration 85−59208
crossed beam collision expts., correlated events detection 88−4826
cryogenic drift chamber, electron drift study in liquid, solid Ar 86−18237
curved anode wire chambers for X-ray diffr. appl. 85−31771
curved one-dimensional neutron position sensitive detectors, 12 years expts. 85−15222
curved razor-blade proportional counter for X-ray diffraction studies 86−50350
CUSB-II, BGO calorimeter, design, status 87−41881
cylindrical drift chamber, Crystal Box detector LAMPF, construction, performance details 86−18254
cylindrical drift chamber for CMD-2 detector at VEPP-2M 87−21412
cylindrical drift chamber for $K\rightarrow\pi\nu\nu$ decay meas. 88−68225
cylindrical drift chamber for Mark II detector at SLAC 85−43238
cylindrical drift chambers, 3-D track and vertex fitting 85−37913
D0 detector, implementation of goals, component performance data 88−36377
data recording using unitary-to-binary convertor with asynchronous control 85−20528
data reduction scheme for channel-plate detectors 87−41847
delay line drift chamber, 2.5×1.5 m operational experience 85−59176
delay line type X-ray position sensitive proportional counter with cylindrical cathode strips *(Japanese)* 85−59204
delay-line readout method for multicell detectors 87−3909
DELPHI barrel electromagnetic calorimeter flash ADC based digitizer 87−44968
DELPHI Barrel RICH Prototype, detection efficiency and spatial resolution, diffusion coeff. for gas mixtures 88−68234
DELPHI Barrel RICH Prototype, detector performance for particle identification. 88−68235
Delphi Experiment, TPC trigger 87−41875
DELPHI forward EM calorimeter, edge effects *(Spanish)* 87−29434
DELPHI high density projection chamber 88−29862
Delphi time projection chamber, contiguity trigger 87−63685
DELPHI time projection chamber, space meas. accuracy tests on half-scale prototype 87−21430
Delphi TPC prototype, readout system 85−43279
Delphi TPC prototype performance test 85−43177
DELPHI TPC readout, preprocessing and data acquisition 85−9058
detector performance effect on high count rate PET imaging 88−61251
development for accelerator beam control 87−50137
digital X-ray imaging installation using one-coord. multiwire chamber 85−59234
digital X-ray imaging system using MWPC 87−77545
dimethyl ether as a drift-chamber gas 87−8843
dimethyl ether drift chamber, performance 86−5785
dimethyl ether precision drift chamber vertex detector 88−10245
Diogene 4π detector at Saturne 88−10243
double wire drift chambers for in-beam expt. at LEAR 87−29457
Dϕ detector status at Fermilab $p\bar{p}$ collider, beam test results 88−48001
drift chamber, 2D, construction and performance *(Chinese)* 87−70996
drift chamber, 2D, delay-line read-out *(Chinese)* 87−70997
drift chamber, 3 m×1 m, construction, operation and electronics 88−68239
drift chamber, cylindrical, multi-layer, for low-energy $\bar{p}p$ expt. 86−25117
drift chamber, diamond shaped cathode pads for longit. coord. meas. 85−52971
drift chamber, electrodeless, electromagnetic shower position measurement 85−59184

position sensitive particle detectors continued
drift chamber, electrodeless operating characteristics 85−64459
drift chamber, electron drift velocity meas. as function of electric field *(Chinese)* 85−48178
drift chamber, focal plane detector for Big Karl magnetic spectrometer, design details 86−25141
drift chamber, longit. position meas. using charge division read-out 85−9036
drift chamber, maximum allowable O_2 contamination in xenon-methane gas, electron attachment coefficient measurement 88−54412
drift chamber, multicell, for L3-LEP muon spectrometer, calibration 88−22968
drift chamber, multiwire circular electrodeless, design details 85−64458
drift chamber, performance for colliding beam expts. 85−4215
drift chamber, precision imager prototype, resolution 85−15181
drift chamber, propane-He gas mixture, properties 86−32195
drift chamber at CLEO II, construction 86−50315
drift chamber calibration using lasers, review 87−29538
drift chamber characts. in beam of slow nuclear fragments 86−44588
drift chamber constructed of aluminized mylar tubes 87−35351
drift chamber construction for SPS 86−65334
drift chamber development, spatial resolution and counting rate improvement, review 88−54435
drift chamber for high-energy heavy ions 87−35338
drift chamber for MARK III detector at SPEAR, performance 85−15175
drift chamber for PEP-4 expt., cosmic ray test *(Chinese)* 85−48179
drift chamber for Serpukhov neutrino detector, design, performance 86−38711
drift chamber for the Mark II detector at SLAC Linear Collider 87−21418
drift chamber front end electronics 85−43242
drift chamber in DELPHI expt., variable drift velocity study 87−41860
drift chamber preamplifier design 86−50417
drift chamber prototype performance test 85−43175
drift chamber readout with flash ADC, time and spatial resolution 86−32157
drift chamber signals, digitised signal waveform anal. 86−32158
drift chamber use for cluster counting, primary ionisation meas. 85−9080
drift chamber vertex detectors for SLC/LEP 88−29844
drift chamber wires, hydrocarbon polymerisation mechanism, PEP storage ring, SLAC 85−64461
drift chamber with 100 MHz FADC readout, time, spatial, energy and double track resolutions 88−68283
drift chambers, appl. as high-resolution tracking devices for high energy physics 88−42410
drift chambers, controlled geometry, prototype tests 85−52968
drift chambers, high resolution design geometry 86−44550
drift chambers, high resolution drift cells 86−5784
drift chambers, laser calibration 85−48187
drift chambers, performance degradation test *(Chinese)* 85−59199
drift chambers, performance test with on-line microcomputer *(Chinese)* 85−59197
drift chambers, resolution of right-left ambiguity using low-noise amplifier 85−11044
drift chambers, search for best timing strategy, computer simulation 85−9035
drift chambers, shaper amplifier with symmetric feedback 86−60621
drift chambers, space charge effects obs. using N_2 laser 85−4201
drift chambers array, resolution study 85−9037
drift chambers for a large-area, high-precision muon spectrometer 87−35339
drift chambers for D0, waveform digitizers 87−63684
drift chambers for L3-LEP muon detector 88−42413
drift chambers for SPES4 spectrometer 87−63631
drift chambers for the observation of multitracks incosmic ray air showers 86−70331
drift chambers in a self-quenching streamer regime 86−44589
drift chambers operated in limited streamer mode 86−32194
drift chambers with controlled charge collection geometry for the NA34/HELIOS experiment 87−21407
drift chambers with delay line readout in limited streamer mode 87−21467
drift chambers with long drift paths, pulse shape simulation 87−77540
drift chambers with stereo wires, 3D track and vertex fitting 85−4228
drift collection calorimeter prototype, energy resolution meas. 88−61105
drift properties of electrons in methane and methane noble gas mixtures 87−29459
drift tube array, computer computer controlled wire tension measurement system used during construction 88−54399
drift tubes, performance 85−15180
drift tubes for low P_t physics at SSC 88−68290
drift tubes in VENUS muon detector, tension meas. system 87−29494
drift-collection calorimeter, construction and operation 85−43251
drift-pots for small angle elastic scattering at the Fermilab Collider 87−21405
drift-tube counters and readout electronics of VENUS muon detector 87−77538
electrodeless drift chambers for accelerator expts. 87−50140
electroluminescent track chambers 85−43164
electromagnetic calorimeter, 2-dimens. MWPC stack 88−22920
electromagnetic calorimeters, impact position meas., future TeV collider appl. 88−4849
electromagnetic shower counters, Fermilab collider detector 85−31722
electron analyser with position sensitive detector, scattered electrons influence 87−21443
electron drift vel. meas. in uniform elec. field 86−18233
electron identification using synchrotron radiation 88−29855
electron spectrometer, high resolution, prelim. design 85−59228
electron spectrometer, parallel-plate, with position-sensitive detector 86−60626
electronically collimated gamma camera utilizing gas scintillation 88−22977
electrostatic proton decay detector, 3D elec. field calc. 88−54392
electrostatic spectrometer for a simultaneousanalysis of energy and scattering angle 86−32200
EM calorimeter module using scintillating fibres immersed in Bi-Pb alloy 85−9048
EM calorimeter using BaF_2 scintillators and photosensitive wire chambers, 1-9 GeV/c test results 88−42439
EM calorimetry using scintillating plastic fibres 85−9051
EM shower position and size meas. using avalanche tube and scintillation hodoscopes 85−43186
position sensitive particle detectors continued
EM shower position determination, accuracy of wide-gap drift chamber 87−3891
endcap shower counters for MARK III detector 85−20812
energy resolution obtained with a multisteppproportional counter 86−65350
error analysis for a noncyclic imaging system 88−22932
escape-gated two chamber proportional counter for Auger electron and X-ray meas. 87−71014
etching curves of external detectors *(Chinese)* 86−11876
EXITE detector for cosmic X-rays in 20-300 keV band 86−50370
EXITE imaging detector for 20-300 keV astronomy 86−50367
experimental apparatus at future high energy machines, Miniato, Italy (May 84) 85−39410
fast integrating multiware beam profile monitor withdigital readout 86−50268
fast neutron personnel dosimeters, comparison of NTA, CR-39 and albedo around electron accelerator 88−54677
fast time-to-digital convertor for position sensitive detector with delay line readout 88−29916
fast tracking detector using multidrift tubes 88−29846
Fermilab Collider Detector 86−50301
Fermilab collider detector, trigger and specialised computing hardware 85−48183
fibre optic data acquisition from high-current wire chamber 88−16647
fine-grained single gap shower chamber with analogue read-out 85−9038
fingerprints, display method using SSNTD *(Chinese)* 86−11903
fission track dating of zircon *(Chinese)* 86−11885
fission track dating of zircon geostandard *(Chinese)* 86−11883
fission track distributions in external detectors *(Chinese)* 86−11875
fission tracks distribution in external and internal SSNTD surface *(Chinese)* 86−11877
fission-track dating of Baiyinchang pyritic copperdeposits *(Chinese)* 86−11884
flat-cone diffractometer with a banana-like one-dimensional multi-cell detector 85−15232
fluorescence detection systems for EXAFS meas. 87−35375
fly's eye neutron position sensitive detector, data quality tests 85−15231
forward charged track detector for LHC/CLIC, operational considerations 88−4851
FRAMM spectrometer, vertex detector geometrical reconstruction program 87−41871
gamma camera, BaF_2-MWPC combination, for PET imaging 88−61295
gamma camera, BaF_2-MWPC combination, for PET imaging 88−61296
gamma camera, electronically collimated, gas scintillation utilisation 87−35398
gamma camera, pressurised Xe wire chamber, clinical applics. using short-lived ^{178}Ta 88−61294
gamma camera based on multiwire position-sensitive detector 85−48227
gamma-ray spectroscopy, with improved digital focusing optics 86−32201
gas counter, self-quenching streamer modes 85−26716
gas counter in SQS transition region, position resolution 86−50395
gas detectors,. position resolution for synchrotron X-ray radiation 86−60556
gas sampling calorimeter using conductive plastic tube 85−26687
gas sampling EM calorimeter with cond. plastic tubes 85−43187
gas sampling shower counter, position sensing by charge division *(Chinese)* 88−48014
gas scintillation drift chamber, heavy ion induced light signals 88−22929
gaseous detectors, design improvements 87−29536
gaseous position sensitive detectors, recent advances 85−15215
GEM magnet for LEP DELPHI detector 85−24251
gridless channel plate star detector for α-particles and fragments 88−74751
hadron calorimeters, segmentation 87−50148
Hamamatsu R 1564U microchannel plate photomultiplier, time resolution performance 87−41828
hardware aspects of neutron position-sensitive detectors 85−15200
herringbone microchannel amplifiers characts. 88−12899
high accuracy measurements, calorimetry and particle identification 88−16653
high count rate position sensitive detectors for synchrotron radiation expts. 87−29537
high counting rate detection system for meas. of charged particle spectra 85−26702
high density lead glass tubing projection chamber, operation and appl. 87−41854
high density spiral projection chamber, end-cap detectors for OBELIX expt. at LEAR 87−21415
high efficiency spectrometer with microchannel plate for VUV fluorescence radiation 86−60672
high energy accelerators, perspectives for experimental apparatus, seminar, San Minato, Italy (May 1986) 87−63642
high energy physics, use of semiconductor detectors, telescopes and microstrip chambers 85−43262
high gain thin gap multiwire gas detector for the OPAL hadron calorimeter 87−29448
high intensity positron beam and ang. correl. expt. techniques and apparatus, Cu single cryst. data 87−29418
high pressure ^3He multielectrode detectors for neutron localisation 85−15201
high pressure Xe gas time projection chamber, electron trajectories, Monte Carlo simulation 87−29477
high resolution 2-dimensional readout of drift chambers 87−29464
high resolution device design for pion-nucleus physics, conf., Los Alamos, USA (Aug. 1987) 88−37798
high resolution vertex chamber, test of full scale sector 87−21423
high resolution vertex drift chamber for Mark II SLC Upgrade detector, prototype results 87−21419
high spatial resolution positron emission tomograph 87−21457
High-density Projection Chamber EM calorimeter, charge transmission props. 87−50149
high-efficiency time-zero detector using microchannel plates, characts. 88−29888
high-pressure parallel grid position sensitive gas scintillation proportional counter 85−43198
high-pressure parallel-grid gas scintillation proportional counter for X-ray astronomy 85−48176
HISPET project, high spatial resolution positron emission tomograph using MWPC 85−43265
horizontal drift chambers for focal plane polarimeter 87−29497
HPC calorimeter, cathode readout proportional chamber, design and construction 86−65332

position sensitive particle detectors continued
hybrid photoelectronic image device 88−10267
imaging gas scintillation proportional counter with microchannel plate readout 85−43199
imaging pin detector, spatial resolution 86−5799
Individual Counter Array, an old form of position sensitive detector 85−15224
induction drift chamber 87−21409
induction drift chamber as high rate vertex detector for ZEUS expt. 88−29845
infusion terminal filter of nuclear trackmicroporous membrane *(Chinese)* 86−11898
integrated strip detector with CCD readout, expt. results 85−31687
intelligent FASTBUS module for Aleph time projection chamber 86−25148
inter-electrode capacitance of wedge and strip position sensing elements 88−54415
interline transfer imaging CCD as position sensitive detector 87−71011
ionisation chamber IRM 81T-TE1, kerma determination in neutron field *(Chinese)* 86−70336
ionisation chambers, gap-shaped cylindrical gas-filled, electron fluence perturbation 86−18242
ionisation chambers, position sensitive, offline data anal. program *(Chinese)* 87−63663
ionisation clusters registration by electroluminescent drift chamber 88−36366
ionisation losses meas. using A/D convertor, high-speed parallel CAMAC-compatible design 88−16024
JADE muon detector, construction and operation 85−64456
JADE muon detector, identification of high energy muons 85−64457
JADE vertex detector at PETRA, meas. of short-live particles 87−57043
jet chamber with long drift paths in mag. field, pulse shape anal. 87−29456
jet chambers, electrostatic properties and performance 86−44551
jet type drift chamber, potential, electric field, anal. soln. 88−29824
kangmar pluton, Xizang, fission track dating, uplift rate *(Chinese)* 86−11882
Kratky block-collimation small-angle X-ray diffractometer for synchrotron radiation 87−71068
L3+1 detector for heavy stable particle detection 88−68279
L3 high resolution muon drift chambers, systematic errors in track position meas. 87−21413
large acceptance mag. detector for CEBAF 87−21398
large area multitube proportional counter 86−65347
large drift chambers for future detectors 88−22942
large format microchannel plate triplet Z-configs. for Extreme Ultraviolet Explorer satellite 85−43214
large position sensitive plastic scintillation detectors 88−22923
large solid angle detector for medium energy charged particles 88−22925
Large Volume Detector, combined neutrino detection system, design 86−65387
large volume hybrid focal-plane detector for magnetic heavy-ion spectrograph 85−59179
laser calibration scheme for the UA1 central detector at high luminosity (ACOL) 88−22945
LEP fastbus data acquisition system calibration system for MWPC *(Spanish)* 87−50122
light heavy ion detection system 85−26701
limited streamer drift tube performance study 85−4231
limited streamer drift tubes with conductive plastic walls, cathode readout 87−14763
limited streamer tubes, drift time techniques appl. 88−42440
linear and area X-ray detectors, data acquisition systems with delay line readout 88−54423
linear PSD using fibre optic encoded scintillators for neutrons 85−15207
liquid argon calorimetry at HERA, the H1 calorimeter 88−22952
local order determination in disordered systems using a one-dimensional PSD 85−15220
location and integration of single reflections using area PSDs 85−15230
logarithmic detection system suitable for 4π detection in nucleus-nucleus collisions 85−64469
long-drift calorimeter modules for the Soudan 2nucleon decay detector 86−50318
long-life microchannel plates, evaluation for X-ray photon counting 88−61108
long-printed circuit delay lines 86−25145
low background scintillation installation for double beta decay experiments 87−14736
low matter density cylindrical proportional chambers 87−14735
low noise preamplifier, single electron detection/position determ. 88−61189
low resolution cold neutron diffractometer 85−15227
LSI detector for low energy ESCA electrons 87−14761
LU-2 GeV linear electron accelerator, computerised detection system using multiwire proportional chambers 88−36365
magnetic spectrometer based on multiwire proportionalchambers 86−50447
Makrofol E, replica method for track evaluation 85−64487
Makrofol E, track performance 85−64483
Makrofol-E plastic track detector, etching conditions *(Chinese)* 86−11856
Mark III vertex chamber design and prototype test results 88−68288
MARK III vertex chamber using dimethyl ether 88−29847
MARK J time expansion chamber, operating experience 88−29843
MARS-2 current sensitive liq. Ar calorimeter 85−20813
MASPIK magnetic spectrometer, proportional chambers system design 88−61154
MCP detector efficiency to 511 keV gamma rays 85−37912
MCP detector for ions and neutrals, absolute efficiency 87−50135
medical applications of position sensitive detectors 85−15216
mesh chambers for positron emission tomography 86−50500
MICHIE cylindrical drift chamber, readout system 85−59180
micro vertex detector for experiment UA1 at the CERNSp$\bar{p}$S collider 86−50312
microchannel plate and luminescent screen, spatial distrib. of particle and photon fluxes 88−42433
microchannel plate chevron as position sensitive detector for β-spectrometers 87−14731
microchannel plate chevron pair, gain and pulse height distribs. width 86−50339
microchannel plate detection efficiency for 1.15 keV electrons 86−60577
microchannel plate detector and assembly, characteristics 85−43200
microchannel plate detector using delay line readout anode 87−71009
microchannel plate detectors, performance in high magnetic fields 88−22972
position sensitive particle detectors continued
microchannel plate electron multipliers, resistance variation with temp. and voltage 87−71015
microchannel plate energy- and angle-resolved low-energy positive ion detector, reflection mode gain characts. *(Japanese)* 86−60550
microchannel plate limited imaging with ultra-thin wedge and strip anodes 87−41829
microchannel plate streak camera 85−52995
microchannel plates, background events, characts. and origins 88−61107
microchannel plates, improved quadrant anode image sensor 88−16638
microchannel plates, optimisation of wedge and strip anodes 85−43212
microchannel plates, position sensitive electronic readout systems 85−43211
microchannel plates, relative electron detection efficiency determ. 85−26711
microchannel plates absolute detection efficiency determ., for electrons and Mg^+ ions 86−38708
microchannel plates appl. to radiation detection, pulsed laser UV radiation meas. appl. 88−4856
microchannel plates system for photons and particles counting 87−71024
microchannel-plate position-sensitive detector, absolute and angular efficiencies determ. 85−20830
microporous membrane pore geometry, microscopic struct. *(Chinese)* 86−11895
microprocessor controlled high density multiwire proportional chambers, 2D angular correlation of positron annihilation 87−21458
microstrip anode position-sensitive detector, design, neutron counting rate 88−22969
microstrip position sensors, vertex detectors, low noise front end electronics 86−18259
microstrip vertex detector for E687 expt. at Tevatron 87−21421
microvertex detector for UA1 expt., design and operation 87−21425
microvertex detector in FNAL E687 expt., Monte Carlo program and pattern recognition 87−3890
microvertex detectors, designs, radiation damage effects 87−29539
mini drift chamber, characteristics 87−77555
miniature drift chamber, construction and behaviour 87−21410
Missouri Research Reactor Facility, position sensitive detectors, data collected system 85−15202
modular multidrift vertex detector 87−21422
modular multidrift vertex detector, track resolution 86−50314
monolayer structural neutron diffraction studies 85−15223
MSA/MWPC detector, digital beta autoradiography system 86−18320
multianode photomultiplier for low light level events 87−41833
multianode photomultiplier with position sensitivity, operational characteristics 86−14822
multichannel drift chambers, data register and processor 86−25134
multichannel drift chambers, test system for electronic instrumentation checking 86−5804
multidetector telescope based spectrometer, for light nucleus detection 86−60633
multielement proportional chamber for double beta-decay expt. 87−14733
multilayered foils as entrance windows and spectral filters for image convertors in ultrasoft X-ray region 88−23017
multiparameter focal plane detector for QMG/2 mag. spectrometer 85−37904
multiple neutron event detector 87−14741
multisectional wire chamber for pulsed X-ray and VUV studies 87−21435
multistage cascade chamber, low-pressure 86−70340
multistep avalanche chamber coupled to solid photocathode, single photoelectrons imaging 85−15186
multistep chamber for digital radiochromatography imaging 85−59187
multitracer digital $\beta-$ autoradiography with MWPCs 85−43206
multitube drift chamber, small angle elastic scattering detector for SSC 88−10278
multitube drift chamber for LHC or SSC 87−63653
multitube proportional chambers for EM shower localisation 85−15187
multiwire avalanche chambers, large area and low mass, performance 86−44563
multiwire chamber applications to EM radiation detection in nucl. medicine 88−61289
multiwire chamber system for neutron spectra meas. 85−26703
multiwire chambers, cathode charge distrib. meas. and theory 85−20817
multiwire chambers, cathode charge distribs., approx. and empirical formulae 85−20818
multiwire chambers, UV photon detection and Cherenkov ring imaging 86−65361
multiwire chambers filament tension meas., using automated electronic tensometer 87−21291
multiwire coordinate detectors, uses in molecular biology and crystallography 87−29693
multiwire detector, unidimensional, development and image resolution 87−41832
multiwire dielectric detector 86−5806
multiwire drift chamber, electric field calcs. *(Chinese)* 87−14747
multiwire emission detector 86−5802
multiwire imaging proportional counter for 0.1 to 10 keV X-ray telescope 86−50368
multiwire position sensitive chambers for compound anal. in thin layer chromatography 87−14745
multiwire position sensitive proportional chamber *(Rumanian)* 87−8860
multiwire proportional chamber, high density, investigation for neutral particle detection appls. *(Chinese)* 88−42418
multiwire proportional chamber for inclined trajectories 86−70325
multiwire proportional chamber for the curved crystal spectrometer *(Chinese)* 85−43157
multiwire proportional chamber imaging device with delay line readout *(Chinese)* 86−11911
multiwire proportional chambers containing TMAE, low pressure aging effects 88−61104
multiwire proportional chambers with information pickup from cathode 86−5807
multiwire proportional counter, spectral resolving power 85−4219
multiwire proportional counter space point finding processor 87−29469
multiwire proportional counter with spherical drift chamber for protein crystallography with X-rays and gamma-rays 87−63630
multiwire proportional counters, gain dependence on count rate due to space charge 86−70329
multiwire proportional counters, planar prototype chamber 85−52961
multiwire proportional detector for Cherenkov ring imaging system, construction and operation 88−61103

position sensitive particle detectors continued
multiwire secondary emission beam profile monitorwith 20 μm resolution 86−60502
multiwire sensors, H ion beams charged and neutral components meas. 88−29765
multiwire tissue equivalent proportional counter, fabrication 85−37918
multiwire tissue equivalent proportional counters, performance for neutron dosimetry 85−37919

parallel plate avalanche chamber with resistive Ge anode and 2D read-out 86−50335
parallel plate avalanche counter, position sensitive for Coulomb excitation expts. 86−65341
parallel plate avalanche counter, position sensitive with distributed constants delay-line-cathode 86−50351
parallel plate avalanche counter for high resolution minimum ionizing particle detection 87−21433
position sensitive particle detectors continued
parallel plate avalanche counter with distributed constants delay-time cathode, prelim. results 85−64471
parallel plate avalanche detector, position resolution 86−5797
parallel plate counter with resistive Ge anode and two-dimens. read-out 86−44577
parallel plate drift chamber, drift velocity meas., signal shape, cell geometry effects 86−65382
parallel plate large area avalanche counter for time-of-flight meas. *(Chinese)* 88−47975
parallel processing of flash-ADC data for the Jet-Chamber of JADE 88−22999
parallel-plate avalanche chamber with a gated drift-chamber readout 88−74743
parallel-plate time projection chamber operation in amagnetic field 86−60583
partition noise theory appl. to wedge and strip position sensing element 88−29836
passive personal monitor for working level accumulationexposure *(Chinese)* 86−11892
PCTW-II, multilayer positron computed tomograph for whole body, performance study 85−48238
peak detector based on drift chambers, electronic cct. 86−60619
PET, BGO 3D detector system 88−61269
phonon mediated position resolved α-detection using supercond. tunnel junctions 88−61081
photodiode array, self-scanned, use for soft X-ray multilayer characteris. 88−23018
photodiode arrays, position sensitive detector for synchrotron X-ray radiation 87−29487
photoelectronic image device, prelim. tests 86−21079
photographic detection for neutron diffraction topography 85−15235
photographic methods in neutron scattering 85−15233
photographic position-sensitive detection with polychromatic neutron beam and its applications 85−15234
photomultiplier, readout of optical scintillation fibres 87−77551
photomultiplier hodoscope, position sensitive test 86−5795
photomultiplier tubes for high energy physics, nuclear medicine appl. 88−68209
photomultiplier tubes using multianode segmented dynodes or resistive anodes 85−40411
pictorial drift chamber model *(Chinese)* 86−65388
PIN large detector arrays, low noise random access readout technique 85−43209
pin-cushion type 2D position sensitive detector with good linear response 88−16644
pion muon identification in the ALEPH detector using the discriminant analysis 88−22950
planar electrodeless drift chamber, detection efficiency, charge spectra *(Chinese)* 85−48180
plane multiwire-electrode ionization chamber formeasurements of radon concentration in air 86−56049
plastic scintillating fibers for track detection 87−41862
plastic scintillator phoswich detector, 2-D position sensitive 85−15183
plastic streamer tubes, induced readout characteristics *(Chinese)* 87−57045
plastic track detector, etching bath, temperature control *(Chinese)* 86−11872
plastic track detector sheets, effects of laser cutting on performance 85−64484
PNP coded aperture arrays for X- and γ-ray imaging 86−50369
polycarbonate plastic detectors, heavy ion track study 85−48188
polycarbonate track detector, response temp. depend. *(Chinese)* 86−11860
polymer foils, spark counting of particle tracks, neutron flux, spectrometry meas. 87−41874
pore size measurement of nuclear track microporousmembrane *(Chinese)* 86−11894
position detection of 17-25 keV X-rays in Kr and Xe filled proportional chambers 86−50333
position identification of gamma rays and electronswith a multianode photomultiplier 86−50332
position sensitive photomultiplier tubes for scintillationimaging 86−47260
positron camera, HIDAC, for PET imaging, clinical applics 88−61292
positron camera, HIDAC, for PET imaging, clinical eval. 88−61303
positron camera, MWPC prototype RAL, clinical trials at Royal Marsden Hosp. 88−61291
positron camera for industrial appl. 87−29471
positron computerised tomography camera using MWPCs as detectors *(Chinese)* 88−68354
positron emission tomography system for small vol. imaging, SHARP prototype performance 88−61297
positron imaging, electron gamma shower for Monte Carlo calcs. 87−21461
precision drift chamber vertex detector prototype using dimethyl ether, test results 88−68287
pressurise vertex drift chamber for MAC detector, design, construction, prototype tests and performance 88−10244
projection chamber, high-density for DELPHI expt. 85−43250
projection chamber for Delphi detector 85−43181
projection chamber in large vol. sampling calorimeter 85−9040
prompt fission neutrons, energy, angular distrib. meas. 88−29927
proportional chamber, multielement, for ^{136}Xe $\beta\beta$ decay 87−29540
proportional chamber for time-resolved meas. using intense X-ray sources 85−37935
proportional chamber utilising at. induction mechanism and Penning effect for GUT monopole search 85−31694
proportional chambers with cathode read-out, detection accuracy study 85−52969
proportional counter, 2-D position encoding 86−32176
proportional counter, characteristics 87−50124
proportional counter, elimination of end effect, ^{14}C activity meas. 87−77523
proportional counter, multistep design, performance, X-ray astronomy appl. 87−63676
proportional counter, partially resistive anode wire, characteristics 87−50123
proportional counter, single wire, cathode strips, position sensing, nonlinearity 88−36355
proportional counter for ^{3}H labelled gas movement meas. 85−37936
proportional drift tube, accurate two-dimensional readout using time division and vernier pads 87−50151
proportional drift tube time resolution improvement, use of pulse trailing edge 87−71018

position sensitive particle detectors continued
proportional tube arrays for photon shower location 85−26699
proportional wire chambers, extended parametrization of gas amplification 87−77558
protein neutron crystallography, data processing 85−15225
proton beams, thin chamber for meas. intense beams profile 86−50271
pulsed microchannel-plate mounting for subnanosecond X-ray image intensifiers, plasma diagnostics appl. 85−26739
Radial Oscillating Collimators to reduce parasitic scattering 85−15237
radial semiconductor drift chambers, signal rise times and energy resolution 88−4800
radial semiconductor drift chambers, step noise effects on energy resolution 87−50150
radial wire drift chambers for CDF forwardtracking 86−50320
radial wire drift chambers for forward tracking 85−43237
radiation damage to drift chambers, lab. study of aging effects 87−29453
radiation detectors, charged-particle track simulation using X-ray and laser beams, reviews 86−25143
readout electronics reduction for 1-D position sensitive detector 88−61176
rectangular drift chamber cells with 100 MHz FADC readout 88−54432
rectangular drift tube for muon identifier 87−63665
red blood cell deformability, nuclear track microporous membrane study *(Chinese)* 86−11897
resistive wire proportional detectors for Q3D mag. spectrograph 87−71007
resonance tensiometer for multiwire chambers *(Spanish)* 87−50121
ring imaging Cherenkov counter test 85−52970
ring imaging Cherenkov detector for Fermilab expt. 665 88−61099
sampling radial drift chamber, feasibility tests 86−25120
sandwich microchannel plates for X-ray photon counting, operating characts. 88−61106
SAPHIR detector, design, performance 87−3905
scintillating fibre detector, high resolution, performance 87−71027
scintillating fibre tracking device, high resolution, with CCD readout, test meas. 88−22987
scintillating fibres, appl. as high-resolution tracking devices for high energy physics 88−42410
scintillating plastic fibres for calorimetry andtracking devices 86−50390
scintillation position sensitive TOF counter, for neutron and charged particle detection 85−64470
scintillation thermal neutron detection, gain stabilisation, processing method 85−15211
scintillator-photodiode hodoscope, electromagnetic shower position detection 87−29553
scintillators for thermal neutron detection 85−15210
segmented scintillator-Pb photon calorimeter using double wavelength shifter readout system 85−9046
selection system for particles with lifetimes of 1-0.1 psec, in vertex detector 87−8872
self-quenching streamer tube, position sensing by charge division method 85−48185
semiconductor counters, two-dimensional position sensitive detector, correlation technique 87−71002
semiconductor detector, magnetic beta spectrometer application 85−59185
semiconductor detector with series connected three microchannel wafers 86−50387
semiconductor detectors, experimental nuclear physics appl. 87−41873
semiconductor detectors, principles and new developments 87−29492
semiconductor detectors and readout electronics, present directions and outstanding problems 87−29546
semiconductor detectors for nuclear radiation, review 87−29521
semiconductor drift chamber, signal pulse processing, passive filter calcs. 88−36374
semiconductor drift chamber detector concepts 87−29547
semiconductor drift detectors, position and energy resolution 86−65336
semiconductor position sensitive detectors, signal and noise criteria 85−9075
shaping a stationary tubular electron beam of highperveance in a longitudinal magnetic field 86−25081
signal dependance on pulse height and gas gain 85−64455
single photon detectors with optically shielded wires, operation in transverse mag. fields 87−21431
single-wire drift tubes, response to variations in wire diameter and gas filling 87−57024
single-wire position sensitive counter in self-quenching streamer mode 85−4207
SiTek position sensitive detector, synchrotron radiation beam monitoring and alignment 88−4814
SLAC SLD waveform sampler CAMAC module 86−50419
SLC energy spectrum monitor using synchrotron radiation 87−41773
SLD, SLAC second generation detector overview 86−50302
SLD central drift chamber, analysis of digitized waveforms 86−50313
SLD central drift chamber, two-cell prototype 87−21411
SLD central drift chamber front end hybrid, test stands 88−68224
SLD drift chamber prototype, performance 86−50316
SLD solenoid multipurpose detector at SLAC Linear Collider 88−36383
small angle neutron scatt. appl. 85−15217
small angle neutron scattering using a radiographic detection system 85−15218
soda glass detectors, improvement of track development properties using etching techniques 86−18255
soda glass detectors, spectrometric response to ^{252}Cf fission fragments 86−18255
soil humidity and waterlogging influence simulation in α-track survey *(Chinese)* 86−11862
solid state area sensitive detector in two-dimensional X-ray diffr. pattern sensor 85−26737
solid state detectors for the soft X-ray region 86−60557
Solid state directional gamma detector 86−50364
solid-state detectors, signal processing 86−65389
solid-state track spark automatic detector, absolute fission rate meas. *(Chinese)* 86−11868
spark counter design *(Chinese)* 86−11870
spark jumping technique of fission fragment tracks *(Chinese)* 86−11869
spatial resolution of neutron-position scintillation detectors 85−15208
SQS adjustable field drift chamber, counting rate plateaus, resolution, efficiency *(Chinese)* 85−31713
SSC calorimeter options 88−68289
SSC central drift chamber, variation on straw chamber theme 88−10273
SSC central drift tracker, wire stability studies 88−10272
SSNTD, α-particle and proton discrimination *(Chinese)* 86−11874
position sensitive particle detectors continued
SSNTD, appl. in neutron dosimetry, environment and life sciences *(Chinese)* 86−11886
SSNTD, fission fragment track diameter bulk etching rate, swelling effect *(Chinese)* 86−11859
SSNTD, geometry factor G>0.5, finding values cause *(Chinese)* 86−11879
SSNTD, ion source emission profiles, determ. using solid state nuclear track detectors 86−18229
SSNTD appl. to geology and archaeology *(Chinese)* 86−11880
SSNTD audio frequency voltage source *(Chinese)* 86−11871
SSNTD bulk etching rate determination methods *(Chinese)* 86−11858
SSNTD etching methods *(Chinese)* 86−11853
SSNTD for cosmic ray research *(Chinese)* 86−11908
SSNTD transfer characteristics from external surface tointernal surface *(Chinese)* 86−11878
SSNTDs, absolute counting efficiency 85−64486
SSNTDs, effect of particle fluence on track diameter 85−64485
Stanford Linear Collider Detector, central drift chamber, front end electronics 88−61177
straight line calibration in drift chambers over eight meters 88−61127
straw tubes central tracking detector for SSC 88−10271
streamer tubes with high resistivity graphite varnish, operating details 86−32196
stretched polyester film for fission fragment recording *(Chinese)* 86−11863
strip detector telescope, spatial resolution, performance 85−15164
system for discrete nuclide identification of ions with A≲60 85−4237
tapered cell drift chamber, high field operation and varying gas pressure 86−50397
tapered cell drift chamber, operation in high mag. fields and different gas pressures 86−32192
tapered cell drift chamber development 85−26698
TASSO vertex detector, small pressurised drift chamber design and performance 85−31693
Techniques and Concepts of High-Energy Physics IV, conf., St. Croix, Virgin Islands (June 1986) 88−37848
thermal neutron detector using sandwich-type semiconductor counter 86−44544
thermal neutron imaging using position sensitive photomultiplier 87−29510
thermoluminescence sheets, spatial distribution readout system 86−25126
thermoluminescent sheets for high energy hadronic, EM shower detection 86−32197
three-dimensional He-recoil MWPC for fast polarizedneutrons 87−3894
three-dimensional position sensitive detector 85−37905
three-dimensional resolution determ. of drift chambers, in π-e and K-e expts. 85−26707
three-electrode system for locating charged-particle beams 85−20808
three-view segmented hadron calorimeter, design, performance 86−38710
time coordinate detector with a porous dielectric emitter 85−26709
Time expansion chamber as a vertex detector 88−22984
time expansion chamber as vertex detector for MARK J at DESY 87−21420
time projection chamber, avalanche broadening due to wire E×B effect 87−21429
time projection chamber, coordinate meas. and space resolution 88−36380
time projection chamber, e^+e^- physics appls., conf., Sant Feliu de Guixols, Spain (March 1986) 88−31297
time projection chamber, electronics, CAMAC interface, design 88−23002
time projection chamber, magnetic and electric field inhomogeneities meas. 85−43239
time projection chamber, Monte Carlo simulation of positron spectrum of muon decay data 88−61165
time projection chamber, principle, structure and performance *(Chinese)* 86−70334
time projection chamber, pulse shape digitizer 86−65343
time projection chamber, real time data acquisition system 88−16627
time projection chamber, synchronously gated, ion trapping props. 86−5779
time projection chamber, wire gain improvement near frame 85−59177
time projection chamber for ^{136}Xe double beta decay expt., design 88−36381
time projection chamber for heavy-ion collisions, trends and perspectives 88−61169
time-of-flight neutron hodoscope, performance 86−50394
time-projection chambers 85−4223
time-resolved electron energy loss spectroscopy 87−3904
time-to-amplitude convertor for electroluminescent drift chamber 87−71035
TOPAZ detector at KEK, trigger system 88−61123
TOPAZ inner drift chamber 88−61124
TOPAZ time projection chamber, design, construction and calibration 87−21432
TOPAZ time projection chamber, FASTBUS digitizer system 87−35366
TOPAZ time projection chamber, performance of field-shaping strips 86−50319
TOPAZ time projection chamber performance 88−68216
TOPAZ TPC-trigger, design, performance 88−68217
TOPAZ-TPC cosmic ray test 87−41842
TPC, field inhomogeneities calibration with laser rays 85−43179
TPC, gated grid system for drift field distortion suppression 85−37900
TPC, space resolution 87−14758
TPC, zig-zag shaped pads for cathode readout 85−43188
TPC as wide angle vertex detector in Omega spectrometer 85−43176
TPC at TRIUMF to study rare decay 85−9054
TPC central detector of DELPHI expt. in LEP 85−9057
TPC for ALEPH expt. in LEP 85−9056
TPC gating, mag. field effects 85−37901
TPC vertex chamber, readout and trigger electronics 88−61191
track finding with the Mark II/SLC drift chamber 87−29465
tracking detectors for large hadron colliders and e^+e^- linear colliders 88−4850
trigger drift chamber for the upgraded Mark II detector at PEP 87−50139
triode type ultra-fast photo-detectors 86−50343
Tuffak polycarbonate track detector, calibration 85−64482
two dimensional angular correlation of positron annihilation using a scintillation camera 87−29531
two-coordinate position-sensitive detector with video display of the information 85−15193
two-dimensional angular correlation of positron annihilation apparatus 87−29530
two-dimensional position sensitive semiconductor detector, struct. and appls. 85−43213
UA1 central detector at present and future luminosity (ACOL) 87−63652

position sensitive particle detectors continued
UA2 vertex detector, FASTBUS based 100 MHz FADC system for drift chambers 87−29460
UA4, SPS, Roman pot spectrometer and vertex detector 85−59224
underground searches for anomalous penetrating particles, GUT monopoles, quarks, heavy charged particles 85−15242
vector drift chambers, track finding and fitting 85−48186
vector multicell drift chambers 88−29841
VENUS central drift chamber, charged particles, pattern recognition algorithm 87−3906
VENUS detector, Pb scintillator luminosity monitor, performance at $\sqrt{s}$=50, 52 GeV 88−68236
VENUS drift chamber, global pattern recognition method 87−29543
vertex and track parameter estimation method 86−65385
vertex detection and tracking requirements at future accelerators 88−42416
vertex detector for beauty search 85−9066
vertex detectors, intermediate boson decay products 88−42441
vertex position determination using kinematic fit 86−65384
VICKSI beam profile monitor system, modification for low beam intensities 88−54081
wedge and strip anodes for position sensitive detector 86−50337
Wellblech chamber, multi-cellular vertex drift device for high energy colliders 88−4852
wide-gap electrodeless drift chamber, charact. and use at HYPERON spectrometer 87−8837
wire chamber advances for Mossbauer spectroscopy expts. 87−21404
wire chamber ageing charact. with tetrafluoromethane/isobutane and Ar/ethane mixtures 88−61101
wire chamber signal development, drift velocity of ions in gases 86−25121
wire chambers, charge and current on all electrodes, fast and accurate 3D calc. 85−43205
wire chambers, effects of end plates on resolution 87−63632
wire chambers, independent readout system 87−63641
wire chambers, resolution and rate behavior, appl. in new hadron colliders 88−10265
wire chambers, use in structural biology 87−29442
wire chambers as transition radiation detector for cosmic ray muons 87−41858
wire chambers in medical imaging, conf., Corsendonk, Belgium (June 87) 88−55780
wire gaseous coordinate detectors and their applications in biomedical research 87−50127
wireless time projection chamber, prototype testing 87−41834
X-ray astronomy, appl. of position sensitive multiwire proportional counters 88−61161
X-ray beam position tracking cct., expt. tests at DESY 85−37982
X-ray detector, position sensitive, for Bragg crystal spectrometer 86−56040
X-ray position detection, 6 μm position resolution, use of wire proportional chambers 87−29541
X-ray position detection with a gas proportional chamber 85−43226
X-ray position sensitive proportional counter (PSPC)of the Rosat telescope 86−32168
X-ray spectrometer with position-sensitive detectors 86−44615
X-ray telescope, ROSAT, focal plane instrumentation 88−23023
Xenon Olive Detector for next generation colliders, design 88−42430
ZEBRA low-energy γ-ray telescope imaging unit 86−50371
zero degree facility for (n,px) meas., design, preliminary results 86−70353
zero power reactor, $\delta^{25,28}$ meas. by SSNTD *(Chinese)* 86−11889
ZEUS Central Tracking Detector, cell design and electrostatic optimisation 88−54433
ZEUS detector at HERA, charged particle tracking 88−48008
zircon, fission track dating *(Chinese)* 86−11881
ep experiments at HERA, struct. fns., machine and detector status 88−68293
$\bar{p}p \rightarrow \xi$ (2220)$\rightarrow\phi\phi$(KK), possible LEAR expt., detector system charact. 85−20833
Al drift-tube counters in VENUS, Monte Carlo simulations of delta ray effects 87−77539
Ar, liq., detector for solar neutrinos and proton decay 85−9059
Ar liquid detector, electron extraction and multiplication in gaseous phase 88−10247
Ar, liquid ionisation drift chamber, coordinate resolution 87−29495
Ar, liquid time projection chamber, large scale purification system 87−71004
Ar-N_2 gas scintillation drift chamber, spatial and energy resolution 85−4220
B content in plants and soil, SSNTD technique *(Chinese)* 86−11905
B in agriculture, meas. by spark counter *(Chinese)* 86−11866
$^{10}BF_3$ gas position sensitive detector for low resolution single crystal diffraction expts. 85−15226
BaF_2 scintillator coupled to low press. wire chamber, recent development 85−4200
BaF_2 scintillators, position sensitive γ-ray detectors 85−43253
$Bi_4Ge_3O_{12}$ calorimeter study using 1-50 GeV electron and hadron beams 85−31696
$Bi_4Ge_3O_{12}$ detector array, response to 0.5-21 MeV photons *(Chinese)* 87−57019
$Bi_4Ge_3O_{12}$ tapered cryst. in positron emission tomography 85−20893
C fibres as resistive anode wire in position sensitive particle detector 86−60549
C filaments as anode in MWPC, charge division, coordinates for single electrons 86−50334
CsI-coated microchannel plates, UV and XUV quantum detection efficiencies 88−16641
CsI(Na) scintillation detector, single-coordinate, position-sensitive, space resolution determ. 87−8855
CsI(Na) scintillation plate with high spatial resolution 87−41825
CsI(Tl) position sensitive γ-ray detector 88−16628
(Ga,Al)As-GaAs, semiconductor scintillator, nuclear particle and X-ray detector 87−77595
Gd_2O_2S fluorescent screen integrating position sensitive X-ray detector 86−60565
Ge digital position-sensitive detector, fabrication technique 85−43233
Ge microstrip detectors, fabrication and performance 85−9069
Ge parallel plate counter with two-dimensional readout 86−60581
Ge position sensitive detector with built-in transverse drift field 85−43216
Ge targets for lifetime meas. 85−9061
Ge(Li) coaxial detector, time and position resolution, least-squares fitting 88−10242
H, high press. TPC performance 85−9055

position sensitive particle detectors continued
H liquid as Cherenkov radiator, position resolution 86−65368
^3H labeled gas movement meas. using multielement position sensitive proportional counter 88−54393
He/CH_4 flow proportional counter, energy resolution in X-e^- coincidence Mossbauer scattering experiment 85−64474
^3He multiwire area detector for the small-angle neutron scatteringfacility at Riso 86−5813
^3He two dimens. thermal neutron PSDs, resolution and accuracy 85−15203
^6LiI position sensitive scintillator, thermal neutron detection 88−61083
$Li_2SO_4:Ce^{3+}$ glass, neutron detector design 85−15206
NaI π^0 and η^0 detector, energy resolutions by Monte Carlo simulations 87−29506
NaI(Tl) cryst. based neutral detector at VEPP-2M 85−26688
NaI(Tl), position-sensitive detectors for shielding tests ofspent fuel shipping casks 86−50362
Ne-Ar proportional counter, low temp. operation 88−16626
NiO catalyst reduction, photodiode array system for energy dispersive EXAFS 88−42426
Pb glass tubing matrices in MWPCs and TPC for medical and high energy physics 85−59205
Pb scintillation calorimeter for electron and pion detection, radiation damage props. 87−14723
Pb-glass calorimeter with vacuum phototriode read-out 86−65330
Pb-glass hodoscopic shower detector, coordinate determ. accuracy improvement 88−29891
Pb-liquid scintillator shower detector for multiphoton detection 85−31695
Pb-scintillator sandwich hodoscope with photodiode readout, energy and position resol. 85−64493
Si E-ΔE telescope, two-dimens. position sensitive detector 86−18244
Si Vertex Detector of Fermilab Collider Detector, performance in tagging $pp \rightarrow W^+W^-+X$, $W \rightarrow tb(l\nu_l)$, $\sqrt{s}$=17 TeV 88−4836
Si, amorphous layer radiation detector development 87−21438
Si barrier detectors for charged particle detection *(Czech)* 87−35335
Si counter array, construction and performance in UA2 87−63656
Si detector, 1 m^2 array for UA2 expt., construction and performance 87−29491
Si detector with 2D pad readout, performance 87−21437
Si detectors for Small Angle Spectrometer of Fermilab Collider Detector, construction, performance 87−29489
Si detectors, large area, properties and radiation stability 87−29551
Si detectors, position sensitive, 2D, resistive charge division, anomalous current time characteristics 88−61147
Si drift chamber, charge transport scheme 85−9064
Si drift chamber for two-dimensional particle detection 87−14750
Si drift chambers, electron dynamics 87−29548
Si drift chambers for position and energy meas. 85−43170
Si drift chambers, performance and characteristics 85−9072
Si drift detector, prototype, fabrication and testing 88−4801
Si high resolution detectors status and future developments 85−9062
Si ion-implanted strip detector for position and energy loss meas. 88−48004
Si microstrip counter with VLSI readout for DELPHI microvertex detector 87−41861
Si microstrip detector as ALEPH minivertex detector 87−63655
Si microstrip detector, capacitive multiplexing 85−37923
Si microstrip detector, hardware development 85−15166
Si microstrip detectors, analog multiplexed electronics in WA75 expt. 86−65333
Si microstrip detectors, application in medicine and structural anal. 85−15161
Si microstrip detectors with VLSI readout, test beam results 87−29549
Si microstrip high-resolution tracking devices for high energy physics 88−42410
Si microstrip vertex detector, test beam studies 85−43241
Si multistrip detector, fabrication and performance at low energy 86−44555
Si, photon counting image acquisition system, performance analysis 87−20928
Si pn-CCD's, fully depleted, energy and position sensitive detection 88−68207
Si position sensitive detector, Tevatron beam tube tests 87−21436
Si position sensitive detectors for the Helios expt., X-Y tracking modules, design, testing 87−29488
Si position sensitive detectors for the Helios expt., test procedures 87−29554
Si position-sensitive photodetectors, fabrication procedure 87−29436
Si radial drift chambers for low noise radiation detection 87−29470
Si radial position-sensitive semiconductor detector 86−50386
Si sampling calorimeter, EM shower development in U and W 85−52973
Si semiconductor drift chambers 85−59168
Si strip detector, γ-ray polarisation, energy and direction meas. 87−77560
Si strip detector system, design criteria 85−15165
Si strip detectors, performance 85−15168
Si strip detectors, production and fabrication 85−15173
Si strip detectors, radiation damage 87−29550
Si strip detectors with capacitive charge division 85−48168
Si strip diode vertex detector for LEP 85−9063
Si strip particle detector IC *(Norwegian)* 87−50125
Si surface barrier, residue implantation detection system on the Daresbury Recoil Separator 88−36348
Si, two-dimensional position-sensitive detector, charge waveform 88−61120
Si vertex detector for CERN NA14 expt., operation 87−29555
a-Si:H MIS position sensitive detector, design, fabrication and characterisation 85−52964
Si(Li) detector arrays for scanning X-ray introscopes 88−36364
U content in Yellow River water fission track anal. *(Chinese)* 86−11906
U content in ores, fission track method *(Chinese)* 86−11901
U deposit in sand conglomerates, α-track study *(Chinese)* 86−11902
U liq. Ar calorimeter, hadron/electron response from 10 to 150 GeV 88−61122
U liq. Ar calorimeter performance 88−22953
U mine survey, fission track method, automatic measuring techniques *(Chinese)* 86−11867
U trace determ. in atmospheric precipitation by fusion tracks *(Chinese)* 86−11907
U/tetramethylpentane EM calorimeter performance 88−29872
^{238}U ions, detection using Triafol plastic track detector 88−48015
Xe TPC for double beta decay expts., background rejection efficiency calc. 88−54397
Xe gamma-quantum detector 87−29513
Xe gas scintillation drift chamber, operation and light detection schemes 88−61110

position sensitive particle detectors continued
Xe, high pressure time projection chamber, design and construction 87−77541
Xe time projection chamber, design, performance 86−38712
Xe-hydrocarbon gas mixture, drift velocity and Lorentz angle meas., detector appls. 88−4802
thermoluminescence sheets, $BaSO_4$:Eu doped, electromagnetic shower detection 86−25126

oxide powder dispersion in organic liqs. 85−33530
oxide powders, mag., dispersion and particle packing 87−339
particle charge/size distrib. meas. system *(Japanese)* 87−63229
$PbTiO_3$ powder prep. for flexible 0-3 piezoelec. composite 87−52215
permanent magnetic materials, properties and power processing techniques 88−57994
piezoelectric ceramics, prep. and industrial appls. 87−6934
seed particle growth by silane pyrolysis, runaway nucleation in aerosol reactors 87−36793

powder technology continued
standard powder, introduction *(Japanese)* 88−479
ultra-fine powder prod. using thermal plasmas, fundamentals and applications 87−22923
ultrafine powders production using electrohydrodynamic atomisation 85−28267
Ag-CdO extruded composite, deform. influence on struct. and props. of elec. contacts 88−44405
B-Si ultrafine powder diffusion source for B doping in Si 85−1479
Ba ferrite, press forged powder compacts, mag. remancence, grain size 85−41019
BaB_6-LaB_6 solid soln. based thick films, powder dispersion effect on electrophys. props. 87−36821
$BaFe_{12}O_{19}$ ferrite powder magnets, struct. form. in variable and const. fields 87−65580
$BaO\text{-}TiO_2$ system polytitanate ceramics, synthesis by hydrothermal precip., dielec. characteris. 88−71829
$Ba_{1-y}Sr_yCuFe_{17}O_{27}$ permanent ferrimag. powders, mag. props. study 86−15387
$BaTiO_3$ based dielectric powder capacitor material synthesis methods 88−31873
$BaTiO_3$ commercial powder, centrifugation and fast firing 87−52216
$Ba_2Ti_9O_{20}$:Nd, ceramics, prep. for microwave appl. 88−26552
$Bi_2Ru_2O_7$ based resistive pastes, electrophys. props. 88−63981
$(CaO_{1-x}PbO_x \cdot 6\ Fe_2O_3)_{97}(La_2O_3)_3$, anisotropic ferrite magnets, effect of PbO substitution on props. *(Japanese)* 88−1863
$CdO\text{-}Sb_2O_5$ semiconducting ceramics, synthesis and defect struct. 88−43947
CdS, hot isostatic pressing 88−24830
CdSe particles chem. bath precip. for use in photoelectrochemical cells 88−5819
Co ferrite fine particles, synthesis and charactn. for coloured magnetic toner 88−44960
Co ferrites, isometric pigments, spinel struct., prep. by wet processes 86−13853
CrO_2 particles for magnetic recording, improved prep. method 87−44400
Cu-O based high T_c superconductors, practical preparation methods 87−74562
$Fe_{14}Nd_2(Cd)_2Y_2B$, submicron particle prep. for mag. recording appls. 86−15344
$\gamma\text{-}Fe_2O_3$ fine particles prep., one-step process involving thermal decomp. 86−26931
$\gamma\text{-}Fe_2O_3$ superfine powder, prep. and gas sensitive props. *(Chinese)* 87−31593
$KTa_{1-x}Nb_xO_3$ ceramic discs, prep. by sol-gel processing and hot pressing 87−52219
$KTa_{1-x}Nb_xO_3$ powders, prep. by sol-gel technique from metal alkoxides 87−52218
$La_3Ba_3Cu_6O_{14+x}$, $LaSrCu_2O_{6+x}$ and $La_{2-x}Sr_xCuO_{4-x/2+y}$, mixed-valence capacitor electrodes, co-sintering with $BaTiO_3$ and dielec. props. 87−52910
$Li_xCo_{1-x}O$ and $Li_xNi_{1-x}O$ solid soln. systems, prep. and elec. props., pot. humidity sensors 86−46393
$LiFe_5O_8$ ultrafine particles, prep. by sol-gel method, characts. 86−46392
Mn-Li-Zn ferrite powders, prep. by chem. method using metalorganic salts *(Polish)* 86−40800
Mn-Zn ferrites, high permeability, powder prep., sintering process *(Slovenian)* 86−15371
MnZn ferrite fabrication, PVA plasticisation by polyethylene glycol *(French)* 88−39798
MnZn ferrite power, molten salt synthesis, EM shielding appls. 87−39397
$Mn_{1-x}Zn_xFe_2O_4$ high-induction ferrites, powder synthesis and physiochem. props. 86−35985
$(Na,Li)NbO_3$ system, sol-gel processing and dielec. characteris. 86−62266
Ni-Zn ferrites with additives, for magnetic heads use 87−73154
$Ni_{1-x}Mn_{2+x}O_4$, oxide spinels for thermistor appl., O_2 evolution during sintering 87−73157
PLZT ceramics; prep., dielec. and piezoelec. props. 85−40979
PLZT ferroelec. polycomponent oxides, controllable powder synthesis, HP and PHP methods 87−328
PLZT piezoceramic elements, isostatic cold pressing 86−28555
PLZT transparent electrooptic ceramics, process reviews 88−24813
PZT synthesis through combination of spray decomp. with solid phase reaction *(Japanese)* 88−12089
PbTe:Na and undoped, sintering, elec. props., SEM obs. 85−54530
$PbTiO_3$ powder, coprecipitated, piezoelec. composite prep. 87−53772
$PbZrO_3TiO_3$-polymer, fired 0-3 composites, prep. and piezoelectric props. 87−67630
RuO_2 based resistive pastes, electrophys. props. 88−63981
RuO_2 based resistive pastes with glass binder, degree of dispersion influence on thick film resistor props. 88−44386
Si, polycrystalline ribbon, for solar cells, electron powder ribbon process 86−40761
Si powder layers, melt recrystallisation for solar cell fabrication 87−5395
Si powder, submicron particle production in aerosol reactor 86−62287
Si solar cells grown from powder using zone melting process 88−37530
SiC, for elec. heater prod., elec. resist. control method 87−44403
Sr ferrite fine particles, prep., mag. props. *(Japanese)* 87−25789
Sr ferrite particles, colloidal, uniform, prep. 88−31863
$SrFe_{12}O_{19}$ particles, prep. by glass-ceramic method, mag. props. 85−10835
Ti-Al-V (6, 4 wt.%), powder compacts, inclusion detection by US technique 85−17011
TiO_2 varistor powder, efficient process for vol prod. 85−17004
UN fuel for space power reactors, fabrication and testing 88−36620
Y-Ba-Cu-O high T_c supercond. ceramic wire prod., powder-in-tube process and props. 87−59017
Y-Ba-Cu-O high temp supercond., metal composite monoliths, shock-compression fabrication 87−67840
Zn ferrites, isometric pigments, spinel struct., prep. by wet processes 86−13853
$Zn_xCd_{1-x}S$ layers prepared from $CdS+ZnS+Cr_2O_3$ powders, struct. and photoelectrical props. 86−42409
ZnO high field varistors, chem. prep., elec. props. 86−58492
ZnO varistors, elec. props., influence of doping 85−6821
ZnO varistors, prep. by controlled powder coprecipitation *(French)* 88−32487
ZnO varistors, prep., grain size, elec. characts. 86−47095
ZnO varistors, urea process synthesis, thermal evolution 88−71140
$ZnO\text{-}CoO\text{-}MnO_2\text{-}Bi_2O_3\text{-}Sb_2O_3$, varistor system, prep. by evaporative decomp. of solns. 88−7076

powder technology continued
$Zr_xTi_ySn_zO_4$, processing, dielec. props. and microwave resonator applics. 86−40795

powders

direct DC to RF conversion by picosecond optoelectronic switching 85−17877
directional couplers, home-made for radio amateurs 85−34141
distributed amp. with regulated supply, operational analysis 86−14030
distributed amplifier using high-powerMOS-transistors and M-derived filters 86−8014
distributed amplifiers performance, large signal conditions *(French)* 85−49753
distributed amps., potential power performances 85−11060
DMOS wideband RF amplifier competes with bipolars 87−5689
Doherty RF power-amplifier systems, efficiency 88−575
Drake L4B conversion for 3XC1200A7 power amplifier tube 86−20312
DS75325, memory-driver chip controls MOSFET gate 86−53620
dual power operational amplifier, integrated, for servo appls. 87−44642
ECM transmitter, antenna and amplifier component characts. and developments 87−40657
efficiency enhancement possibilities *(Czech)* 88−32033
EHF solid-state power amplifiers using GaAs IMPATT diode ccts., design considerations 87−37539
electric spark machine's electrodes distance controlsystem *(Bulgarian)* 86−26438
EMC situation impact, theoretical calculations and denied channel calcs. 85−612
EW wideband FET power amplifier technologies 85−55152
fast op amp with 375 V/μs slew rate, ±100 mA outputcurrent 86−8030
feed-forward linearizer cct., analysis and expts. *(Japanese)* 88−6672
FET, noise factor 86−27102
FET, stability conditions 85−6196
FET amplifier, 14 GHz, cooled low-noise design for communication satellite appl. 85−40249
FET amplifier, power gain under large-signal conditions, graphical approach *(Japanese)* 86−27113
FET amplifier anal. using power depend. S-parameters 88−63892
FET audio amplifier, high-power design 85−44904
FET audio amplifier with switch mode operation, design and characts. *(German)* 87−37016
FET nonlinear power amplifiers, optimum design technique 88−25469
FET power amp., input impedance calcs. 87−44635
FET power amplifier design using small-signal parameters 86−27093
FET solid-state microwave pulsed-power amplifier 88−56482
FET wideband power amplifier, 1 W over 8 to 17 GHz 85−17850
FETs, high-power, slope characteris., frequency dependence determination 85−35004
FRC Concepts RFC 2-23 and Tokyo Hi-Power HL-37V 30 W 144 MHz power amplifiers, comparison 88−12222
frequency hopping power amplifiers for transceivers, design considerations 87−37042
frequency-dependent feedback-feedforward amplifiers, distortion reduction 86−20326
general-purpose solid-state power amplifier for FM broadcasting 87−66555
Gonset 300 W amplifier for 2 m band, design 85−28386
Hafler pre/power amplifier *(German)* 88−22367
Harman-Kardon equipment, review *(German)* 86−760
harmonic reaction amplifier−a novel high-efficiency and high-power microwave amplifier 88−12607
Heathkit HF linear amplifiers, modifications 88−38391
Heathkit SB-200 power amplifier, upgrade modifications 88−63530
Heathkit SB-200/220 linear amplifier power supply improvement 87−65800
Heliotron-E, high final stage amplifier design 85−611
HF broadband power amplifier technology 85−28408
HF broadband power amplifiers, design 88−12234
HF electric process heating, efficient power source 87−72588
HF power amplifier, 500 W output, 30-30 MHz, design using switching MOSFETs 85−33675
HF pulsed solid-state power amplifier, 1000 W output for NMR imaging appls. 85−54699
HF PWM servo amplifier design using power MOSFETs, for DC servomotor control 86−14019
HF radio ccts. using dipolar transistors, stability calcs. 88−63547
HF series-resonant switching amplifier for AC motor drive 87−31737
HF transistor amps., phase response calcs. 87−59205
Hi-Fi amplifier, construction and assembly aspects *(Spanish)* 88−53487
Hi-Fi amplifiers, testing *(German)* 85−17162
high frequency, for grounding impedance freq. characteristics meas. *(Japanese)* 85−26450
high power FET stereo amp, construction details 86−69970
high power microwave amplifiers of ERS-1 Satellite 87−6334
high power op amp, low quiescent power draw 85−44903
high-efficiency power amplifier MIC for 800 MHz mobile radio 88−71136
high-fidelity AF amplifier, high-power type, design, characts. and operation *(Spanish)* 88−38401
high-harmonic gyro-TWT amplifier with large orbit, operation 88−39016
high-power triode HF amp., efficiency increase 86−52700
Hitachi HA-1397 audio amplifier IC 88−18946
horizontal TV deflection, self-adapting driver circuit 86−11263
HPA for direct broadcast satellite appls. 85−42536
HV electro-optic driver with DMOS power FETs and optocoupling isolation 88−70563
HV HF class-E convertors suitable for miniaturization as fluorescent lamp ballast 85−6167
HV HF/VHF power SIT amplifiers with broadband neutralisation scheme, design and performance 87−16912
HV monolithic Hi-Fi stereo audio driver, bipolar IC with dual op-amp 87−28876
HV push-pull amplifier, bridge type config. using DMOS power FETs 87−37021
HV voltage multipliers for power amplifiers, transient anal. and circuit CAD *(Russian)* 87−23946
hybrid class-BD amplifier with low distortion *(Japanese)* 88−50044
hybrid IC power amplifier, 1000 W load drive capability 86−57660
hybrid power amplifier module for X band 87−66540
hybrid power amplifier modules for wideband RF operation 87−16907
hybrid power op amps with video freq. range bandwidths at 4 A 87−73331
IC audio power amp ccts. 85−28385
IC audio power amps., practical ccts. 85−28383
ICRF tetrode power amplifiers, cct. config. and extra high power operation 88−63552
IMPATT amplifier, 100 W 10% bandwidth microstrip low-cost module 87−6097
input zener breakdown in linear high frequencypower amplifiers 86−800
instability of amplifiers with parallel-corrected power transistors 85−595
instrumentation TWT power amplifiers for almost any appl. 87−73341
integrated double LF power amplifiers A2000V and A2005V *(German)* 86−55481
intermodulation level prediction due to distortion in linear broadband power amplifiers 86−27116
JT-60 ICRF heating system, high-power amplifier and launching system 88−63551
Ka/Q band IMPATT amplifier technology 85−6508
keyboard amplification equipment 85−31267
Klimo DK-OTL monoblock valve amplifier *(German)* 88−74196
Klystrode as UHF TV amplifier, characts. 85−55398
Ku-band power amplifier for communications satellites 86−62846
Ku-band reflective diode predistortion linearisers for microwave power amplifiers, spacecraft appls. 86−8522
KW amplifier, design 85−44893
KW Ten-Tec Titan linear amp. 87−34455
L-band radar module, 2 kW design using 550 W quad building blocks 86−11169
L-band solid-state pulse amplifiers for radar transmitters, transient response anal. 88−56982
L-band solid-state radar module, 1 kW amplifier design considerations 87−20607
laboratory amplifier boosts 1 to 500 MHz 87−52407
large-signal amplifiers, transistor slope impedance dependent distortion reduction 88−50040
LF, complementary stages *(German)* 85−39937
LF, output stages *(German)* 85−33683
LF amplifiers, cross-symmetrical design *(German)* 85−33682

power amplifiers continued
LF power amps. using MOSFETs *(German)* 85−23776
linear amplifier unit for HF band transceivers. I 86−40930
linear solid-state power amplifier for 64 QAM radios 88−1011
LM12, 150W high power op. amp. provides diverse cct. functions 86−52688
LM12 monolithic power op amp 88−50036
LM12 power op amp has build-in fault protection 87−37027
LM391 audio power driver amp., final stage thermal protection *(Dutch)* 88−32015
load matching 88−63549
loss measurements in cores and inductors 86−53092
loudspeaker power amps. with load-adaptive source impedance 88−74184
low-distortion, high-power thyristor amplifier 87−44630
low-pass tunnel diode transmission power amplifiers, design 86−57691
Luxman CL-360 and MQ-360 valve amplifiers *(German)* 88−47368
Luxman L-215 stereo amplifier, features and performance 86−24204
magnetic resonance imaging, RF power amplifier design 86−70388
MDA 2020 AF power op. amp., parameters and appls. *(Czech)* 86−27110
memoryless power amplifier system, piecewise linear limiter performance, optimal characts. study 86−775
MESFET amplifiers, power optimisation using nonlinear modelling of MESFET 88−19419
MESFET distributed amplifiers, wideband power performance prediction using Volterra series representation 87−17355
microstripline high power amplifier design 86−41345
microwatt operational amplifier for monocell powering *(German)* 85−22666
microwave, 3rd order intermodulation distortion reduction in FET ccts. 86−8501
microwave, linearisation using active feedback networks 85−17821
microwave, solid-state, 4 GHz, onboard satellite appl. 87−6111
microwave amplifiers using miniature microwave hybrid ccts. 86−47084
microwave capacitively coupled traveling-wave power amplifier 85−1055
microwave cct. large-signal charactn., computer-aided load-pull meas. system with error correction 87−20901
microwave class-B FET power amplifiers of 1,2, and 4 W 87−6132
microwave FET power amplifiers, linear amplification of varying envelope signals 85−54694
microwave harmonic reaction amplifier, high-efficiency operation using power FET pair 88−71120
microwave high-voltage FET amplifiers for satellite andphased-array applications 86−8491
microwave hybrid distrib. amplifier, declining drain line lengths cct., computer-derived design concept 86−47063
microwave large MESFET scaling-up, lumped and distrib. scaling 88−71057
microwave linear power amplifier with micromodule technology 88−1013
Microwave Modules Ltd. MML432/100 power amplifier 86−67037
microwave oscillator/amplifier large-signal load-pull meas., vector error-corrected calibration technique 88−22756
microwave power amplifier for microwave digital radios with inherent phase compensation 87−73739
microwave power amplifier modules, design for 800 MHz land mobile communications 85−11551
microwave power amplifier modules for Antiproton Collector stochastic cooling systems 85−52932
microwave power amplifiers for the ACOL stochastic cooling systems at CERN 88−12593
microwave power amplifiers in satellite transponders, dual-gate MESFET predistortion linearisers cct. 86−27592
microwave power amplifiers in satellite transponders, GaAs dual-gate MESFET linearisers 86−8518
microwave power amps., matched transformers design 86−35083
microwave power distributed amplifier using constant-R networks 87−6159
microwave power summing in common load, load props. 85−55129
microwave power tube design, power and efficiency improvements 87−1145
microwave power-combining multiple-device ladder amplifier, theory and performance 86−41335
microwave predistortion networks using digital circuits, design and performance 85−14127
microwave resonant cavities, DENSEPACK array of Langmuir probes 87−11022
microwave transistor amplifier, max. available power gain under large-signal operation *(Japanese)* 87−59863
microwave transistor amplifier under large-signal operation, max. available power gain 88−44348
microwave type, distortion characts. using vector meas. method 86−8450
MM-wave IMPATT diode power amplifier design for Q-band operation 85−17862
MM-wave monolithic GaAs power FET amplifiers, design and performance 87−59857
MMIC, total active device and passive network designcapability for optimum travelling-wave power amplifiers 86−53065
MMIC amplifiers, EW system design 87−73339
MMIC capacitively coupled traveling-wave power amplifier 85−17827
MMIC distributed power amplifier, K/Ka-band, with capacitive drain coupling 88−63947
MMIC distributed power amplifier, novel design approach 86−53066
MMIC dual-gate FET distrib. power amplifier, 1-20 GHz design, modelling, fabrication and performance 88−19412
MMIC fully integrated 0.5 W, 2 to 6 GHz amplifier 88−32454
MMIC power amplifier module, 6.5-16 GHz operation, design and characts. 86−27595
MMIC power amplifiers, stability and cct. modelling 88−63971
MMIC power distributed amplifier using constant-Rnetworks 86−67500
MMIC/hybrid 3 W amplifier with low phase noise at X-band 87−6134
MMICs, development for broadband system appls. 88−50372
MMICs, power types for C-/X-/Ku-bands, design and performance characts. 88−19411
mobile AF power amplifier 86−31064
modular audio power system, dummy load for amp. 85−37359
monolithic amplifiers, design using isolated collector vertical p-n-p technology 87−23966
monolithic bipolar IC type for portable tape recorder with single 1.5 V dry battery operation *(Japanese)* 86−55495
monolithic MIC medium power amplifier, 3.7 to 4.2 GHz 86−20837
monolithic operational amplifier, LM12, 150 W output, design and protection features *(German)* 87−65863
monolithic power operational amplifiers for large loads, comparison with hybrid devices 88−25023
MOS modulated-pulse amplifiers revived 87−44610

power amplifiers continued
MOS transistor, high-power, switch mode, equivalent circuit anal. 85−35002
MOSFET, high-power audio amplifier, design 85−28403
MOSFET bridge amplifier for 12-V operation 86−8005
MOSFET high-power AF amplifier module, Playmaster series 200 based, design and construction 86−34551
MOSFETs in high commutation level, characterisation 88−71502
MOSFETs RF power amplifiers, mathematical model 87−53548
MU radar with active phased array system, antenna and power amps. 86−23968
multicarrier digital microwave system, high power amplifier linearisation 87−40719
multichannel wideband RF power amp. design 88−44069
multioctave transistor, linear dynamic range limit calcs. 87−59204
multiple-diode reflection type amplifiers using IMPATTdiode, 10 GHz design and characts. study *(Japanese)* 86−14514
Nakamichi/Threshold audio power amp. performance *(German)* 87−14027
NEC power amplifier for personal radio *(Japanese)* 86−781
NEC power amplifier module for 1.2 GHz band handheld amateur radio *(Japanese)* 87−76534
negative feedback amplifier in microwavefrequencies 85−49761
network synthesis, canonical approach 87−388
neutral particle beam discriminator, RF power source technology 87−14630
noise-to-signal ratio variation 86−14028
nonlinear distortions anal., comparison of quasi-stationary and dynamic methods 86−30974
nonlinear distortions in case of dephasing modulation, effect of amplitude asymmetry on channels 86−14013
nonlinear high-power amplifier for shaping magnetising current pulses 86−861
nonlinear solid state power amplifiers, wideband operation, calculations and meas. comparison 85−11058
O-type TWT beam amplifiers, noise characts. rel. to interaction space 85−6661
operational, for wide spectrum of jobs and specifications 87−23943
operational amplifier, monolithic type, LM12, 150 W, design, performance and appls. *(German)* 87−23948
operational amplifier, OPA 541, appl. in microprocessor controlled DC motor drive system *(German)* 88−75965
operational amplifier, output stages, feedback and protection considerations 86−8002
operational amplifier, power dissipation problems *(French)* 87−23955
operational amplifiers, design *(Spanish)* 86−8019
operational amplifiers, input differential stage, driver amplifier and bias network aspects 86−755
operational amplifiers, stability and appls. *(Spanish)* 87−5691
operational amplifiers benefit from integration and conquered thermal problems 85−61125
optimal harmonic-suppression output filter for power amplifiers 85−17620
optimised CAD using automated meas. procedure 88−70577
optimised class-e amplifier with load variation 87−73335
OSCAR 10 satellite, 60 W uplink amplifier design 85−28387
output noise of a high-power amplifier 88−44060
parallelable PWM amplifier 88−16014
parallelable PWM amplifier with multiple-loop feedback 87−65891
plate-and-grid modulated selective HF amplifier, optimal design 87−59194
PLT, lower hybrid current drive, 2.45 GHz system 85−1238
power electronics, conf., Blacksburg, VA, USA (June 1987) 87−65071
precision power amplifier for power/energy calibration applications 87−65843
precision power amplifier for power/energy calibration applications 88−16013
programmable, broadband power amplifiers for automated microwave testing, 6900H series 20/100 W models 87−37526
pulse power amplifier with enhanced dynamic response 86−57681
pulsed broadband RF power amplifier design for NMR spectroscopy 85−54698
pulsed IMPATT diode amplifiers 87−6098
push-pull amps. with PWM, low freq., distortion calcs. 88−44071
push-pull stage with transformerless output and improved efficiency 86−20335
push-pull switching power amplifiers simplified models 88−18931
PWM amplifiers using MOSFETs, principles, realisation and appls. *(German)* 88−44055
PWM current-mode power amplifier, design for DC motor energisation appl. 85−61122
PWM high power amplifiers for LF and DC *(German)* 86−40919
PWM power amplifier anal. by state-space averaging method *(Japanese)* 86−27112
PWM power amplifiers, stabilised, correction synthesis for transient quality improvement *(Russian)* 86−67050
PWM servo amplifier, Copley Controls 241 87−44612
PWM switched-mode converter topologies 88−70527
PWM transconductance amplifier for precise microstepping 86−62460
QAM digital radio system performance rel. to RF amplifier nonlinearities 87−28369
QPSK signals, nonlinear channels, digital ship earth station, performance characteris. 87−48973
Quad 306 and 606, and Celestian loudspeakers *(German)* 88−29167
resonant mode amplifier, using DC-DC convertor in push-pull configuration 86−20325
RF, 16 W, TECMOS appl. *(Spanish)* 86−34582
RF, broadband leveling in pulsed operation 85−61133
RF, hybrid amplifier for 200 mW to 30 W operation for Kraftmeier II (Heman II) *(German)* 85−20319
RF, overview of class A versus class AB power amplifiers or how linear is linear! 87−41179
RF amplifiers, high efficiency design using optimally loaded harmonic waveshaping 87−16909
RF and microwave power semicond. devices, colloquium, London, England (May 1985) 85−44419
RF broadband power amplifiers design, one-port impedance models appl. 85−22680
RF class C power amplifier for dielectric heating applications 87−52400
RF linear amplifier, 60 W, config. using power FETs and push-pull output stage 88−32029
RF medium-power amplifier phase shift, automatic meas. using ATE program technique 85−58521

power amplifiers continued
RF power amplifier, linear type, 2-30 MHz, design and performance *(Spanish)* 85−11054
RF power amplifier balancing, bandpass matching networks 85−17161
RF power amplifier design considerations 87−16908
RF power amplifier for 2-30 MHz range, design and characts., SSB appls. 86−27094
RF power amplifier modules, ATE system and CIM process with active laser tuning 87−37041
RF power amplifier modules, design, active laser tuning and testing 87−37040
RF power amplifier with dedicated interlock and feedback controller 87−35290
RF power amplifiers, design aspects using vacuum tubes *(Spanish)* 85−44908
RF power amplifiers, techniques and components 88−584
RF pulse power amplifier, design *(Spanish)* 88−56491
RF systems, outphasing efficiency 86−8011
RF transistor dynamic junction temp. distrib. determ., using IR imager 88−50824
RF type, CAD, parameter extraction techniques for RF power transistor models 87−36932
RF type, characts. meas. using combined S-parameter and load-pull technique 88−22769
RGB HV video output amp., single chip 10 MHz 87−10696
S-band high power amplifier of deep space groundstation *(Japanese)* 86−40925
S-band high-power pulse amplifiers, design options 86−53067
S-band solid-state high-power amplifier design 87−73671
Sanyo STK077 30W hybrid IC audio output stage 85−37352
SCRs, GTOs and power transistors increase load capacity for power conversion 85−44068
series parallel connected composite amplifiers 85−6198
series- or parallel-connected composite amplifiers 86−46586
servo-amplifier, PWM, ultra-high efficiency, using Power MOSFET devices 85−49022
SHF 30 W solid state power amplifier for satellite communications applications 88−56999
SHF multiple-diode transmission type amplifier usingIMPATT diodes, design and performance *(Japanese)* 86−1377
shortwave radio broadcasting, 500 kW tetrodes 88−64177
single-sideband signal components, separate amplification, nonlinear distortions anal. 87−44617
SM-3V seismometer, recording channels amplifying devices 86−44778
small Earth station development for business satellite communications 87−56099
solid state 3 kW UHF-TV broadcasting equipment, review *(Japanese)* 87−63142
solid state driver a 43.5 to 45.5 GHz for uplink-transmitter power amplifiers 87−66556
solid state power op-amp ICs, review 85−28405
solid-state power devices and ccts. for HF elec. process heating appls., review 86−67019
Soundcraftsmen 450X2 stereo power amplifier 87−70311
Soundcraftsmen model 200X2 stereo power amplifier 88−47361
stereo amplifier, construction 86−33809
stereo low-power amplifier, 2.5 W per channel, design and construction *(Spanish)* 86−67057
stereo power amplifier, Playmaster Series 200, constructional details 86−756
stereo power amplifier, Playmaster Series 200, design and construction 85−61120
stereo power amplifier, Playmaster Series 200, design and construction 86−754
surface-mount MIC amplifier, Avantek PPA-18632, 6-18 GHz, design and characts. 87−52856
switch mode power amplifier, DC properties 86−57688
switched-mode aperiodic solid-state high-power class-D_{ap} HF amplifier *(Polish)* 87−37028
switched-mode power amplifiers, current feeding techniques for inductive and capacitive loads 88−63554
switching circuit parameter optimisation for thyristor turn-off in electric drive power amplifiers *(Russian)* 85−17163
switching power amplifier with amplitude modulation 87−31729
switching-mode tuned amplifiers, single-ended 85−54704
switching-mode type, generalised conditions for 100% efficiency and nonzero output power 87−525
Tandberg 3018 preamplifier and TPA 3016 A power amplifier, review *(German)* 88−41907
TDA 2030 IC AF power amp. and cct. appl. 85−14514
TDA 7250 stereo audio driver: quiescent current control 'on chip' *(German)* 88−70560
TECMOS linear power amplifier with 240 W ppe *(Spanish)* 87−65886
temperature controlled predistortion circuits for 64QAM microwave power amplifiers 86−8023
Ten-Tec Titan, legal limit power amp. 86−46573
tetrode amplifiers, power supply and control system design 88−24981
thermal stabilizer, design 85−592
Thomson-CSF TTL-CMOS compatible power driver amplifiers *(German)* 86−46583
Thomson-LGT transistorised TV transmitters, developments 88−35664
thyristor power amplifier, automatic system for holding pinch in equilibriumposition in Tokamak 86−57628
thyristor switching device in a Class E tuned power amplifier 88−6670
Toshiba VHF and UHF all solid state TV transmitter, technologies 88−35663
transconductance IC amplifier for servomechanism appls. 88−70554
transimpedance input stage for current amplifiers, cct. design for IC implementation 85−22675
transistor, actual and potential output powers 86−27087
transistor amplifier with protection devices, output power 87−52395
transistor power amplifier in a wire broadcasting system 87−59190
transistor power amplifiers, stability 88−50047
transistor pulse power amplifier 85−6187
transmitters using power amplifiers 85−31165
transponder for mobile satellite service, development 86−41270
travelling-wave power amplifier, capacitively-coupled, 2-8 GHz, MMIC design 85−23123
tuned single-sideband tube amplifiers, parasitic phase modulation anal. 87−59188

power amplifiers continued
TWM-4 AF power amplifier ICs, microprocessor controlled tester *(Polish)* 86−44115
two-dimensional distributed microwave power amplifier, no increase in cct. load 87−52849
TWT amplifier lineariser, GaAs dual-gate MESFETs 85−17184

UHF push-pull amplifiers, high-power pulsed type, design considerations 88−578
UHF solid-state, TV transmitter, design 88−35660
UHF spurious-free operation 86−34585
ULN-3750 family of power op. amps. simplify drive circuits 86−750
ultrahigh efficiency servo amplifier, power MOSFET device appls. 85−33698
ultrawideband transistor power amplifiers 87−65876
US imaging, RF power amplifier and coupling ccts. design 87−42278
USW transmitter, transistorised 5 kW, with high degree of operating reliability *(German)* 86−43969
VD 490 UHF power amplifier for 400 family radio equipment 88−35359
vertical deflection booster with automatic raster sizecompensation 86−11264
VHF, TV transmitter, all-solid-state design, 50 kW 87−3281
VHF 4 kW amplifier subsystem design for FM broadcast transmitter appl. 86−52704
VHF power amplifiers, broadband, push-pull 300 W config. 88−18944
VHF power amplifiers with broadband input circuitry 85−599
VHF wideband power amplifiers, undesirable oscillations reduction 86−34572
VHF-FM radio broadcast transmitter amplifiers with power MOSFETs, design and performance 86−62463
VMOS FET power amp. cct. 86−67055
VZQ-6900L1 single TWT amplifier boosts 18 to 40 GHz 87−52406
wattmeter and watthour meter testing by continuous and sampled data feedback current amplifier 85−65001
waveguide type power combining amplifiers, design, equiv. ccts. and characts. *(Japanese)* 85−61468
wideband, with distributed gain along connecting lines 85−22678
wideband klystron amp. for digital satellite communications 86−21041
wideband low distortion microwave PLL power amplifiers for analog and digital communications 87−532
wideband microwave power amplifiers using electron semiconductor tubes, limiting frequency bands 88−18951
wideband power amplifier, LF cut-off reduction 87−52397
wideband power amplifier with high controllablelinearity, using bipolar and MOS transistors 86−57682
wideband power-divider/combiner for the 2 m and 70 cm bands 88−44073
wideband RF amplifier unit, 300 W, design and construction 85−33674
wideband RF power amplifier, 300 W, design using FET technology 88−32031
X-band high performance monolithic power amplifier using aunique ion implantation process 86−67498
X-band high performance monolithic power amplifier using all RIE etch process 88−19407
X-band monolithic variable gain amplifier 88−63970
X-band single-ended monolithic amplifier using FETs, design and layout sensitivity testing 86−35114
X-band variable power amplifier using dual-gate FET, design and performance 86−14521
X-band variable-gain amplifiers , design for 16 W pulsed solid-state transmitter appl. 88−71064
ZT-P fusion device, 52 MW equilib. amplifier system, design, construction and test results 88−69666
AlGaAs laser diode array travelling-wave amplifier, high peak power, gateable picosec. optical pulses 87−12446
AlGaAs-GaAs HBTs for microwave power amplifier appls. 88−19417
Fe powder cores for RF power appls. 88−1877
GaAs 86−67504
GaAs, 1 W DC to 4 GHz MMIC travelling wave amplifier 86−41351
GaAs 100 W broadband X-band power amplifiers/combiner using IMPATT diodes and FETs 87−45294
GaAs 2-18.5 GHz MMIC distributed amplifier 86−67503
GaAs 3-7 GHz 1/2 W MMIC low-cost amplifier 86−67499
GaAs C-band 100 W FET amplifier for digital radio 88−1015
GaAs FET 1.6 GHz linear power amplifier for ship earth stations 86−27618
GaAs FET 2 to 10 GHz 1 W TWT replacement amplifier, serrodyne techniques 85−17851
GaAs FET 5-GHz 20-W amplifier for MLS 87−6131
GaAs FET C-band 10 W power amplifier for satellite down-link communication systems 85−6543
GaAs FET X-band high-efficiency 5-watt power amplifier with harmonic tuning , design/characts. 88−71106
GaAs FET X-band power-amplifier design 87−73340
GaAs FET amplifier, AM-to-PM conversion *(Japanese)* 87−66565
GaAs FET amplifier module, S-band, high pulsed power 85−6530
GaAs FET based 40-W broadband class-A amplifier 86−53068
GaAs FET distributed power amplifier design, large-signal criteria 86−8460
GaAs FET driver amplifier, 20 GHz, lumped-element wideband design, communication satellite appl. 85−40250
GaAs FET high power distributed amplifier using MBE synthesizedmaterial 86−27627
GaAs FET microwave amplifier for U6 GHz 16 QAM radio system 87−34420
GaAs FET microwave power amplifier modules for 14-GHz band 86−14508
GaAs FET microwave power amplifiers, thermal design considerations 86−53047
GaAs FET power amplifier, 10 W, 8 GHz, digital microwave appls. 86−41347
GaAs FET power amplifier, 4 GHz, quasi-monolithic implementation for C-band communication satellite appls. 88−71105
GaAs FET power amplifier, Ku-band, 2 W output power 86−27625

power amplifiers continued
GaAs FET power amplifier design, 64 QAM digital radio system appl. 86−27608
GaAs FET power amplifier for 6 GHz SSB radio 85−40255
GaAs FET power amplifier for 64 QAM digital radio transmitter, design 88−1014
GaAs FET power amplifier for 64 QAM digital radio transmitter, design and charactn. 88−25508
GaAs FET power amplifier for microwave digital radio 85−22668
GaAs FET, power amplifier, nonlinear model 86−8499
GaAs FET power amplifiers, C-band design for communication satellite transponders 85−40248
GaAs FET power amplifiers, X-band, class-B operation, design and characts. 87−17356
GaAs FET power amplifiers for multi-level QAM digital radio system, TWT substitutes 88−1012
GaAs FET power module with GaAs matching ccts., design for SHF operation 85−17868
GaAs FET replaces TWT amplifiers 85−584
GaAs FET solid state high power amplifer (32 W) development program (U) 87−37567
GaAs K_a-band monolithic power FET amplifier 87−73711
GaAs Ka-band monolithic FET power amplifier modules 88−63972
GaAs Ku-band power FET amplifiers use flip-chip FET devices 85−61127
GaAs MBE FET power amplifier module, X-band, 6 W, class AB, high-efficiency design 88−71107
GaAs MESFET power amplifier output cct. anal./design using NFET computer program 86−28338
GaAs MESFET power amplifiers, single-freq. and broadband types, nonlinear design procedures 88−32438
GaAs MESFET power devices with very high performance, design 88−12614
GaAs MESFET travelling-wave amplifiers, overview 85−55143
GaAs MM-wave monolithic power FET amplifiers 87−32087
GaAs MMIC FET amplifier, K-band power modules, design; fabrication and performance 88−19416
GaAs MMIC FET power amplifiers, 1 W, 2-8 GHz, distrib., feedback and relative designs comparison 85−45246
GaAs MMIC, Ka-band, 1 W power, high gain, design and fabrication using Be coimplantation 88−71063
GaAs MMIC amplifier, theoretical description 87−32071
GaAs MMIC amplifiers, high-performance types, high-yield production technology 86−27601
GaAs MMIC based power amplifiers, EG8017, dual device config., broad band 6-18 GHz operation 87−73699
GaAs MMIC design 88−56947
GaAs MMIC power FET amplifiers, Ka-band, design and performance 87−59893
GaAs MMIC power FET amplifiers at K-band 88−32453
GaAs MMIC power amplifier, 2-20 GHz, design, fabrication and performance 87−59879
GaAs MMIC power amplifiers, CAD and cct. simulation techniques 85−44914
GaAs MMIC, producibility 87−993
GaAs MMIC push-pull power amplifier, X-band, 4.5 W, design and characts. 86−35115
GaAs MMIC wideband variable gain amplifiers 88−63973
GaAs MMICs, amplifiers and phase shifter, L-band radar transceiver appl. 86−35116
GaAs RF power amplifiers for digital radio systems 88−1016
GaAs *V*-band monolithic power MESFET amplifiers ; design, fabrication and characts. 88−71062
GaAs X-band monolithic power amplifiers *(Chinese)* 87−66558
GaAs microwave internally matched power FETs 87−6133
GaAs microwave monolithic amplifiers *(French)* 88−7068
GaAs microwave power FETs and MMICs, refractory self-aligned gate technology 88−50362
GaAs microwave power amplifier module for EW appls. 87−32088
GaAs miniature FET power amplifiers, 30-way radial power combiner design 87−6059
GaAs monolithic 6-18 GHz medium power amplifier 85−1056
GaAs monolithic dual-gate FET variable power amplifier module 86−27623
GaAs monolithic power amplifiers, developments for microwave freq. appls. 86−35113
GaAs nonlinear power FET amplifiers, optimum design 87−73716
GaAs power FET K- and Ka-band high efficiency amplifier modules 87−73777
GaAs power FETs and MIC amplifiers, reliability, high-temp. life testing 85−6531
GaAs power MESFET amplifiers at K- and Ka-bands, design and performance 88−63919
GaAs quasimicrowave FET power amplifier 87−45228
GaAs solid-state amplifier with feedforward correction for linear SSB appl. 87−23960
GaAs uniplanar MMICs for full-MMIC receiver 88−63960
InGaAsP 1.5 μm optical amplifiers, gain measurements 86−11066
InP MM-wave amplifiers and CW oscillators, design and performance 85 50037
Si MMIC amplifiers push 1 W at 1 GHz 87−52846
Si MMIC wideband power amplifiers, design and performance 87−37575

230 kV extruded cross-linked polyethylene cable joint and terminal moulding 85−53347

power cables continued
230 kV pipe-type underground cable system, installed in substation, thermal performance of splices and terminals 85−48592
230-kV isolated-phase gas-insulated underground cable, ampacity, sensitivity anal. 85−53336
245 kV XLPE cable installation at Stockholm Energi 87−30190
250 kV DC Skagerrak submarine cables, paper insulated mass-impregnated, develop., perform. 88−54998
270 kV DC oil-filled cable for UK-France power system interconnection, design and testing 85−21210
275 kV internally cooled XLPE cable, development and testing 85−48591
275 kV internally water-cooled XLPE cable with stainless steel coolant tube, field test *(Japanese)* 88−68951
275 kV XLPE cable at Bokuto substation, Al sheath and fire-proof PVC jacket *(Japanese)* 87−71696
275 kV XLPE cable system, internally water-cooled, design and initial performance *(Japanese)* 85−43605
275 kV XLPE cables and extrusion type molded joint development 85−59731
275 kV XLPE power cable, laminated waterproof layer development for avoidance of water penetration *(Japanese)* 85−43606
345 kV oil-paper insulated cable systems, ampacity sensitivity 88−5356
345 kV paper-polypropylene-paper insulated power cables design and manufacture 88−75179
380 kV buried cable installation with indirect forced cooling *(German)* 86−6370
380 kV cable link bridging Vienna South Railway tracks *(German)* 86−6371
380 kV cable protection, signal transmission by optical waveguide *(German)* 86−6410
380 V distribution lines, protection criteria *(Russian)* 86−25588
400 kV LDPE insulated cable develop., France *(French)* 88−42858
400 kV motor cable, low load region limitation *(German)* 88−43135
400 kV naturally cooled underground cables, temperature modelling and data telemetering 87−4406
400 kV submarine cable system laying across Messina Straits, Italy 86−51076
400 kV underground power cables, thermal anal. of air-filled trough 88−68944
415 V motor feeder, voltage drop considerations on cable sizing 88−55020
500 kV cable development in China 86−70675
500 kV laminated paper insulated self-contained oil-filled cable, develop. 88−55003
500 kV lines in Northeast Power System in China, relay protection 85−64965
500 kV oil-filled cable, laminated paper insulated for transmission line interconnection *(Japanese)* 87−71678
500 kV oil-filled underground power cable, laminated paper insulation *(Japanese)* 86−65718
500 kV power cables, insulator suspension assembly study 88−68956
500 kV XLPE cable, design and development 85−32170
500 kV XLPE cables, R&D 87−30211
500 kV XLPE power cable design and manufacture 87−21938
525 kV AC submarine cable link from mainland Canada to Vancouver Island 86−51020
525 kV submarine power cable link for VancouverIsland 86−32763
1050 kV pilot plant for power transmission, construction, testing 87−78065
2000 MW cross channel link between England and France *(Danish)* 87−4399
2000 MW France-UK HVDC link, submarine cables, cable laying and design features *(French, English)* 86−18721
2000 MW HVDC cross-channel link, land and submarine cable protection *(French, English)* 86−18725
2001 V to 35 kV type MV cable, materials and makeup 87−64163
'JICABLE 84', international conference on polymer-insulated cables, overview *(German)* 85−32162
absorption technique for impregnation control of power cable paper insulation *(Russian)* 87−30194
AC and DC power transmission, IEE conf., London, England (Sept 1985) 86−12500
AC power transmission using self-contained oil-filled 1100 kV cables, tests and design 86−51025
AC test methods used for 11 kV extruded cable in CEGB Power Stations 85−32256
ACSR overhead suspended cables, elec. operating props. *(Slovak)* 88−30397
air cycle cooling system for HPOF cables prototype testing 85−48589
airport cables using special materials *(French, German)* 87−4402
airtight bushings for power cables, design for stability against seismic action *(Russian)* 87−64165
Alcatel Outside Plant Group activities 88−9369
ampacity calc. of power cables in tray with raised covers 86−65712
ampacity calculations, computer tools appl. 88−23517
ampacity eval. of cables in concrete ducts using finite elements, computer programs 88−23509
ampacity of wrapped cables 88−55001
arc-reflection method locates cable faults 88−5391
armored power cables, corrosion study 85−32174
armoured cable tension fatigue model for failure prediction 88−50453
asset replacement in England and Wales distrib. system 87−50783
atomic bomb explosions, cable protection from NEMP *(German)* 86−22714
bonding cable continuity monitoring using stray currents, arc energy reduction 87−35653
buried cable pin-point location of faults *(German)* 85−53365
buried power cable systems, frequency dependence of parameters, numerical survey 85−59740
buried power cables, conservative current rating procedure for cyclic loads 86−39166
buried power cables thermal fields calc. by charge simulation method *(German)* 85−59727
buried XLPE insulated cable rating, two-layer soil model *(Dutch)* 87−9169
busbar cables, dynamic load meas., short circuit current data effect *(German)* 86−32756
bushings, 132 kV, diagnostic monitoring 88−75213
bushings connecting power transmission lines to 500 kV substation, mechanical load test model *(Japanese)* 86−12480
cable, splice and termination failure analysis, fault location 88−23495
cable and conductor sealing when threaded through concrete walls *(German)* 88−10862
cable clamps, international testing stipulations *(German)* 85−38535
power cables continued
cable connector, premoulded with cable testing facilities, for improved safety *(German)* 85−27083
cable equipment production, collaboration of USSR, East Germany and Hungary 85−43614
cable installation, quality assurance *(German)* 87−4396
cable joint for extruded dielectric cable rated 5000 to 46000 V, IEEE standard 87−21964
cable joint for laminated dielectric cable rated 2500 to 500000 V, IEEE standard 87−21964
cable systems, voltage tests *(German)* 87−4397
cable trench backfill additive field tests for heat transfer and moisture retention 86−12448
cable trench thermal stabilisation for improved load capacity *(German)* 88−54996
cables fitted to warships, fire hazards reduction 88−21893
cables for low-temperature applications in oil exploration 88−53106
cables thermal stability tests at voltages up to 1 kV *(Russian)* 87−42471
cables with solid insulation, testing methods 88−23496
cabling and wiring standards *(German)* 87−6181
CAD and protection of cable installations *(German)* 86−12435
capacitor switching transient voltages, insulation performance of 15 and 25 kV cables 87−30213
capital city distribution system characteristics and topology *(Spanish)* 87−9156
cathodic corrosion protection of underground power cables, influencing possibilities *(German)* 87−64167
cellulose paper-polypropylene-paper insulating tape for URD cables 87−30197
chlorosulfonated polyethylene for low fire hazard offshore cables 88−55026
chlorosulfonated polyethylene/ethylene propylene terpolymer blends for cable insulation 88−55025
CIM, response of cable manufacturers 87−30198
coaxial cables transfer impedance meas. under impulse conditions *(French)* 87−57645
coaxial gas-insulated cable, V-t characts., influence of insulating spacer 88−54999
coaxial gas-insulated cable, V-t characts., insulating spacer influence, EHV bus tests 88−55000
cold shrink PST terminations for 11 kV XLPE power cables 88−36869
colliery cable networks, fault location method *(Russian)* 88−18278
colloquium on discharge detection in cables, London, England, (1983) 85−27959
combined power and communication cables for later insertion of optical fibres 86−49437
composite insulating material developments 87−25709
composite power and fibre optic cables, design and appl. 88−9609
composite power cable with optical fibres, data transmission *(German)* 85−31039
composition *(German)* 87−4389
compressed gas insulated cables in still air, sunlight effects on current ratings *(French, English)* 86−70663
computer aided temp. distribution calc. of power cable trench backfill and soil 85−59737
computer-aided fault analysis using pulse reflectometer *(German)* 88−68946
computer-aided layout *(German)* 85−4638
conductive-rubber shielded LV cables for mine shuttle car appls. 87−42478
conductor bundle stress anal. using computerised FEM 88−61933
conductor connection system using new soldering technique 87−15350
conductor stranding optimisation for overhead cable loss improvements 88−17176
conductors and cables for agroindustrial complex 85−64917
conduit systems for buildings *(German)* 87−78176
connector system for medium power cables *(German)* 87−9204
contactor control circuits, cable sizes *(Italian)* 87−30870
conversion to DC supplies of transporting rail bogies *(Russian)* 88−62705
cooled current leads of cryogenic electrical devices, thermal and hydraulic design 87−78149
cooling of power cables and connectors, capillary heat pipes appl. *(Czech)* 88−17165
Copenhagen, fibre optic packet-switched network for power cable and district heating supervision 88−73966
cordsets for biomedical electronics, hazard-free, factors to consider when specifying 88−1072
corroded power neutrals in power cables, NESC 88−55011
corrosion protection layers for power cables, research *(Japanese)* 85−59743
couplings, heat-field calcs. using finite-element method 87−71689
cross bonded single core Al sheathed oil-field cables, zero-phase and positive phase sequence impedances meas. and calcs. 86−25595
cross-linked polyethylene cable development for underground transmission 86−51006
cross-linked polyethylene high voltage cable insulation, dielectric ageing study 87−18432
cross-talk attenuation and HF parameter meas. on 220 kV transmission time *(Russian)* 87−4421
crossing regions hot spot determ. 87−15310
crosslinked polyethylene insulated cables, thermal history estimation, differential scanning calorimetry *(Japanese)* 86−6373
cryogenic, polyethylene films-liquid N_2 composite insulation breakdown by partial discharge 87−6942
cryogenic cables, high field dielectric loss behaviour of insulating polyethylene films 87−6943
current carrying capacity of buried power cables, influence of short pipe passages *(Polish)* 85−21207
current carrying capacity of cables with solid insulation 88−36849
current injection for conductance testing of power cables 88−61940
current rating of cables buried in soil subject to moisture migration, model *(French, English)* 86−51002
current ratings for PVC insulated power cables in multilayer groups 86−56438
data communications over mains cables *(German)* 85−13895
DC cable fire at Bayernwerk Schwandorf power plant, cause, course, consequences *(German)* 88−23740
DC cables, oil-impregnated paper insulation, transients investig. *(Russian)* 85−64911
DC electric car track stays on poles for power cables *(Japanese)* 87−51525
DC leakage current measurement device, with optical fibre, for operational power cables insulation diagnosis *(Japanese)* 85−37701

power cables continued
DC power submarine cables, life testing of LDPE insulation under high pressure 87−15304
design and installation in nuclear and nonnuclear power stations, IEEE standard 87−21965
design optimisation of cables for distribution networks 86−25602
deteriorated XLPE cables testing, diagnostic device develop. *(Japanese)* 88−30373
development prospects up to year 2000 in Russia 87−42474
diagnostic method for power cable insulation, oil-filled and XLPE cables 87−35640
dielectric disruption *(Japanese)* 86−65707
dielectric materials, conf., Xian, China (June 1985) 86−66537
dielectric power cables, laminated and shielded extruded, live end sealing 88−17185
dielectric props., semiconductor shielding influence *(Slovak)* 85−43629
digital electronic fault locator for HV and LV cables 87−64164
digital weighbelts boost cable plant efficiency 87−30205
discharge inception voltages due to voids 88−30379
discontinuity overvoltage build-up, Bewley's lattice method development 87−50751
dissimilar copper cables, compartmentalised splice case 88−30404
distribution cable coordination with jointing, IEEE standard 404 revision effects 88−23508
distribution cable failure due to electrochemical treeing, service life improvement 85−38508
distribution cable replacement, economic life estimation 85−21214
distribution cables, armoured cables with thermosetting insulation, current rating standards 86−12446
distribution cables, current rating standards, minimum spacing for cables in air 86−12443
distribution cables, current rating standards for PVC insulated cables 86−12445
distribution cables and accessories breakdown, capacitor-switching surge effects on insulation aging 87−71693
distribution cables with XLPE insulation 87−4383
distribution network asset replacement considerations 87−57617
distribution network for steel mill, pulling cable without intermediate splices 85−53309
distribution network practices in large cities, Stuttgart, West Berlin, Tokyo *(Spanish)* 86−50986
distribution networks, oil-filled polythene insulated cables *(Polish)* 86−25601
double-cross fibre reinforced plastic armoured cable development *(Japanese)* 86−6364
Drakapreen crane cable design by personal computer *(Dutch)* 86−18825
dry terminations for outdoor installation 85−38532
duct power transmission, future prospects *(Korean)* 88−48536
earthed buried cable, potentials and currents, exposed to EM effects of power line under fault conditions 86−15940
economic cross-section determ. from normalised current densities *(Russian)* 86−18829
economic current density, forced cooling of of conductors *(Russian)* 87−4386
eddy-current loss eval. for pipe type, power cables 85−59733
EHV power systems, 380 kV Simmering power station and Kendlerstrasse substation interconnection *(German)* 85−21123
electric cable and conductor standardisation proposal from installation engineers *(Hungarian)* 88−18420
electric field stress calculations using charge simulation technique for three core cables 85−27069
electric heat tracing control and monitoring using addressable power line carrier system 87−35652
electric potentials transferred by cables outside substations *(Polish)* 87−4400
electric power transmission systems and equipment, performance improvements in maintenance 87−42425
electric stress calc. by charge simulation modelling of three-core belted cables 85−59729
Electric Supply Authority Engineers' Institute 56th annual conference, New Plymouth, New Zealand (Sept. 1985) 86−52108
electric/magnetic fields health risks *(German)* 85−43446
electrical installation and services in Heathrow's Terminal 4 87−15263
electrical power systems, types of cables *(German)* 88−36857
electrical stress relief, theory 87−15269
electrical submergible pump cables on ethylene-propylene dimethyl 88−17167
electrical transmission lines in space, thermal anal. 88−55014
electrical-insulation paper, optical techniques for QC 88−30376
Electricity distribution, conf., Brighton, England (May, 1985) 85−60581
electromagnetic fields in a cable with twisted conductors *(Russian)* 87−78133
electromagnetic transient characts. analysis using Poynting theorem based model 85−27076
EM induction effects of power and control cables in pulp and paper mills 86−68801
EM noise from conically shaped electrode, characts. 86−3567
EM wave propagation characteristics in underground power cable 85−15614
epoxy resin, glass reinforced, for cable ducts, advantages over other materials 85−9523
ethylene polypropylene rubber insulated cables, DC and impulse breakdown strength props. 87−18431
ethylene-propylene-rubber extruded cables, short and long-term performance study 86−70678
European power system electricity exchange, changes in load flow *(German)* 88−61834
excavation-free cable and pipe laying, bore theory *(German)* 87−78136
excavator flexible power cable insulation damage, accumulation and revelation *(Russian)* 87−22853
explosion safety precautions for electrical installations *(German)* 87−91
external heat resistance calc. for cables in earth *(Slovak)* 86−6376
external thermal resistance of power cables in duct banks, finite element anal. 85−59734
extruded cable prospects in Dutch 10 kV networks *(Dutch)* 87−9175
extruded cable surface flaw inspection using scattered light based technique 85−58641
extruded dielectric cable processing techniques 86−25604
extruded dielectric cables, joint and termination failure anal. 85−27073
extruded dielectric cables, shield insulation overvoltages 86−61174
power cables continued
extruded dielectric cables operating at 130°C and above, emergency overload characts. 85−27072
extruded dielectric power cables, insulation dielectric breakdown strength improvement studies 85−59732
extruded dielectric power cables, metallic shield optimisation under fault conditions 85−27068
extruded HV cables, dielectric screens 87−15302
extruded medium voltage cable materials and practices in the USA, Europe and Japan, survey 87−30208
extruded power cables, DC testing 86−65711
extruded power distribution cable materials quality improvement trends 86−56437
extruded solid dielec. insulated power cables 86−70683
extruded synthetic cable applicability in Dutch 10-30 kV networks *(Dutch)* 87−9173
extrusion lines anal. using microcomputers 87−71688
factory-moulded joints for 69-138 kV solid-dielectric cables 85−64935
fault location, equipment for burning through insulation *(Russian)* 85−21208
fault location, light arc impact procedure *(German)* 86−25599
fault location instruments *(Czech)* 87−71686
fault location procedure of Colorado Public Service Company 85−59830
fault location using 110 kV DC voltage generator based mobile system *(German)* 85−15686
fault location using Biccotest method for HV cables *(Danish)* 85−27066
faults in parallel power cables, impedance considerations 86−61146
faults survey, Germany and USA results comparison *(German)* 87−4392
fibre optic cable with power delivery bonus 87−20567
fibre optic cables for power cable monitoring and heat system control appls. *(Danish)* 88−28313
fibre optic/power cable windings, laying and installation experiences 88−73922
FIECAG program for power cable ampacity calc. 87−50811
FIR laser for inspection of HV cable insulation 86−42663
fire behavior of insulating materials, characts. and prospects 86−68094
fire in control room of industrial plant simulation, full-scale fire tests 86−51028
fire protected grouting sacks for cable grouting *(German)* 88−42853
fire resistance evaluation criteria 88−36855
fire resistance of electric cables for railway installations *(French)* 85−16731
fire resistant, Firox mica paper insulation 86−65721
fire resistant and flame retardant cables for buildings and tunnels 88−55015
fire resistant cables, appl. of mica tapes 88−55016
fire resistant cables, performance testing 88−10859
fire resistive cables, halogen-free, splicing system based on room-temperature curing two-component resin 85−9507
fire retardant tapes for cable protection 86−57155
fire-resistant cables, history and status 86−65719
fire-retardant cables for nuclear power plants, development 86−70691
fireproofing, effects on current loading capacity *(Slovak)* 85−21209
flame propagation resistance of power station cables 87−15287
flame retardant, low smoke, halogen free cable insulation for ships 87−21941
flame retardant, revolutionary manufacturing technology 85−24036
flame retardant irradiated XLPE wire, super heat resistant *(Japanese)* 87−30239
flame retardant low smoke cables, flammability and combustion tests 88−55028
flame retardant nonhalogen wires and cables, develop. 86−56435
flame retardant paint for electrical cables and installations 88−55022
flexible rubber cables, elec. and mechanical characts., mining and hoist equipment appls. 88−55767
forced cooled underground electric transmission systems, turbulent convective heat transfer 86−18831
forced-cooled cable thermal transient and cyclic load calc. *(French, English)* 86−51003
forced-cooled oil-filled cable continuous rating calc. *(French, English)* 87−78131
forked cable connections, naturally cooled cables switched to forced cooled high power cable *(German)* 87−42476
forked cable connectors for bulk power transmission over greater distances *(German)* 87−15333
French 400 kV LDPE insulated cable installations 87−30193
frequency invertor for petroleum pipeline pumps, harmonic reduction in power lines 86−40340
friction between cable and conduit surfaces, measurement under varying loads 85−32169
gas insulated substations and cable systems for reliable supply of large cities 88−69653
gas insulated three-phase cables, anal. of power losses 85−32168
gas-filled cable lines, 220 and 500 kV, lightning protection using nonlinear surge divertors *(Russian)* 87−78201
gas-insulated cables, review 86−25593
glands for 0.6/1 kV cable termination 85−28750
glands in earthing and protection against EMI 87−30229
ground fault damage to cable shields in petrochemical plant distribution systems 86−39198
ground fault tests for damage determ. to cable shields 87−30251
halogen-free, design and construction for improved fire performance 85−32173
halogen-free electrical installation cable characteristics and types *(German)* 87−78139
Hawaiian Deep Water Cable Project, system studies 86−12322
Hawaiian deep-water power cable failure potential due to erosion-corrosion 88−48583
hazard resistant, test requirements, standards *(Italian)* 87−35637
hazardous area cable system management *(Chinese)* 87−71683
heat shrink jointing of migrating oil-paper and polymeric cables 85−27090
heat shrinkable transition joint between HV paper and XLPE insulated cables 88−55017
heat shrinkable trifurcating transition joint for 13 kV URD, improved reliability 86−32807
heat trace control using PLCs 88−23559
heat treatment in microwave electromagnetic field 85−48594
heat-shrinkable terminations for 66 kV polymeric cables 87−15358
heat-shrinkable terminations for paper and polymeric cables up to 24 kV 87−15352
heavy current regulated current leads for superconducting magnets, economic operation 87−64170

power cables continued
heavy-current, transient heating calculations and measurements comparison *(Hungarian)* 85−4634
high conductivity aluminium alloys in conduits *(Croatian)* 88−36860
high pressure oil filled cables, designer's handbook formulation 85−19
high pressure oil filled reduced wall 138 kV power cables and joints to replace 69 kV lines 87−30201
high temperature superconductors appl. 88−26699
high voltage XLPE power cables with sector-shapedcores 86−32764
high-pressure oil-filled cable AC/DC resistance ratio calc. 85−59746
high-pressure oil-filled cable rating using computer 88−75183
high-voltage cable inspection using far-IR laser scanner 85−38514
hot-line XLPE cables with water trees, diagnostic method 87−35642
HT distrib. line strand state meas. using SCC detector *(Japanese)* 87−50884

HV cables with extruded insulation, laboratory thermal and ageing tests *(French, German)* 87−4403
HV cables with polyethelene insulation *(Croatian)* 88−68955
HV co-axial cable in pulsed power system, polyethylene insulated, breakdown properties *(Japanese)* 87−9167
HV conductor systems, electric field calc. using microcomputers 88−61923
HV DC cables, LDPE and XLPE behaviour, press. wave propagation method *(French)* 88−42861
HV extruded cables with SF_6 immersed sealing ends, enclosed substations *(Dutch)* 88−36852
HV insulation, relationship between operating life and elec. strength *(Russian)* 85−64931
HV lines and cables grounding networks, EM impact in urban areas 86−51026
HV lines of Swiss power supply grid, corona discharge effects *(German)* 88−10860
HV network cost sensitivity to system fault levels 88−36819
HV oil-filled cable pressure monitoring and leak location system 85−59722
HV oil-filled cables, electric field strengths 86−44978
HV oil-filled cables, leak detection and location by microprocessor monitoring system 85−32166
HV oil-filled underground cables, computer aided anal. of thermomechanical bending 88−10865
HV power cable end coggings, for AC and DC cables *(German)* 85−27084
HV power cable pulse forming line with 800 kV charge voltage 87−50818
HV power cables, construction and installation, paper and XLPE insulated 87−42468
HV power cables, insulation, ageing and testing *(German)* 85−32164
HV power cables, insulation, design, laying, cooling, testing *(French)* 85−32163
HV power cables, insulation, elec. field meas. by press. wave propagation method *(French)* 88−42860
HV power cables in Intercity Experimental train *(German)* 86−45758
HV power line, microcomputer connection by optical fibre link, voltage and current meas. 87−78145
HV XLPE cable manufacture with continuous catenary vulcanising tube furnace 87−50820
HV XLPE cables, materials development 85−64918
HV XLPE insulated cables, Norwegian experience 86−32765
HVDC cable for Gotland island 86−12450
HVDC cables and accessories, steady state DC potential distrib. calc. with computer program 87−21940
HVDC oil-impregnated cellulose-paper cable design limits 86−12447
HVDC submarine power link between Britain and France 86−56339
HVDC systems, positive corona pulse repetition rate study, wind and bundling effects 88−23438
HVDC transmission cables design procedure using iterative methods 88−75144
hydrocarbon-halogenated elastomer blend for power cable insulation 88−55027
hydroelectric power station jumper cable overvoltage protection using nonlinear voltage limiters *(Russian)* 88−11116
impedance calc. based on subdivision of conductors 87−35645
impedance selection for compliance with IEE Wiring Regulations (15th Edition) 85−64899
impregnated paper insulated cables under AC stresses, PD spectra anal. 88−68959
impregnated paper insulation, thermal stability and conflagration conditions *(Russian)* 88−54995
power cables continued
impregnated paper insulation for power cables, ageing study 85−43613
impregnated paper vs. extruded synthetic cable selection *(Dutch)* 85−64916
incombustibility props. using insulation materials *(Russian)* 88−54994
induction coils for meas. cables and cable lines *(Hungarian)* 88−48582
industrial cable distribution systems, cable jointing proof-testing, revision of IEEE 404 standard 87−35677
industrial cables for carrying high-frequency electrical energy 86−44980
industrial facility wiring methods using nonarmored cable, cable sealing 88−12652
industrial plant power supplies, standardisation of 6-10 kV cable cross-sections *(Russian)* 88−31223
industrial plants, supply ccts., power loss reduction *(Russian)* 87−43671
industrial underground cable ampacity computation 86−44986
installation and maintenance, small-scale mechanisation *(Czech)* 88−23502
installation procedures *(German)* 87−4391
installed synthetic cables, direct voltage insulation testing *(German)* 87−78135
insulated power cables, Neher-McGrath calc. of temperature rises and current carrying capacity 86−12437
insulating, semiconducting, and jacketing materials 87−42480
insulating liquids, historical development 87−64169
insulating materials, development from impregnated paper to polymeric materials *(French, English)* 85−15616
insulating materials development *(Korean)* 86−18828
insulating oils, heat effect on quality, assessment by laser beam 87−43303
insulation, high density polyethylene (HDPE), dielectric breakdown strength, comparison with XLPE cables 87−21942
insulation, historical survey 86−44983
insulation, radiation modification using electron acceleration 88−42855
insulation, relevance of discharge measurements 85−32251
insulation, shielded, void detection by Mie scatter power of laser radiation meas. 87−50813
insulation, water treeing as mech. damage phenomenon, theoretical and expt. study 86−68047
insulation accelerated life testing with partial discharge mapping technique 87−15279
insulation and sheathing, current development and future trends 88−42852
insulation defect location by partial discharge meas. *(Japanese)* 86−51007
insulation developments in Japan 87−30200
insulation diagnosis microcomputer controlled system *(Japanese)* 88−55009
insulation diagnosis test methods and equipment *(Japanese)* 87−9202
insulation life tested for URD appls. 88−75160
insulation life testing with partial discharge mapping technique 87−15278
insulation of power cables, power capacitors, generators, motors and power transformers 87−71685
insulation test methods for XLPE and oil filled cables 87−35641
insulations, temp.-dependent thermal resistances consideration *(German)* 85−59728
insulator pollution monitoring, simulated field tests 88−23505
intelligent buildings and cabling for modern offices *(French)* 88−59946
interference prevention, specifications *(German)* 87−21943
internal freon cooling XLPE cable system development *(Japanese)* 86−6372
internal water cooling, expansion potentials and limitations of cable *(German)* 85−21205
irregular wave propagation characteristics in underground transmission cables 88−36858
Island of Martha's Vineyard power supply using submarine cable 85−4642
IXOSIL insulators for plastic insulated 10-170 kV cables *(Hungarian)* 85−21235
JET nuclear fusion plant, gas-insulated HV cable for neutral injector *(German)* 87−35744
JetMole tunneling tool for underground cable replacement 86−32808
jointing, of polymeric to paper insulated type, by heat shrinkable transition joint 85−4657
jointing using heat-shrinkable tubing, cables up to 36 kV 87−15345
Joule losses in electric power feeds, numerical anal. 87−71695
Jupiter-Settlement Point cable across Straits of Florida, voltages rel. to tides 87−47072
laid in special back-fills, effective external thermal resistance calc. method *(French, English)* 85−53341
LDPE cable insulation, gamma irradiation degradation, residual voltage 88−5355
LDPE cable insulation, multistress ageing 88−75190
leaderstreamer propagation in long positive sparks of power cables *(Russian)* 87−64166
life expectancy calc., practical approach 88−5362
lightning induced voltage observations of power distribution lines 86−51097
lightning overvoltage calc. for underground power cables 86−12438
lightning-produced overvoltages in cable ducts, simulation 88−8518
line disturbance monitoring and analysis 87−50887
line disturbance monitoring by Graphic Environmental Monitor Model 4800 86−12518
line-rectification by resonant convertors, input-current shaping 88−30381
linear low-density polyethylene for cable sheath *(Japanese)* 87−30238
Lloyd's of London office block electrical services 87−71656
load capability calc. on desktop computer 87−30199
load capability of cables laid in groups *(Russian)* 86−32767
load capacities calc. *(German)* 87−4390
load capacity calc. accounting for partial soil aridity *(German)* 87−21937
load carrying capacity determ., transient and steady state *(Hungarian)* 86−61145
load control power line communication system, load management testing 87−69872
load facilities including lead-in cables, interior wiring and circuit breakers for offices *(Japanese)* 87−50763
load-bearing cables, working capacity of supporting part 86−44981
localisation of faults on power lines *(Italian)* 86−65710
long HV cable characteristic impedance calc. *(Croatian)* 87−9179
long life tree-retardant insulation for industrial and utility power cables 86−39168
loss reduction in Polish power network, effect of substation number and cable length *(Polish)* 88−5323
low and medium voltage cables in various types of conduit, ampacity ratings 88−61941
low load motor cable, cooling water, dynamic behaviour, computer program *(German)* 88−48859
LV, low power cables in domestic and office appls., fire risk assessment 87−42484

power cables continued
LV cable advantages of XLPE insulation and concentric neutral conductors *(French German)* 87−35648
LV cable dimensioning and total simultaneous capacity calc. for residential buildings *(Croatian)* 85−64889
LV cable jointing, resin-filled and heat-shrink techniques 86−47109
LV cable specification problem solns. 86−47108
LV cables for electrical installations, Australian standards 85−10399
LV conductors in industrial installation *(Italian)* 87−50810
LV distribution systems, choice of conductors *(Polish)* 86−18814
LV network, lightly loaded, anal. *(Italian)* 88−36837
LV network priority variant selection *(Croatian)* 86−12419
LV power cables, selection and elec. characts. 87−64171
LV underground cable ampacity calculations for USA National Electrical Code 86−44985
management systems using raised floors, develop. trends 88−61919
manufacture, effects of automation *(Swedish)* 85−53971
manufacture, insulation conf. New Delhi, India (Oct. 1987) 88−49382
manufacturing of HV extruded power distribution cables, state-of-the-art 87−30210
marine cable laying technology for North Friesian Islands power supply *(German)* 87−35669
mechanical damage prevention for power cables in urban distribution networks *(Russian)* 86−44974
mechanical load-bearing cables, permissible load determination 86−44979
medium and high voltage extruded cables, high potential field testing 88−10863
medium voltage cable design and testing 86−70670
medium voltage cables, sheathing and jointing technology *(German)* 86−39189
medium voltage cables, silane crosslinked type for watertightness 85−59748
medium voltage cables, synthetically insulated, standardisation situation *(German)* 87−4395
medium voltage distribution networks, fault location systems *(Polish)* 86−25574
medium voltage earth cables, load capacity in parallel operation and bundled installation *(German)* 87−35634
medium voltage polymeric cables, jointing techniques 87−15289
medium voltage power cable design in BRD, insulation, testing and fittings *(German)* 85−64913
medium voltage VPE insulated cables, electrical safety of runner fittings *(German)* 86−25598
medium voltage XLPE cables, water trees in service aged and accelerated aged cables 87−15297
medium voltage XLPE insulated cables, cable termination w.r.t. contamination and space requirement 87−15354
microprocessor control of prod. in industry 85−4632
MIND cables, polymeric insulation to prevent water ingress 87−15290
mine electrical equipment reliability 86−26469
mine flexible power cable repairs, resources and methods *(Russian)* 86−26466
mineral insulated cables for conventional wiring systems, earthing, cost cutting 87−78129
MNSK cable, losses occurring in sheath and armor 87−57649
moisture migration mechanism for external thermal resistance assessment 85−64919
moisture resistant cable designs 87−78147
motor power supply cables, adiabatic heating under short circuit conditions *(Italian)* 88−55276
Mulheim-Karlich nuclear power plant, heavy power cable design *(German)* 87−30195
multiconductor cables, factors limiting time domain characterisation 88−72601
multiconductor power cables, admittance- and impedance matrices, application of Poynting's theorem 85−43610
multiconductor power lines subject to distributed impulse sources, transient anal. 87−30207
multicore reeled cable thermal network analysis 88−23507
multigrounded cable shields inductively and conductively coupled to neutral power lines, anal. 87−62808
multilayer composite insulation power cable, voltage relationship for student design project 85−59739
multiple cable connections, protection from single-phase earth faults *(Russian)* 86−18876
MV, synthetically insulated, standardisation, for public networks *(German)* 85−27063
MV, VPE-insulated, mechanical resistance of outer jacket *(German)* 85−21236
MV and HV cable terminal connections for field control *(German)* 88−30374
MV cable in conduit URD systems 88−17119
MV cable load capacities according to VDE Specification 0298, PC program *(German)* 87−50807
MV cables, shield and circulating current losses, ampacities, concentric neutral conductor design 88−55012
MV cables and switching equipment, new technology for adverse environmental conditions *(German)* 85−21206
MV cables in parallel operation, optimisation methods *(German)* 88−68943
MV distribution cables, prefabricated transition joints and insulation 87−50839
MV distribution networks, fault localisation methods for power cables 88−61994
MV network, partial discharge location in cable *(German)* 88−42891
MV power cable DC overpotential tests to assure reliability 87−78128
MV power cables, testing and earthing method for jointed sleeve assemblies *(German)* 88−69012
MV shielded power cables, HV testing 88−75186
MV URD cable joints using thermoelastomeric tubing, design and testing 87−50841
MV XLPE insulated cables, terminations, premoulded, Termini type 88−55056
Namgne method for derating cables in trays traversing firestops 88−68948
naturally-cooled, transient heating calcs., partial overloading capacities determ. *(German)* 85−21204
new materials for electrotechnology 87−57655
noise, real-time adaptive cancelling, microprocessor system *(Japanese)* 86−70666
noise suppression methods for partial discharge meas. 88−75189
noncooled lead-in wires for cryoelectric devices, heat conduction 88−42856
nonhalogen flame retardant cable, fire characts. 86−70673

power cables continued
nonhalogenous flame-resistant cables, flammability and smoke generation *(Japanese)* 87−71697
nuclear power stations, cable insulation, fire resistance assessment 87−35728
nylon-jacketed termite resistant power cables, struct., field tests and appls. 85−59745
offshore cables, 6 kV, fireproof and fire resistant *(Danish)* 87−72649
offshore electrical cables, quality assurance *(Danish)* 87−72651
offshore facilities, cable technology 86−32766
offshore installations, cables, design and testing *(Danish)* 87−72648
offshore use, recent developments 85−27062
oil and gas exploration, submerged electrical system reliability *(Russian)* 87−4387
oil filled 150 kV submarine cable link between Ionian Islands and Greek mainland 87−15356
oil filled cables, modern design and oil leakage prevention upto 180 kV 87−15306
oil filled HV cables, dielectric strength of insulation under overvoltages 87−57650
oil production installations power cables, characts., influence of technological and operational factors *(Russian)* 85−59724
oil production power cable insulation technological quality prediction *(Russian)* 86−33890
oil quantity monitoring and alarm system *(Japanese)* 86−51010
oil rig submersible pumps, dielectric properties of power supply cable insulation, life testing 87−35639
oil-filled 150 kV submarine cable laying for Ionian Islands, Greece *(Japanese)* 87−30236
oil-filled cables, dielectric loss effects on insulation thermal ageing 85−48596
oil-filled self contained power cables for UHV DC transmission, design 86−51023
oil-filled underground cable design for AC and DC EHV systems 86−12449
oil-impregnated paper insulation in HVDC transmission systems, elec. characts. study 86−68124
oil-paper power cables elec. characts. of synthetic dielectric oils 87−15299
oil-paper power cables with synthetic oil, performance and elec. characts. 87−30215
operating reliability, type testing and cable and fittings exam *(German)* 88−17164
optical cables in power utility applications 88−73973
optical fibre appls. in power distributors *(Danish)* 88−35334
optical fibre cable for mobile application in brown coal mining areas 88−28917
optical fibre cables for power systems, Cabloptic SA experience *(German French)* 85−59741
optical fibre composite overhead ground wire, insulation characts. *(Japanese)* 86−64965
optical fibre/power line composite tether cable for remotely operated unmanned submersible 85−37026
optimization problem for groups of buried cables ampacity enlargement *(German)* 87−15274
overhead lines appls., conf., Liege, Belgium (May 1987) 88−11591
paper-insulated cables with Al sheath/neutral conductor, current rating standards 86−12444
paper-insulated lead-covered distrib. cables, current rating standards 86−12442
paper-polypropylene-paper laminate insulation for power cables 87−78142
parallel cables without side paths, transient reactions, eigenvalueproblems *(German)* 86−6361
partial discharge location in power cables, instrument improvement 85−48588
partial discharge meas., noise suppression and reflection effect elimination 86−65720
partial discharge meas., open factory environment, cables rated at 6.6 kV to 132 kV 85−32254
partial discharge meas. system 86−70677
partial discharge meas. using optical fibre cable 85−32191
partial discharge tests on cables in industrial plants, noise suppression 85−32255
PD detect., location and charactn. in extruded dielectric power cables 88−30382
PE cables, operating experiences *(German)* 87−4393
PE insulated medium voltage cables, partial discharge measurement for fault detection *(German)* 85−15687
personnel earthing cable failure characteristic prediction program 87−78193
petrochemical plant power distribution and instrumentation cable trends 86−44961
petrochemical plants, wire and cable update, 1985 86−45865
petroleum industry, long-length submarine cables, design, manufacture, testing, shipping and installation 86−39169
phase conductors in common nonmagnetic grounded sheath, forces *(Czech)* 86−32768
pipe-type cable splices, buried, thermal performance 86−51067
pipe-type power cables, surge propagation characts. 86−44973
plastic coated metal shielding tapes for power cables, ignition suppression and moisture control 87−71718
plastic insulated cables, very low freq. test technique *(German)* 88−48579
plastic insulated electric power cables, DC pretesting methods *(German)* 88−23493
plastic insulated power cables, HF characterisation 88−75187
plastics insulated HV cables, nondestructive location of small discharges 85−32167
plug-in splices, construction, testing and installation, for linear engine and power utility service *(German)* 85−21237
plugs for medium voltage networks, safety and reliability *(German)* 86−25624
polyetherurethane compounds for cable fittings in the petroleum and chemical industries *(German)* 88−18259
polyethylene, electrically stressed HV power cable insulation, thermally stimulated discharge current spectra 88−55013
polyethylene, growth of electric trees 86−70687
polyethylene cable insulation, ageing process, struct. and elec. props. changes 85−38516
polyethylene cable insulation, breakdown behaviour during AC loads *(German)* 85−4635
polyethylene cable insulation, struct. changes caused by thermal ageing 87−25720

power cables continued
polyethylene cable insulation containing water trees, dielec. response 85−1798
polyethylene degradation by irradiation and thermal ageing 86−28565
polyethylene extrusion-moulded connection box for 154 kV underground CV cable *(Japanese)* 86−51072
polyethylene insulated medium and HV cables, development and manufacture in Hungary *(Hungarian)* 85−21202
polyethylene insulation, treeing behaviour and detection 86−47917
polyethylene jackets for VPE-insulated medium voltage cables, stresses and behaviour *(German)* 86−6363
polyethylene power cables, insulation shrinkback, cable and splice load testing 85−59736
polyethylene resistivity, ageing by partial discharges 88−71858
polyethylene tape/oil cable insulating system subjected to elec. and thermal stress 88−68960
polyethylene-insulated cables, weathering props. 88−61936
polyimide taped air impregnated cable, partial discharge perform. assessment for radioactive environment 88−23497
polymer dielectric protection from mineral oil in cables 86−70685
polymer insulated power cable systems state-of-the-art Swiss technology 88−75180
polymer insulated power cables, life testing plant in Birrfeld *(French German)* 85−59742
polymer insulated power cables testing, HV laboratory *(French German)* 88−18448
polymer insulation of geophysical cables, elec. characts., storage conditions and operating factors effect *(Russian)* 85−64912
polymeric cables, discharge meas. using solid-state bipolar LF generator 88−75188
polymeric cables for 33 kV distrib. systems, conductors, insulation, moisture barriers 87−15286
polymeric insulated cables, terminations and jointing 87−21946
polymeric insulated cables with pre-moulded connectors, appl. in HV electric railway distrib. systems 88−5980
polymeric insulated HV cables, partial discharge tests using 3-phase coupling unit 88−17166
polymeric insulated power cables, failure analysis 85−27071
polymeric insulated power cables, influence of water on service performance 87−15292
polymeric insulation, extruded, elec. ageing determ. using dielec. loss meas. 87−46271
polymeric insulation, water tree growth appl. of instrumental neutron activation analysis 88−13624
polymeric power cable insulation, dielectric ageing in wet locations 87−15296
polymeric-insulated medium-voltage cables, service experience 88−23515
polypropylene laminated paper and applicability to EHV UHV underground cables 86−70692
polypropylene laminated paper oil-filled cables, EHV, development 86−70684
porcelain rod insulators of multiple cable systems, dynamic stress capacity evaluation *(German)* 85−38534
portable test apparatus power for power cable lines *(Russian)* 86−6368
potential and current distribution along an underground conductor earthed at the end points 87−57653
power station cable fire protection and prevention 86−51451
power station cable inflammability standards revision *(Italian)* 86−44984
power supply systems, stochastic model of electrical loads *(Russian)* 88−30247
practise and trends in evaluating, rising, specifying and installing, in petrochemical plants 85−15604
pre-moulded rubber sleeve for extruded insulation cables of 60 to 275 kV 88−42882
pre-threaded conductors, appl. for building installations *(Italian)* 88−68921
prefabricated joints and terminations for 90 to 150 kV cables with polyethylene insulation 87−15361
pressurised dry N_2 for moisture removal in underground cable purging 86−32773
primary voltage cable terminations, development of insulating materials with high dielectric strength 85−21243
production in Germany, cable laying and connecting improvements, reliability *(German)* 85−43609
protection against fires, w.r.t. Czechoslovak standards *(Czech)* 88−23501
protection from rodent attack using microcapsulated cycloheximide *(Japanese)* 87−78179
public supply cable laying, requirements and construction company cooperation *(German)* 86−44998
pulling forces, friction and rigidity anal. in power cable laying *(Russian)* 87−35667
pulse power supply cables, development, terminations and appl. 85−59735
PVC and XLPE cables for LV appls., comparison 88−55019
PVC cable systems, jointing and cable faults 88−36868
PVC cable-ducting in electrical installations *(Italian)* 88−42876
PVC insulated distrib. cable, electric protection system for tracking troubles 87−42482
PVC-Sb_2O_3 flame retardant system, thermal anal. 86−70690
radial distribution system planning, optimal conductor selection 88−54957
radial distributions feeders optimal conductor cross-sections determ. 85−59668
radial-flow type internally oil-cooled oil-filled cable develop. 88−55002
radiation and flame resistant condensate additive *(Japanese)* 86−6366
radio and TV interference voltage contribution of 345 kV line 86−29427
radio interference caused by HV equipment, metering techniques *(Spanish)* 87−68813
rapid transit system, cable system design, reliability optimisation using fuzzy uniform-cost algorithm 88−49231
RAPS-2 power station, India, report on fire incident, future protection recommendations 88−42909
reaction to fires, Swiss and international standards *(French, German)* 88−68950
recent developments in power cables in South Africa 86−39158
reduction conductor conduits, safety eval. using voltage reduction factor *(German)* 88−36851
redundant power and communications on a single cable 87−76521
reliability testing using different indicators *(Rumanian)* 87−50805
reradiation from power lines, initial assessment 86−29426
residential area optimal reticulation system, optimal sizing of cables, transformers and substations 87−42446
resin encapsulated joints for 11 kV paper insulated cable systems 87−15347

power cables continued
resins for cable jointing, 3M-supplier of resin cable joints, recent develop. 87−42511
resistance determination during short-cct. current heating *(Russian)* 88−48575
resonance testing unit, construction and operation *(German)* 88−10861
rubber termination and joints for cables up to 36 kV 87−15348
rural underground distribution systems, primary cable design 86−39170
SAR for surveying buried pipes and cables *(Japanese)* 88−60251
scattering of radio signals by power lines 88−58841
Scilly Isles, submarine cable link between islands 88−61909
screen temp. determ. w.r.t. different successive layers 87−15281
secondary protectors to suppress noise-to-ground and fault induced voltages 85−47389
security and economy of overhead lines and cables *(Hungarian)* 88−17177
self-cooled cables, thermal interferences effect *(German)* 88−23503
self-cooled power cables using rear-drive *(German)* 87−35638
semicrystalline dielectric cable insulation, differential scanning calorimetry for analysis 86−62314
separable cable connectors, for MV cable systems, state-of-the-art in West Germany *(German)* 85−48603
separable medium voltage cable connectors, state of art in FRG 85−59798
separate power cable as element of power line carrier coupling filter 87−57652
separator coupling for PEX cables, 132 kV *(Danish)* 87−15332
service-aged, water-treed, XLPE insulated URD cables, voltage breakdown strength, thermal load effects 87−50812
SF_6 insulated overhead power cables, thermal transient simulation method 88−55041
Shanghai 23 kV underground cable network, reformation 88−23468
sheath circulating losses, sensitivity anal. 85−48593
Shinkansen feeder cable fault detection relay operation *(Japanese)* 86−51978
short circuit capacities of cables with solid insulation 88−61931
silane crosslinked insulation for medium-voltage power cables 85−15605
single conductor lines of independent power systems, induced voltage calc. *(Russian)* 87−4401
single core 50 kV underwater Cu cables, insulation and laying method *(German)* 87−4384
single-conductor cable sheath bonding, voltage and current calc., IEEE guide 88−23512
single-conductor cable with metallic sheath in homogeneous ground, parameter calculation 85−43604
single-core, with dielec. contour deform. and void, elec. field patterns 86−70674
sinusoidal electrodes for gas-insulated flexible cable *(Japanese)* 86−12439
sizing microcomputer program 86−32726
SLAC linear collider, modulator system and power supply 87−51359
SLICE cable information systems for power plant design 87−71953
soil electrical props. effect on surge performance of buried long cables 88−23504
solar photovoltaic energy system, optimal power flow control 88−5885
solid dielectric insulated power cables, maximum safe pulling length determination 85−21241
solid insulation cable manufacture, polyethylene crosslinking methods 88−36848
South Holland 150 kV underground XLPE cable transmission system *(Dutch)* 87−50809
Soviet Union's cable industry, development trends, improvements in technology 85−49226
Soviet Union's cable industry, trends in material resources conservation 85−49227
splice modules for underground 15 kV cable network 87−15336
splices, power cables and terminations reliability study 86−70668
static VAr compensators, optimal control for power line loss minimisation 88−68766
Statue of Liberty restoration, power distribution system 86−61127
steel armouring, effects on reduction factor *(Czech)* 85−21234
steel wire armour cable, earth fault impedance 86−12441
stochastic dimensioning using thermal limiting load capacity criterion *(German)* 86−18823
stranding and sheathing in single operation 86−25603
stranding machine efficiency improvement 88−55047
submarine oil-filled 132 kV cable installation in Malaysia 88−69042
submarine power cables, types, manufacture and laying, Norway 88−68954
submarine power transmission system, cable selection methodology 86−39162
substation, underground, urban, 230 kV electrical design 87−35978
substation maintenance needs, in-house and contract alternatives 85−65304
substation reliability anal. model including overload effects 88−11337
SUNFLON 200 fluorinated polymer insulated flexible wires, H grade *(Japanese)* 88−68953
superconducting cables for power transmission *(Polish)* 85−59750
superconductivity, appls. to power systems *(German)* 88−26738
supertension cables for HVDC power transmission, R&D projects 88−54974
supertension cross linked polyethylene cable manufacture 85−27067
supertension power cables for HV power transmission, state-of-the-art technology 88−54968
supervisory system for high tension cable fault indication *(Japanese)* 87−50883
supply system power cables, insulation and sheathing *(German)* 87−42475
swellable nonwoven tapes for longitudinally watertight cables 88−75177
synthetic cables with insulated screens, short-circuit impedance *(Dutch)* 86−12434
synthetic extruded cable reliability, watertreeing and countermeasures *(Dutch)* 87−9168
synthetic insulation, structural and physical properties *(French)* 85−15645
synthetic insulation for power cables, 63-400 kV 86−70682
synthetic insulations, mechanical, electrical, and physical props. *(French)* 85−27065
synthetic medium voltage cables, FGH tests, interim report *(German)* 87−4398
synthetic medium-voltage cable, Netherlands standard *(Dutch)* 87−9172
synthetic medium-voltage cable reliability improvements *(Dutch)* 87−9171
synthetically insulated, developments *(French)* 85−4637
synthetically insulated, properties and application limits *(French)* 85−53333
synthetically insulated MV cable, testing with resonance test units, construction and dimensioning *(German)* 87−50806

power cables continued
technology and development prospects 86−32762
telecommunication earth and 20 kV cable laying in marsh, polyethylene outer jacket tolerance *(German)* 87−21959
telephone offices, power cabling costs reduction 86−25582
temperature evolution in core of high-voltage elec. cable 85−53334
temperature meas. by fibre-optic sensors *(French German)* 87−35224
temperature rise of cyclicly loaded power cables *(German)* 85−15608
tensile stresses and strain *(German)* 86−44976
termination rating computerised methods modified for thermal inertia 86−45005
terminations and splices reliability study 87−42479
test methods for partial discharge meas. on long cable lengths, IEC standard 85−32252
testing of power cable accessories, formulation of development and qualification tests 85−15606
thermal analysis and ampacity calcs., using probabilistic approach 85−9506
thermal capacity, temp. dependence of resistances losses, load curve shape *(German)* 86−65706
thermal cond. meas., transient method, use in transmission cable industry 88−68053
thermal conditions of cables housed in plastic pipes in free air *(Slovak)* 86−32770
thermal design, finite element method 86−56433
thermal field calc. using charge simulation and network anal. *(German)* 86−39159
thermal power plant, automatic computation algorithm for cable bundle determ. *(Rumanian)* 87−30350
thermal power plant cable bundles determ. by automatic computation algorithm 87−50981
thermal testing of AAShv 3×95-6 cable *(Russian)* 87−4385
thermal- and flame-resistant EPDM insulated cables, development and characterisation, for PWR nuclear power plants *(Japanese)* 85−43607
thermoplastic, zero halogen, low smoke, fire retardant cable compound technology 88−28624
three retardant an tree resistant synthetic insulation medium voltage cables 88−23513
three-phase pipe-sheathing systems, eddy currents and sheath temp. 85−27075
Tohoku Shinkansen express railway, power supply facilities using 30 kV XLPE coaxial cables *(Japanese)* 86−7241
Tohoku Shinkansen express railway, power transmission lines between Ueno and Ohmiya *(Japanese)* 86−7239
toxic hazard evaluation of plenum cables 86−70669
traction power supply system peak transit service level support capability evaluation 86−45766
transient heating during cyclic loading, FEA based on soil drying *(German)* 86−39153
transients, time-domain response functions anal. method 86−18822
transmission and distribution extruded dielectric cables, aging eval. 88−42859
transmission cable, conductor-cooled, fault tree anal. and long testing, West Berlin 86−51024
transmission cable effects of nuclear EMP 86−44945
transmission line, gas insulated, R and D, appl., Japan 86−51021
transmission line reliability when covered in ice *(Russian)* 88−36850
transmission line superconducting cables, operational test results 86−39171
transmission lines/cables, transient voltage reflections, anal. and protection 85−21198
transmitting capability of cables feeding synchronous motors 88−5672
tray cable flame testing, IEEE 383 test procedure variations 86−6374
tree retardant XLPE insulating materials for perform. improvement 88−55023
treeing in polymeric insulation of power cables, detection and anal. 88−55018
UHV XLPE cables, develop. of extruded and molded straight joint *(Japanese)* 87−30237
ultrasonic welding for reconditioning polymer cable insulation 87−15326
underground, thermal field calc. in cable trenches based on soil drying *(German)* 87−71690
underground 138 kV extruded dielectric cables, shield interrupt overvoltage study 85−21211
underground cable ampacities calc. using computer program 87−9178
underground cable development for hot water and sulphide immunity in geothermal environment *(Japanese)* 86−6365
underground cable direct water-cooling system using FRP pipes *(Japanese)* 86−51009
underground cable fault location using HV radar with thumping equipment 88−75185
underground cable laying in France using mechanical devices 85−59795
underground cable location using two-rod, extended remote rod, current loop and 60 Hz current trace methods 87−15277
underground cable waste heat recovery system *(Japanese)* 86−51008
underground cables, cathodic protection requirements estimation 86−65722
underground cables, ground fault current distribution anal. 87−30202
underground cables, laying methods, old and new, for urban, suburban and rural areas *(French)* 85−27089
underground cables, load carrying capacity determination using thermal properties analyser 85−21201
underground cables, pulling tensions, sidewall bearing pressures and friction factors 86−32774
underground cables, soil thermal stability expts. 87−57654
underground cables load capacities and temperatures during irreversible ground dryness *(German)* 85−53332
underground coal mining, temp. rise limits of transformers, motors and cables 88−24302
underground cooled high power conductor cable, transient heating *(German)* 86−18824
underground distribution cables and accessories selection 88−61932
underground oil insulated power cables, thermomech. anal. 88−55007
underground Pb and Al sheathed power cables, steel tape and galvanised steel wire armour 86−39157
underground power cable backfill thermal stability theory and field test 87−30206
underground power cable current carrying capability 88−42851
underground power cable fault location methods and systems *(Italian)* 86−56434
underground power cable installation practices in Hong Kong 88−55915
underground power cable rating factors, soil thermal resistivity 87−78146
power cables continued
underground power cable sheath corrosion protection and resistance monitoring *(German)* 88−54997
underground power cable systems, external thermal resistance coeffs. for ampacity eval. 87−35644
underground power cables, anal. of Fe loss *(Japanese)* 87−35650
underground power cables, cyclic temp. calc. and meas. 86−65713
underground power cables, heat and moisture flow in soil computation 88−23506
underground power cables, influence of moisture content in surrounding soil 86−56432
underground power cables, internally oil-cooled oil-filled cables 85−59730
underground power cables, parameters allowing for sheath-ground circuit transverse currents 87−35647
underground power cables, soil transient temp. anal. using PCs 88−61934
underground power cables, thermal interference from heat pipes and its prevention 87−15309
underground power cables, transient temp. calc. and meas. using Fourier integrals 86−65714
underground pressure-assisted power cables, oil leak location using hydraulic method 87−42477
underground residential distribution cable failure, life-cycle costs 88−42848
underground residential distribution system cable fault location devices 85−59674
underground residual distribution cable system design options and evaluation ratings 87−78130
underground rural distribution cables with gas flow drying 86−70667
underground rural distribution systems, cathodic protection, installation, maintenance and economics 86−65695
underground transmission cables, indirect trough cooling *(Japanese)* 86−32771
underground transmission power cables, HV and current transmission, cooling, insulation, power losses *(Japanese)* 86−65708
undersea cables, corrosion protection and correct design *(Norwegian)* 87−57648
underwater AC single-core armoured cables, return current and loss prediction 86−39155
unequally loaded with constant and cyclic current, heat transfer meas. 85−15611
unscreened separable cable connectors and accessories 10 kV to 36 kV 87−15351
urban and rural nonarmoured plastic-insulated cable laying and operation *(Hungarian)* 87−64173
URD, power cable problems and faults 86−32772
URD cables, failure associated problems, operations research appl. 88−10866
URD Cu concentric neutral wires, corrosion control, soil resistivity 86−51015
VHF/UHF EM noise from corona on power-line conductors 88−40589
Vienna 380 kV network, buried cable loading rel. to temp. pattern *(German)* 86−6369
Voitsberg 3 thermal power station, electrical wiring and cabling *(German)* 85−9730
voltage detectors for URD cable testing 88−5346
voltage rating determination from void discharge characts. for three-core cables 85−27070
Voltalit epoxy spacers in SF_6, HV cable insulation, DC conductivity obs. 86−18827
VPE cables, operating experiences *(German)* 87−4394
VPE medium voltage cable with water tree retarding insulation *(German)* 87−42473
VPE-insulated medium voltage cables, water sensitivity considerations *(German)* 86−6362
water cooled cables, optimisation *(German)* 86−44982
water cooled power cable using conductor current driven water pumps *(German)* 87−78137
water tree suppressive XLPE cable, develop. 86−39161
water-tree-retardant insulation, development, manufacture and performance test 87−15275
water-tree-retardant XLPE cables 85−38513
waterblocking tapes for water ingress protection, characts. 88−55021
waterswellable-nonwoven-plastic insulated cables, for power and telecommunications, longitudinal waterblocking performance 85−57906
Weibull's distribution, three parameter, solution appl. to plastic insulated cable, breakdown strength *(Slovak)* 87−50808
wide freq. range digital power meter for AC and DC lines *(Japanese)* 88−42194
wire shielded XLPE cable line, sheath surge test *(Japanese)* 86−6396
wire structure damage intensity calc. 86−51005
wires and cables, conf., Arlington, VA, USA (1987) 88−24358
wrapped cable trays, power cables rating, ampacity 88−55006
XLPE, cure method influence on sol content and physical structure 88−5359
XLPE, economic use of plastics for power cable production 87−50815
XLPE, high-field polarisation behaviour 88−30384
XLPE, hydrated and elec. stressed in power cable, dielec. behaviour 88−30383
XLPE, water trees grown needle water electrodes, characts. 86−70686
XLPE and EPR power cable insulation, water tree resistance 87−15291
XLPE and ethylene-propylene diene rubber, thermal response of cable insulation, shield and jacket materials aged at 130°C and above 87−30214
XLPE and HMWPE distribution cables, field reliability, analysis of utility data 85−4643
XLPE and HMWPE insulated HV distribution cable, field failure data anal. 85−59738
XLPE and paper insulated cables, factors influencing cable choice 87−15305
XLPE and polyethylene, high field conduction as a function of temperature in cable insulation for DC operation 87−30216
XLPE and polyethylene insulation, constant visualisation of water trees using scanning *(German)* 87−50837
XLPE cable, 10 kV jointing sleeves test results *(Dutch)* 85−64933
XLPE cable, AC breakdown strength improvement by adding N-vinyl carbazol 88−30385
XLPE cable, voltage endurance improvement by introduction of additives to semiconductive shield *(Japanese)* 85−38511
XLPE cable accessories 87−15360
XLPE cable application prospects *(Dutch)* 87−9176
XLPE cable insulation, partial discharges and elec. ageing 87−42481
XLPE cable insulation, single impulse voltage breakdown characts. at elevated temps. 87−15301

power cables continued
XLPE cable with added N-vinyl carbazole for improved voltage endurance *(Japanese)* 88−55008
XLPE cable with water-barrier layer, water immersion electric breakdown testing *(Japanese)* 86−12440
XLPE cables, 66 kV, design, installation and operation in Bahrain 87−15308
XLPE cables, DC withstand voltage, temp. depend. 86−70676
XLPE cables, effect of organic additives on tree suppression effect *(Japanese)* 87−78144
XLPE cables, field aged and containing water trees, impulse life tests 87−30212
XLPE cables, service aged, insulation characts. and breakdown strength 87−30209
XLPE cables, transient DC leakage currents, temp. and field depend. study 86−70681
XLPE cables and accessories for underground transmission lines rated 66 kV and above, developments 86−70680
XLPE cables cross-linking, on-line calcs. 87−50816
XLPE cables manuf. employing cross-linking process 85−33164
XLPE develops. for long life cables 87−78148
XLPE distribution cable system, elevated temp. operation 86−70672
XLPE HV cable insulation, elec. breakdown 87−15300
XLPE HV cable insulation, thermo-mechanical characts. 88−68964
XLPE HV cables, partial discharge location in manufactured lengths *(Czech)* 87−78138
XLPE HV cables and accessories, joints and termination 87−15357
XLPE insulated, water content meas., operating experience, Norway 86−51022
XLPE insulated cable reliability, experiences and user requirements *(Dutch)* 87−9170
XLPE insulated cables, electrical insulating materials for end couplings 87−9177
XLPE insulated cables, outer jacket damage localisation *(Dutch)* 86−51004
XLPE insulated cables, water treeing causes and countermeasures *(Japanese)* 85−4641
XLPE insulated cables combined-stress behavior 86−70688
XLPE insulated cables for long circuit connections in London, 66 and 132 kV 87−15307
XLPE insulated cables manufactured by vulcanizing system 88−36843
XLPE insulated distribution cables, AC breakdown testing 88−75181
XLPE insulated HV cable development and application *(Hungarian)* 87−64172
XLPE insulated HV cables, Cu screen resistance and protective system operation *(Dutch)* 87−9174
XLPE insulated HV cables, optimal partial discharge measuring systems *(German)* 87−57644
XLPE insulated HV cables, partial discharge meas. *(German)* 88−23500
XLPE insulated overhead power lines of 20 kV *(German)* 88−23520
XLPE insulated power cables, effect of water trees on life span 87−15293
XLPE insulated power cables, electric breakdown and long-term characts. *(Japanese)* 87−35651
XLPE insulated power cables, impulse breakdown strength improvement *(Japanese)* 88−68952
XLPE insulated power cables, influence of water trees on treeing breakdown phenomena 87−15295
XLPE insulated power cables, preparation required for correct cable jointing 88−23494
XLPE insulated underground cable for cryogenic operation, development 85−43618
XLPE insulated vinyl sheath cable for DC HV, breakdown under polarity reversal, space charge effect 87−30191
XLPE insulating material for HV cables, develop. trends 88−55024
XLPE insulation, treeing breakdown 86−44972
XLPE insulation develop. 86−51017
XLPE insulation develop. and trial, Netherlands 86−51018
XLPE medium voltage cable used in France, insulation ageing tests 86−70689
XLPE medium voltage cables, impulse breakdown testing at increased voltages 85−59749
XLPE miniature cables water tree degrad., effects of freq. and temp. 87−21945
XLPE or PE cables, short-circuit impedance nonlinearity due to Cu-wire screens 87−15282
XLPE power cable insulation, water tree retardant compounds 87−15294
XLPE power cable joints with SiC as stress relieving material 87−15349
XLPE power cables, 72 kV dry terminators 87−15359
XLPE power cables, thermal and mech. performance under overload conditions, Al screens 86−51019
XLPE power cables in service, microcomputer-based meas. system for in-situ diagnosis 86−70679
XLPE service aged cable insulation, oxidation and water tree formation 88−5361
XLPE underground power cables with large insulated strand conductor 87−21939
XLPE versus EPDM as insulation for distrib. cables, aging and water treeing tests 88−42857
XLPE water tree resistant insulated cables, comparative tests *(German)* 88−48578
XLPE-cables, Swedish experience 88−23516
XLPE-insulated, partial discharge testing; selection of criteria 85−48595
XLPE-insulated power cables, material design improvements 87−25707
Al and Cu power cables, effect of forced cooling on economic current densities *(Russian)* 87−30203
Al bunched and twisted conductor overhead cables for developing countries 86−12470
Al conductor steel reinforced for power transmission loss reduction *(Japanese)* 86−65715
Al corrugated laminate sheath for HV cables *(French)* 88−42881
Al sheathed cables, protective coverings, soil burial test *(Japanese)* 87−30204
Al sheathed oil-filled power cables, cooling characts. 87−30192
Al use in power cable technology 88−61938
Al-steel power cables, climatic effects on thermal stresses and current carrying capacity *(Czech)* 88−68945
MgO mineral insulated cable 87−57646
Nb_3Sn alloy strip element for superconducting AC cable, mechanical and electrical characts. 88−68965
Nb_3Sn superconducting power transmission system at Brookhaven, performance summary 87−9180

power cables continued
O_3 resistant materials for wire and cable 86−12436
Pb sheathed 5 kV underground cable, NDT of status level 87−35643
PbSnSb sheathing material for submarine power cables, fatigue life 88−55005
SF_6 compressed gas insulated cable, dielectric breakdown meas. 87−15303
SF_6 gas insulated transmission line switching transient meas. and analysis 87−64761
SF_6 gas pressurised cable and conduit system 88−36847
SF_6 insulated three phase cables with ferromagnetic enclosures, phase conductor forces *(German)* 86−70665
SF_6 insulated three-phase cables with ferromagnetic enclosures, loss calc. using Fourier series *(German)* 86−39160
SF_6 switchgear end sealing for 380 kV oil-filled cables *(German)* 86−6943
SiC cable system with built-in terminations 88−23514
ZnO sheath voltage limiter for power cables, laboratory tests and field experience 86−39165

power capacitors
3-phase synchronous motor drive, performance improvement by tertiary capacitor tuning 85−27677
6-10 kV industrial distributions networks, static compensator effects on arc short circuit induced overvoltages *(Russian)* 85−27104
50 kJ repetitively pulsed capacitor bank for pulsed power supplies 85−27591
50 kW 3-phase induction generator adaptive power factor controller 88−30701
63 and 90 kV networks of Electricite de France, capacitor banks *(French)* 88−69721
100 kVAr capacitors by ZEZ for compensation, filtration and commutation *(Czech)* 87−9698
110 kV overhead lines, series capacitors or transformers for network transmission capacity improvement *(German)* 86−12462
200 MVAr static compensation for power system stability, Hagby, Sweden 86−50888
345 kV switched capacitor banks in New York transmission system, transient network analyser study 86−51929
500 MW transmission line, improved transfer capability using series capacitor banks 87−78123
AC contactor kept switched on by pulsed discharge of pre-charged capacitor *(Russian)* 87−22662
AC electrified railway sections, use of power capacitors and filters *(Japanese)* 88−11437
advantages for reactive power compensation 87−50673
agricultural motor and system power factor improvement capacitors 86−7353
all-film capacitors for commutation applications 87−58259
all-film power capacitor endurance eval. *(French)* 88−69663
all-film power capacitor with folded electrode foil, elec. properties and reliability 87−36089
alternative, cost effective applications of power factor correction 88−30324
anal. of power factor correction capacitors 85−43560
arc welding current pulsation with capacitive accumulator 87−43688
asynchronous generators, capacitor excited, reactive current overload capacity *(German)* 86−56750
automated capacitor switching effects on distribution network 87−78096
automatic switching simulation in power system security analysis 86−32632
balancing capacitor optimal grading for large single-phase loads *(Chinese)* 86−51873
bilateral estimation of capacitance of toroidal capacitors *(Russian)* 88−37350
C-dump unipolar power convertor for variable reluctance motor drives, develop 86−45560
capacitor welding machines, charging circuit control device 88−31235
charging arrangement for storage capacitors of largesize 86−45538
circuit breaker protection shunt capacitors, synchronous closing control 86−6964
commutating, damping and inter-phase capacitors, mains-driven thyristor convertors, forced commutation appls. *(Russian)* 86−26128
commutation and filter capacitor develop. for power electronics 86−61702
compact capacitor powered railgun systems 87−26705
compensated multiphase power convertors, circuit and charact. computer aided anal. *(Russian)* 85−65321
compensator location long-distance 1150 kV power transmission lines using planning theory *(Russian)* 88−61928
controllable linear capacitive compensator, design and operation principles *(Russian)* 88−62840
cosine capacitors for nonsinusoidal voltage, reliability improvement *(Russian)* 87−43329
cost effective appls. of power factor correction using capacitors 87−78008
Crimean power supply complex, reactive power sources, compensating capacitors *(Russian)* 88−54840
DC electric drives with compensated convertor, staged switching of power capacitors 87−9890
diagnostic methods 87−36087
dielectric properties of power capacitors with synthetic film and non-PCB fluid *(Polish)* 85−39164
dielectric system parameters for power capacitors for advanced appls. 85−16182
dielectric systems, accelerated life testing 87−72355
distorted bus voltages, power factor correction, capacitor optimisation 88−23247
distribution line losses reduction by capacitor placement using VARSITI computer program 87−57633
distribution line optimal capacitor placement using feeder reactive current profile 88−48560
distribution networks, capacitor control techniques and settings, overview 86−39135
distribution networks, compensating capacitors, optimal placement planning *(Chinese)* 88−48550
distribution system line loss reduction throughenhanced capacitor location techniques 86−51038
distribution systems, capacitor bank switching, digital simulation and field meas. of transients 85−64898
dry type power capacitors utilising polypropylene film *(French)* 86−51874
dry-type and nonchlorinated fluids to replace PCB insulation *(French)* 88−5816
EDF network, capacitors for voltage control and losses reduction *(French)* 88−68745
EHV series capacitor overvoltage protection using metal oxide varistors testing procedures 88−75884

power capacitors continued
electric drives, variable-frequency, for centrifugal pumps and fans, power factor considerations 85−27686
electric motors, capacitor in windings for static stability improvement *(Russian)* 86−66035
electrical equipment, effects of stochastically periodic harmonics 86−66152
electricity distribution component *(Swedish)* 88−17121
electrode shape anal. for constant field strength along boundary sections *(Russian)* 85−21774
energy discharge capacitors, effects of dV/dt in polypropylene insulation films 87−22684
energy management system for network feeder and capacitor control and circuit breaker monitoring 86−50913
energy storage capacitors, repetitive service, test techniques 85−44139
ESD simulator spark acceleration by charge injection capacitor 88−2477
expert systems and power system planning in developing countries, capacitor installations 88−68858
fault-current-limiter, shunt microprocessor controlled fault-current-limiter 87−30279
filter capacitors, optimum voltage anal. *(Russian)* 87−43328
filter compensation device, protection device meas. cct., transients study 87−9699
filtering, commutation and protection appls. in power conversion 87−64767
filtering and AC capacitor types and characteristics *(French)* 88−6648
fire protection measures *(German)* 85−54101
fixed capacitor/thyristor controlled reactors for static VAr compensation of 400 kV network 86−12908
fluid dielectrics for PCB replacement *(French)* 88−5747
flyback capacitor charging unit, losses eval. 88−75796
force-commutated HVDC inverters, series-capacitor and parallel-capacitor commutation circuits 86−6900
fundamental properties and applications 86−6962
gas-insulated, design, for more compact and competitive capacitors 85−21772
harmonics anal. in unbalanced system using three-phase bus impedance matrix 88−54873
HF high power capacitor design 85−32669
HF high-power capacitors, materials consideration 85−34218
high voltage capacitor low inductance, high energy density, units of different elements, breakdown and life tests *(Japanese)* 87−9697
high voltage capacitors for microwave ovens *(German)* 86−33577
HV, for economical reactive power compensation *(Czech)* 87−22680
HV, performance review 88−62552
HV, screening test on capacitor fluids, low temp. partial discharge props. 85−65412
HV AC generator, lightweight construction using variable capacitor and rotating Al discs *(German)* 86−51872
HV all-film power capacitors, development 85−60377
HV capacitor bank installations for industrial plants 85−53998
HV insulation, relationship between operating life and elec. strength *(Russian)* 85−64931
HV laboratory test circuits using special power capacitors *(Italian)* 85−39161
HV paper capacitor performance rel. to lead position and voltage distrib. 86−6961
HV power capacitors, develop., testing 88−62554
HV power factor correction capacitors, automatic in-circuit testing system 85−16183
HV shunt capacitors in New South Wales power system, review 87−43332
idle current compensation plant, design, power capacitor installation, LV networks *(German)* 88−30348
impregnated insulating systems, performance and reliability 86−68103
incipient failure detection by capacitance meas. 87−22683
Indian power system disturbances affecting power capacitors 86−6960
induction motors, saturated, with series capacitor on supply, starting transients 87−9559
industrial plants, capacitor selection for motors and power factor correction 85−44136
industrial power networks, reactive load distribution, arrangement of capacitors *(Russian)* 87−78098
industrial power system reactive power compensation using shunt power capacitors, voltage rating 88−10693
industry power factor improvement by correct choice of capacitor 87−43669
insulated pedestal-mounted, fault detection accuracy improvement *(Japanese)* 87−51421
insulation of power cables, power capacitors, generators, motors and power transformers 87−71685
insulation testing, high-speed partial discharge diagnostic system 88−60874
ISOKOND shunt capacitors of over 1 kV 87−22682
liquid askarel insulated equipment fire protection *(German)* 86−13425
liquid insulating materials for transformers and capacitors 87−25708
loss minimisation on distribution systems by shunt capacitor control 86−39136
LV capacitor banks using foil power capacitors for reactive power compensation *(German)* 85−39163
LV cosine capacitors, for reactive power compensation, joint development within Interelektro framework 85−44137
LV mains reactive power compensation *(German)* 85−27041
LV power capacitor protection by HRC fuse and pressure-operated membrane *(German)* 87−64765
LV power capacitors, self-healing from ABB 88−69661
mains hum suppression capacitors 88−1042
materials development, overview 87−36086
medium voltage, dielec. fluid characts. 85−55204
metallised capacitors, self-healing breakdowns, energy meas. 88−75886
metallised paper capacitors, accelerated ageing tests 88−75885
metallised polypropylene capacitors, safety considerations 85−60376
metallised polypropylene film dielectric power capacitors 86−61701
metallised polypropylene power capacitors, safety considerations *(Italian)* 85−39162
mine power systems, capacitor assignment based on electrical-cost optimisation 87−65027
multi-layered insulation structures, field grading 88−44920
MV distribution radial networks, optimal capacitive compensation of primary feeders *(Italian)* 87−78093
MV systems, 3-phase condensers, protection, phase correction equipment *(Italian)* 88−24114
MV/LV distribution systems, HV capacitor banks effects 88−17144
nonlinear dissipative turn-off snubber, optimum size 88−56439

power capacitors continued
nuclear plant power factor correction, technical problems, economic benefits 87−71872
oil impregnated EHV condenser bushings, thermal stability anal. 85−32204
optimal capacity and siting for reactive load compensation *(Spanish)* 86−6214
optimal power factor correction for nonsinusoidal power systems, identification method 85−43544
partial discharge diagnostic equipment with acoustic detector *(German)* 88−51049
partial discharge inception and extinction voltages 86−45628
partial discharges in capacitor insulation *(Russian)* 86−33576
perfluorocarbon-based capacitor technology, materials performance 85−40948
PF correction calculations, HV and LV techniques 85−64796
pole-top power-factor-improvement equipment evaluation 85−64928
polychlorinated biphenols in elec. engng., hazards disposal *(German)* 87−64653
polychlorinated biphenyl hazards, transformer/capacitor risk management model 87−50439
polychlorinated biphenyl hazards of electrical equipment *(German)* 87−18423
polychlorinated biphenyl risks from transformer and capacitor fires and spills 86−61572
polychlorinated biphenyl risks from transformer fires and capacitors 86−61571
polychlorinated biphenyl waste disposal manual revision 86−12879
polychlorinated biphenyls in electrical equipment *(German)* 87−22453
polychlorinated dibenzofurans and polychlorinated dibenzo-p-dioxins in transformers and capacitors 88−37281
polymer/liquid interfaces, transient liquid motion induced by charge injection, capacitor appl. 85−50789
polypropylene film-liquid insulation for HV power capacitors 86−42017
polypropylene films, compatibility with impregnants for power capacitor appls. 85−29391
polypropylene insulation, DC breakdown in high-temp. region 86−45627
porcelain bushing grinding and assembly in capacitor manufacture, robotic system 88−49103
power convertor circuits supplying electrotechnical plants, thyristors with damping capacitors *(Russian)* 85−44110
power factor correction condensers control, contactors use *(Italian)* 88−75859
power system components, effects of adjustable speed drive and power rectifier harmonics 85−15528
power system energy improvements using shunt capacitor banks 88−23310
power system reactive power compensation, capacitor bank selection and arrangement 85−38401
power system with turbogenerator, transmission line and infinite busbar, mathematical dynamics model 85−38450
power systems, optimal voltage and reactive power control *(Chinese)* 88−61807
power systems, reactance current compensation for energy and current reduction *(German)* 85−59624
protection, by internal fuses 85−21773
pulse and power capacitor test voltage criteria 87−64766
pulse discharge capacitors, low loss, high repetition rate, equivalent series resistance, calorimetric meas. 87−43331
pulse power capacitors, materials-related degradation phenomena 87−30886
pulse power supply cables, development, terminations and appl. 85−59735
pulsed power supplies, capacitor and inductor linking and pulse generation 85−39105
pyrolysis of transformer and capacitor organic insulation, trace combustion products 86−51701
radial distribution feeder systems, capacitive compensation using fixed and switched capacitors 86−6351
reactive current compensation, PCB condensers, DIN specifications *(German)* 88−36737
reactive power compensation, capacitor bank planning 86−6243
reactive power compensation, quadratic mathematical model *(Russian)* 85−59544
reactive power compensation using synchronous machines, shunt reactors and capacitors *(Chinese)* 87−50612
reactive power source siting in electric network, multiobjective optimisation algorithm 87−64105
RF shunt capacitors, design procedure 88−12642
rural distribution networks, power capacitor utilisation for economic power factor correction 85−15580
screening efficiency of capacitor plates *(Russian)* 85−65411
second generation all-film capacitors, power density 88−69664
self-excited induction generator steady-state analysis 87−43028
series capacitor compensation, resonant frequency problems and countermeasures 86−61120
shunt capacitor banks in substations, protection, IEEE guide 86−56933
shunt capacitor for leading reactive power in power systems 88−68796
shunt capacitors, optimal allocation by nonlinear programming 88−23269
shunt capacitors for industrial power systems, guidelines 86−39131
shunt capacitors over 1 kV, impregnants in insulation, dielectric props. 88−37351
shunt power capacitor installation appls. in power supply systems 86−56932
shunt power capacitors for AC power systems, full scale endurance testing 85−39160
single-phase capacitor-run induction motors with solid-steel rotor 87−43049
space power distribution systems, HV high power components 85−48382
stabilised parallel-series current inverter, improved capacitor utilisation 88−43273
static VAr and distortion compensators 88−48456
static VAr compensation, for 345 kV transmission lines, components, control 88−48509
static VAr compensator and series capacitor capabilities 86−65637
static VAr system for power system transmission capacity improvement 88−68747
substation capacitor bank testing using portable substation capacitor checker 85−39229
supervision of transformers, instrument transformers, and coupling condensers *(German)* 88−17684
supply circuit capacitor effects and transmission/distribution system design 86−51871
surge divertor and capacitor 3D elec. field calc. using integral eqns. 88−30412

power capacitors continued
switch on conditions and applicable switchgear choice for power capacitors 85−16181
switchgear station series capacitor characteristics and transmission capacity improvement *(Japanese)* 87−30879
switching effects on transformer transients, digital simulation 88−49025
synchronous machines, capacitor utilisation in excitation loop 86−51596
synthetic impregnating fluid type power capacitors for 27.5 kV railway network, operational tests *(Russian)* 86−26238
technological developments and manufacturing processes 86−71032
telephone lines inductive interference from power factor correction capacitors 85−42411
temperature field equalisation technique 85−49059
testing and service experiences on high voltage power capacitors 88−69665
tests of dielectric materials for power capacitors 87−36088
thermal design of power capacitors 86−66221
thermal loading of power capacitors *(German)* 87−30885
three terminal capacitor with dissipation factor compensated to zero *(Japanese)* 87−22681
three-phase induction motor energy efficiency with single-phase supply and starting capacitor 87−43043
three-phase nonlinear power consumer, compensating capacitors, capacitance calc., algorithm *(Czech)* 88−48430
three-phase standard induction motor utilisation as capacitor self-excited induction generator 87−43039
three-phase unbalanced primary distribution feeders, losses reduction using shunt capacitors 87−78108
thyristor switched, theory and practice 86−12996
traction substations, compensation filter tuning effect on maximum capacitor voltage *(Russian)* 88−69648
transformer and capacitor insulating liquids, behaviour evaluation using partial discharge method 86−51718
transient and steady-state processes of capacitive energy stores with rectifier converters 87−9876
transient overvoltages effect on behaviour 86−6959
transmission lines, earthing of poles and balancing capacitors *(Spanish)* 87−71744
transmission lines with series capacitor banks, SF_6 bypass interrupter 87−71671
UGILEC C101, impregnant for HV power capacitors 85−29398
UHV capacitors with $SrTiO_3$ dielec. , developed by TDK, construction and characts. *(German)* 88−75883
VHV and HV network compensating reactors and capacitors location *(Spanish)* 86−50949
Al electrolytic capacitors for switched mode power supplies 86−40032
H_2O insulation, deionized, partial discharge and electric breakdown 87−18395
SF_6 self-extinguishing MV circuit breaker for industrial appls. 87−22667

power combiners (microwave) *see waveguide components*

power control

building energy management systems, BEMS, financial loss reduction in industrial plants 88−18103
CAD of industrial plant power consumption supervisory control system *(Russian)* 85−27834
calorimetry, digitally controlled heater power supply 85−49739
capacitive energy store and m-pulse rectifier system, operation and anal. *(Russian)* 86−39027
capacitive installation power control stages, transient minimisation by switching *(Russian)* 88−49168
carrier control of lighting facilities at Sangawa station, Japan *(Japanese)* 86−66470
cascade power transmission system with invertor power control *(Polish)* 87−42428
cellular mobile telephone, digital control of transmitter power 87−3099
cement works, power control of ball mills *(Czech)* 85−32868
centralised real power control, advance dispatch procedures 86−56378
CHP boiler control using power and frequency variations *(Russian)* 88−68724
CMOS DC-DC convertor cct., 60 V PWM remote power controller for ISDN appls. 88−56440
Coal and oil-fired generating units control 87−22119
commercial buildings, power consumption control using programmable bus technology *(German)* 86−6342
communication satellite, power subsystem using solar cell array and Ni-Cd battery 85−48418
complex process control by preprogrammed microelectronic computer *(German)* 86−70006
computer individual I/O sequence control 85−61082
computer power control using single-chip microcomputer 85−28351
constrained reactive implicit coupling in load flow optimal power flow, and system control 87−71578
consumption patterns optimisation in Czechoslovakia, w.r.t. 8th five-year plan *(Czech)* 87−42334
continuous casting plants using power transducer controlled electromagnetic channel *(German)* 85−10252
cross-regulating transformer, appls. in supply networks, control of active power *(Swedish)* 86−19342
current mirror devices and applications 87−31703
current mirror devices for power circuit current control and motor control 87−52377
current source inverter, twelve pulse, in DC link between wind plant and power grid 86−66008
current source inverter fed induction motor drive, microcomputer power factor angle control 88−11420
current source inverter induction motor drive, microprocessor control 86−66398
current source invertor fed induction motor drive with power factor control, microprocessor-based system 87−31029
Czechoslovak automated power system control development *(Czech)* 87−35553
DC source liquid metal power regulator, reliability factor *(Russian)* 86−39941
decoupled power system state estimation based on the pseudoinverse algorithm 88−23374
department store energy management by load cycling 86−19529
development history and marine systems appl. of power management systems 88−37705
digital power controller handling 1 kW 86−56931
digital simulator for minicomputer based controller for power plant frequency and power control *(Russian)* 87−4469
dimmer lighting control system using VDU electronic crossbar *(Japanese)* 87−64959
DINOV 2 digital indicator of the quarter-hourly maximum *(Czech)* 87−49796
disc file actuator, power dissipation minimisation 88−64930
distributed power processing concepts using on-card power conversion for avionic equipment 87−77794
distribution feeder loads forecasting, modelling, volt/VAr control 88−48558
distribution network optimum voltage and wattless power control *(Russian)* 86−39116
distribution networks, capacitor control techniques and settings, overview 86−39135
distribution networks, static var compensation for performance improvement 85−15594
distribution networks optimal control of reactive power and voltage 87−71662
distribution networks with end-load and varying load condition, reactive power control 85−43592
distribution systems, volt/VAr control using shunt capacitors and voltage regulators 86−18808
distribution systems, volt/VAr control using shunt capacitors and voltage regulators, problem solutions 86−18809

power control continued
distribution systems, volt/VAr control using shunt capacitors and voltage regulators, numerical results 86−18810
distribution systems with end-load and fixed load condition, reactive power control 86−18801
double-fed inductive motor, reactive power control 87−58088
dual interval programming for reactive power control 86−70629
dual-element induction cooking unit using power MOSFETs 86−26418
Dutch Flevo 180 MW thermal power plant, power and voltage control loop modelling 87−4554
dynamic stability improvement, static VAr compensator design using MRAC system 88−23248
EDA 128 controller of power consumption *(Czech)* 88−17054
EL 20 industrial locomotives, with diesel driving system, construction *(German)* 85−16313
electric drives, SIMADYN D digital closed-/open-loop control system, hardware structure 87−16090
electric furnace power control using thyristors for steel heat treatment appls. 88−69948
electric locomotives, 212/243 series, power control and electronic control equipment *(German)* 85−60480
electric locomotives, Class S 499.2, for Czechoslovak State Railways, operation and control characts. 85−21876
electric power industry autonomous controller appls. 86−44852
electric power system automatic control of frequency and power, system response speed and stability *(Russian)* 87−30085
electric power system of Siberia, computerised frequency and active power control *(Russian)* 86−32660
electric vehicle controller, power regulation and regenerative braking 85−49181
electric vehicle induction motor drive, optimised microelectronic power control 86−61786
electric vehicle induction motor power control by PWM invertor with gate turn-off thyristors 85−65572
electric vehicle two-speed drive with electronic power controller *(French)* 85−65529
electrical power supervision system using computers 88−42792
electrical power system reactive power and harmonics reduction using self commutated AC/DC converters *(German)* 87−51357
electrical power system stabilization using superconducting magnet energy storage 86−44899
electricity demand supervisory control system with peak cut fn., demand contract *(Japanese)* 87−50882
electricity supply industry, consumer power regulation effectiveness *(Russian)* 86−32657
electron beam heat treatment, precision, computerised control 85−39384
electron beam power density distribution control 86−40325
electron gun beam deflection, power control and industrial use *(German)* 88−7247
electronic control of power flow, power convertors, state-of-the-art, future trends 88−69522
electronic power control principles 88−70514
electrophotographic machines, power and control system optimisation *(Russian)* 87−16215
electrostatic precipitator power conservation by field corona optimisation 86−61395
electrostatic precipitator power supply minimisation using energy management system 85−19101
emergency power control by automatic transfer switching 86−6302
energy accounting and control systems in industry, cost-advantage anal. 87−43868
energy conservation techniques for lighting loads 88−31181
energy consumption control using ripple control system *(Czech)* 88−23307
energy consumption in restaurants 86−19530
energy controllers isolated from mains, cct. using SGS L120 or L121 ICs 85−54637
energy demand control in power systems, comparison of control methods *(Russian)* 87−15184
energy management, water volume forecast using autoregressive model *(Japanese)* 86−39039
energy management system for Niagara Mohawk Power Corporation 87−15157
energy optimization by means of centrally managed technique *(German)* 88−30283
energy plant, optimal operation calc., basis factorisation method appl. *(Japanese)* 85−4561
energy saving for motors in British industry 87−15634
ESM 1 electronic monitor of power maximum *(Czech)* 86−51156
European wind turbine development trends 87−15619
expert system assisting decision-making ofreactive power/voltage control 86−50797
expert system for decision making of reactive power/voltage control 87−4265
flywheel energy storage using resulting angular momentum for spacecraft attitude control 87−42055
French National Control Center for power system control, developments 87−30053
frequency correction equipment synthesis for power control system in power generating unit *(Russian)* 87−57871
futuristic housing estate, all-electric, energy consumption study *(Dutch)* 88−18104
glass industry power factor correction for thyristor power controllers 88−43513
glass melter for nuclear waste, power supply and controls 87−15868
glass melting electric forehearths, power and temperature control 85−27904
glass melting for nuclear waste vessels, power supply and control 86−7302
Growian 1 wind energy convertor, speed and power control 85−53638
GTO and optically fired thyristors appl. *(Italian)* 87−67246
GTO PWM inverters, parallel running and power balancing control 88−5759
GTO thyristor converters for reactive power control 88−5784
GTO thyristors, high current, power conversion improvements 85−33671
HF resonant converters, power transfer control methods 87−51368
high-head turbine emergency power control by water diversion *(Russian)* 86−6596
high-speed reluctance machines, axial air-gap type, SCR convertor expt. study 86−39752
HV IC technology for power control and conditioning 87−1658
HVDC convertor station, reactive power and voltage control 87−30751
HVDC systems, power modulation controls and computer simulation 86−50973
HVDC transmission and BWR nuclear power plant, hybrid control system develop. 86−65677
hybrid convertor for HVDC appls., real and reactive power control 88−17727
hybrid elec. car optimisation and control 88−11446
hydroelectric power plants, multimachine, reactive power control and power system connection *(Croatian)* 87−22159
hydroelectric power plants with microprocessor control, processes and regulator parameter selection, mathematical modelling *(Croatian)* 87−22158
hydroelectric power station active power and electrohydraulic speed regulation *(Russian)* 86−33184
hydroelectric power station at Bratskaya, grouped power and frequency control system *(Russian)* 86−33185
IF modulated radiometer sensitivity increase, by heterodyne power control 87−56702
induction crucible furnaces, microcomputer control 87−22905
induction furnaces, power regulation system design for increased efficiency 88−37751
induction motor drive, current source GTO invertor-fed, anal. 87−30567
induction motors, energy-saving controller 85−53691
induction motors, power factor controllers, markets and performance 85−65407
induction motors, power factor controllers, markets and performance, laboratory tests 85−65409
induction motors, single phase, power controller development for efficiency improvement *(Korean)* 85−60198
industrial energy management systems design, case histories 86−7344
industrial energy saving by regulating reactive power and motor selection *(Spanish)* 88−48851
industrial lasers, power output control, calibration system *(Russian)* 86−36540
industrial locomotive, EL 20 series, power and electronic equipment 86−71095
industrial process supplies using regulating autotransformers 87−22502
initial power on reset circuit, design and operation 86−7941
Integral, power control device, design and appls. 88−30969
integrated CMOS logic and DMOS output, appl. 85−17155
intelligent digital firing controller for bridge connection power factor improvement 86−66381
intelligent single chip microcomputer-based power controller for real time appl. 88−49219
interconnected power networks, control algorithms for static VAr systems *(French)* 87−15197
interconnected power system load frequency-tie line power control 86−44854
interconnected power system of Europe, computerised control and meas. system *(German)* 87−15174
interconnected power systems, adaptable freq. and power equilibrium control structure *(Czech)* 87−57510
interconnected power systems, digital automatic control system for frequency and active power control *(Russian)* 86−18675
interconnected power systems, planning practices for voltage and reactive power control *(French, English)* 85−4541
interconnected power systems, real power control, sensitivity *(Russian)* 86−44837
interconnected power systems in USSR, digital control and limitation of power flows *(Russian)* 86−32659
invertors, fast response variable frequency, for position control of nuclear power station equipment 87−15912
IPSCON software package for power system security control, reactive power control and load dispatching *(Chinese)* 87−15148
ISDN S-interface, Am7936, Am7938 subscriber and exchange power controllers 85−61185
isolating and retaining bus information on extension units 87−4784
Iwasaki Computer Centre, cogeneration system, power, information system and safety control, operation *(Japanese)* 88−48782
junction isolated power IC's 87−1659
K-band reflection amplifier with levelled output power using EPROMS 87−24483
large-scale power system voltage and reactive power control 88−68783
laser radiated power regulation 87−68565
lighting control circuit 85−16423
lighting control for energy saving in small businesses 87−31071
lighting installation with energy control devices and systems 86−19596
linear induction motor driven transit system, operating experience and power controller 87−5060
LV distribution networks, power consumption guard device *(Czech)* 86−18893
LWR nuclear power stations, power control *(German)* 87−64296
magnet power control system for Tandem Mirror Experiment-Upgrade 85−5218
magnetic power controllers in voltage-mode resonant push-pull convertor, static characts. anal. *(Chinese)* 87−73310
magnetic thyristor reactive power regulator, design and operation 86−40028
magnetrons *(German)* 85−34429
management system, personal computer based 86−50923
market and laboratory tests of power factor controllers 85−65410
markets and performance of power factor controllers 85−65408
metallurgical industries, use of automated management systems in electric energy management 88−17042

multiple boiler/turbine plants, service life extension, case history 86−6584
multiprocessor-based UPS. design, implementation 88−75774
multiresonator klystron microwave transmitter, power control processes study 87−70193
Nelson River HVDC system with receiving end AC network disturbances, power control 86−50974
network constrained reactive power control using incremental reactive current model 86−70628
nuclear power plant, digital control unit for controlling triacs and thyristors *(Czech)* 88−13369
nuclear power plant control *(Hungarian)* 85−53396
nuclear reactor power control using fuzzy logic 86−6548
offshore power systems, smart motor controllers for peak starting kVA demand control 88−17536
one-phase dual convertor for two-quadrant power control of supercond. magnets 85−60310
optical fibre appls. in power distributors *(Danish)* 88−35334
optical sweep oscillator, power level controlled, using GaAs semiconductor laser 88−20704
optimal control of voltage and reactive power of power system 87−71580
optimal power flow by guiding search direction *(Chinese)* 87−21839
optimal power flow calc., modified Newton method using quadratic approximate power flow 86−33028
optimization of active and reactive power in power systems *(Czech)* 87−57472
opto-isolator as analogue controller for power control 88−33876
optoelectromagnetics, microwave appls. 86−8449
packet switching network system for power control at Tokyo Electric Power Co. Inc. *(Japanese)* 87−64084
parallel inverters, digital simulation 85−49007
parallel resonant converter, bidirectional power flow control 88−11298
parallel resonant converter, bidirectional power flow control 86−45566
parametric transformer, variable-voltage, using bridge-connected magnetic circuit, application as DC power stabiliser 85−27467
phase controlled rectifier, digital method for power control 86−45535
phase-shifting transformers for network power flow control *(Russian)* 87−30034
phase-splitter, TLE 3102, for small AC motor speed control *(German)* 87−65813
photovoltaic pump powered by asynchronous machine, optimal control *(French)* 87−36122
power demand control for power saving in Japanese National Railways Nagano Factory *(Japanese)* 86−6855
power diode stabilizer device 87−59860
power factor correction for thyristor equipment in the glass industry 87−43714
power flow convergence control using generalized least-power type theorem 88−30262
power plant automatic frequency and active-power control algorithms 87−71764
power pool loads, unplanned, optimal control *(Russian)* 86−65625
power station power overflow control along transmission lines, frequency and active power control *(Russian)* 88−17233
power system and power plant control conf., Beijing, China (Aug. 1986) 87−65085
power system and power station control, operational technology study *(Japanese)* 86−70574
power system computer control, load distribution research project at Athens, Tennessee 86−65648
power system control, frequency and power regulation to reduce power failures *(Danish)* 85−26968
power system control, generalised gradient method with second order information for optimal power flows 87−4312
power system control, optimal power flow in energy management systems 87−4311
power system damping enhancement by two-axis supplementary control of synchronous generators 85−48535
power system damping using shunt VAr compensators 86−44903
power system dynamic behaviour, influence of turbine control *(German)* 85−15491
power system monitoring and control, conf., Durham, UK (1986) 86−66553
power system optimal control, dynamic stability anal. of emergency turbine control 85−43522
power system oscillations damping using static var compensators 85−59601
power system power control, BECOS 10 Plus control system, operation and appl. 86−70571
power system reactive load and reserve calculation in real time computer control system 88−10769
power system reactive power control and management, textured computational modelling 85−59614
power system reactive power imbalance, reactive power and voltage control 86−61035
power system real-time voltage VA monitoring, control, reactive power control and communications strategies 86−70630
power system turbine power and generator excitation control during fault disturbances 88−54861
power systems, dynamic stabilisation by reactive power modulation 86−65617
power systems, generator voltage/VAr control using master station voltage controller 87−15159
power systems, interconnected, PF control based on deadbeat controller, multivariable structure system approach 87−71542
power systems, optimal reactive power control, linear approach *(Chinese)* 88−61803
power systems, optimal voltage and reactive power control *(Chinese)* 88−61807
power control continued
power systems, power consumption regulation effects on USSR national economy *(Russian)* 85−43553
power systems, static compensation form voltage and reactive power regulation *(Croatian)* 88−5235
power systems, static devices for variable reactive power control andload compensation *(Italian)* 86−44868
power systems and long transmission lines, reactive power compensation 85−48518
programmable controllers in power control *(Rumanian)* 85−5543
programmable devices for reactive power compensation *(Russian)* 88−61800
programmable transformer coupled converter forhigh-power space applications 86−51758
protection for computer systems 88−17724
push-pull parallel resonant convertors with power controllers, static and dynamic characts. 87−22579
PWM HF resonant invertor using static induction transistors and thyristors, config., control strategy, appls. 88−49050
PWM HF resonant invertors using static induction transistors and thyristors, phase difference angle control mode strategy 87−73321
PWM inverter with modified pulse patterns for UPS, deadbeat control, algorithm 88−55446
PWM with 0 to 100% duty cycle, cct. 85−10990
PWR control using hierarchical method, power distrib. soln. 88−17314
radio links, centralised control of power resources 88−35363
rapid transit systems, GTO device appl. in power control ccts. 88−31129
reactive and active power control for voltage and thermal management computation 85−59615
reactive power balance anal. and control 86−6250
reactive power compensation and optimum control in power systems, models *(Russian)* 87−42325
reactive power compensator with active filter, control scheme *(German)* 86−70642
reactive power control, definition under nonsinusoidal voltage and current *(Chinese)* 87−15632
reactive power control, optimal, via loss minimization and voltage control 86−18702
reactive power control for real power loss minimisation using nonconventional LP algorithm 87−78014
reactive power controllers, effectiveness for power convertor bus of HVDC link 86−12329
reactive power transfer and voltage control in Polish national power system *(Polish)* 86−18687
real-power controller for large power pools, plant power delivery control *(Russian)* 88−61823
rectifier-invertor substations, digital control of reactive and active power 85−5198
relays and switches for security control and functional backups 88−19462
reliability improvement of power controllers 87−31325
resistive heating, time proportioning computer control 88−55714
ripple control transmitters for power transmission lines *(Czech)* 88−42824
satellite communications, uplink transmission power control scheme, feedback loop control system 86−64952
SCR electric heating power control microcomputer output interface design *(Chinese)* 88−62761
SCRs, GTOs and power transistors increase load capacity for power conversion 85−44068
secondary storage batteries, computerised management system for space vehicle appls. 87−22705
self-commutated inverter for fuel cell power plant 87−43228
self-controlled synchronous motor constant-horsepower control system performance 86−70891
semiconductor laser for optical fibre communication systems, simultaneous stabilization of frequency and output power 88−27186
semiconductor lasers, power control *(German)* 87−26398
sensors and controls development for steel industry 86−5013
servo-loop for power stabilisation of optically pumped far IR lasers *(Chinese)* 85−18983
sewage treatment plant at Makurazaki City, Shinko Electric supplied equipment *(Japanese)* 86−19690
short-wave amplifiers for plasma heating 86−57657
simultaneous sequential control for the reduction of the fundamental reactive power *(German)* 88−30242
single-phase induction motor control, integral-cycle switching approach 88−17598
single-phase induction motor integral-cycle switching controller, dynamic model 86−33401
single-phase PWM invertor, SIT, microprocessor-controlled, solar energy system appl. 86−51791
slip power control improvement for slip recovery drives 86−71089
slip recovery drive, KASKAD 8A, config. and operation 86−51949
smart houses, closed loop power control using microprocessors and telemetry 88−30359
SMARTMOS H-bridge for power control of bidirectional DC motor drives 88−62643
SMES, power conditioning circuits 88−75962
SMES, simultaneous real and reactive power control using asymmetrically controlled 6 pulse converter 88−43398
SMES AC coil application with PWM control 88−69719
solar cell array/AC distribution network connection, optimum power transfer using linear current control 85−5009
solar photovoltaic energy system, optimal power flow control 88−5885
solid state remote power controller for direct currentin hybrid technology *(French)* 86−51770
solid-state relay based AC power controller adapted to D/A converter *(Japanese)* 88−19234
solid-state switchgear technology advances for large space vehicle power systems 85−50084
space appl. of power electronics, review and projection 85−9350
spacecraft dynamic isotope power systems, electric power generation and conditioning 87−77797
spacecraft power systems, multi-MW, design and develop. issues 87−42147
spare power capacity, optimal control under power supply limitations, Cu smelting plant appl. *(Russian)* 88−11514
stage lighting. II with electronic control, construction project 86−26401
static compensator with reactor-thyristor stages, reactive power regulation problem, soln. *(Russian)* 85−5341
static reactive-power compensator controls for improved system stability 87−35533

power control continued
static VAr compensation, for 345 kV transmission lines, components, control 88−48509
static VAr compensator for transmission line loss minimisation 88−69005
static VAr compensator of AC system with HVDC installation, control modelling and simulation 86−50892
static VAr compensators for AC transmission appls. 85−38488
static VAr compensators for power system reactive power control 88−75105
static VAr compensators with computer control to reduce local generation costs 86−70595
steam plants power generation control using dual-mode control 85−27288
steel coil factory, real-time energy monitoring *(French)* 87−64081
steel smelting electric arc furnaces, power control system *(Russian)* 85−32801
streetcar power supply, microcomputer-based remote control *(Hungarian)* 87−72504
substation bus input reactive power control, appl. in power network perform. improvement *(Russian)* 87−78086
substation equipment for large buildings and factories *(Japanese)* 88−62545
substation protection, LP and L company DC power control system review 85−9534
substation reactive power and voltage control using microprocessor-based system 87−72217
substation voltage and reactive power compensation 87−72223
superconducting magnet energy storage system, GTO converter for instantaneous active and reactive power control 88−75959
superconducting magnet energy storage using GTO thyristor converters, simultaneous active and reactive power control 86−40178
superconducting magnetic energy storage system for transmission stabilisation, power control experiments 87−15266
superconducting turbogenerator with alternator, mech. power control effects on transient stability 87−51171
superconductive magnetic energy storage, real and reactive power control 88−31058
supply secondary regulation using saturable core magnetic amplifier *(French)* 88−11283
switched capacitor network, energy and power calc. *(Czech)* 86−14359
switched-mode converter harmonic-free terminal waveforms control using internal energy storage 87−22560
switched-mode power supply for CW YAG:Nd laser system 87−36032
switchgear heater power supplies, centralised control using relative humidity detectors *(Japanese)* 85−39101
synchronous motor reactive power control by Elektronika MC 2702 microprocessor *(Russian)* 88−55306
synchronous motors, unity power-factor controller, construction and expt. results 87−78639
synergic MIG welding, power source design and control 87−72815
system interconnection extra-to-plan load optimum control problems, operative dispatching 87−64049
Tamil Nadu Electricity Board reactive power and distrib. voltage control 88−36813
telecommunication and energy systems, conf., Rome, Italy (Mar. 1987) 88−39
telecommunication power supply with programmable logic control 88−30870
telephone exchange air conditioning, energy efficient control 87−20342
thermal power plant, 180 MW, modelling and control 85−53284
three phase UPS system, 500 kVA parallel redundant config. with independent power control *(Japanese)* 88−43289
three-turbogenerator system, protective control of excitation system, transients anal. *(Russian)* 87−64529
thyristor applications, electronic control within supply and load systems 86−12945
thyristor power controlling element TLS3.1 for elect. heating *(German)* 86−66164
tie lines, freq. and active power control synthesis using noniterative optimisation operators *(Russian)* 88−30303
total energy management for integrated pulp and paper mills 86−7343
traction diesel generators, excitation regulation anal. *(Russian)* 87−51551
transmission line RF exposure systems for animal expts., energy absorpt. rate control 87−50428
transmission network planning, reactive power considerations 86−12369
transmission network reactive power and voltage control *(Hungarian)* 87−50653
transmission network ripple control signal crosstalk reduction *(Czech)* 88−42825
transmission networks, AD-DC systems, reactive power-control to alleviate busbar voltage violations 85−32084
transmission networks, reactive power regulations optimisation using three phase representation 87−50664
transmission system reactive power and voltage control, bibliography 87−57541
TRISTAN AR steering magnet power supply control system 86−26143
tuned closed-input thyristor invertors, pulse-width regulation of output power 88−37292
turbine control equipment, active power automatic limitation *(Russian)* 87−64452
turbogenerator load feedback control tuning with allowance for turbine power-frequency control *(Chinese)* 86−39579
turboset feedback, optimum, in generating unit control system, simulation studies 88−37057
twelve-pulse hybrid power convertor 86−61647
unified power grid in USSR with power transfer control between subsystems *(Russian)* 87−50650
UPS, EMC design specifications and test results 88−30857
Uruguaiana frequency converter stationinterconnecting Brazilian and Argentine AC systems, control 86−26165
USSR Power Pool network power for control by phase shifting transformers 88−23419
USSR unified power systems, automatic freq. and active power control *(Russian)* 88−30284
utility-interactive photovoltaic power conditioners:effects of transformerless design and DC injection 85−53633
UV preionised excimer laser construction and performance 88−14103
V^+ to −5 V convertor, cct. 87−10647
VAr control for multiunit generating station power losses minimisation 87−78473
VIA I/O devices, power load control 86−8339
Volkingen power plant, automatic control system, equipment and design *(German)* 85−4871
voltage and reactive power control for power systems *(Chinese)* 85−15475
voltage and reactive power flow control in power systems *(Czech)* 87−57513
voltage source invertors, parallel operation 87−43230
voltage type PWM converter, power factor and DC voltage control 88−75751
voltage-fed MOSFET power supply with PWM power control and protection, HF induction heating appls. 87−78770
VVER 1000 water cooled reactors, boiler feed systems. automatic power control *(Russian)* 88−10966
VVR-SZM research reactor, dual-processor control system *(Hungarian)* 85−53453
warehouse, refrigerated, with computerised electric power control system *(Japanese)* 85−27820
wheelchair, feedback controller 88−62721
wideband power regulation system for Ar ion laser 87−18910
wind energy farm, synchronous generator with diode-bridge rectifier, electrical behaviour 86−66005
wind power system using an adaptive Sherbius inductionmachine 86−51536
wind turbine, microcomputer controlled, power optimisation 86−66007
wind turbine generators, 250 kW, power control systems 85−15949
wind-driven induction generation power output controller 87−72068
wind-driven slip-ring induction generator, automatic generation controller 85−5034
window coatings for efficient energy control 88−33842
WWER-1000 reactor, power distrib. control and safety during operation in load-following regime *(Russian)* 85−21387
Zeisk hydroelectric power station, automatic control of active power *(Russian)* 88−37078
CO_2 laser beam diagnostics and control 87−75225
He-Ne laser, power regulator for discharge current control 88−14247
He-Ne laser with transverse microwave discharge, power stabilisation system 88−51749

power conversion

filtering, commutation and protection appls. of power capacitors 87−64767
geothermal wellhead conversion system power cycle analysis with selected working fluids 86−12718
gyrators, time variable, for power processing 88−70910
HEXPAK, high power HEXFET module for control and power conversion appls. 87−52380
HF power conversion, present and future trends 88−75797
HF power conversion using transformer secondary-side resonance 86−66195
HF resonant oscillator in push-pull mode for DC to AC power conversion 86−66194
line-commutation convertor with series capacitors functioning with pulsating DC, intrinsic stability *(Polish)* 87−15846
magnetic frequency multiplier with core-type zero-phase-sequence cct., operating characts. 88−33551
microwave power conversion to DC power, novel device, appls. 85−16131
parametric transformer, power conversion device demonstrating the principles of parametric excitation 85−21712
phase-modulated resonant power conversion techniques for HF link inverters 86−45571
rectifiers, ultrafast recovery, switching capability testing under high di/dt conditions 87−30791
resonant convertors for power transfer control *(French)* 87−9644
resonant power conversion develops. book 88−75736
resonant switch concept, structures and performances 88−37339
semiconductor switching capabilities and characteristics *(German)* 87−16855
space appl., review and projection 85−9350
uninterruptible power supply systems, power conversion process improvements 85−15543

power convertors
see also cycloconvertors
1.4 MHz secondary-side quasi-resonant off-line DC-DC convertor 87−44575
1.5 kW AC-DC convertor with high efficiency and low interference *(French)* 86−51738
1 kW convertor, uninterrupted supply for PET-CBM 2001 computer *(Spanish)* 86−66157
1 MHz 23 W buck convertor, design 87−31721
1 MHz DC-DC convertor, EMC issues 87−33460
1 MHz direct base drive for power converters with HV bipolar transistors 88−69523
1 MHz offline power supplies, specific packaging solns. 88−30815
1 MHz power circuit with strict input/output ripple requirements, active filters 88−12200
1 MHz power circuits, active filters for required ripple requirements 87−17229
1 MHz power supplies, packaging 87−72312
1 MHz regulated DC-DC convertor as EMI source 87−31704
2 kV/3 kW boost convertor using three-transistor series compound switch 85−10026
2 MHz off-line hybridised quasi-resonant convertor for 300 V offline appl. 87−44571

power convertors continued
3, 5 and 10 kVA single phase UPS convertors for computers 88−30859
3 kW computer power system with 500 W DC-DC convertor boards 87−51378
3 kW SMR power convertors, perform. comparison 88−75722
3-phase, feeding series excited DC motor *(Portuguese)* 85−5106
3-phase AC drives for traction vehicles, invertor and convertor microprocessor control *(German)* 88−31071
3-phase AC motor drive using PWM-controlled GTO power convertor 88−31083
3-phase AC supply for passenger coaches, train-borne *(German)* 85−27734
3-phase AC-DC convertors anal. under unbalanced supply conditions 88−69493
3-phase AC-DC SPM convertor-fed DC series motor drive 88−24209
3-phase active filter for reactive power and harmonics compensation 87−22574
3-phase bridge convertor, charcts. anal. using two-stage filter-compensator *(Russian)* 85−60292
3-phase bridge convertor circuits anal. using space-phasor components *(German)* 85−44078
3-phase controlled convertor, conduction limits in inversion, application in DC motor drives 85−27528
3-phase induction motors, multiple converter-fed, perform. anal. using equiv. ccts. 88−48962
3-phase invertor/convertor, new PWM technique, for electric motor drives 85−39083
3-phase machines, convertor-fed, torque adjustment by direct-self-control *(German)* 87−35932
3-phase PWM frequency changer, rectifier-invertor type, optimum system design 85−32621
3-phase semiconvertor controlled separately excited DC motor 88−69411
3-phase sinusoidal PWM waveform generator, theory, operation and performance 85−27492
3-phase transformer-thyristor convertor of alternating voltage, EM process anal. *(Russian)* 88−55479
4 kW residential photovoltaic power conditioning system microcomputer control 85−32406
4-quadrant convertor, asymmetric, anal. and control, for supply DC current 85−32617
6-pulse bridge rectifier, with input filter, steady-state charcts. 85−32614
10 kW brushless permanent magnet servomotor, design and construction 87−64631
10 MHz DC/DC converters using power MOS technology *(French)* 86−7931
12 V to 12 V converter, design 88−44051
12-phase compensated convertor with resonance phenomena, EM processes *(Russian)* 88−55425
12-pulse convertor configuration, simplified, for reactive power control 85−65354
12-pulse convertor operating principles and performance *(German)* 86−39925
12-pulse reactive power compensator for power factor correction appls. 88−68780
14 MHz 100 W class-E DC-DC convertor with transformer coupling, design 87−31721
15 kW three-phase prototype series-resonant power converter, control concepts 88−55444
17 MW current source convertor drives for petrochemical industry compressors 88−24296
20 kHz, 5 kW static induction thyristor type HF link DC to DC converter 88−30825
20 kW MOSFET PWM invertors for AC drive appls. 88−75998
22 MHz DC/DC convertor, design and perform. study 88−55494
30 MW/50 MVA rotating traction converter for Lehrte substation of German Federal Railways *(German)* 86−6860
40 Hz grid-derived power supply for Broken Hill (NSW) mines 86−52096
50 Hz-60 Hz single stage conversion scheme for bidirectional power conversion 85−5174
50 MVA transformers for rotating convertor traction substations between Harburg and Lehrte *(German)* 86−6826
50 W, 1.5 MHz power supply cct., current mode IC controlled, development 87−31717
50 W PWM Cuk converter using integrated magnetics 88−75822
50 W zero-voltage switched multi-resonant power converter 88−75725
50/60 Hz machine convertors, synchronous/asynchronous and synchronous/synchronous *(Russian)* 88−55467
60 kW asymmetrical 4-quadrant power convertor with real-time fuzzy adaptive controller 88−30908
100 kHz resonant convertor using power MOSFETs 87−31714
100 kHz SMPS using an emitter driven Darlington transistor 87−51370
100 kWe Li-cooled nuclear reactor with Brayton power convertor for spacecraft 85−48424
100 V forward convertor power supply, flyback charcts. of ferrite power transformers 87−64723
100 W 14 MHz class E resonant DC/DC convertor 87−64721
100 W parallel loaded resonant power supply 86−66196
140 Mb/s optical waveguide link, remote power supply 86−61641
150 W capacitively coupled half-bridge convertor for current-mode control 87−44581
150 W on-board switching power convertor, EMI reduction 87−44577
200 kHz, 5 kW MOSFET invertor for induction heating appls. 86−12926
200 kVA GTO invertors, regenerative snubbers 88−75759
220 V mains, 500 kHz class-E convertor using cascoded BIMOS 86−7974
250 W 40 kHz resonant convertor power supply using resonating inductor 87−59175
300 to 600 kHz static HF convertor with power MOSFET *(German)* 88−24035
300 W 300 kHz current-mode convertor *(French)* 88−6646
350 W parallel resonant power convertor using RF transformers 88−75809
380/440 V AC medium power switch mode supplies, power stage optimisation 88−69526
400 Hz transformer and power electronics for $16^2/_3$ Hz high-speed locomotive 87−22861
400 kV HVDC convertor stations, design and RF operation 86−33550
450 KHz multi-kilowatt resonant power supply with phase-shifting regulation technique 88−11310
500 kHz two-switch forward resonant convertor topology, design 87−31718
580 kHz switching regulator using on-off control 88−11304
600 KHz 50 W offline single-ended transformer-coupled forward convertor, design 87−31721
power convertors continued
600 W phase shifted parallel DC to DC convertor, appl. in spacecraft SMPS 87−71253
600 W phase shifted parallel DC-to-DC convertors for spacecraft SMPS appls. 86−12115
700 W series-resonant power convertor, DC-DC or DC-AC 87−58192
2000 MW DC interconnection link between France and UK, French convertor station 86−50881
2000 MW HVDC Cross-Channel Link, convertors and overvoltage protection 88−68878
2000 MW HVDC cross-channel link, Les Mandarins power convertor station *(French)* 86−18724
2000 MW HVDC cross-channel link control system, convertor compatibility *(French)* 86−18723
2000 MW HVDC link between England and France, submarine cables and convertor station 87−42438
2000 MW HVDC link between England and France, convertor station compatibility 86−12321
AC and DC power transmission, IEE conf., London, England (Sept 1985) 86−12500
AC converter for solar electricity supplies *(German)* 88−69490
AC drives, application in transportation 85−16320
AC drives, converter fed, online PWM for microprocessor speed control 87−4981
AC drives, pulse modulation techniques of voltage employing feedback *(Russian)* 85−65472
AC drives, star-modulated variable-freq. types 87−78974
AC drives for public transportation systems, technological progress *(German)* 85−65504
AC electric locomotives, forced switching devices for traction convertors *(Russian)* 86−7264
aC line harmonics caused by three-phasehalf-controlled converters with DC motor load 86−39918
AC machine with concentrated winding for operation with static power convertor 85−9841
AC motor drives, GTO thyristor appls. *(Slovenian)* 86−19211
AC network power convertor, closed loop current control *(Czech)* 88−17117
AC power convertor, microprocessor controlled using GTO thyristors for selected harmonic elimination 88−49102
AC power distrib. system for US space station, 25 kW/25 kHz using split convertor concept 87−29883
AC power system static convertor, equivalent circuit *(Russian)* 86−26151
AC power system with thyristor converter and capacitor banks, harmonics injection, digital simulation 88−68756
AC power systems, HVDC convertors for voltage stability control 86−12371
AC supply current harmonics calc. from HVDC convertors, diakoptic approach 85−64886
AC supply for Technical Exploitation Centre *(Polish)* 88−43286
AC supply thyristor convertors *(Italian)* 87−23902
AC system overvoltages for Oklaunion and Walker County-STP HVDC projects 86−12370
AC to AC direct freq. conversion, microcomputer based method 86−66169
AC to DC converter with HF transformer isolation, sine wave generation 86−12937
AC to DC converters, power factor improvement using dual thyristor *(French)* 87−72235
AC to DC power conditioner drawing sinusoidal input current, digital proportional-integral control 87−22584
AC transmission networks, anal. of harmonics induced by HVDC convertors 85−48570
AC uninterruptible supply systems, using thyristor convertors *(German)* 85−9467
AC UPS, bang-bang control of converters 86−61625
AC vector control drives for paper-machine retro-fitting 86−7346
AC voltage control at HVDC power convertor terminals 85−44081
AC voltage convertors, transformer-switched single phase, energy charcts. *(Russian)* 85−65324
AC-DC, effect of aperture on testing continuous signals *(German)* 85−27496
AC-DC 12-pulse convertor, with unique connection of power transformers, for LV/high-current applications 85−44082
AC-DC 2-phase convertors under unbalanced supply conditions, harmonics calc. 87−43244
AC-DC 3-phase PWM convertor motor system, digital simulation using state space model 87−43243
AC-DC converter, industrial power systems induced harmonics minimisation 86−12934
AC-DC converter, PWM controlled, GTO thyristors for input-output improvement 88−75747
AC-DC convertor, forced commutated techniques 86−66181
AC-DC convertor with triple freq. link, power conversion processes *(Russian)* 86−8411
AC-DC convertors, modelling using average circuit method, and machine appls. 86−45586
AC-DC convertors for minimizing induced harmonics for power systems 88−17033
AC-DC convertors in power supply, harmonics 86−57648
AC-DC power convertor, thyristor phase control IC TCA 785 *(French)* 87−44530
